
#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, March 30, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, April 6, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—309-311 Bedford avenue, Brooklyn.

APPEARANCES—

For Appellant: Joseph Bilowitz.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Absent ..... 0

## THE RESOLUTION:

(1255-25-A)

WHEREAS, Joseph Bilowitz, owner, filed, December 5, 1925, an appeal from an order of the fire commissioner, affecting premises 309-11 Bedford avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 12, 1925, reads:

"1. Remove all benzine from the premises and discontinue the further storage of benzine on said premises for the reason that the storage and sale of volatile inflammable oil (benzine) is prohibited on Tenement House premises."

WHEREAS, the building is non-fireproof, three stories in height, 40 ft. by 67 ft. in area on 1st floor and 40 ft. by 2 ft. in area above. OCCUPIED: 1st story, south side, paint store, 2 persons; north side, dressmaker; occupied above as a tenement for four families; and

WHEREAS, appellant requested that he be permitted to store one drum of 50 gallons of benzine in brick one-story extension at the rear of the building, and contends that there is no heat in the extension; that the extension is lighted with electric light and that there are five fire pails, and proposes to install in the wall separating the extension from the store a standard automatic fire door.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

872-25-A.

APPELLANT—Joseph L. Burke, for Standard Oil Company, lessee.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—Southwest corner of Avenue U and East 56th street, Brooklyn.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Report of committee adopted; appeal denied.

## THE VOTE TO ADOPT REPORT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE VOTE TO GRANT—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Absent ..... 0

## THE RESOLUTION:

(792-25-A)

WHEREAS, Joseph L. Burke, for Standard Oil Company, lessee, filed, July 31, 1925, an appeal from a decision of the fire commissioner, affecting premises at the southwest corner of Avenue U and East 56th street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, dated July 31, 1925, reads:

"1. All storage tanks comprising or forming a part of an oil storage plant shall be buried so that the tops thereof shall be at least two feet below the grade as per Section 111, Subdivision 5 of Article 8 of Chapter 10, Code of Ordinances.

"2. No tank shall have a capacity greater than 100,000 gallons as per Section 111, Subdivision 5 of Article 8 of Chapter 5 of the Code of Ordinances. Appeal may be taken to the Board of Appeals."

and

WHEREAS, the proposed plant consists of three one-story fireproof buildings, 60 ft. by 90 ft., 112 ft. by 90 ft. and 45 ft. by 15 ft.; OCCUPIED as a bulk oil storage and marketing plant; the storage system consists of four tanks, each 30 ft. in diameter by 40 ft. high, for the storage of gasoline, kerosene and oils; each tank surrounded by dike walls enclosing volume to exceed the tank capacity by 50 per cent; the entire property fronts 350 ft. on Avenue U and 650 ft. along the bulkhead line of Mill Basin; and

WHEREAS, the appellant proposes to erect four storage tanks on grade, of 211,500 gallons capacity each; he claims, with the exception of a one-story vacant building, there are no other buildings within 800 ft. of the premises; that the installation will comply with the law in all other respects except as to capacity and burying; in addition a complete chemical extinguishing system of the fire foam type will be installed; that it is impossible to bury the tanks on account of the rising tide water; that the board has granted similar request in this locality; and

WHEREAS, the full board made an inspection of the premises under consideration and submitted a report recommending denial.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

872-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Wm. Cohen, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—241 Wythe avenue, Brooklyn.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(872-25-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for William Cohen, owner, filed, August 27, 1925, an appeal from an order of the fire commissioner, affecting premises 241 Wythe avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 27, 1925 (Order No. 78827-F) reads:

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 800 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basement, cellars and roofs), placed within main stairway enclosure.

# MINUTES

Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.”;

and

WHEREAS, the building is non-fireproof, three stories (39 ft.) in height, 200 ft. by 35 ft. and 126 ft., irregular, in depth, about 18,375 sq. ft. in area at 1st story and 7,475 sq. ft. above; OCCUPIED, manufacture of cans and the canning of honey; 1st story, 10 persons; 2nd story, 10 persons; 3rd story, 27 persons; and

WHEREAS, the appellant contends that the building is divided into areas: A, B, C, D and E; that the combined area of A, B, C and D equals 7,475 sq. ft.; that area E equals 10,900 sq. ft.; that the latter area is really a driveway or courtyard roofed over; that it would be difficult to maintain standpipes as there is no heat in such portion of the building.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the premises as now subdivided, and the present use and operation of the existing industry, shall remain substantially unchanged; that any horizontal openings shall be equipped with self-closing fireproof doors, and that the entire premises shall not be increased in height, area or dimension.

181-26-A.

APPELLANT—Philip J. Sinnott, for S. Kaplan & Company, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—64-66 Fifth avenue, Manhattan.

APPEARANCES—

For Appellant: Philip J. Sinnott and Mr. Kaufman.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied. Reopened and set for hearing April 6, 1926, at 2 p. m.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

THE VOTE TO REOPEN—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland and Guilfoyle..... 4

Negative: Chief Kenlon..... 1

Absent ..... 0

THE RESOLUTION:

(181-26-A)

WHEREAS, Philip J. Sinnott, for S. Kaplan & Company, Inc., owner, filed, March 2, 1926, an appeal from an order of the fire commissioner, affecting premises 64-66 Fifth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 17, 1926 (Order No. 11-A) reads:

“1. A wet automatic sprinkler system, installed as required by the Board of Standards and Appeals, to cover every square foot of the stage, dressing rooms and property room.

“2. Telegraphic communication with Fire Department Headquarters.”;

and

WHEREAS, the building is fireproof, nine stories (120 ft.) in height, 51 ft. 6¼ in. by 115 ft. and 125 ft., irregular, in depth, about 6,175 sq. ft. in area. OCCUPIED: Basement, 5 dressing rooms and boiler room; 1st story, auditorium, 284 seats; 2nd, 3rd and 4th stories, offices; 5th story, school; 6th story, school and 3 studio apartments; 7th, 8th and 9th stories, studio apartments; and

WHEREAS, the appellant contends that sprinkler systems are not required in theatres having less than 300 seats; that this theatre is located on the ground floor of a fireproof

building and provided with adequate exits; that the building is provided with a standpipe system, consisting of a gravity tank of 7,500 gallons capacity, located 20 ft. above the roof, which in turn is supplied by a 75 gallon per minute automatic pump; that the street main is 6 in. in diameter, fed both ways, minimum pressure is 45 pounds.

Resolved, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

A motion to reopen and reconsider was adopted and the hearing set for April 6, 1926, 2 p. m.

## BUILDING ZONE CASES.

845-25-BZ.

APPLICANT—John J. Dunnigan, for Walter Eveleth, owner.

THE RESOLUTION:

(1059-25-BZ)

WHEREAS, Eugene DeRosa, for Hamford Realty Corporation, owner, filed, October 26, 1925, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed building to be used as a theatre; premises west side of Jerome avenue, 100 ft. south of 190th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue and West Fordham road are in a business district, and Davidson avenue in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 26, 1925, reads:

"1. Erection of proposed theatre building in business district extending into residence district is contrary to Sec. 3 of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, one story and balcony (70 ft.) in height, having a frontage of 161 ft. on Jerome avenue and a depth of 114 ft. 1/2 in.; occupied as a theatre, auditorium seating 1,516 persons, balcony seating 914 persons; the westerly court and a portion of the southwest part of the theatre, approximately 80 ft. in length, extends for a distance of about 7 ft. into the residence district; and

WHEREAS, the board deemed that the applicant was entitled to relief under sections 7b and 21 of the building zone resolution, as the main portion of the premises is within the business district.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building shall not be erected within 12 ft. of the rear property line, and that there shall be no openings in the rear gable wall other than the emergency exits required by law; that the exterior face of the rear and gable wall shall be finished in light color face brick; the building to be constructed in accordance with section 25 of the code of ordinances; all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1225-25-BZ.

APPLICANT—William F. Doyle, for Harold J. Levine, owner.

SUBJECT—Application (re: decision of superintendent of buildings) under sections 7c and 21 of the building zone resolution, to permit in a residence district the erection of an apartment house with stores on the 1st story.

PREMISES AFFECTED—2636-2656 Ocean avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

## THE RESOLUTION:

(1225-25-BZ)

WHEREAS, William F. Doyle, for Harold J. Levine, owner, filed, November 24, 1925, an application, under the building zone resolution, to permit in a residence and business district the erection of an apartment house with stores on the 1st story; premises 2636-2656 Ocean avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Ocean avenue is in a residence district, and East 19th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 21, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 3.

"The erection of an apartment house with stores in a residential district.";

and

WHEREAS, the proposed building is of non-fireproof construction, four stories in height, with a frontage of 167 ft. 6¾ in. on Ocean avenue and 112 ft. 7¾ in. on Neck road; to be occupied as stores and apartment houses; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7c and 21 of the building zone resolution, due to the surrounding and abutting conditions.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the 1st story on the street front of Neck road of the proposed structure of conforming use, to be developed in conjunction with the erection and construction of the four (4) story apartment house; as to the use of retail stores, specifically prohibiting the use and conduct of any fish store, meat market or delicatessen store, *on condition* that the store use shall be separated from the apartment house use of the 1st story, by unpierced walls of approved masonry; that the Ocean avenue wall shall return on the Neck road front with a brick pier of not less than 16 in.; that there shall be no openings on the Ocean avenue front, from the corner store, other than two windows at the rear of the stores, the sills of which shall be not less than 6 ft. above the sidewalk level; that the entire plot otherwise shall be maintained for conforming residential use and occupancy; that there shall be no signs erected on the premises; any advertising to be restricted to fixed letters on the plate glass show windows of the store fronts; that there shall be no produce or merchandise exposed or displayed on the exterior of the building; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1038-25-BZ.

APPLICANT—Gardiner Conroy, for Fangusta Realty Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under sections 21 and 7e of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—South side of East New York avenue, 200 ft. east of Schenectady avenue (878-89 East New York avenue), Brooklyn.

## APPEARANCES—

For Applicant: John H. McCooey, Jr.

For Opposition: Andrew S. Derby, Maurice Biederman, Maurice Raidman, Thomas J. Kirk, Jacob M. Palmer.

ACTION OF BOARD—Application denied.

## THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners Connell, Holland and Chief Kenlon .....

Absent .....

## THE RESOLUTION:

(1038-25-BZ)

WHEREAS, Gardiner Conroy, for Fangusta Realty Corporation, owner, filed, October 9, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 878-892 East New York avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East New York avenue, Maple street and Schenectady avenue are all in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered September 2, 1925, reads:

"1. Occupancy being contrary to Zone Resolution (Art. II, Sec. 4, Subd. 15), application for above proposition is hereby denied. (Public garage for more than 5 cars in business district.)";

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 137 ft. 6 in. on East New York avenue and 77 ft. 6 in. on Maple street and a depth of 190 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application and it hereby is *denied*.

1079-25-BZ.

APPLICANT—Philip Freshman, for John DeAngelis, owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, and also a gasoline service station.

PREMISES AFFECTED—6418-6424 Fort Hamilton parkway, Brooklyn.

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1079-25-BZ)

WHEREAS, Philip Freshman, for John DeAngelo, owner, filed, October 22, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles, and also a gasoline service station; premises 6418-6424 Fort Hamilton parkway, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 65th street, 64th street and Fort Hamilton parkway are all in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered September 17, 1925, reads:

"1. Proposition is contrary to Zone Resolution and is hereby denied (gasoline station and public garage for more than five cars in a business district), Art. II, Sec. 4, Subdiv. 15.";

WHEREAS, the premises under appeal involves two plots, one on the corner of Fort Hamilton Parkway 60 ft. 11 $\frac{3}{4}$  in. frontage by 90 ft. 0 in. in depth and the plot on 65th street 80 ft. front by 99 ft. 9 in. and 115 ft. 0 in. irregular for the proposed uses of a gasoline selling station on the corner plot and a one-story non-fireproof public garage on the 65th street plot; and

WHEREAS, the full board as a committee of inspection visited the premises and submitted a report thereon; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution, only so far as the application for variation affects the erection of a garage on the 80 ft. plot at the rear of premises on 65th street, and that the proposed gasoline service station on the corner lot, 60 ft. 11 $\frac{3}{4}$  in. by 90 ft., be denied.

*Resolved*, that the board of standards and appeals denies the application for gasoline selling station on corner lot and does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the plot 80 ft. front by an irregular depth of 99 ft. 9 in. and 115 ft., beginning 90 ft. westerly from Ft. Hamilton parkway, *on condition* that the building shall be limited in height to a one-story structure; that the easterly and westerly gable walls shall be unpierced throughout their entire height and length; that the front elevation on 65th street shall be finished with face brick and architectural terra cotta or stone trimmings, any gasoline storage equipment installed shall be located at the westerly end of the proposed structure at the front of the building; there shall be no signs erected other than one projecting electric sign indicating the title of the garage; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

53-25-BZ.

APPLICANT—Herbert Martin, for Ambassador Hotel Corporation, owner.

SUBJECT—Application (re: order of superintendent of buildings) under section 21 of the building zone

resolution, to permit in a residence district the maintenance of a business use.

PREMISES AFFECTED—341-351 Park avenue, Manhattan.

## APPEARANCES—

For Applicant: Michael F. Dee.

For Opposition: Insp. Alex. McPhee, Insp. John Lewes of building department, Harry Baer, R. W. Gillette, James A. McCarthy, Duncan Harris and others.

ACTION OF BOARD—Application granted on condition.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(1153-25-BZ)

WHEREAS, Herbert Martin, for Ambassador Hotel, Inc., owner, filed, November 9, 1925, an application, under the building zone resolution, to permit in a residence district the maintenance of a business use; premises 341-351 Park avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue, 51st street and 52nd street are all in a residence district; and

WHEREAS, the order of the superintendent of buildings, rendered April 15, 1925, reads:

"You are hereby notified that the building situate on the front of the lot on the east side of Park Ave. commencing about 0 feet from the northeast corner of 51st St. and Park Ave., being a sub-bas. 17 story fireproof about 200 feet front, 200 feet rear, 179 feet deep, and 200 feet in height, and occupied as a hotel and known as Number 341-351 Park Ave. and located in a residence district in the Borough of Manhattan, in The City of New York, does not conform to section 3, Art. 2 of the BUILDING ZONE RESOLUTION of the Board of Estimate and Apportionment adopted July 25, 1916, in the respects noted below: In that of occupying the first floor as a broker's office and drug-gist, which use is a business and not an occupancy use customarily incident to the operation of a hotel.

"You are hereby directed to discontinue said use, in compliance with the requirements of the Building Zone Resolution.";

and

WHEREAS, the existing building is of fireproof construction, 18 stories and pent house in height, with a frontage of 200 ft. 10 in. and a depth of 38 ft. 4 in. and 179 ft. 1 in., irregular; to be occupied as drug store, broker's office and as hotel; and

WHEREAS, a certificate of occupancy now in force issued by the bureau of buildings included a store occupancy for a use presumably incidental to the operation of a hotel; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution in that the non-conforming use is an accessory to the conduct of a hotel.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the business use in the matter of the appeal before the board be restricted to a specific room on the 1st story, located at the extreme northerly end of the corridor of the hotel,

# MINUTES

the entrance to this business booth or store to be from the public corridor of the main entrance of the hotel only and shall be restricted to the use and occupancy of this single room as a retail pharmacy, and that the use of the mezzanine room directly over shall be restricted to the conduct of a brokerage office, for the accommodation and convenience of occupants and dwellers of this hotel; that there shall be no exterior signs exposed and no advertising permitted in the window; no outward display of signs or advertising, other than five (5) fixed metal letters on the exterior of the stone pier on the corner of 52nd street and Park avenue; and that the entire structure otherwise shall be confined to conforming uses as permitted in residential sections, and that the requirements of the building zone resolution shall be maintained in all other respects.

## AREAS FIXED.

(203-26-BZ)

The chairman presented and read a communication from Joseph Popkin, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 402 Osborn street, Brooklyn.

The following area was approved by the board:

Both sides of Osborn street from a point 100 ft. south of Riverdale avenue to a point 400 ft. north of proposed poultry slaughter house; also the premises at rear and for a distance of 50 ft. on either side of the side lot lines of the premises in question.

(6-26-BZ)

The chairman presented and read a communication from Frederick J. Flynn, requesting this board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 145-147 West 120th street, Manhattan.

The following area was approved by the board:

Both sides of West 120th street from St. Nicholas avenue to a point 100 ft. west of Manhattan avenue; the easterly side of Manhattan avenue from West 120th street to West 121st street and also the property at rear and for a distance of 50 ft. each side of the side lot lines of the premises in question.

(502-25-BZ)

The chairman presented and read a communication from Emil Guterman, requesting this board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 145-147 Astoria avenue, Flushing, Queens.

The following area was approved by the board:

Both sides of Astoria avenue from 2nd avenue to Goodrich street; both sides of Isabella place from Astoria avenue to a point 200 ft. southerly therefrom and also the property at rear and for a distance of 50 ft. on each side of the side lot lines of the premises in question.

## THE RESOLUTION:

(524-25-A)

WHEREAS, Edward P. Doyle, for Louis Schrag, owner, filed, May 20, 1925, an appeal from an order of the fire commissioner, affecting premises 134 West 23rd street, Manhattan; and  
WHEREAS, the order of the fire commissioner, No. 71584, dated February 9, 1925, reads:  
"Provide an approved gas shut-off valve, installed, arranged and equipped as provided for in the rules of the Board of Standards and Appeals, adopted January 11th, 1924. Said valve to be attached to the gas supply pipes on the inside of the building at a point where said pipes enter the building and before they reach the gas meters, which valve shall shut off the gas automatically when subjected to direct contact with fire and shall also be connected with a conspicuous and conveniently accessible control box at a place on the exterior of the building so arranged as to allow the gas supply to be shut off by the officers of the Fire Department immediately, when-

ever the necessity arises. Section 2-a, Chapter 12, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories and cellar in height, 18 ft. 9 in. by 98 ft. 9 in. in area. OCCUPIED: Cellar, stock, 3 persons; 1st story, store, 4 persons; 2nd story, tailor, 5 persons; 3rd story, furrier, 5 persons; 4th story, pleating, 5 persons; gas is used for heating and lighting purposes, the seven existing gas meters are from 3 to 10 lights capacity; and

WHEREAS, the appellant contends that the installation of a gas shut-off valve would not add to the safety of anyone in case of fire; that it is not his duty to protect anyone against gas until the gas becomes his property; that the regulation of the use of gas should be made by the Public Service Commission, which alone has jurisdiction.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and that the appeal be and it hereby is denied.

525-25-A.  
APPELLANT—Edward P. Doyle, for Emily McGuckin, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—146 West 23rd street, Manhattan.

WHEREAS, William Porter, for Mrs. Lillie R. Burling, owner, filed, May 21, 1925, an appeal from a decision of the fire commissioner, affecting premises 245 83rd street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered May 4, 1925, reads (Alt. Applic. No. 1739-23):

"4. Note on tank drawing, tank will be tested in presence of a Fire Department Representative and afterwards coated with a suitable rust resisting material.

"8. Note on plan: "Piping will be tested in presence of a Fire Department Representative.";

and

WHEREAS, the building is of frame construction, 21 stories in height, 25 ft. by 40 ft. in area; OCCUPIED as a private residence; and

WHEREAS, the appellant has installed a fuel oil heating system, consisting of a 500-gallon storage tank buried outside, a 55-gallon auxiliary tank inside, and a Nokol Automatic Oil Burner approved by the board under Cal. 107-24-SA; and

WHEREAS, this appeal was dismissed for lack of prosecution by the board December 22, 1925, and reopened by the board March 9, 1926; and

WHEREAS, the appellant, re: to Item 4, proposes to file a sworn statement with the fire department to the effect that the tank has undergone a shop test; re: to Item 8, contends that all piping is of wrought iron, known as standard; that otherwise the fuel oil installation conforms in all respects with the fuel oil rules.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 4, as to shop test and use of storage tank, *on condition* that the tank shall be enclosed in 12 in. of cement concrete, buried below ground in accordance with the fuel oil rules, and that a certificate of factory test shall be filed with the fire commissioner; and *granted*, as to Item 8, *on condition* that standard wrought-iron pipe shall be used throughout the equipment and that the fuel oil installation shall comply with the fuel oil rules in all other respects.

52-26-A.

APPELLANT—Rev. Brother Gerard, for St. Leonard's Academy, owner.

SUBJECT—Application for a temporary permit—appeal from decision of fire commissioner.

PREMISES AFFECTED—26 Brevoort place, Brooklyn.

608-23-BZ.

APPLICANT—Charles F. Rittel, Jr., owner.

SUBJECT—Application for reopening (re: decision of superintendent of buildings) to permit partly in an unrestricted district and partly in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—North side of West Fordham road, 78.56 feet west of Cedar avenue, The Bronx.

APPEARANCES—

For Applicant: Lillian Kotzum.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(608-23-BZ)

WHEREAS, James P. Whiskeman, for Chas. F. Rittel, Jr., owner, filed, May 17, 1923, an application, under the building zone resolution, to permit the extension, from an unrestricted district into a business district, of a proposed garage for the storage of more than five (5) motor vehicles; premises north side of West Fordham road, 78.56 ft. west of Cedar avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, July 31, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West Fordham road is a business district and Cedar avenue and Harlem River terrace are unrestricted districts; and

WHEREAS, the decision of the superintendent of buildings, rendered May 14, 1923, in acting on N. B. App. No. 1549-23, reads:

"1. Erection of proposed garage for storage of more than five (5) motor vehicles partly in business district is contrary to provisions of building zone resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 75 ft. and a depth of 125 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, under the provisions of section 7, subdivision C, the board is empowered to act; and

WHEREAS, the application was granted by the board at its meetings, July 3, 1923, July 15, 1924, and April 28, 1925, on certain conditions, and applicant requested a modification of the time limit.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building be constructed fireproof and limited to two stories in height; that the front elevation be finished in face brick, with architectural terra cotta or stone trimmings; and that all permits necessary for the prosecution of the work be obtained within nine months and the building completed within nine months from the date of this action.

1137-22-BZ.

APPLICANT—Martin James Fielder, for Tillie S. Feldman, owner.

SUBJECT—Application for reopening (re: order of fire commissioner) to permit in a business district the erection of an oil selling station.

PREMISES AFFECTED—South side of Buel avenue, 1,030 feet east of Richmond road, Borough of Richmond.

THE RESOLUTION:

(1137-22-BZ)

WHEREAS, Martin James Fielder, for Tillie S. Feldman, owner, filed, September 22, 1922, an application, under the building zone resolution, to permit in a business district the erection and maintenance of an oil storage plant premises south side of Buel avenue, 1,030 ft. east of Richmond road, Richmond; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, October 31, 1922, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Buel avenue and Richmond road are business districts; and

WHEREAS, the decision of the fire commissioner, rendered September 20, 1922, in acting on Alt. App. No. 1151-19, reads:

"1. Oil storage plant not permitted in a business district under section 4A of the Building Zone Resolution."

and

WHEREAS, the premises consist of a plot of ground in business district on which it is proposed to erect a one-story frame oil-house, with a frontage of 26 ft. and a depth of 11 ft., and a one-story frame stable for five horses, 25 ft. by 30 ft., and to install underground a 15,000-gallon tank for petroleum storage; and

WHEREAS, appellant contends that the premises were occupied for similar uses previous to the passage of the building zone resolution; and

WHEREAS, this appeal was granted by the board at its meetings, October 31, 1922, and September 30, 1924, for a temporary period of two years, and applicant requests extension of time.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the application be and it hereby is granted, for a period of one year from the date of action, on condition that applicant obtain all necessary permits and that the storage tank shall be installed in accordance with the fuel oil rules of the board of standards and appeals.

1132-23-BZ.

APPLICANT—Eugene Raimonds, owner.

SUBJECT—Application for extension of permit (re: order of fire commissioner) to permit in a residence district the maintenance of a garage for the storage of two (2) pleasure motor vehicles in two (2) spaces rented to persons not residing on the premises.

## THE RESOLUTION:

(1132-23-BZ)

WHEREAS, Abraham Farber, for Anna and Ida Farber, owners, filed, September 28, 1923, an application, under the building zone resolution, to permit in a residence district maintenance of a garage for the storage of two pleasure motor vehicles, two spaces rented to persons not residing on the premises; premises 4224 17th avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application before the board of appeals, at its regular meeting, January 22, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 17th avenue, 43rd street and 4th street are residence districts; and

WHEREAS, the order of the fire commissioner, dated September 10, 1923, in acting on Order No. 82434-LC, reads:

"Discontinue the maintenance of garage on these premises in which is kept motor vehicles that are not the property of persons residing in a dwelling on the same lot.";

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 18 ft. and depth of 18 ft.; occupied as a garage for two motor vehicles, space rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged consent of the owners of 86½ per cent of the property interest deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting, January 22, 1924, on certain conditions, and applicant requested an extension of the time limit.

Resolved, that the board of appeals does hereby make a modification in the application of the use district regulations under the building zone resolution, and that the application be granted it hereby is granted, for a period of two years from the date of this action, on condition that the capacity of the garage be limited to the storage of two (2) automobiles of pleasure car type, and that no gasoline shall be stored on premises other than in the tanks of the cars.

23-BZ.

APPLICANT—Alfred J. Jollon, for Mrs. Anna Cotter, owner.

SUBJECT—Application for reopening and modification of resolution to extend the time limit for erection of garage building.

## THE RESOLUTION:

(721-23-BZ)

WHEREAS, James Kearney, for Martin McCauley, owner, filed, June 8, 1923, an application, under the building zone resolution, to permit in a business district the erection of a garage for the storage of more than five motor vehicles; premises 56-60 Cedar place, 985-87 Franklin avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application before the board of appeals at its regular meeting, July 31, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Franklin avenue and Cedar place are business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 4, 1923, in acting on N. B. App. No. 10052-23, reads:

"Denied—Proposition contrary to the Zone Resolution, Art. II, Sec. 4. Public garage in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 50 ft. and a depth of 200 ft., to be occupied as a garage for more than five motor vehicles; and

WHEREAS, there existed on this street between the intersecting streets on July 25, 1916, a stable for more than five horses; and

WHEREAS, under Cal. 279-19-BZ, the board on May 27, 1919, granted a variation of the building zone resolution permitting the erection of a garage on these premises, which permit expired by limitation; and

WHEREAS, the board granted this application at its meeting July 31, 1923, on certain conditions; and

WHEREAS, certiorari proceedings to review the decision of the board were instituted, which proceedings were quashed, and the actions to review dismissed; and

WHEREAS, during the pendency of the writ to review, the permit issued by the superintendent of buildings had expired by limitation.

Resolved, that the board of appeal does hereby reaffirm its action of July 31, 1923, as of this date, on condition that the stipulations set forth therein be complied with, to wit: that the structure be limited to one story in height; that the gable walls be unpierced throughout their entire height and length; that the front elevations on Cedar place and Franklin avenue be finished in front brick with architectural terra cotta or stone trimmings; that the roof be of flat design and construction; that the Cedar place front be limited to one vehicular entrance; that any skylights installed be glazed with plain glass, protected above and below with wire guards; and that all permits necessary for the prosecution of the work be obtained within nine months and the building be completed within one year from March 23, 1926.

## \*CORRECTION.

369-25-A.

APPELLANT—A. Ramona Dean and Louise F. Dean, owners.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—284 Chauncey street, Queens.

APPEARANCES—

For Appellant: William M. Dean.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Messrs. Kennedy, Dowd, Holland, Connell and Fire Chief

Kenlon ..... 6

Negative ..... 0

Absent: Mr. Gunnison ..... 1

THE RESOLUTION:

(369-25-A)

WHEREAS, A. Ramona Dean and Louise F. Dean, owners, filed, April 4, 1924, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 284 Chauncey street, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 16, 1925, reads:

"With reference to your application dated April 22nd, 1925, for a permit to maintain a garage at the above location, I regret to inform you that I am without power to grant such a permit for the reason that Section 15, Chapter 10, Code of Ordinances, provides that no permit shall be issued for a garage in a building in

\*Correction—The word "Brooklyn" changed to "Queens" in fourth line of digest and of resolution.

which more than two stories above the garage are used as living apartments.

"You are therefore ordered to remove all automobiles having gasoline in their fuel tanks and discontinue the use of premises as a garage.";

and

WHEREAS, the building is non-fireproof, three stories and a cellar in height, 18 ft. by 34 ft. in area. OCCUPIED as a garage; 1st, 2nd and 3rd stories, as dwelling the garage portion being separated from the remainder of the premises by 4 in. terra cotta partition walls, with metal-covered wooden door at the opening therein, and a ceiling of plaster boards covered with 26 gauge metal

and WHEREAS, appellant contends that there are no public garages in the vicinity, and contends further having received a certificate of occupancy from the building department which led to the belief of being entitled to garage accommodations; and

WHEREAS, appellant had received a certificate of occupancy, permitting the use of the premises as an access to a garage and dwelling, issued by the bureau of building the board deemed that it would be a hardship to compel compliance with the order of the fire commissioner.

Resolved, that the order of the fire commissioner be it hereby is modified, and the appeal be and it hereby granted on condition that fire escape balconies, not less than 3 ft. by 3 ft. in area, embracing at least one window on each story, connected by vertical ladder, with drop ladder guides from lowest balcony to yard, shall be provided at the rear of the building; that the opening between garage and boiler room shall be built up solidly with approved masonry, and that not more than one automobile of pleasure car type shall be maintained on the premises, that no gasoline storage equipment shall be maintained on the premises.

## PUBLIC HEARING

(77-25-SR)

Notice is hereby given that the public hearing, on proposed amendments to Rules for Fire Extinguishing Appli-

ances, Sprinkler Rules, scheduled to be held on March 1926, was laid over to Friday morning, April 23, 1926, 10 o'clock.

*Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.*

RULES

FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly vacating of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 and in any other building in which the Fire Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter, it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter in the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc., are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders shall be final as to the carrying out of the fire drill on his particular floor.

Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. The WATCHMEN shall be the only persons permitted to remain on the floor during the progress of a fire drill and do so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned with consent in writing from Fire Commissioner.

Rule 4. Duties of Searchers.

The MALE and FEMALE SEARCHERS shall search all toilets, dressing rooms and emergency rooms used and frequented by their sex and all other portions of the floor and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist all persons who may faint or be disabled.

SEARCHERS shall leave the floor immediately after the last squad leaves.

Rule 5. Duties of Street Alarm Box Runner.

The STREET ALARM BOX RUNNER shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the STREET-ALARM BOX-RUNNER shall report to the Foreman for orders and if his services are not required he shall promptly leave the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the STREET-ALARM-BOX-RUNNER proceed to the street alarm box and send in the fire alarm.

# RULES

## Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the fire department, any fire that may occur. When it is necessary for the fire brigade to respond to different fires in the building they shall not use the stairways or fire escapes while the occupants are escaping from the premises.

## Rule 7. Duties of Exit Guards.

The EXIT GUARDS shall station themselves at all exit doors leading to fire escapes, stairways and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the exit doors open and direct the movements of the persons using these exits and prevent congestion. EXIT GUARDS shall remain at their stations until all the occupants of the building have passed their stations. Then close their doors and pass out of the building. Upon signal for the occupants to return, EXIT GUARDS shall take their designated stations and remain there until all persons have returned to their respective floors.

## Rule 8. Duties of Squad Monitors.

The SQUAD MONITORS, as soon as the alarm is sounded, shall see that the employees under their charge quickly form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all aisles and passageways are cleared of obstructions. Note: Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches. MONITORS shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the EXIT GUARDS. In reaching the sidewalk MONITORS shall keep their squads in order and lead them a reasonable distance from the building, so as not to cause congestion and interference with fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads. MONITORS will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

## Rule 9. Holding of Drills.

FIRE DRILLS shall be held at least once each month at varied hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct occupants to a place of safety. Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm

rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the persons on the premises engaged at work for a factory, and drills shall be conducted at least twice each year in which all of the persons on the premises shall participate simultaneously.

## Rule 10. Duties of Owner.

It shall be the duty of the OWNER, LESSEE OR TENANT OF THE BUILDING or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any FIRE DRILL in which all of the occupants do not participate shall not be considered as complying with the LAW, except as otherwise provided in these rules.

The person or persons representing the OWNER, LESSEE OR TENANT who supervises the FIRE DRILL at the building shall submit to an examination by the Bureau of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing by the FIRE COMMISSIONER.

## Rule 11. Duties of Engineer.

It shall be the duty of the ENGINEER, SUPERINTENDENT or other PERSON IN CHARGE of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and to see that all apparatus operated by springs requiring winding are rewound after each alarm and kept in normal condition for operation.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the PERSON IN CHARGE OF BUILDING will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc., are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of the alarm signals.

It shall also be the duty of the PERSON IN CHARGE OF BUILDING to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The PERSON IN CHARGE OF BUILDING must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

## Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire copies of Form 13A, for notices to property owners, such copies are not to be supplied by this office. The applicant is entitled only to one copy of Form 13A, properly filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Phone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 2 noon.

All communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, March 30, 1926, at 10 a. m.

Minutes of Regular Meeting, March 30, 1926, at 2 p. m.

Corrections.

Rules.

Progress Report.

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

APR 13 1926

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 6, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, April 13, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

ACTION OF BOARD—Appeal granted on conditions.  
CONDITIONS—As specified in resolution.

#### THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

#### THE RESOLUTION:

(1215-25-A)

WHEREAS, Automatic Sprinkler Corporation of America for S. Newman Chair Company, owner, filed, November 23, 1925, an appeal from a decision of the fire commissioner affecting premises 237-41 Wallabout street, Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered August 26, 1925 (Alteration Application No. 1444-12) reads:

"2. Not more than 400 heads shall be controlled by a 'Type A' dry pipe valve.";

and

WHEREAS, the building is non-fireproof, four stories, basement in height, 75 ft. by 125 ft. in area; OCCUPIED for the manufacture and storage of chairs, 20 persons on entire premises; and

WHEREAS, appellant contends that 475 heads have been installed on a dry pipe valve and that the valve is equipped with an exhauster, and contends, further, that the exhauster (approved by various recognized laboratories) accelerates very materially the operation of a dry pipe valve.

Resolved, that the decision of the fire commissioner is hereby modified, and the appeal be and it is granted on condition that the number of heads shall not exceed by 25 per cent the present allowance under the sprinkler rules, and that the sprinkler equipment shall conform with the rules in all other respects; that the building shall not be increased in height, area or dimension; and granted so long as conditions as to occupancy and use shall remain unchanged.

## THE RESOLUTION:

(1216-25-A)

WHEREAS, Automatic Sprinkler Corporation of America, or John P. Gustaveson, owner, filed, November 23, 1925, an appeal from a decision of the fire commissioner, affecting premises 240-56 East 139th street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered October 30, 1925 (Alteration Application No. 1729-24), reads:

"No. 11—Type 'A' dry pipe valves may not carry more than 400 sprinkler heads. Your layout shows each of the two dry pipe valves is considerably overloaded.";

WHEREAS, the building is non-fireproof, four and three stories in height, separated by a one-story section; irregular in area, having a frontage of 225 ft. facing East 139th street and a frontage of 100 ft. on Rider avenue; OCCUPIED as wood working factory, 130 persons in entire premises; and

WHEREAS, appellant contends that 475 heads and 525 heads have been installed on each of two dry pipe valves and that each valve is equipped with an exhaustor (approved by various recognized laboratories), and contends, further, that the exhaustor accelerates very materially the operation of a dry pipe valve.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the number of heads shall not exceed by 25 per cent the present allowance under the sprinkler rules; and that the sprinkler equipment shall comply with the rules in all other respects; that the building shall not be increased in height, area or dimension; and granted as long as conditions as to occupancy and use shall remain unchanged.

1262-25-A.

APPELLANT—Estate of Millard F. Smith and Ida C. Randolph, owners.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—2-4 Nevins street, Brooklyn.

APPEARANCES—

For Appellant: C. W. Wilson, Jr., F. W. Mayes and Lauritz Lauritzen.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon ..... 4  
Negative: Commissioner Connell..... 1  
Absent ..... 0

## THE RESOLUTION:

(1262-25-A)

WHEREAS, Estate of Millard F. Smith and Ida C. Randolph, owners, filed, December 8, 1925, an appeal from orders of the fire commissioner, affecting premises 2-4 Nevins street, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated November 21, 1925, read:

Order No. 86922-F—

"1. Provide at least one elevator, kept in readiness for immediate use by the Fire Department during all hours of the day and night, including holidays and Sundays, and a man competent to operate the elevator shall be present at all times."

Order No. 86924-F—

"1. Install a standpipe system with risers 6 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure \* \* \*";

Order No. 86925-F—

"1. Provide one approved 2½ gallon liquid fire extinguisher on each of 4th, 8th and 12th stories of tower.";

and  
WHEREAS, the building is fireproof, three stories and mezzanine in height; irregular in area, having a frontage of 29 ft. on Fulton street, 73 ft. 4 in. on Flatbush avenue and 55 ft. 3 in. on Nevins street, a total area of approximately 6,500 sq. ft.; at the southeast corner of the building there is a tower 26 ft. by 26 ft. in area, 16 stories (232 ft. 6 in.) in height. OCCUPIED: 1st story, stores; mezzanine, restaurant; 2nd story, billiard academy, 80 persons; 3rd story, uniform salesroom, 12 persons; the tower being occupied as a store on the 1st story and as a kitchen on the mezzanine story, the upper stories being vacant; and

WHEREAS, appellant contends that the tower contains a space for two elevators and was built to be used as an elevator tower, if the height of the main building was ever increased; that the existing elevator in the tower runs only to the 3rd story; that the tower is vacant and that nothing is stored above the mezzanine story.

Resolved, that the order of the fire commissioner, No. 86922-F, Item 1, and 86924-F, Item 1, be and it hereby is modified, and the appeal be and it hereby is granted, so long as existing structure shall not be increased in height, area or dimension; that the tower structure above the 3rd story level shall be maintained free, clear and unoccupied throughout; that Order No. 86925-F, Item 1, be and it hereby is affirmed, and the appeal as to this item be and it hereby is denied.

98-26-A.

APPELLANT—Edward P. Doyle, for Real Estate Board of New York Building Co., owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—10-14 East 41st street, Manhattan.

APPEARANCES—

For Appellant: J. Irving Walsh and Edward P. Doyle.

ACTION OF BOARD—Appeal granted on condition

CONDITIONS—As specified in resolution.

## THE VOTE—

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(98-26-A)

WHEREAS, Edward P. Doyle, for Real Estate Board of New York Building Company, owner, filed, February 2, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 10-14 East 41st street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings rendered January 22, 1926, reads:

"11. All doors, frames and other interior finish in the building should be of incombustible materials or fireproof wood to conform with the requirements of Sec. 356 of the Building Code.";

and

WHEREAS, the proposed building is fireproof, 17 stories in height, 62 ft. 6 in. by an irregular depth of 93 ft. 2 in. and 98 ft. 15½; OCCUPIED as stores on 1st story and offices above; and

# MINUTES

WHEREAS, the appellant proposes to use plain wood doors and trim on part of the 2nd and 3rd stories only, which floors will be occupied by the Real Estate Board, instead of fireproof wood as required by law; radiator enclosures will be lined with  $\frac{1}{4}$  in. asbestos and No. 26 gauge galvanized iron, all as indicated on plans in red ink.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the 2nd story for the installation of wood wainscoting for a height not exceeding 3 ft. as temporary decorative treatment and for five (5) pilasters in foyer hall of 3rd story only, *on condition* that this trim shall be planted tight against the wall, back filled with cement mortar; and that the use and occupancy of this floor shall be restricted to executive offices of the Real Estate Board exclusively.

APPELLANT—John J. Cray, for L. M. Z. Realty Corp., owner.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—210 Fifth avenue, Manhattan.

APPEARANCES—

For Appellant: John J. Cray.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(539-25-A)

WHEREAS, John J. Cray, for L. M. Z. Realty Corp., owner, filed, May 26, 1925, an appeal from orders of the fire commissioner, affecting premises No. 210 Fifth avenue, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated December 15, 1925, read (Order No. 70234-F):

"1. Provide a tank on roof of at least 3500 gallons capacity for the standpipe system, said tank to be so elevated that the bottom will not be less than 20 ft. above the roof level. Sec. 20, Ch. 12, Code of Ordinances."

(Order No. 70235-F)

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at north and south side of buildings, or other approved protection, as per Sec. 20, Ch. 12, Code of Ordinances."

and

WHEREAS, the building is fireproof, 11 stories (145 ft.) in height, extending through the block, having a frontage of 30 ft. 2  $\frac{6}{7}$  in. on Broadway and 28 ft. 2  $\frac{4}{7}$  in. on Fifth avenue, by an average depth of 128 ft. 10 in., about 3,276 sq. ft. floor area. OCCUPIED: 1st story, stores; 2nd story, salesrooms, 2 persons; 3rd story, beauty school, 10 persons; 4th story, salesrooms, 4 persons; 5th story, vacant; 6th story, salesrooms, 8 persons; 7th and 8th story, apartments; 9th story, offices, 3 persons; 10th story, salesroom and tailor, 3 persons; 11th story, apartments and office, 2 persons; and

WHEREAS, the appellant contends the standpipe system has been installed since 1905 and consists of: riser in stair-hall, one 600 gallon reserve tank and one 800 gallon pressure tank located in the cellar; the reserve tank is fed by 4 in. connections to two street mains of 40 pounds pressure; that there are two automatic electric pumps connected

with the tanks and operating at 75 pounds pressure; appellant claims there are 78 windows on the north side and 13 windows on the south side of building affected under Order No. 70235-F; that there is no manufacturing being done on the premises.

*Resolved*, that the order of the fire commissioner, No. 70234-F, be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the present standpipe system as now installed shall remain unchanged, with a minimum pressure of not less than 25 pounds at the highest outlet of top story; that there shall be no manufacturing of any nature or description throughout the premises; and as to Order No. 70235, the appeal be and it hereby is *granted* only so far as it affects all windows not on course of stair hall or elevator shaft.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and

Chief Kenlon ..... 0

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(1244-25-A)

WHEREAS, Edward P. Doyle, for Veibar Realty Corporation, owner, filed, December 4, 1925, an appeal from a decision of the fire commissioner, affecting premises west side of Fifth avenue, 100 ft. south of Washington avenue, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated November 12, 1925, reads (Applic. No. 2263-25):

"No. 3. As application states a celluloid occupancy, two source water supply is required consisting of gravity and pressure tanks of sufficient capacity.

"No. 7. As plans indicate floor area to be over 2000 square feet a standard 4 in. standpipe system must be provided."

WHEREAS, the building is fireproof, two stories in height, 117 ft. 8 in. by 100 ft. (approximately 11,000 sq. ft.) in area; OCCUPIED for the manufacture of novelties—very dense occupancy; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system supplied by a 15,000 gallon gravity tank, bottom of same being located 20 ft. above the roof and proposes to eliminate the pressure tank and in lieu thereof same proposes to provide a 6 in. connection to the city main (letter from department of water supply, gas and electricity states main is fed two ways and the pressure is 40 pounds per sq. in.); appellant contends, further, that the celluloid (a maximum quantity of 200 pounds) is stored in sprinklered fireproof vaults located on the roof of the premises.

*Resolved*, that the decision of the fire commissioner, No. 2263-25, be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 3, *on condition* that the supply to the sprinkler system shall be maintained from a 15,000 gallon gravity tank and a 6 in. connection to the city main; and *granted*, as to Item 7, *on condition* that the building shall not be increased in height or area; and that the sprinkler system as modified shall be installed.

THE RESOLUTION:

(1229-25-A)

WHEREAS, Samuel Rosenblum, for the Howard Specialties Company, Inc., lessee of 3rd floor, filed, November 25, 1925, an appeal from a decision and order of the fire commissioner, affecting premises 549-561 Grand avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered May 6, 1925, reads:

"In reply to yours of 4/10/25, I am returning your permit uncorrected, with the following explanation: The inspector's official survey shows that you possessed a lease for your premises on 11/1/22 which will expire 12/31/25.

"According to the provisions of Section 232, Subd. 2-1, Chapter 10 of the Code of Ordinances, as amended to become effective on May 1, 1923, an exemption was extended to you, to expire three years from the enactment of the ordinance, which is 11/1/25.

"Accordingly, your permit has been endorsed to expire 11/1/25, beyond which date it is not legally possible for this Department to extend its authorization for the continuance of your business at this premises.";

and the order of the fire commissioner, File No. 25441-12, Order No. 1365-LC, dated January 22, 1926, reads:

"With reference to your application dated October 22, 1925, for a permit to store nitro cellulose products (5,000 pounds) at the above location and regret to inform you that I am without power to grant such a permit for the following reasons:

"Sub. Div. 21 of Section 232, Chapter 10, Code of Ordinances of N. Y. provides that no permit for the storage or manufacture of nitro celluloid products shall be issued for any building where dry goods, garments or other materials of a highly inflammable nature (manufacture of carbon paper) are manufactured in a portion of the building above the nitro cellulose occupancy. The above mentioned subdivision and section also provides that no permit for the storage or manufacture of nitro cellulose products in excess of 100 lbs. shall be issued for any building wherein more than 6 persons are employed or congregate above the celluloid occupancy.

"You are therefore ordered to forthwith remove all nitro cellulose products in the form of blocks, slabs, sheets, rods, tubes, or other shapes to be used as raw material from the premises and to discontinue the further storage of the above mentioned material on the premises.";

WHEREAS, the building is fireproof, six stories in height, 1 ft. by 100 ft. in area. OCCUPIED: 1st story, machine shop, 100 persons; 2nd story, knitting mills, 5 persons; 3rd story, manufacturing celluloid articles, 75 persons; 4th story, manufacturing instruments, 90 persons; 5th and 6th stories,

manufacturing carbon paper, 55 persons on both stories; and

WHEREAS, the appellant, who has occupied the 3rd story since 1920, contends that the building is equipped with a sprinkler system and a standpipe system; that his former permit issued by the fire department allowed 5,000 pounds of celluloid; he now requests a permit to carry 4,000 pounds of celluloid in vault and not over 250 pounds in process of work at any one time outside of the vault.

Resolved, that the decision and order of the fire commissioner be and they hereby are modified, and the appeal be and it hereby is granted on condition that the code of ordinances requirements regarding celluloid occupancy shall be complied with in all other respects.

1245-25-A.

APPELLANT—Robert Teichman, for Whitnol Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

THE RESOLUTION:

(1245-25-A)

WHEREAS, Robert Teichman, for Whitnol Corporation, owner, filed, December 4, 1925, an appeal with the board of appeals from an order of the fire commissioner, No. 85055-F, affecting premises 131-137 West 44th street, Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"Item 1—Provide iron shutters at all openings in the exterior wall above the first story, which are distant in a direct line less than 30 ft. from any opening in any other building \* \* \*";

and

WHEREAS, the building is non-fireproof, three stories in height, 60 ft. by 100 ft. 5 in. in area. OCCUPIED: Stores, offices, studios, show room and photographer, with a total of 71 persons in the entire building. There are six windows in the rear wall in the 2nd and 3rd stories, which are within 25 ft. 10 in. of openings in an adjoining building at the rear; and

WHEREAS, appellant contends that the building is only 41 ft. 2 in. in height; that the distance between the rear wall and the adjoining property is 25 ft. and for a portion 30 ft.; that there would be hardship to comply with the order.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the structure shall be not increased in height, area or dimension, and that the use and occupancy shall remain substantially unchanged.

1270-25-A.

## THE RESOLUTION:

(1270-25-A)

WHEREAS, Edward P. Doyle, for H. S. Karp, owner, filed, December 10, 1925, an appeal from an order of the fire commissioner, affecting premises No. 27 Wilbur avenue, L. I. City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated November 16, 1925, reads (Order No. 99341-LC):

"With reference to your application dated May 3, 1925, for a permit to store nitro-cellulose products at the above location I regret to inform you that I am without power to grant such a permit for the following reasons:

"1. Section 232, Sub. Div. 2F, Ch. 10, C. O. N. Y., provides that no permit for the storage or manufacture of nitro-cellulose products except as heretofore provided shall be issued for any building which is not equipped with an approved system of automatic sprinklers.

"2. Section 232, Sub. Div. 2G, Ch. 10, C. O. N. Y., provides that no permit for the storage or manufacture of nitro-cellulose products except as heretofore provided shall be issued for any building where paints, varnishes or lacquers are manufactured, stored or kept for sale.

"3. Section 232, Sub. Div. 2H, Ch. 10, C. O. N. Y., provides that no permit for the storage or manufacture of nitro-cellulose products except as heretofore provided shall be issued for any building where matches, rosin, turpentine oils (manufacture of hair tonics) hemp cotton or any explosives are stored for sale."

and

WHEREAS, the building, facing on two street fronts, is fireproof, five stories and cellar in height and 70 ft. by 185 ft. in area. OCCUPIED: Cellar, manufacture metal boxes, 70 persons; 1st story, manufacture of gas heaters, 25 persons; 2nd story, manufacture of gas heaters, 50 persons; 3rd story, occupied by appellant for the manufacture of dolls' eyes (celluloid on buckram) and mechanism for dolls' voices, 100 persons; 4th story, manufacture of radio parts, 35 persons; 5th story, manufacture hair waving machines, 40 persons; and

WHEREAS, appellant contends that the sprinkler system in the building conforms with the rules, excepting in that there is no pressure tank installed, the system being fed from a 20,000 gallon gravity tank and also from a 6 in. city water main; that the oils in the premises consist of 150 gallons of "Japan," which is used in the basement and 1st story; that the amount of celluloid on the premises never exceeds 40 pounds, and that the work wherein the celluloid is used is but an incidental part of the appellant's business.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the occupancy shall be restricted to the 3rd story; that not more than 25 pounds of sheet cellulose, mounted on buckram, sheets approximately 8½ in. by 10 in. shall be used, same to be stored in a brick vault, said vault to be equipped with at least one jumbo sprinkler head.

## THE RESOLUTION:

(1290-25-A)

WHEREAS, Samuel Rosenblum, for Arthur Mueller, owner, filed, December 14, 1925, an appeal from an order of the fire commissioner, affecting premises No. 780 Madison street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 24, 1925, reads (Order No. 82586-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from an opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east, west and south sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances.

"2. Replace the defective shutters with proper iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at south and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances."

and

WHEREAS, the building is non-fireproof, four stories (40 ft. 4 in.) in height at rear and three stories (40 ft. 4 in.) in height at front of premises, and 20 ft. by 100 ft. in area. OCCUPIED for the manufacture of furniture, 33 persons on entire premises; and

WHEREAS, there are two openings on each story above 1st story in the easterly wall of the three-story section and three openings on each story above the 1st story in the easterly wall of the four-story section within 30 ft. of openings in the rear wall of an adjoining building to the east; four openings in the southerly wall on each story above 1st story within 30 ft. of openings in a neighboring building to the south and ten openings on each story above 1st story in the west wall of the three-story section within 50 ft. of a neighboring roof of a one-story building to the west and four windows in the west wall on each story above the 1st story of the four-story section within 30 ft. of openings in neighboring buildings to the west; and

WHEREAS, appellant contends that a prior order from the fire department requiring shutters on the west wall of the building was rescinded by the fire department in 1915 and that the major portion of the premises is but slightly above the 40 ft. height of buildings which are exempted from shutters.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height, area or dimension; and granted so long as the present conditions as to occupancy and use shall remain unchanged.

1159-25-A.

APPELLANT—John J. Gilmartin, for M. S. owner.

## THE RESOLUTION:

(1159-25-A)

WHEREAS, John J. Gilmartin, for M. Slonea, owner, filed, November 10, 1925, an appeal from an order of the fire commissioner, affecting premises No. 43-47 West 16th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 19, 1925, reads (Order No. 31352-LC):

"You are hereby notified that your permit, No. 115540, expiring March 27, 1926, to store and use 99 pounds nitro-cellulose products becomes null and void on December 15, 1925, for the reason that Section 232-2-1 of Article 19, Chapter 10, Code of Ordinances, of the City of New York, prohibits the storage of nitro-cellulose products in that portion of the building occupied by you.

"You are therefore ordered to remove all nitro-cellulose products by December 15, 1925.";

WHEREAS, the building is fireproof, 12 stories in height, 0 ft. by 92 ft. in area at 1st story and 60 ft. by 80 ft. in area above; OCCUPIED as a tenant factory; the appellant occupying the northeast corner of the 3rd story; and

WHEREAS, this appeal was denied by the board at its meeting on March 2, 1926, and reopened March 16, 1926, on request of the appellant, on the ground that the lessee had an inspection made of the premises by the fire department prior to taking possession in October, 1922, and that permit and certificate of fitness had been issued by the fire department at that time, which permit has been renewed each year, and that he would suffer great financial loss if compelled to vacate the premises, and that his work consists of the setting of rhinestones in already manufactured articles.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the quantity of celluloid maintained in the 3rd story of the premises under appeal shall not exceed 50 pounds, to be stored in an approved metal cabinet; and that the requirements of the code of ordinances for celluloid occupancy shall be complied with in all other respects.

## THE RESOLUTION:

(151-21-A)

WHEREAS, Andrew Guldner, for George Guldner, owner, filed, January 18, 1921, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 2153 Chatterton avenue, The Bronx; and

WHEREAS, the order of the fire commissioner, No. 3810-LC, dated December 30, 1920, reads:

"With reference to your application, undated, for a permit to conduct a motor vehicle repair shop, at the above location, I regret to inform you that I am without power to grant such a permit for the following reasons:

"1. Maintenance of your motor vehicle repair shop is a violation of section 3 of article 2 of the Building Zone Resolution of the Board of Estimate and Apportionment of the City of New York, adopted July 25, 1916, which prohibits the operation of a repair shop in a residence district.

"You are, therefore, ordered to

"1. Discontinue the use of premises for the repair of motor vehicles.";

and

WHEREAS, the premises consist of a plot of ground 50 ft. by 111 ft. in area, located in a residence district outside the fire limits, upon the front of which is a two-story frame dwelling 22 ft. by 50 ft. in area, on the rear of which is a two-story frame dwelling 22 ft. by 30 ft. in area, and a one-story frame building 25 ft. by 28 ft. in area; OCCUPIED as a motor vehicle repair shop in which repair work is done by the appellant on his own cars; appellant buying up old cars and repairing them with the intention of selling them; and

WHEREAS, appellant has filed five affidavits duly acknowledged that the building was used as a repair shop previous to July 25, 1916; and it appeared at the hearing that there was nothing but frame buildings within the area; and

WHEREAS, this appeal was granted by the board at its meeting March 1, 1921, and September 25, 1923, for a temporary period of two years, and appellant requested a further extension of time.

Resolved, that the order of the fire commissioner be and it hereby is modified, and that a temporary use of these premises for a period of two years be and it hereby is granted on condition that the use and conduct of the motor vehicle repair shop will be discontinued on or before April 1, 1928.

APPELLANT—Cornell Utilities Co., Inc., for Anna DeJonge, owner.

SUBJECT—Application for reopening—amendment to resolution (re: appeal from order of fire commissioner).

PREMISES AFFECTED—377 St. Pauls avenue, Borough of Richmond.

APPEARANCES—

For Appellant: Willilam Porter.

ACTION OF BOARD—Appeal reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(1105-24-A)

WHEREAS, Cornell Utilities Co., for Anna DeJonge, owner, filed, September 6, 1924, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 377 St. Pauls avenue, Richmond; and

WHEREAS, the order of the fire commissioner, No. 24753-LC, dated June 26, 1924, reads:

"1. Uncover storage tank so that same may be inspected. Rule 19-32.

"2. Arrange with this department to make a test of tanks as per Rule 21.

"6. Arrange with this department to have feed and return lines tested as per Rule 25—Sec. 2.

# MINUTES

"7. Capacity of buried tank may not exceed 1100 gallons.

"10. Discontinue the use of an unapproved burner as per Rule 27.";

and

WHEREAS, the building is non-fireproof, three stories in height, 40 ft. by 30 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning system has been installed consisting of a Nokol Burner, a 1,500-gallon tank buried outside the building and a 55-gallon auxiliary tank; and

WHEREAS, appellant contends that the installation conforms with the fuel oil rules excepting in that the burner is not an approved burner; and

WHEREAS, this appeal was granted by the board at its meeting November 25, 1924, at which time due notice was taken of the presence of the 1,500-gallon tank, but appellant failed to incorporate Item No. 7 in the copy of order filed, and the board deemed that the case should be reopened to include this item.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Items 1, 2 and 7, *on condition* that appellant file factory certificate satisfactory to the fire commissioner; as to Item 6, *on condition* that extra heavy wrought-iron pipe shall be used throughout the installation; as to Item 10, *on condition* that fire-box door of furnace shall be equipped with self-closing device; and that the fuel oil rules shall be complied with in all other respects.

APPELLANT—Edward P. Doyle, for National Button Works, lessee.

SUBJECT—Application for reopening—reconsideration (re: appeal from order of fire commissioner).

PREMISES AFFECTED—147-153 Waverly place, Manhattan.

APPEARANCES—

\* For Appellant: Edward P. Doyle.

ACTION OF BOARD—Appeal reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(713-24-A)

WHEREAS, Edward P. Doyle, for National Button Works, lessee, filed, May 21, 1924, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 147-153 Waverly place, Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 23, 1924, in acting on Order No. 23915-LC, reads:

"Section 232-2, Chapter 10, Code of Ordinances, prohibits the storage of nitro-cellulose products in any building where oils are stored or kept for sale.

"You are, therefore, ordered to:

"1. Remove all nitro-cellulose products.";

and

WHEREAS, the building is fireproof, 12 stories in height, 92 ft. by 62 ft. (irregular) in area; OCCUPIED as a tenant factory, 72 persons above the 1st story, appellant occupying the 8th story for the manufacture of celluloid buttons, equipped with a two-source sprinkler system and a standpipe equipment; and

WHEREAS, appellant contends that the main celluloid storage (250 pounds) is kept in a metal cabinet, sprinklered and vented to the outer air, and that the cabinet is in a fireproof room, protected with a fireproof door; that the amount of celluloid in work is 25 pounds and that no open flame is used on the premises; and

WHEREAS, this appeal was granted by the board at its meeting July 22, 1924, on condition that the celluloid stor-

age, operation and work shall be confined to the 8th story and it appears that the occupant has moved from the 8 story to the 12th story.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the requirements of the celluloid ordinance shall be complied with in all other respects, and that the celluloid storage, operation and work on the 8 story shall be permanently discontinued and the occupant transferred to the 12th story, and that the quantity of celluloid stored on the premises shall be limited to 250 pounds with not more than 25 pounds in work.

Absent .....	0

THE VOTE TO MODIFY RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	3
Negative .....	0
Absent .....	0

THE RESOLUTION:

(306-23-A)

WHEREAS, the Procter & Gamble Mfg. Co., owner, filed, March 12, 1923, an appeal, with the board of appeals, from a decision of the fire commissioner, affecting premises west side of Western avenue, 180 ft. south of Richmond terrace, Port Ivory, Borough of Richmond; and

WHEREAS, the decision of the fire commissioner reads:

"1. Proposed gas plant for the manufacture and storage of oxygen and hydrogen gas in large gas holders will not be permitted by this department.";

and

WHEREAS, the premises consist of ground along Western avenue, occupied by the Procter & Gamble Manufacturing Company; it is proposed to maintain a 10,000 cu. ft. oxygen holder, a 5,000 cu. ft. hydrogen holder at the south end of the property near the silicate house, and a 100,000 cu. ft. hydrogen holder at the centre of the west side of the premises; and

WHEREAS, appellant contends that the use of hydrogen gas in the manufacture of soap and soap products is essential to the operation of the industry and that the use of gas holders proposed is of most modern and approved steel, gas-tight containers, and that the hydrogen storage holder is located more than 1,000 ft. from the hydrogen storage and 200 ft. from the nearest building; and

WHEREAS, this appeal was granted by the board at its meeting May 22, 1923, on certain conditions, and appellant requested a modification of the conditions as to hydrogen manufacture and storage.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the plans embracing the proposed equipment be submitted to and approved by the fire commissioner; that the hydrogen manufacturing equip-

# MINUTES

Installation and storage on these premises be in accordance with plans so approved; that there shall be no structure other than the water gas hydrogen manufacturing unit within 100 ft. of the existing hydrogen tank holder and that the exhaust flue or stack shall be not less than 200 ft. distant from the existing hydrogen tank holder; that the capacity of the existing gas holder shall not be increased; and on further condition that this plant shall be operated at all times throughout the twenty-four hour day, under the supervision of a qualified operator, so certified to by the fire commissioner, and that a periodical inspection shall be made by a recognized research organization satisfactory to the fire commissioner.

## BUILDING ZONE CASES.

114-25-BZ.

APPLICANT—John J. Dunnigan, for Carmine Dargenio, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for the storage of more than five motor vehicles.

THE RESOLUTION:

(1168-25-BZ)

WHEREAS, James A. Boyle, for Margaret M. Schaedle, et al., owner, filed, November 12, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 140-144 Devoe street, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Devoe street, Ainslie street and Manhattan avenue are all in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered October 19, 1925, reads:

"Proposition as to erection of public garage for more than 5 cars within a business district contrary to Zone Resolution, Art. 2, Section 4, Par. 15. Therefore application is denied."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 75 ft. and 100 ft. across rear and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was not entitled to relief as the street is as yet not otherwise invaded with non-conforming uses.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

# MINUTES

1239-25-BZ.

APPLICANT—Alfred H. Townley, for Car barn Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7-e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—110-130 West 51st street and 109-131 West 50th street, Manhattan.

APPEARANCES—

For Applicant: Alfred H. Townley, Dominick Henry, Luring N. Farnum, Van Buren Stanbury, Louis F. Lee and others.

For Opposition: Samuel Levy, Charles L. Craig and others.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle and Chief Kenlon .....	2
Negative: Chairman Walsh, Commissioners Connell and Holland .....	3
Absent .....	0

THE RESOLUTION:

(1239-25-BZ)

WHEREAS, Alfred H. Townley, for Car barn Corporation, owner, filed, December 2, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 109-131 West 50th street and 110-130 West 51st street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 50th street, West 51st street and Sixth avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings reads:

"1. Proposed occupancy is unlawful as the building is to be located in a business district. Section 4, Subd. 15 of the Building Zone Resolution."

and

WHEREAS, the proposed building is a ten-story structure, seven stories above and three stories below grade, of fire-proof construction, with a frontage of 305 ft. and a depth of 200 ft. 10 in.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, under Cal. No. 89-25-BZ, the board, June 2, 1925, denied an application for a garage on this site, seven stories in height, with a frontage of 245 ft. and a depth of 200 ft. 10 in., since which time substantial conforming improvements have been made in the block, to wit: a twenty-story hotel and a large theatre. The board deems that the business use area of the streets involved would be adversely affected by the invasion of a public garage of the contemplated dimensions and a deterrent to the natural development of the immediate neighborhood; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7e of the building zone resolution and that there would not be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the application be and it hereby is *denied*.

1066-25-BZ.

APPLICANT—Daniel Campbell, Jr., for Roland Lievendag, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7-g of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Northwest corner Queens avenue and 24th street, Flushing, Borough of Queens.

APPEARANCES—

For Applicant: Rodman Richardson and Daniel Campbell, Jr.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(1066-25-BZ)

WHEREAS, Daniel Campbell, Jr., for Roland Lievendag, owner, filed, October 20, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles, and also a gas selling station; premises northwest corner Queens avenue and 24th street, Flushing, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Queens avenue, north of 24th street, is in a business district; that Queens avenue, south of 24th street, is in a residence district, and that 24th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings reads:

"Your application for a permit on the above location has been rejected, contrary to the provisions of the Zone Law to erect a public garage in a business district."

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 100 ft. on Queens avenue and 51 ft. on 24th st.; to be occupied as a garage for the storage of more than five motor vehicles and a gas selling station; and

WHEREAS, the applicant has complied with the requirements of section 7g of the building zone resolution, by filing affidavits of consents of more than 80 per cent of the owners of property within the area deemed affected by the board; and

WHEREAS, the board deemed that a gasoline selling station as proposed on plan filed with the board should be permitted as there was no disapproval by the superintendent of buildings, the decision of the superintendent of buildings is hereby *reversed* and the application is *granted* on condition that the structure be limited in height to a one-story building above ground that the rear and westerly gable walls shall be unpainted throughout their entire height and length; that the structure shall be built to the building line on 164th street and Queens avenue; that the front elevations on Queens avenue and 164th street shall be finished with face brick, architectural terra cotta or stone trimmings; that there shall be no signs erected or maintained; that there shall be not more than one vehicular entrance on the 164th street front; and advertising shall be limited to one electric projecting

# MINUTES

indicating the title of the garage; that the architect shall make a return drawing to this board for approval before submitting same to the superintendent of buildings; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1305-25-BZ.

APPLICANT—Harry Landy, for Love Lane Garage Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7-e and 21 of the building zone resolution, to permit in a business district the alteration and extension of an existing garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—46-50 Love lane, northwest corner College place, Brooklyn.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(1305-25-BZ)

WHEREAS, Harry Landy, for Love Lane Garage Corporation, owner, filed, December 16, 1925, an application, under the building zone resolution, to permit in a business district the alteration and extension of an existing garage for the storage of more than five motor vehicles; premises 46-50 Love lane, northwest corner of College place, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that both Love lane and College place are in a business district and that Hicks street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 27, 1925, reads:

"Proposed three-story extension to present garage is contrary to Art. 2, Section 6-a of the Zone Resolution, as proposed extension is to be located in a business district.";

and

WHEREAS, the existing building is of fireproof construction, three stories in height, with a frontage of 50 ft. 1 1/4 in. on Love lane and 39 ft. 4 in. on College place and a depth of 82 ft.; occupied as a garage for the storage of more than five motor vehicles; it is proposed to build a three-story extension 50 ft. 2 in. by 32 ft. 1 in.; the entire structure to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7e and 21 of the building zone resolution and, because of existing invasions by non-conforming uses on this street front there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed addition shall be restricted to a three-story structure, erected fireproof; that there shall be no vehicular entrances incorporated in this extension of the existing garage; that the exits and entrances shall be through the existing surrounding structure; that the street wall on Love

lane and College place shall be finished, as to material and design, the same as the existing surrounding structure, of which this addition is a part; that there shall be no signs erected on this structure, of any nature or description; that there shall be no gasoline storage equipment installed in this addition; that all permits necessary for the prosecution of the work shall be obtained within nine months and the construction completed within eighteen months from the date of this action.

(1303-25-BZ)

WHEREAS, William F. Doyle, for Mary E. Butler, owner, filed, December 16, 1925, an application, under the building zone resolution, to permit in a business district, extending from an unrestricted district, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises west side of Hoffman street, 171.14 ft. north of East 184th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 30, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hoffman street and Lorillard place are in business districts, and that Third avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 10, 1925, reads:

"1. Erection of proposed garage for storage of more than five cars in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories and cellar in height, with a frontage of 100 ft. and a depth of 94.9 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7c and 7e of the building zone resolution, and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building be restricted to a one-story structure above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; that there shall be no skylights installed within 25 ft. of the northerly gable wall; that any gasoline storage equipment installed shall be located at the street front, at the extreme southerly end of the building; that the front elevation shall be finished in face brick with architectural terra cotta or stone trimmings; that there shall be no roof signs, and no advertising on the front of the building with the exception of one electric sign indicating the title of the garage; that the roof shall be of flat design and construction; that all permits necessary for prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

347-24-BZ.

APPLICANT—Rubenstein & Rosling, for Daniel Fuchs, owner.

SUBJECT—Application for extension of permit (re: decision of superintendent of buildings) to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1925-1929 Union street, Brooklyn.

APPEARANCES—

For Applicant: George Rosling.  
For Opposition: None.

ACTION OF BOARD—Application reopened and time extended to obtain permits.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon..... 1

THE RESOLUTION:

(347-24-BZ)

WHEREAS, William F. Doyle, for Morris Gross and Daniel Fuchs, owners, filed, March 6, 1924, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1925-29 Union street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals at its regular meeting, June 3, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Union street and Portal street are residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 29, 1924, in acting on Application No. 2684-1924, reads:

"Proposed two story brick public garage for more than five motor vehicles in a residence district is contrary to Art. II, Sec. 3, of the Zone Resolution.";

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 78 ft. 2 in. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that there would be hardship in preventing applicant from making proposed use of property, owing to its location in relation to the railroad cut; and

WHEREAS, the board granted this application at its meeting June 3, 1924, on certain conditions; and

WHEREAS, certiorari proceedings to review the decision of the board were instituted, and a decision rendered sustaining the action of the board; and

WHEREAS, during the pendency of the writ to review, the permit issued by the superintendent of buildings had expired by limitation.

Resolved, that the board of appeals does hereby reaffirm its action of June 3, 1924, as of this date, on condition that the stipulations set forth therein be complied with, to wit: that the building be restricted to a two-story structure above

grade on the Union street frontage; that the rear and gable walls shall be unpierced throughout their entire height and length, and the exterior of said wall to be finished with light colored brick; that the vehicular entrances shall be restricted to Portal street; that there shall be no openings other than windows on Union street, the sills of same shall be not less than 6 ft. above grade; that the front elevations on Portal street and Union street shall be laid up in front brick, with architectural terra cotta or stone trimmings; that there shall be no signs nor advertising display permitted on the street fronts in any shape or manner, other than one electric projecting sign at the corner of the building at the intersection of Union and Portal streets; that there shall be no roof signs of any nature or description permitted; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## AREAS FIXED.

(1134-25-BZ)

The chairman presented and read a communication from Edward P. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 861-863 Park avenue, Brooklyn.

The following area was approved by the board:

Both sides of Park avenue from a point 200 feet west of Sumner avenue to Broadway; the east side of Sumner avenue from Park avenue to Ellery street; also the south side of Ellery street from Sumner avenue to a point 195 feet east of Sumner avenue.

(1192-25-BZ)

The chairman presented and read a communication from John M. Baker, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises northeast corner of 166th street (Bergen street) and 90th avenue (North First street), Jamaica.

The following area was approved by the board:

Both sides of 166th street from a point 100 feet north of 89th avenue to a point 75 feet south of 91st avenue and also both sides of 90th avenue from 166th street to 168th street.

(227-26-BZ)

The chairman presented and read a communication from Schreiber, Collins, Myers & Buchter, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 133-135 West 100th street, Manhattan.

The following area was approved by the board:

Both sides of West 100th street from Amsterdam avenue to Columbus avenue; also the premises at rear and for a distance of 50 feet on either side of the side lot lines of the premises in question.

Adjourned 5.45 p. m.

WILLIAM J. O'GORMAN, Secretary.

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

TUESDAY AFTERNOON, MARCH 30, 1926

Present: Chairman Walsh, Commissioners Connell, Holland, Guilfoyle and Fire Chief Kenlon.

### PETITIONS FOR VARIATIONS.

739-25-S.

PETITIONER—Edward P. Doyle, for Frank Dobson, owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—310-321 East 53rd street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 13, 1926, at 2 p. m.

908-25-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Estate of Levi P. Morton, owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—110-116 Nassau street and 43-45 Ann street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 13, 1926, at 2 p. m.

993-25-S.

PETITIONER—Thompson-Greger, Inc., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—408-410 Broadway, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 13, 1926, at 2 p. m.

988-25-S.

PETITIONER—William F. Doyle, for 385 Madison Ave., Inc., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES—385 Madison avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 13, 1926, at 2 p. m.

1110-25-S.

PETITIONER—Margaret C. Howard, lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—602 Madison avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 13, 1926, at 2 p. m.

18-24-S.

PETITIONER—Henry Roth, for Greenwill Construction Co., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—14-16 East 38th street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

1090-25-S.

PETITIONER—Kenneth B. Norton, for Leah L. P. Norton, owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—16 West 45th street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

1102-24-S.

PETITIONER—Arthur Greenbaum, for Abram I. Kaplan, lessee.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—251 Fifth avenue and 1 East 28th street, Manhattan.

APPEARANCES—

For Petitioner: Philip J. Sinnott.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to May 11, 1926, at 2 p. m., on request of petitioner's representative.

918-25-S.

PETITIONER—Frederick Mathesius, for Estate of B. Fischer, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—30-32 East 21st street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

734-25-S.

PETITIONER—Buchman & Kahn, for Siden Building Co., Inc., owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—87-89 Nassau street and 130 Fulton street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

1121-25-S.

PETITIONER—Samuel Rosenblum, for L. H. N. W. Co., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—130-132 West 25th street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

654-25-S.

PETITIONER—Criterion Construction Company, for East New York Knee Pants Company, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—539 Schenck avenue, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

871-25-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Wm. I. Cohen, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—241 Wythe avenue, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

# MINUTES

1037-25-S.

PETITIONER—George Kran, for Keabro Realty Corp., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—235 West 27th street, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Laid over to April 27, 1926, at 2 p. m.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held Tuesday, March 9, 1926, as they appeared in Bulletin No. 11, Vol. II, are hereby corrected to read as follows:

(1182-25-A)

WHEREAS, J. Schneider, Sr., owner, filed, November 13, 1925, an appeal from a decision of the fire commissioner, affecting premises 147 Twelfth avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered November 5, 1925 (Alt. Applic. No. 2437-1925), reads:

"1. Burner must be of a type approved by Board of Standards and Appeals. Examination continued when additional information is received."

and

WHEREAS, the building is of frame and glass sash, construction, one story in height, 100 ft. by 100 ft. in area; OCCUPIED as a greenhouse; the appellant having installed an oil burning system, consisting of a 2,000 gallon storage tank, all necessary piping and valves in accordance with the fuel oil rules, except as to the burners; and

WHEREAS, the appellant has submitted plans to the fire department, which were disapproved; and

WHEREAS, the appellant claims that he is using four burners, known as the "Strong, Carlisle & Hammond Burner," which is now before the board for its consideration under Calendar No. 1046-23-S; the appellant requests a temporary permit to operate the fuel oil system, pending the approval of the burner.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, for a temporary period of ninety days, subject to further examination and consideration of plans filed in the fire department.

\*Correction—Words "fire commissioner" substituted for "superintendent of buildings" in line 5.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held Tuesday, February 9, 1926, as they appeared in Bulletin No. 7, Vol. XI, are hereby corrected to read as follows:

(726-25-A)

WHEREAS, Philip Steigman, for Harry Rosenfield, owner, filed, July 9, 1925, an appeal from an order of the fire commissioner, affecting premises 159 Varet street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 11, 1924, reads (Order No. 54590-F):

"1. Provide iron or kalameined shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at the east and west sides of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, five stories height, 25 ft. by 100 ft. in area; OCCUPIED as a tenement factory, about 30 persons on each story; and

WHEREAS, the appellant claims there are 44 windows on the west side and 7 windows on the east side of the building affected by Fire Department Order No. 54590-F; that a similar order was complied with June 19, 1919, in accordance with modifications granted by the board of review; he further proposes to fireproof all windows on the 2nd and 3rd stories at west side which are affected by the order; and

WHEREAS, the fire department representative reported that the alleged action of the board of review of fire department did not provide reasonable protection in view of the adjoining exposure, namely, moving picture theatre, which is a non-fireproof and non-sprinklered old structure.

Resolved, that the appeal be and it hereby is dismissed for lack of prosecution.

\*Correction—Word "appeal" substituted for words "order of the fire commissioner" in next to last line.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 30, 1917; Amended November 1, 1917, and Feb. 3, 1922.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations any material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air and weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet.

During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and under sides with the fire-retarding materials specified in rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or steel lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding for the covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth*, That no one is entitled to written notice of the date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

### DIRECTORY

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

OFFICE—Municipal Building, Rooms 1001 to 1015.

TELEPHONE—Worth 0184.

OFFICE HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 noon.

communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, April 6, 1926, at 10 a. m.

Minutes of Regular Meeting, April 6, 1926, at 2 p. m.

Correction.

Reserve Calendar.

Rules.

Progress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.

Special meetings as published in this Bulletin.

Call of Clerk's Calendar, Tuesdays, at 2 p. m.

All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 13, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, April 20, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

TUESDAY MORNING, APRIL 6, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.

The minutes of the regular meeting of the board of standards and appeals, held on Tuesday morning, March 30, 1926, and the minutes of the regular meeting of the Board, held on Tuesday afternoon, March 30, 1926, were approved as printed in the Bulletin, No. 14, Vol. XI.

### APPEALS FROM ADMINISTRATIVE ORDERS. 1111-25-A.

APPELLANT—Industrial Automatic Sprinkler Co., for Abraham & Straus, owners.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—50-58 Boerum place and 209-233 State street, Brooklyn.

### APPEARANCES—

For Appellant: Murray Riskin.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Laid over to April 20, 1926, at 2 p. m., for final disposition on request of appellant's representative.

### 1312-25-A.

APPELLANT—William C. McTarnahan, for Petroleum Heat & Power Co., Inc., of New York, lessee.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—416-432 East 47th street, Manhattan.

### APPEARANCES—

For Appellant: George P. Knight.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal withdrawn.

### THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Chief Kenlon

Negative

Absent: Commissioner Holland.

### 732-25-A.

APPELLANT—Giuseppe Chirico, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—2327 Arthur avenue (rear), The Bronx.

### APPEARANCES—

For Appellant: Joseph Pennetto and Giuseppe Chirico.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal dismissed, order not being enforceable.

### THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle....

Negative

Absent: Chief Kenlon.

### THE RESOLUTION:

(732-25-A)

WHEREAS, Giuseppe Chirico, owner, filed, July 10, 1925, an appeal from an order of the fire commissioner, affecting premises No. 2327 Arthur avenue (rear), Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated June 20, 1925, reads (Order No. 30030-LC):

"1. Discontinue the use of living apartments for dwelling purposes for reason that same are not occupied by the applicant or his employee. Section 154, Chapter 10, Code of Ordinances.

"2. Separate the living apartments from the garage by fire retarding walls and floors not pierced except by

one opening, protected by a fireproof self-closing door Chapter 10, Section 154, Code of Ordinances.

"3. Discontinue use of device employing free flame or fire in garage where live motor vehicles are being stored."

and

WHEREAS, the building is non-fireproof, three stories in height, 26 ft. by 40 ft. in area at 1st story and 26 ft. by 30 ft. in area above; located on the rear of the lot. OCCUPIED: 1st story, garage for the storage of five cars; 2nd and 3rd stories, living apartment on each story, now vacant; and

WHEREAS, the appellant contends that he has complied with Items 1 and 3 of Order No. 30030-LC; re to Item 1 the appellant claims that the garage is entirely separate from the living apartment by fire retarding walls and floor consisting of plaster boards, 3/4 in. cement plaster and 1/2 in. garage metal, and fireproof self-closing door; and

WHEREAS, the inspector of fire department reported that the order was dismissed of record in fire department on August 4, 1925, as not being enforceable for the reason that living apartment occupancy had been discontinued.

Resolved, that the appeal be and it hereby is dismissed.

### 1175-24-A.

APPELLANT—William R. Heins, for Republic Storage Co., owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—628-642 West 45th street, Manhattan.

### APPEARANCES—

For Appellant: William R. Heins.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

### THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle....

Negative

Absent: Chief Kenlon.

### THE RESOLUTION:

(1175-24-A)

WHEREAS, William R. Heins, for Republic Storage Co. Inc., owner, filed, September 27, 1924, an appeal with the board of appeals from a decision of the fire commissioner affecting premises 628-42 West 45th street, Manhattan; and

WHEREAS, the decision of the fire commissioner reads:

"1. Not more than the following number of heads shall be controlled by one Type A dry pipe valve: Standard 1/2 in. heads 400, Type B dry pipe valve, standard 1/2 in. heads 500.

"NOTE: We have no evidence that accelerator has been approved as per Rule No. 3, Board of Standards and Appeals. Letter from Underwriters Laboratories of Chicago or Mutual Laboratories of Boston must be filed."

and

WHEREAS, the building is fireproof, nine stories in height, 72 ft. 11 in. by 141 ft. 5 in. in area; OCCUPIED for the storage of clothing, 115 persons in the entire building; and

WHEREAS, appellant contends that an accelerator has been installed, in the sprinkler system, which reduces the time of tripping of the air valves in the system more than 25 per cent.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the increase in number of heads shall not exceed 25 per cent of that allowed by the existing sprinkler rules controlling dry-pipe valves equipment; and that this sprinkler installation shall comply with the rules in all other respects.

# MINUTES

969-24-A.

APPELLANT—Grinnell Company, Inc., for Walter Shuttleworth, owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—126 Franklin street and 220-224 West Broadway, Manhattan.

APPEARANCES—

For Appellant: R. B. Godley, Jr.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(969-24-A)

WHEREAS, Grinnell Co., Inc., for Walter Shuttleworth, owner, filed, July 25, 1924, an appeal with the board of appeals from a decision of the fire commissioner, affecting premises 126 Franklin street and 220-24 West Broadway, Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered July 25, 1924, in acting on Alteration Application No. 933-23, reads:

"1. No more than 400 heads shall be controlled by one "Type A" dry pipe valve—Rule No. 27.";

and  
WHEREAS, the building is non-fireproof, ten stories in height, 48 ft. by 91 ft. (irregular) in area; proposed occupancy, office building; and

WHEREAS, appellant contends that the dry pipe valves are equipped with "accelerators" which reduce the time of tripping the air valves 90 per cent, and that there are three re department connections, one on each street upon which the premises face, affording a potential auxiliary water supply.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the increase in number of heads shall not exceed 25 per cent of that allowed by the existing sprinkler rules controlling dry-pipe valves equipment; and that this sprinkler installation shall comply with the rules in all other respects.

87-25-A.

APPELLANT—Elk Novelty Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—524 East 187th street, The Bronx.

APPEARANCES—

For Appellant: Morris Hindenberg.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(987-25-A)

WHEREAS, Elk Novelty Co., for Henrietta Godt, owner, filed, September 25, 1925, an appeal from an order of the fire commissioner, affecting premises No. 524 East 187th street, Borough of Bronx; and

WHEREAS, the order of the fire commissioner, dated September 2, 1925, reads (Alt. No. 1601-25):

"You will be required to install an automatic sprinkler system having a two source supply consisting of a pressure tank and gravity tank due to the cellulose oc-

cupancy in order to comply with Order No. 24666-LC of this Department.";

and

WHEREAS, the building is non-fireproof, one story in height, 30 ft. by 75 ft. in area. OCCUPIED: Two stores and a workshop for the manufacture of celluloid buttons, 5 persons; and

WHEREAS, appellant contends that the maximum amount of celluloid on the premises is 250 pounds, stored in an approved fireproof vault located in the rear of the workshop; that the amount of celluloid in work will not exceed 25 pounds, and proposes to install a sprinkler system fed by a 4 in. direct connection to the city water main. A letter from the department of water supply, gas and electricity states that the main in question is fed two ways and that the hydrostatic pressure therein is 45 pounds per square inch.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the quantity of celluloid stock maintained on premises shall not exceed 90 pounds and shall be stored in an approved fireproof vault, located at the extreme rear of the premises, 1st story; that the premises shall be equipped with a sprinkler system with a 4 in. direct connection to the city main; and that the building shall be not increased in height, area or dimension.

160-26-A.

APPELLANT—L. Davidson, for Emil Buff, owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—85-11 127th street, Richmond Hill, Borough of Queens.

APPEARANCES—

For Appellant: L. Davidson.

For Opposition: Rudolph Thies and Carleton F. Wallace.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Absent .....	0

THE RESOLUTION:

(160-26-A)

WHEREAS, L. Davidson, for Emil Buff, owner, filed, February 25, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 85-11 127th street, Borough of Queens; and

WHEREAS, the decision of the superintendent of buildings, rendered December 15, 1925 (Plan No. 22883/25 N. B.), reads:

"The erection of a garage for more than 5 cars in a business district is prohibited by the zone law.";

and

WHEREAS, the proposed building is non-fireproof, one story in height, 20 ft. 9 in., fronting on 127th street, 74 ft. in width at rear, by 100 ft. in depth. OCCUPANCY: Dead storage garage; the south side wall is to be an 8 in. brick party wall, erected along the use district boundary line, 100 ft. north of and parallel with Metropolitan avenue; and

WHEREAS, the appellant contends that the proposed building is to be used for the dead storage of automobiles and as a salesroom; that there will be no storage of gasoline in the cars nor in any other place about the premises; that the building will not be connected by doors to any other building; that the building will be wholly within a business district and used for business purposes in strict accordance with the zone resolution.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

1311-25-A.

APPELLANT—Dairymen's League Co-Operative Association, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—542 East 19th street, Manhattan.

APPEARANCES—

For Appellant: Frank B. Lent and Amos J. Vroman, Jr.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Guilfoyle and Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Holland..... 1

THE RESOLUTION:

(1311-25-A)

WHEREAS, Dairymen's League Co-operative Association, Inc., owner, filed, December 17, 1925, an appeal from an order of the fire commissioner, affecting premises No. 542 East 19th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 17, 1925, reads (Order No. 86797-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.";

and

WHEREAS, the building is fireproof, three stories (70 ft.) in height, 118 ft. by 82 ft. (9,676 sq. ft.) in area; OCCUPIED as a dairy and a pasteurizing plant, 45 persons in entire premises; and

WHEREAS, appellant contends that the building is less than 85 ft. in height and also is less than 10,000 sq. ft. in area.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension; and *granted* so long as the present use and occupancy shall remain unchanged.

1338-25-A.

APPELLANT—H. G. Vogel Company, for Stag Laundry, Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—149 North Fourth street and 148-150 North Fifth street, Brooklyn.

APPEARANCES—

For Appellant: W. P. Thomas.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(1338-25-A)

WHEREAS, H. G. Vogel Company, for Stag Laundry, Inc., owner, filed, December 24, 1925, an appeal from a decision of the fire commissioner, affecting premises 149 North 4th street and 148-50 North 5th street, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered October 19, 1925, reads (Alt. Applic. No. 1509-25):

"1. No more than 80 heads may be taken from 4 in. supply, as per Rule No. 15. Appeal must be made to the Board of Standards and Appeals.";

and

WHEREAS, the premises consist of a three-story non-fireproof building, having a frontage of 75 ft. on North 4th street and a depth of 100 ft.; a two-story non-fireproof building, having a frontage of 35 ft. on North 5th street and a depth of 100 ft., and also a one-story frame building having a frontage of 40 ft. on North 5th street and a depth of 80 ft. OCCUPIED: 1st story, manufacture of rubber goods, 90 persons; the remainder of the premises being occupied as a laundry, 110 persons; and

WHEREAS, appellant contends that the sprinkler system was installed voluntarily, the size, construction and occupancy of the premises not requiring a sprinkler; that the water supply for same consists of one 4 in. connection to the 6 in. city main in North 4th street (main being fed two ways and having a pressure sufficient to afford a pressure of 25 pounds per square inch at the top line of sprinklers); that the 4 in. street connection is increased to 6 in. and carried as such into the premises; and appellant further contends that there is an average of 95 heads per fire area and in the top story that there are installed only 89 sprinkler heads.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height or area; and *granted* only so long as the occupancy and conduct of business maintained on the premises shall be restricted to wet wash laundry.

1341-25-A.

APPELLANT—Victor A. Thomas, for S. S. Glauber, Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—521-529 East 79th street, Manhattan.

APPEARANCES—

For Appellant: Victor A. Thomas.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....  
Absent .....

THE RESOLUTION:

(1341-25-A)

WHEREAS, Victor A. Thomas, for S. S. Glauber, Inc., owner, filed, December 28, 1925, an appeal from a decision of the fire commissioner, affecting premises 521-29 East 7th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered December 3, 1925 (N. B. Applic. No. 444-25), reads:

"2. Thickness of tank material is not in accordance with Fuel Oil Rules.";

and

WHEREAS, the building is fireproof, two stories in height, 125 ft. by 100 ft. in area; OCCUPIED as a warehouse storing plumbing materials; and

WHEREAS, the appellant has buried a storage tank of 500 gallons capacity 2 ft. below the cellar floor, to be used in connection with a fuel oil burning system; the tank being 7 ft. in diameter by 17 ft. 7 in. in length and having convex heads; and

WHEREAS, the appellant claims that the convex heads of the tank are 5/16 in. in thickness; that the shell is ½ in. in thickness; that the tank has been tested to a pressure of 30 pounds without showing defects; that the foundation of solid rock and the tank is buried in concrete.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is

# MINUTES

is granted on condition that the tank shall be entirely encased with 12 in. of cement concrete; that certificate of factory test shall be filed with the fire commissioner; that the storage of oil in said tank shall be restricted to Grade A fuel oil; and that the fuel oil burning equipment shall comply with the fuel oil rules in all other respects.

766-25-A.

APPELLANT—New York Railways Corporation, owner.

SUBJECT—Application for reopening—amendment to resolution—appeal from decision of fire commissioner.

PREMISES AFFECTED—721-725 Lenox avenue, Manhattan.

APPEARANCES—

For Appellant: Eugene J. Noyes.

ACTION OF BOARD—Appeal reopened and resolution modified.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN; TO MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(766-25-A)

WHEREAS, New York Railways Corp., owner, filed, July 4, 1925, an appeal with the board of standards and appeals from an order of the fire commissioner, affecting premises 721-725 Lenox avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"(Re Applic. No. 395-1925)

"6. The entire area of premises must be equipped with a regulation standpipe, independent of the sprinkler system, supplied from a gravity tank 20 ft. above the roof with at least 5,000 gallons reserve. Siamese connections for every 200 ft. of frontage, 5 in. cross-connection, 4 in. risers, with 2½ in. outlets and 2½ in. unlined linen hose, etc.";

WHEREAS, the premises consist of a plot of ground, facing on three street fronts, upon which is located the car house, two and four-story fireproof building, including a portion of the 1st story (50 ft. by 232 ft. in area); OCCUPIED as a garage; and

WHEREAS, appellant contends that the garage portion of the premises is entirely separated by brick walls from the remainder of the premises; that the buildings are protected by a sprinkler system; the source of supply for fire protection being a 60,000-gallon gravity tank (located 75 ft. above the ceiling of the garage), and five (5) 25,000-gallon pressure tanks with 75 pounds air pressure maintained; and

WHEREAS, this appeal was granted by the board at its meeting November 4, 1925, on certain conditions, and appellant requested a modification of these conditions in so far as they affect the car barn portion of the structure.

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted on condition that the entire premises be equipped with an approved wet sprinkler system and that the garage portion of these premises shall be additionally equipped with standpipe system in compliance with the standpipe rules in all respects other than the requirement of a 5,000-gallon gravity tank.

## BUILDING ZONE CASES.

826-25-BZ.

APPLICANT—William F. Doyle, for Alart Building Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a 1½ times height district the erection and maintenance of a street

wall, in part, to a height exceeding the limit required by the zone resolution.

PREMISES AFFECTED—2849-2855 Broadway, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: Henry R. Dwight and William Bonner.

ACTION OF BOARD—Laid over to April 20, 1926, at 2 p. m., for decision by tenement house commissioner.

1268-25-BZ.

APPLICANT—Henry J. Nurick, for Isaac Levin, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7a of the building zone resolution, to permit in a residence district the erection of a proposed extension to an existing factory building.

PREMISES AFFECTED—376-378 Throop avenue, Brooklyn.

APPEARANCES—

For Applicant: Louis Klein, Isaac Levin and Samuel Levin.

For Opposition: None.

ACTION OF BOARD—Laid over to April 6, 1926, at 2 p. m., on request of appellant's representative.

897-25-BZ.

APPLICANT—John W. Dolan, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the erection of a gasoline service station.

PREMISES AFFECTED—Southwest corner of 51st street and Jackson avenue, Corona, Borough of Queens.

APPEARANCES—

For Applicant: John W. Dolan.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

Negative: Chairman Walsh..... 1

Absent ..... 0

THE RESOLUTION:

(897-25-BZ)

WHEREAS, John W. Dolan, owner, filed, September 3, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner Jackson avenue and 51st street, Corona, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jackson avenue and 51st street are in business districts, and that 50th street is in a residence district; and

WHEREAS, the decision of the fire commissioner, rendered June 29, 1925, reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Appeals.";

and

WHEREAS, the premises consist of a plot of ground, 25 ft. by 93 ft., irregular in area, on which it is proposed to install a gasoline selling station with buried storage tanks, pumps and small structure for office, etc.; and

# MINUTES

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that all permits required for the prosecution of the work shall be obtained within six months and the construction work completed within one year from the date of this action.

1317-25-BZ.

APPLICANT—D. S. Morrison, owner.

SUBJECT—Application (re: decision of fire commissioner), under sections 7a and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Southwest corner of Riverdale avenue and West 259th street, The Bronx.

Connell, Holland and Guilfoyle and  
Chief Kenlon ..... 5

Absent ..... 0

THE RESOLUTION:

(1317-25-BZ)

WHEREAS, D. S. Morrison, owner, filed, December 18, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises southwest corner Riverdale avenue and West 259th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Riverdale avenue is in both a residence and a business district; that West 259th street and Netherland avenue are in residence districts; and

WHEREAS, the decision of the fire commissioner, rendered December 14, 1925, reads:

"1. A gasoline service station may not be permitted in a business district.";

and

WHEREAS, the premises consist of a plot of ground, with a frontage of 19 ft. 2 in. and a depth of 76 ft., on which it is proposed to install a gasoline service station; with buried storage tanks, pumps and buildings, etc.; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 7a of the building zone resolution, and that there would not be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the decision of the fire commissioner be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

1334-25-BZ.

APPLICANT—Edward P. Doyle, for Robert R. Meyer, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7c, 7e and 21 of the building zone resolution, to permit partly in a business district and partly in an unrestricted district, the alteration and change of occupancy of a building formerly occupied as a stable to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—136-138 West 4th street, Manhattan.

APPEARANCES—

For Applicant: Edward P. Doyle and Robert R. Meyer.

# MINUTES

## THE RESOLUTION:

(728-24-BZ)

WHEREAS, Philip J. Sinnott, for Helen B. Peckett, owner, filed, May 23, 1924, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 2074-2088 Fulton street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, April 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fulton street is in a business district; that Hopkinson avenue is in a business district, and that Herkimer street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 5, 1924, reads:

"Denied—Proposition contrary to the Zone Resolution, Art. II, Sec. 4. A public garage for more than five motor vehicles in a business district."

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 200 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, this case was filed on May 23, 1924, under section 20; and was denied by the board on October 24, 1924; reopened by the board on April 21, 1925; withdrawn by applicant on May 26, 1925; reopened by the vote of the board on March 9, 1926, on the basis of obtaining consents under section 7g. New consents were filed and these consents with the consents previously filed in the case amount to 80 per cent of the area deemed affected by the board; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 7g of the building zone resolution in that he failed to file 80 per cent of consents of affected property owners.

Resolved, that the decision of the superintendent of buildings be and the same hereby is *affirmed*, and that the application be and it hereby is *denied*.

728-23-BZ.

APPLICANT—John J. Dunnigan, for Hugh A. McGorry, owner.

SUBJECT—Application for extension of permit (re: order of fire commissioner) to permit partly in a business district and partly in a residence district the maintenance of a garage for the storage of three (3) motor vehicles, three (3) spaces rented to persons not residing on the premises.

PREMISES AFFECTED—3420 Olinville avenue, The Bronx.

APPEARANCES—None.

ACTION OF BOARD—Chairman read request for extension; application reopened and permit extended for two years.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN; TO EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Holland, Connell and Guilfoyle.... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(733-23-BZ)

WHEREAS, Edward R. Koch, for Hugh A. McGorry, owner, filed, June 12, 1923, an application, under the building zone resolution, to permit partly in a residence and partly in a business district the maintenance of a garage for the storage of three (3) motor vehicles, spaces rented to persons not residing on the premises; premises 3420 Olinville avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, March 18, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Olinville avenue is a residence district and White Plains avenue is a business district; and

WHEREAS, the order of the fire commissioner, dated January 19, 1923, Order No. 15802-C, reads:

"1. Discontinue the maintenance of a garage which is not an accessory to residence on same lot.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 27 ft. and a depth of 18 ft.; occupied as a garage for three motor vehicles, space for two of which is rented to persons not residing on the premises; and

WHEREAS, under the provisions of section 7, subdivision F, the board is empowered to act; and

WHEREAS, this application was granted by the board at its meeting March 18, 1924, on certain conditions, and the applicant, through his architect, John J. Dunnigan, requested an extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted, conditionally*, for a period of two years from March 18, 1926, on condition that the capacity of the garage be limited to three automobiles of the pleasure car type, space for two of which may be rented to persons not residing on the premises, and on further condition that there be no gasoline storage system maintained on the premises.

Adjourned 1 p. m.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative .....

Absent: Chief Kenlon.....

THE RESOLUTION:

(966-25-A)

WHEREAS, Lena J. Fry, owner, filed, September 17, 1925, an appeal from an order of the fire commissioner, affecting premises on the south side of Kenmore road, 72 feet west of Douglas road, Douglaston, Borough of Queens and

WHEREAS, the order of the fire commissioner, dated August 31, 1925, reads (Order No. 97847 1 C):

"You are hereby notified that an inspection of the above premises, used for the storage of fuel oil, shows that the following must be done before the permit requested by you can be issued:

"FORTHWITH—

"1. Remove all fuel oil until the following order are complied with.

"2. File plans showing the complete installation of the fuel oil burning equipment, as per Rule 16 of the Fuel Oil Rules.

"3. Submit a certificate from the Superintendent of Buildings approving the proposed construction of the tank enclosure and location of the tanks, as per Rule 16 of the Fuel Oil Rules.

"5. Have fuel oil burning device or apparatus of Grade B Fuel Oil approved by the Board of Standards and Appeals as per Rule 35-a of the Fuel Oil Rules.

"6. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals as per Rule 217 of the Fuel Oil Rules.

"7. Provide an automatic shut-off to prevent a normal flow of fuel oil to the burners, as per Rule 22-a of the Fuel Oil Rules.

"9. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B Fuel Oil carrying piping, as per Rule 25, Sec. 2 of the Fuel Oil Rules."

"12. Provide a pilot light for each automatic fuel burning system of an adequate intensity, in each combustion chamber so arranged as not to be easily extinguished, as per Rule 28 of the Fuel Oil Rules."

and

WHEREAS, the building is frame, 1½ stories in height, 45 ft. by 28 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, a fuel oil burning equipment has been installed consisting of a 1,000 gallon tank buried outside the building, an "Electrol" burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant contends: In re Item 2, that the required plans have been filed; re Item 3, that the tank location and enclosure conform with the fuel oil rules; re Items 5 and 6, that application has been made to the board of standards and appeals for the approval of the burner; in re Item 7, that the automatic shut-off is provided of the apparatus; re Item 9, appellant contends that the piping will withstand the required test; and in re Item 12, appellant contends that no pilot light is required in the installation for the reason that it is electrically ignited.

# MINUTES

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary permit as to the use of Electrol burner for a period of ninety days at the owner's risk pending determination by the board on petition for approval of burner for general use, *on condition* that the fuel oil burning equipment installation shall comply with the fuel rules in all other respects.

11-26-A.

APPELLANT—Philip J. Sinnott, for S. Kaplan & Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

THE RESOLUTION:

(181-26-A)

WHEREAS, Philip J. Sinnott, for S. Kaplan & Company, Inc., owner, filed, March 2, 1926, an appeal from an order of the fire commissioner, affecting premises 64-66 Fifth avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 17, 1926 (Order No. 11-A) reads:

"1. A wet automatic sprinkler system, installed as required by the Board of Standards and Appeals, to cover every square foot of the stage, dressing rooms and property room.

"2. Telegraphic communication with Fire Department Headquarters.";

WHEREAS, the building is fireproof, nine stories (120 ft.) in height, 51 ft. 6 3/4 in. by 115 ft. and 125 ft., irregular, depth, about 6,175 sq. ft. in area. OCCUPIED: Basement, 5 dressing rooms and boiler room; 1st story, auditorium, 284 seats; 2nd, 3rd and 4th stories, offices; 5th story, school; 6th story, school and 3 studio apartments; 8th and 9th stories, studio apartments; and

WHEREAS, the appellant contends that sprinkler systems are not required in theatres having less than 300 seats; that this theatre is located on the ground floor of a fireproof building and provided with adequate exits; that the building is provided with a standpipe system, consisting of a gravity tank of 7,500 gallons capacity, located 20 ft. above the roof, which in turn is supplied by a 75 gallon minute automatic pump; that the street main is 6 in. diameter, fed both ways; minimum pressure is 45 lbs.; and

WHEREAS, this appeal was voted upon and denied by the board at its regular meeting held March 23, 1926, and immediately thereafter reconsidered, reopened and set for further hearing April 6, 1926, at 10 a. m. by a second meeting of the board, in order that the appellant may have opportunity to obtain all orders from the fire department on condition that theatrical use shall not be maintained pending determination by the board of any appeal which shall be presented in connection with the use and occupancy of the building; and

WHEREAS, the appellant has filed a copy of the letter addressed to the fire department containing a request for all requirements of the law affecting the premises in question in order that a license for theatrical use may be issued;

WHEREAS, the reply from the fire department, dated March 26, 1926, reads:

"The following requirements, enumerated with the consent of Chief Kenlon, must be complied with be-

fore an approval of license can be recommended. They are based upon Chapter 12, Article 2, Section 20, and Chapter 3, Article 1, Section 8 of the Code of Ordinances:

"1. Provide an asbestos curtain arranged as described in Article 25, Chapter 5, C. O.

"2. Provide skylights to occupy a space equal to one-eighth the area of stage above the same, arranged to open automatically as described in Article 25, Chapter 5, C. O.

"3. Provide a wet automatic sprinkler system, installed in conformity with the regulations of the Board of Standards and Appeals, to cover every square foot of the stage, dressing rooms and property room.

"4. Have all scenery and drops treated with a fireproofing solution.

"5. Install a fire alarm telegraphic communication with this Department."

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

823-25-A.

APPELLANT—H. C. Bohack Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1979-1981 Metropolitan avenue, Maspeth, Borough of Queens.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

THE RESOLUTION:

(823-25-A)

WHEREAS, H. C. Bohack Co., Inc., owner, filed, August 10, 1925, an appeal with the board of standards and appeals from an order of the fire commissioner, affecting premises 1979-1981 Metropolitan avenue, Maspeth, Queens; and

WHEREAS, the order of the fire commissioner, dated July 22, 1925, reads:

"Order No. 82332—Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per sq. in. extending from cellar to roof. \* \* \*";

and

WHEREAS, the building is non-fireproof, one story (15 ft.) in height, 112 ft. by 204 ft. in area; OCCUPIED as a factory, 95 persons; and

WHEREAS, the appellant contends the building is equipped with a sprinkler system, supplied by a tank of 50,000 gallon capacity, 100 ft. above ground; that a watchman makes hourly rounds; that there are two (2) fire hydrants and a 50 gallon Foamite tank within 50 ft. of the building; and

WHEREAS, this appeal was denied by the board at its meeting December 15, 1925, and appellant, through his attorney, William H. Goode, requested a reopening of the case and a rehearing on the ground that there is a concrete driveway leading from Metropolitan avenue and enclosing three sides of the building, approximately 35 ft. in width; that there is a highway giving access to land on the rear; that an approved sprinkler system is installed; that there are two city fire hydrants within 50 ft. on each side of property; no boilers in the building; machinery is operated by electricity and gas is shut off at night.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the present structure shall not be increased in height and that the existing subdivision of the

# MINUTES

floor area shall not be increased; that any horizontal openings shall be equipped with automatic fire doors on both sides; that the present skylight area of present roof shall not be decreased; and that the premises shall be equipped with approved wet automatic sprinkler system throughout; that the fire hydrants now installed in the yard shall be provided with not less than 200 ft. of approved 2½ in. hose and that there shall not be any heating or power generating apparatus installed within the area of building; and *granted* only so long as the conditions as to the use and occupancy otherwise remain unchanged.

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(1086-25-A)

WHEREAS, P. Cousten, one of the lessees, for Bernard Burge, owner, filed, October 24, 1925, an appeal from the order of the fire commissioner, affecting premises No. 102 West 101st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 23, 1925, reads (Order No. 31365-LC):

"With reference to your application dated October 21, 1925, for a permit to store nitro-cellulose products at the above location, I regret to inform you that I am without power to grant such a permit for the following reasons: Section 232, Subdivision 2, Chapter 10, Code of Ordinances, prohibits the storage of nitro-cellulose products in any building.

"2. Which is not equipped with an approved two source system of auto. sprinklers;

"3. Where paints and varnishes are manufactured, stored or kept for sale;

"4. Where matches are stored or kept for sale.

"You are therefore ordered to:

"Remove all nitro-cellulose products from these premises forthwith."

and

WHEREAS, the building is six stories (80 ft.) in height, 100 ft. by 100 ft. 11 in., nearly 10,000 sq. ft. in area, with fireproof floor arch construction; OCCUPIED for the manufacture of furniture, underwear, fountain pens, perfumes and celluloid articles; about 35 persons on each story; and

WHEREAS, the appellant, who occupies the 6th story for the manufacture of celluloid articles, claims that the building is provided with an automatic sprinkler system connected with the national district office by telegraphic alarm, and supplied by a 12,000 gallon gravity tank; that 10,000 pounds of celluloid is stored in a fireproof vault on the roof; that only 100 pounds of celluloid is used in the course of work; that the only paint, varnish and matches kept on the premises is that which is sold retail by the Woolworth store on the first story, and for which a permit has been issued by the fire department; and

WHEREAS, this appeal was denied by the board at its meeting February 23, 1926, and the present lessee, through its representative, W. F. Doyle, requested a reopening of the case, and proposed to reduce quantity of celluloid stored

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Items 3 and 4, on condition that the location of any paints and varnishes shall be restricted to the first story, maintained in metal containers of small unit capacity for retail sale, and *granted on further condition* that the quantity of matches maintained on the premises shall be restricted to a quantity within that permitted under fire department permit, maintenance and storage to be limited to the 1st story; that the celluloid use and occupancy shall be restricted to the top story, and that the quantity of celluloid maintained on the premises shall not exceed 500 pounds; and shall be stored in an approved vault or cabinet and not more than 100 pounds to be in use at one time.

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(665-25-A)

WHEREAS, F. P. Keniston, for Spring Products Corporation, lessee, filed, June 26, 1925, an appeal, with the board of standards and appeals, from an order of the fire commissioner, affecting premises 2505 Third avenue, The Bronx, and

WHEREAS, the order of the fire commissioner, No. 291 LD, reads:

"1. Provide an approved buried storage system of sufficient capacity for the proper storage of benzine;

"2. Discontinue the storage or use of benzine in the same room or compartment where there is an open flame."

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 90 ft. in area; OCCUPIED for the manufacture of springs, shipping and japanning on the 1st story; a total of 58 persons in the entire building; and

WHEREAS, appellant contends that they store only 50 gallons of benzine, which is used to thin the lacquer in the dipping room, which room is enclosed in fireproof partitions, and that this room is 12 ft. from the gas fire where the springs are baked, and requests permission to have a portable safety tank; and

WHEREAS, this appeal was granted by the board at its meeting October 20, 1925, on certain conditions, and appellant requested a modification of these conditions.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the quantity of benzine stored on the premises shall not exceed 50 gallons, stored in metal drums buried below grade in the rear of present main structure; vented to outer air above 1st story level; that the dipping room shall be constructed of masonry not to exceed a height

# MINUTES

one story at the rear of premises with walls and roof pierced, with the exception of one door opening, equipped with metal doors, and a ventilator in roof; and that no empty line or benzine drum shall be maintained or stored in any of premises; and that the opening in the rear wall to platform of dipping room shall be equipped with self-closing fireproof door.

## THE RESOLUTION:

(375-23-BZ)

WHEREAS, Thomas W. Lamb, for B. F. Keith's New York Theatre Company, owner, filed, March 28, 1923, an application, under the building zone resolution, to permit in a resi-

# MINUTES

dence district extending from a business district the erection and maintenance of a building for theatre purposes; premises 109 East Fordham road, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East Fordham road is in a business district, and that Morris avenue and East 190th street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 3, 1925, reads:

"1. Erection of proposed place of public assembly in business district extending into residence district is contrary to provisions of Building Zone Resolution.";

and  
WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 40 ft. on East Fordham road and 111 ft. 9 in. on Morris avenue, irregular in area; to be occupied as a theatre; and

WHEREAS, this application was withdrawn July 15, 1924, and reopened by vote of the board October 20, 1925; and

WHEREAS, the board deemed the applicant was entitled to relief under section 7c of the building zone resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be erected in accordance with the requirements of section 25 of the code of ordinances; that there shall be no openings from the theatre within the residence use district on the Morris avenue front, other than the emergency exits required by law; that there shall be no advertising signs, billboards or display permitted on the Morris avenue front of the structure; that the street wall of the Morris avenue front shall be finished in face brick, with architectural terra cotta or stone trimmings; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1268-25-BZ.

APPLICANT—Henry J. Nurick, for Isaac Levin, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7-a of the building zone resolution, to permit in a residence district the erection of a proposed extension to an existing factory building.

PREMISES AFFECTED—376-378 Throop avenue, Brooklyn.

APPEARANCES—

For Applicant: Henry J. Nurick.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(1268-25-BZ)

WHEREAS, Henry Nurick, for Isaac Levin, owner, filed, December 9, 1925, an application, under the building zone resolution, to permit in a residence district the erection of a proposed extension to an existing factory building; premises 376-378 Throop avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 6, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that DeKalb avenue is in a business district; that Kosciuszko street is in a residence district; and that the northeast and northwest corners of Throop avenue and Lafayette avenue are in a business district;

WHEREAS, the decision of the superintendent of buildings rendered November 12, 1925, reads:

"1. Proposed erection of four-story brick addition to present factory in a residence district is contrary to Art. 2, Section 3 of Zoning Resolutions, and is hereby denied.";

and

WHEREAS, the existing factory is non-fireproof, six stories in height, 20 ft. by 83 ft. in area; it is proposed to erect to the north a four-story non-fireproof addition, 22 ft. by 90 ft. in area; to be occupied for factory purposes; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7a of the building zone resolution as an extension of existing adjoining factory use occupancy.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, so far as it affects the zoning restriction, *on condition* that the proposed addition shall be an extension to the existing factory structure in the same ownership; and that the building shall comply with the labor law requirements in all respects; all permits necessary for the prosecution of the work to be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1148-22-BZ.

APPLICANT—Morris & McVeigh, owner.

SUBJECT—Application for reopening—extension of time (re: decision of superintendent of buildings) to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—West side of Walton avenue and east side of Gerard avenue, 80 ft. south of 149th street, The Bronx.

APPEARANCES—

For Applicant: Joseph L. Johnson and John Jacobs.

For Opposition: None.

ACTION OF BOARD—Application reopened and extended.

THE VOTE TO REOPEN AND TO EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(1148-22-BZ)

WHEREAS, Lewis Spencer Morris, owner, filed, September 26, 1922, an application, under the building zone resolution, to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five motor vehicles; premises west side of Walton avenue and east side of Gerard avenue, 80 ft. south of 149th street, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals at its regular meeting, December 12, 1922, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Walton avenue and Gerard street are business districts and Gerard avenue is an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings rendered September 19, 1922, in acting on N. B. No. 28 reads:

# MINUTES

"1. Erection of proposed garage for storage of more than five motor vehicles extending into business district is contrary to provisions of Building Zone Resolution.";

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 180 ft. and a depth of 120 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the applicant has filed the duly acknowledged minutes of the owners of 87 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this appeal was granted by the board at its meeting on December 12, 1922, on certain conditions, and applicant requests an extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the northerly and southerly gable walls be unpierced throughout their entire length and height, and that there be no vehicular entrance or exit within the business district within 15 ft. of East 149th street on either the Walton avenue or Gerard avenue fronts of this building, and that the front elevations be faced with front brick and stone or terra cotta trimmings;

Resolved, further, that all permits necessary for the prosecution of the work be obtained within six months and the building completed within six months from the date of this decision.

7-BZ.

APPLICANT—Charles S. Clark, for 54th Street Holding Corp., owner.

SUBJECT—Application for reopening—extension of time (re: decision of superintendent of buildings) to permit the conversion of an existing stable into a garage in a business district.

PREMISES AFFECTED—103-105 West 53rd street and 104-106 West 54th street, Manhattan.

APPEARANCES—

For Applicant: Rudolph Ludwig.

For Opposition: None.

ACTION OF BOARD—Application reopened, modified and time extended.

THE VOTE TO REOPEN AND TO EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(92-17-BZ)

WHEREAS, William F. Doyle, for 54th Street Holding Corp., owner, filed, January 23, 1917, an application, under building zone resolution, to permit in a business district the conversion of a stable for more than five (5) motor vehicles into a garage for more than five (5) motor vehicles; premises 103-5 West 53rd street and 104-6 West 54th street, Manhattan; and

WHEREAS, a public hearing was held on this application before the board of appeals, at its regular meeting, October 24, 1924, after due notice by publication in the Bulletin of Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 53rd street and 54th street are in business districts; and

WHEREAS, it is proposed to alter an existing four-story fireproof building, 50 ft. by 200.10 ft. in area, now used for stable and wagon storage, into a garage for more than five motor vehicles; and

WHEREAS, this application was granted by the board on January 20, 1917, but owner failed to commence work in accordance with conditions in the material and labor market; and the case was reopened and a modification and an extension

of time granted October 14, 1924, and applicant requests a further extension of time; and

WHEREAS, the board deemed there would be a hardship in preventing applicant from making the proposed change owing to the character of surrounding buildings and the former action of the board.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be fire retarded throughout in accordance with the rules of the board of standards and appeals, and that it shall comply with the building code in all respects; that the 54th street front shall be restricted to one emergency vehicular exit; that there shall be no ramp entering from or exiting to the 54th street front; that any ramp construction on the 53rd street front shall be set back not less than 15 ft. from the front of the building; that there shall not be more than one projecting illuminated sign permitted on the 54th street front; that any gasoline storage equipment plant shall be installed on the 53rd street front of the building; that the building be completed by May 14, 1926.

APPLICANT—Gardiner Conroy, for O'Hara Realty Co., owner.

SUBJECT—Application for approval of plans in accordance with resolution adopted November 4,

1925 (re: decision of superintendent of buildings), as amended April 6, 1926.

PREMISES AFFECTED—507-511 Flatbush avenue and 1118-1122 Washington avenue, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Plans approved as being substantial compliance with the conditions imposed by the resolution, as amended April 6, 1926.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative .....

Absent: Chief Kenlon .....

AREA FIXED.

(17-26-BZ)

The chairman presented and read a communication from William F. Doyle, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 168-170 East 98th street, Brooklyn.

The following area was approved by the board:

Both sides of East 98th street from the easterly side of Clarkson avenue and its prolongation to a point 100 ft. west of the westerly side of Winthrop street to the property in the rear and for 50 ft. on either side of the lot line of the premises in question.

Adjourned 5.30 p. m.

WILLIAM J. O'GORMAN, Secretary.

## MINUTES

\*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, January 19, 1926, as they appeared in Bulletin No. 4, Vol. XI, are hereby corrected to read as follows:

969-25-A.

APPELLANT—Henry J. Nurick.

\*Correction—Words "superintendent of buildings" substituted for "fire commissioner" in line 3.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—24 Myrtle avenue, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Appeal withdrawn.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioner Connell, Flanagan, Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

Cases listed in the Reserve Calendar are cases upon which action by the board has been deferred pending committee reports, of this board, court or department actions, and will remain thereon until the aforesaid reports, court or departmental actions are consummated. Whereupon the case or cases will be restored to the regular calendar and due notice of the date set for hearing will be mailed to the appellant, applicant or petitioner of record.

# RULES

## FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

### DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly vacating of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

#### Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 and in any other building in which the Fire Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter, it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter in the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

..... " " 5.....  
..... " " 6.....

#### Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, force and have full charge of the "Fire Drill" in every story on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc., are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders shall be final as to the carrying out of the fire drill on his particular floor.

#### Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. WATCHMEN shall be the only persons permitted to remain on the floor during the progress of a fire drill and do so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned by consent in writing from Fire Commissioner.

#### Rule 4. Duties of Searchers.

The MALE and FEMALE SEARCHERS shall search all toilets, dressing rooms and emergency rooms used frequently by their sex and all other portions of the building and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist all persons who may faint or be disabled.

SEARCHERS shall leave the floor immediately after the last squad leaves.

#### Rule 5. Duties of Street Alarm Box Runner.

The STREET ALARM BOX RUNNER shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the STREET-ALARM BOX-RUNNER shall report to the Foreman for orders and if his services are not required he shall promptly leave the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the STREET-ALARM-BOX-RUNNER proceed to the street alarm box and send in the fire alarm.

# RULES

## Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the fire department, any fire that may occur. When it is necessary for the fire brigade to respond to different fires in the building they shall not use the stairways or escapes while the occupants are escaping from the premises.

## Rule 7. Duties of Exit Guards.

The EXIT GUARDS shall station themselves at all exits leading to fire escapes, stairways and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the doors open and direct the movements of the persons using these exits and prevent congestion. EXIT GUARDS shall remain at their stations until all the occupants of the building have passed their stations. Then close their doors and pass out of the building. Upon signal for the occupants to return, EXIT GUARDS shall take their designated stations and remain there until all persons have returned to their respective floors.

## Rule 8. Duties of Squad Monitors.

The SQUAD MONITORS, as soon as the alarm is sounded, shall see that the employees under their charge immediately form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all exits and passageways are cleared of obstructions.

Note: Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches.

MONITORS shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the EXIT GUARDS.

On reaching the sidewalk MONITORS shall keep their squads in order and lead them a reasonable distance from the building, so as not to cause congestion and interference with the fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads.

MONITORS will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

## Rule 9. Holding of Drills.

FIRE DRILLS shall be held at least once each month during the hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct the occupants to a place of safety.

Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm

rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the persons on the premises engaged at work for a factory, and drills shall be conducted at least twice each year in which all of the persons on the premises shall participate simultaneously.

## Rule 10. Duties of Owner.

It shall be the duty of the OWNER, LESSEE OR TENANT OF THE BUILDING or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any FIRE DRILL in which all of the occupants do not participate shall not be considered as complying with the LAW, except as otherwise provided in these rules.

The person or persons representing the OWNER, LESSEE OR TENANT who supervises the FIRE DRILL at the building shall submit to an examination by the Bureau of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing by the FIRE COMMISSIONER.

## Rule 11. Duties of Engineer.

It shall be the duty of the ENGINEER, SUPERINTENDENT or other PERSON IN CHARGE of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and to see that all apparatus operated by springs requiring winding are rewound after each alarm and kept in normal condition for operation.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the PERSON IN CHARGE OF BUILDING will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc., are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of the alarm signals.

It shall also be the duty of the PERSON IN CHARGE OF BUILDING to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The PERSON IN CHARGE OF BUILDING must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

## Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire of Form 13A, for notices to property owners, such forms are not to be supplied by this office. Each applicant is entitled only to one copy of Form 13A, and only one filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Telephone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 2 noon.

All communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Docket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, April 13, 1926, at 10 a. m.

Minutes of Regular Meeting, April 13, 1926, at 2 p. m.

Correction.

First Quarterly Report.

Rules.

Notice of Public Hearing.

Progress Report.

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 20, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, April 27, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## MINUTES

### BOARD OF STANDARDS AND APPEALS

#### REGULAR MEETING.

TUESDAY MORNING, APRIL 13, 1926.

Present: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon.

The minutes of the regular meeting of the board, held on Tuesday morning, April 6, 1926, and the minutes of the regular meeting of the board, held on Tuesday afternoon, April 6, 1926, were approved as printed in the Bulletin, No. 15, Vol. XI.

71-21-A.

APPELLANT—James M. Vincent, for August Heckscher, owner.

SUBJECT—Application for reopening—modification of resolution—appeal from decision of superintendent of buildings.

PREMISES AFFECTED—1230-1237 Fifth avenue, Manhattan.

APPEARANCES—

For Appellant: James M. Vincent.

ACTION OF BOARD—Laid over to April 27, 1926, at 10 a. m.

12-26-A.

APPELLANT—Samuel Rosenblum, for Ideal Cleaners & Dyers, Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—239 Nostrand avenue, Brooklyn.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Laid over to May 4, 1926, at 2 p. m., on request.

23-26-A.

APPELLANT—Samuel Rosenblum, for Neivel Realty Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—West side of Van Alst avenue, 238 ft. south of South Jane street, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Laid over to April 20, 1926, at 2 p. m., to submit certificate of occupancy or approval of plans.

26-26-A.

APPELLANT—Frank H. Bulley, for May H. Bulley and Lillie E. Crary, owners.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—355 Adams street, Brooklyn.

APPEARANCES—None.

ACTION OF BOARD—Chairman read request to withdraw; appeal withdrawn.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent: Commissioner Connell.....

1343-25-A.

APPELLANT—William Koehler, for Ferdinand Munch Brewery, owner.

SUBJECT—Appeal from order of superintendent of buildings.

PREMISES AFFECTED—285-289 Vernon avenue, Brooklyn.

APPEARANCES—

For Appellant: James J. Sullivan and Charles Werner.

ACTION OF BOARD—Appeal granted on conditions specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent: Commissioner Connell.....

#### THE RESOLUTION:

(1343-25-A)

WHEREAS, William Koehler, for Ferdinand Munch Brewery, owner, filed, December 28, 1925, an appeal from order of the superintendent of buildings, affecting premises 285-289 Vernon avenue, Borough of Brooklyn; and

WHEREAS, the order, No. 6854/25, of the superintendent of buildings, rendered November 19, 1925, reads:

"Parapet wall not carried up three feet above level. In violation of Art. 13, Sec. 259 of the Building Code. Brick corbel at top of piers not properly bonded. In violation of Art. 13, Sec. 252 of the Building Code."

"You are required to build parapet wall 3 ft. above roof and properly bond brick work.";

and

WHEREAS, the building is non-fireproof, five stories high, 84 ft. 6 in. by 62 ft. 6 in., divided into two sections by a fire wall; the easterly half used for cold storage, the westerly half occupied as an ice plant; and

WHEREAS, the two upper stories of the westerly half of the building were wrecked by fire in May of 1925, and have since been repaired and the fire wall which closed the premises is erected to a point 14 in. above the roof and

WHEREAS, the petitioner claims that the brick corbel at top of piers has been done according to law, and that the fire wall has been rebuilt to its original height and coping.

# MINUTES

*Resolved*, that the order of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the repair of the parapet wall where damaged by fire, *on condition* that the restored portion of parapet wall shall be constructed to the height of the original existing parapet wall; *granted* only so long as the conditions as to the height of the abutting buildings remain substantially unchanged; *denied* as to the loading of brick corbels.

26-A.  
APPELLANT—John J. Gilmartin, for Estate of Clifford Seasingood, et al., owners.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—83-85 Greene street and 128-132 Spring street, Manhattan.

APPEARANCES—  
For Appellant: John J. Gilmartin.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Connell..... 1

THE RESOLUTION:  
(1-26-A)  
WHEREAS, John J. Gilmartin, for Estate of Clifford Seasingood, et al., owner, filed, January 2, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 83-85 Greene street and Nos. 128-132 Spring street, Borough of Manhattan; and  
WHEREAS, the order of the fire commissioner, dated November 24, 1925, reads (Order No. 87226-F):

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

WHEREAS, the building, facing on two street fronts, is non-fireproof, six stories (88 ft. 6 in.) in height, 51 ft. by 10 ft. (5,100 sq. ft.) in area. OCCUPIED: 1st story, manufacture of paper boxes, 25 persons; upper stories, tenement factory, 25 persons per story; and  
WHEREAS, appellant contends that the building is amply provided with exits; that it is equipped with a two source sprinkler system, supplied from a 7,500 gallon gravity tank and a 5,000 gallon pressure tank, with central office connections.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that an approved two (2) source sprinkler system, with central office connection, shall be maintained, and that the building shall be not increased in height, area or dimension, and *granted* only so long as conditions otherwise as to use and occupancy remain substantially unchanged.

25-A.  
APPELLANT—Lena Dubin for H. Z. Dubin, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—305 East 170th street, The Bronx.

APPEARANCES—  
For Appellant: Lena Dubin.  
For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief Kenlon ..... 4  
Negative ..... 0  
Absent: Commissioner Connell..... 1

## THE RESOLUTION:

(213-25-A)

WHEREAS, Lena Dubin, for H. Z. Dubin, owner, filed, February 24, 1925, an appeal from an order of the fire commissioner, affecting premises No. 305 East 170th street, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated June 20, 1924, reads (Order No. 24681-LC):

"Referring to your application dated May 20, 1924, for a permit to maintain a non-storage garage at the above location, I regret to inform you that your application for such permit has been disapproved for the following reasons:

"A.—More than two stories immediately above garage occupied as a dwelling. Section 154, Chapter 10, Code of Ordinances.

"B.—Building occupied as a dwelling by more than two families. Section 154, Chapter 10, Code of Ordinances.

"C.—Boiler is not separated from the remainder of the building by an unpierced fireproof wall consisting of solid masonry of at least 8 inches in thickness or its equivalent. Section 159-1, Chapter 10, Code of Ordinances.

"D.—Signs prohibiting smoking not displayed. Section 8, Chapter 10, Code of Ordinances.

"E.—Three fire buckets filled with sand not provided. Section 159-2, Chapter 10, Code of Ordinances.

"F.—One waste can with self-closing cover for oily waste rags not provided. Section 159-3, Chapter 10, Code of Ordinances.

"You are, therefore, hereby, ordered to:

"1. Discontinue the maintenance of a garage on these premises."

and

WHEREAS, the building is non-fireproof, three stories and cellar in height, 25 ft. by 70 ft. in area. OCCUPIED: Cellar, private garage for two cars; 1st story, store; 2nd and 3rd stories, one living apartment on each story. EXITS: Party wall outside iron balcony at 2nd and 3rd stories in west yard court; and

WHEREAS, this appeal was dismissed by the board October 9, 1925, for lack of prosecution; and

WHEREAS, the appellant contends that the garage is entirely separated from other parts of the cellar by masonry walls, 20 in. in thickness, the ceiling is constructed of hollow tile blocks, 4 in. in thickness, with two coats of cement mortar and ½ in. plaster boards; that proper means of egress in case of fire is provided for living apartments on 2nd and 3rd stories.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to objection "A," *on condition* that not more than two (2) families shall occupy the premises above the store occupancy; *granted*, as to objection "C," *on condition* that the garage shall be separated from the boiler room by an unpierced 8 in. brick wall, and that the ceiling of the garage portion of the structure shall be fire retarded and fire stopped at the angles formed by the ceiling and side walls; *denied*, as to objections "B," "D," "E," "F"; and *granted on further condition* that a party wall fire escape shall be provided at the 2nd and 3rd story level, connecting with premises directly to the west, and that the occupancy of the garage shall be limited to two (2) automobiles of the pleasure car type, the property of the owner or occupant of the premises, and that there shall be no gasoline storage equipment installed or maintained on the premises.

# MINUTES

1247-25-A.

APPELLANT—Emil Guterman, for DeMuth Glass Mfg. Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Southeast corner of Lombardy street and Scott avenue, Brooklyn.

APPEARANCES—

For Appellant: Emil Guterman.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Connell..... 1

THE RESOLUTION:

(1247-25-A)

WHEREAS, Emil Guterman, for DeMuth Glass Mfg. Co., lessee, filed, December 4, 1925, an appeal from an order of the fire commissioner, affecting premises southeast corner of Lombardy street and Scott avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 4, 1925, reads (Order No. 96170-LC):

"2. Provide a space of at least six inches between enclosure walls and fuel oil storage tank or tanks, as per Rule 4, Sec. 1-a of the Fuel Oil Rules.

"3. Construct fuel oil storage tank enclosure consisting of walls, floor and roof of reinforced concrete of not less than eight (8) inches in thickness or twelve (12) inches of masonry, as per Rule 4, Sec. 1-a.

"4. Erect walls of fuel oil tank enclosure to a height not less than one (1) foot above the top of tank, as per Rule 4, Sec. 1-b of the Fuel Oil Rules.

"6. Provide a manhole in tank enclosure and a fireproof cover properly weighted, immediately above manhole in fuel oil storage tank, as per Rule 4, Section 1-c of the Fuel Oil Rules.

"7. Fill space between fuel oil storage tank and the enclosure with dry upland sand or earth well tamped, as per Rule 4, Sec. 1-e of the Fuel Oil Rules.

"8. Provide a separate enclosure for each fuel oil storage tank, as per Rule 4, Sec. 1-f of the Fuel Oil Rules.

"9. Provide a firm foundation for each fuel oil storage tank, as per Rule 4, Sec. 2-c of the Fuel Oil Rules.

"16. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 25 lbs. per square inch, for all riveted tanks, as per Rule 7, Sec. 1-b of the Fuel Oil Rules.

"17. Provide a hydrostatic test of not less than 150 pounds per square inch for all fuel oil carrying piping of a normal working pressure of less than 100 pounds, as per Rule 8, Sec. 3 of the Fuel Oil Rules.

"30. File plans showing the complete installation of the fuel oil burning equipment, as per Rule 16 of the Fuel Oil Rules.

"31. Submit a Certificate from the Superintendent of Buildings, approving the proposed construction of the tank enclosure and location of the tanks, as per Rule 16 of the Fuel Oil Rules."

and

WHEREAS, the building is of frame construction, one story and cellar in height, 200 ft. by 125 ft. in area; OCCUPIED for the manufacture of glass, 30 persons. Two separate and independent fuel oil burning systems having been installed; system No. 1 consists of two storage tanks, 3,400 and 3,800 gallons capacity, placed in concrete with fireproof roof and located 75 ft. from the main building; two approved Gould pumps installed in the cellar and connected up to furnaces using three Anthony Nebulyte burners; and

WHEREAS, the appellant contends that the fuel oil burning system No. 1 has been installed since 1915, prior to the enactment of the present fuel oil rules; and that the installation complied with all requirements of the fire department at that time.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the use and operation of this plant shall be restricted to the industrial operation of a glass works, and that an approved burner shall be installed and maintained and that the oil storage shall be limited to Grade "A" fuel oil, stored in two (2) metal tanks, each tank to be equipped with a manhole cover, located on the outside of the main building, enclosed in a concrete structure; granted only so long as the existing use and operation remain unchanged.

1248-25-A.

APPELLANT—Emil Guterman, for DeMuth Glass Mfg. Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Southeast corner of Lombardy street and Scott avenue, Brooklyn.

APPEARANCES—

For Appellant: Emil Guterman.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Holland and Guilfoyle and Chief

Kenlon ..... 4

Negative ..... 0

Absent: Commissioner Connell..... 1

THE RESOLUTION:

(1248-25-A)

WHEREAS, Emil Guterman, for DeMuth Glass Mfg. Co. lessee, filed, December 4, 1925, an appeal from an order of the fire commissioner, affecting premises at the intersection of Lombardy street and Scott avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated May 4, 1925, reads (Order No. 96171-LC):

"7. Remove rust proofing material from seams of tank so that proper test can be made, as per Rule Sec. 5 of the Fuel Oil Rules.

"12. Place fuel oil storage tank or tanks in permanent position and make hydrostatic test in the presence of an inspector from the Fire Department, as per Rule 7, Sec. 1-a of the Fuel Oil Rules.

"13. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 25 lbs. per square inch, for all riveted tanks, as per Rule 7, Sec. 1-b of the Fuel Oil Rules.

"18. Provide a hydrostatic test of not less than 150 pounds per square inch for all fuel oil carrying piping of a normal working pressure of less than 100 lbs., as per Rule 8, Sec. 3 of the Fuel Oil Rules.

"22. Remove receiver terminal of fill pipe to fuel oil storage tank as remote as practicable from building openings, as per Rule 8, Sec. 5-b of the Fuel Oil Rules.

"33. Provide fuel oil pump or pumps of a type approved by Board of Standards and Appeals, as per Rule 11, Sec. a of the Fuel Oil Rules.

"35. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals, as per Rule 27 of the Fuel Oil Rules.

"37. File plans showing the complete installation of the fuel oil burning equipment, as per Rule 16 of the Fuel Oil Rules.

"38. Submit a Certificate from the Superintendent of Buildings, approving the proposed construction

# MINUTES

the tank enclosure and location of the tanks, as per Rule 16 of the Fuel Oil Rules.”;

and  
WHEREAS, the building is of frame construction, one story and cellar in height, 200 ft. by 125 ft. in area; OCCUPIED for the manufacture of glass, 30 persons. Two separate and independent fuel oil burning systems having been installed; system No. 2 consists of an outside storage tank, 4 ft. by 6 ft. by 6 ft., buried below the grade, connected with an approved American pump, operated by compressed air, using a Maxim Premier burner; and

WHEREAS, the appellant contends that the fuel oil burning system No. 2 has been installed since 1879, prior to enactment of the present fuel oil rules; that the installation complied with all requirements of the fire department at that time; and, furthermore, that changes were made to this system to comply with requests of the fire department in 1923.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the use and operation of the oil burning system shall be limited to the present industrial glass plant and that the use of the oil shall be restricted to grade “A” fuel oil, with a flash point of not less than 80 degrees, and that the quantity of oil stored shall be limited to 1,200 gallons, stored in a metal tank, at the rear of the premises in the open yard, buried below ground, and that the plant shall be operated with an approved oil burner, and that the conditions as to size and area of plant shall be not increased.

1329-25-A.

APPELLANT—Louis A. Sheinart, for Morris Drapkin, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—23-29 Bond street, Manhattan.

APPEARANCES—

For Appellant: Louis A. Sheinart.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative ..... 0

Absent: Commissioner Connell..... 1

THE RESOLUTION:

(1329-25-A)

WHEREAS, Louis A. Sheinart, for Morris Drapkin, owner, filed, December 22, 1925, an appeal from a decision of the fire commissioner, affecting premises Nos. 23-29 Bond street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated December 17, 1925, reads (N. B. Applic. No. 452-25):

“1. Sump pit may not be permitted.”;

and  
WHEREAS, the building is non-fireproof, two stories and basement in height, 100 ft. by 110 ft. in area; OCCUPIED a public garage, 15 persons in entire premises; and

WHEREAS, appellant contends that the street sewer is approximately 3 ft. above the basement floor level; that the waste from the sump pit is pumped into the oil separator and that without the sump pit, the basement could not be used as a garage.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the drainage of the basement story, *on condition* that an automatic pump shall be provided for discharge from the pit, and that a weighted metal cover shall be provided to the sump pit at the cellar floor level.

1339-25-A.

APPELLANT—The Peelle Company, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—47-65 Stewart avenue, Brooklyn.

APPEARANCES—

For Appellant: Henry E. Peelle.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

Negative ..... 0

Absent: Commissioner Connell..... 1

THE RESOLUTION:

(1339-25-A)

WHEREAS, The Peelle Company, owner, filed, December 24, 1925, an appeal from an order of the fire commissioner, affecting premises Nos. 47-65 Stewart avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 1, 1925, reads (Order No. 87098-F):

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure.”;

and

WHEREAS, the building is non-fireproof, a portion on the Harrison place front being two stories (31 ft. 6 in.) in height, and the remainder being one clerestory (approximately 30 ft.) in height; having a frontage of 200 ft. on Stewart avenue, 58 ft. on Harrison place and 164 ft. 8 in. on Ingraham street, a total area of 20,250 sq. ft. (inside dimensions); OCCUPIED for the manufacture of fireproof doors, 120 persons in entire premises; and

WHEREAS, appellant contends that the building is low in height and accessible on all sides; that there are four city fire hydrants within 200 ft. of the premises; that there is installed a watchman service and time detectors and also direct telegraphic communication with fire headquarters.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that all required portable fire fighting equipment as ordered by the fire commissioner shall be provided and that the building shall be not increased in height, area or dimension, and that the present occupancy and use shall remain unchanged.

49-26-A.

APPELLANT—William F. Doyle, for Walter D. Strang, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—279-281 Greene avenue, Brooklyn.

APPEARANCES—

For Appellant: William F. Doyle.

For Administration: Inspector Maher of fire department.

WHEREAS, William F. Doyle, for Walter D. Strang, owner, filed, January 21, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 279-81 Greene avenue, Borough of Brooklyn; and

# MINUTES

WHEREAS, the order of the fire commissioner, dated January 5, 1926, reads (Order No. 88587-F):

"Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply \* \* \*";

and

WHEREAS, the premises consist of two fireproof reinforced concrete buildings, No. 279 being four stories in height, 25 ft. by 75 ft. in area at 1st story and 25 ft. by 50 ft. in area above, and No. 281 being three stories in height, 25 ft. by 75 ft. in area, separated into two sections by a brick wall with openings therein protected by fireproof self-closing doors; OCCUPIED for the storage of furniture, 1 person in the entire premises; and

WHEREAS, appellant contends that the building is small in area; that there are no lights above the 2nd story; that adequate aisle space has been provided and that the only portion of the building which is heated is the office, and that this heat is supplied from an adjoining building.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that all portable fire fighting equipment as ordered by the fire department shall be installed and that not less than two enclosed fireproof stairways shall be provided and maintained in the premises and that the building shall be not increased in height, area or dimension.

THE RESOLUTION:

(943-25-BZ)

WHEREAS, Luke Flanagan, for J. I. and C. Stein Corporation, owner, filed, September 15, 1925, an application, under the building zone resolution, to permit in a business district the use of an existing building as a motor vehicle repair shop; premises 406 East 77th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 77th street is in a business district; that East 76th street is in an unrestricted district, and that First avenue is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered August 18, 1925, reads:

"With reference to your application dated June 23, 1925, for a permit to conduct business as above at 406 East 77th Street, Manhattan, this location appears to be shown on the use district map accompanying the building zone resolution of the Board of Estimate and Apportionment as a business district. Inasmuch as you are conducting or propose to conduct a business which is a prohibited use at this location, your application is denied."

and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 19 ft. 4 in. and a depth of 95 ft.; to be occupied as a motor vehicle repair shop on 1st story and an electrician's shop on 2nd story; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that there shall be no gasoline storage equipment installed on the premises; that motor vehicle repair work conducted on the premises be restricted to the first or ground floor, limited to minor repairs and adjustments of manual operation; that no anvil, no open forge or flame, and no motor-driven machinery, other than a one horsepower electric drill, shall be maintained on the premises; that the building shall not be increased in height, area or dimensions; and that the gable walls shall be unpierced throughout their entire height and length.

1250-25-BZ.

APPLICANT—Charles J. Pintell, for Kojo Realty Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a poultry slaughter house.

PREMISES AFFECTED—8165-8167 New Utrecht avenue, Brooklyn.

APPEARANCES—

For Applicant: Charles J. Pintell.

For Opposition: Thomas F. Powers.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative: Commissioner Guilfoyle..... 1

Negative: Chairman Walsh, Commissioner Holland and Chief Kenlon ..... 3

Absent: Commissioner Connell..... 1

THE RESOLUTION:

(1250-25-BZ)

WHEREAS, Charles J. Pintell, for KOJO Realty Corporation, owner, filed, December 4, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a poultry slaughter house; premises 8165-8167 New Utrecht avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 13, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that New Utrecht avenue is in a business district; that 84th street is in a business district, and that Eighteenth avenue is in a business district; and

# MINUTES

WHEREAS, the decision of the superintendent of buildings, rendered September 10, 1925, reads:

"1. Denied; contrary to Art. II, Sec. 4 (a) 38, Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 40 ft. and a depth of 52 ft.; to be occupied as a poultry slaughter house; and

WHEREAS, the board deemed that applicant was not en-

titled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commission-  
ers Connell, Flanagan and Guilfoyle .... 4

Negative ..... 0

Absent: Fire Chief Kenlon ..... 1

THE RESOLUTION:

(560-25-BZ)

WHEREAS, Charles Kreymborg, for Cerussi Contracting  
Company, owner, filed, May 29, 1925, an application, under  
building zone resolution, to permit the extension from  
unrestricted district into a business district of a pro-  
posed garage for the storage of more than five motor ve-

Correction—"4583" changed to "4582" in line 9 and 29.

hicles; premises 4582 Third avenue, Borough of The Bronx;  
and

WHEREAS, a public hearing was held on this application  
by the board of standards and appeals, at its regular meet-  
ing, October 13, 1925, after due notice by publication in the  
Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the build-  
ing zone resolution show that Third avenue is in an un-  
restricted district; that Bathgate avenue is in a business  
district and Lorillard place is in a business district; and

WHEREAS, the decision of the superintendent of buildings,  
rendered May 12, 1925, reads:

"8. Proposed extension of public garage in business  
district contrary to Zoning Resolution.";

and

WHEREAS, it is proposed to alter three one-story non-  
fireproof buildings on a lot having a frontage of 112 ft.  
on Third avenue and a maximum depth of 197 ft., into a  
public garage for the storage of more than five motor ve-  
hicles; two of the existing buildings are now public ga-  
rages and a rear building, 50 ft. by 70 ft. in area, is used  
as a marble yard; an irregular portion of the rear building  
extends into the business district for a distance of 34 ft.  
6 in., the remainder of the premises being in the unre-  
stricted district; and

WHEREAS, the board deemed that the granting of the  
appeal was a reasonable application of the provisions of  
section 7-c of the building zone resolution.

Resolved, that the board of standards and appeals does  
hereby make a variation in the application of the use district  
regulations of the building zone resolution, and that the  
application be and it hereby is granted on condition that the  
rear and gable walls within the business area shall be un-  
pierced throughout their entire height and length; and that  
all necessary permits shall be obtained within sixty (60)  
days.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1923; amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards Appeals July 29, 1924.

Rule 1.—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty persons employed above the second story, all interior stairways, serving as required means of exit, and the platforms, and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest landing of the stairway in accordance with the following table:

Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Stairways Enclosed			
Stairways Enclosed	Stairways Enclosed		
Stairways Enclosed	Stairways Enclosed	Stairways Enclosed	

term "contents" as used above means articles, goods, and merchandise, packed, stored, manufactured or in process of manufacture.

term "combustible" as used above means articles, wares or merchandise which will burn or support combustion.

term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

term "story" as used above means that part of a building between any floor and the floor or roof next above the first story is that part of a building which extends more than 50 per cent above the floor below and the next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding that portion of the under side of the beams within the stair enclosure shall be covered with fire-resisting material, except in buildings with roofs of non-combustible material, in which case the partitions shall extend to the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvers or ventilators, or exterior windows with fireproof sections at the top floor.

Openings in such partitions shall be provided with self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, shall be accepted as a compliance with this rule where both sides of the fire wall or walls are occupied by the same occupant.

Rule 2.—Where there are occupancies on any story or a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of egress shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated, as above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

### Rule 3.—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit or escape from fire remote from each other, one of which shall lead from every floor above or below grade shall lead to or open on an interior stairway which shall be enclosed, as hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or to a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills, properly secured. When sill is more than 8 inches above the floor level, and where there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard with egress to the street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

Rule 4.—Enclosure of Stairways.—In two-story buildings where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the ceiling of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall not be required. Such enclosures shall lead directly to a door opening outwardly to a street or road, or an open area affording unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

### Rule 5.—Storage of Combustible Material About Factory Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of any stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO RULES GOVERNING FIRE EXTINGUISHING APPLIANCES— SPRINKLER SYSTEMS.

[77-25-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals on Friday, April 23, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Rules for Fire Extinguishing Appliances, Sprinkler Rules.

*General Requirements.* The rules contained herein cover the general details of a sprinkler equipment only. Before an equipment is installed or before a present equipment is remodeled, complete working plans should be submitted for approval to Fire Department.

These plans shall be drawn to an indicated scale; give correct address and points of compass; show sectional elevations of the building; and the essential features of the construction, viz., size, location and direction of joists, timbers or other structural members. They shall also indicate the location and size of water supplies, connecting pipes, feed mains and risers, gate, check, alarm and dry-pipe valves, as well as the location, spacing, number and type of sprinklers.

Upon approval of preliminary plans such number of sets of clean, corrected plans on cloth as the Fire Commissioner may require, not exceeding three (3), shall be filed for final approval of the Fire Commissioner. A certified copy of the approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If a standpipe (fire line) equipment is provided throughout the building, the plans shall include a note to that effect.

When entirely completed in accordance with the approved plans and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the sprinkler equipment is approved the applicant will be so advised in writing by the Bureau of Fire Prevention.

All sprinkler equipments shall be installed in a thoroughly workmanlike manner.

**Rule 1. Definition of Automatic Extinguisher Systems.** Automatic extinguisher systems shall consist of a system of piping connected to one or more acceptable sources of water supply, or other extinguishing medium, provided with distributing devices so arranged and located as to discharge and diffuse automatically under the action of heat an effective stream or spray over every part of the interior of the building area in which a fire may start or to which it may be communicated.

**Rule 2. Classification of Sprinkler Systems.** For the purpose of these rules, sprinkler systems shall be classified as:

(a) Automatic Wet Pipe Systems, in which all pipes and sprinkler heads are at all times filled with water;

(b) Automatic Dry Pipe Systems, in which the pipes and sprinkler heads are filled with air, either compressed or at atmospheric pressure, and the water supply is operated by a Dry Pipe Valve as defined in Rule 27 of these Rules.

(c) Non-Automatic Systems, in which all pipes and sprinkler heads are maintained dry with a fire department connection for water supply.

Thermostatic fire alarm with direct connection to Central Office or Fire Department Headquarters shall be provided in connection with all non-automatic sprinkler systems.

**Rule 3. Approved Devices.** Automatic Sprinklers and accessory appliances shall include all devices approved as such by the Bureau of Standards, Washington, D. C.; by the Underwriters' Laboratories, Inc., of Chicago; by the Associated Factory Mutual Laboratories of Boston; and all devices which meet the tests prescribed by the Board of Standards and Appeals.

**Rule 4. Water Supply.** Approved sources of water supply shall be classified as Automatic and Auxiliary.

(a) Automatic Sources shall include the Gravity Tank, the Pressure Tank, [and] the Public Water System, the Automatic Electric Fire Pump, installed as required under the provisions of Rule 8, hereinafter provided.

(b) Auxiliary Sources shall include the non-automatic Pump and the Fire Department Connection.

**Rule 5. Gravity Tank.** Gravity tanks shall contain available quantity of water sufficient to supply twenty per cent (25%) of the number of sprinkler heads in average protected fire area for twenty (20) minutes, but less than 5,000 gallons; and the bottom of the tank shall have an elevation of not less than twenty (20) feet above the highest line of sprinklers below the main roof. If the area of a pent house exceeds 2,500 sq. ft. the bottom of the tank shall be required to be not less than 20 feet above the highest line of sprinklers below the pent house but where a pent house contains only pressure tanks this will not apply.

Where a tank capacity in excess of [25,000] 30,000 gallons is required by this rule, the amount of water provided in excess of [25,000] 30,000 gallons shall be fixed by the Board of Standards and Appeals, except tanks of unlimited capacities are supported on structural members independent of buildings.

The tank shall be filled through a fixed pipe, independent of the sprinkler piping, not less than two inches in size, discharging into the top of the tank through a by-pass not less than two (2) inches in diameter around the check valve in the discharge pipe, providing the supply is of sufficient pressure to fill the tank. Water supply and connections shall be capable of filling the tank at a rate of not less than sixty-five gallons per minute.

The filling pipe shall be carried up inside a frost-casing and may extend through tank bottom to discharge at top of tank above full water level. The portion of inside tank must be of brass or copper or other non-corrosive material.

Tanks shall not be fed through sprinkler lines.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct ice main connection, provided that there are separate mains from the basement or lowest story and a check valve in each feed line in a pump or engine room.

The overflow pipe shall be not less than two (2) inches in diameter for tanks up to 30,000 gallons capacity and less than three (3) inches in diameter for larger tanks. The top of the overflow pipe shall be three (3) inches below the top of the staves in wooden tanks and one inch from the top in steel tanks. The pipe may extend through the bottom of tank provided the portion inside is of brass or copper or other non-corrosive metal without joints or it may extend through side of tank. Tanks over roofs overflow pipes shall terminate not less than twenty-four (24) inches above roof and shall be provided with a 90 degree elbow.

The discharge, heating or filling pipes where exposed to the weather shall be protected from freezing by a frost-proof covering which may be of three layers of one (1") hair felt interspersed with building paper well secured and covered with canvas well painted and frost-proof boxing as specified by the National Board of Fire Underwriters.

Easy access to top of each tank shall be provided by means of a steel gooseneck ladder substantially constructed and rigidly braced, the top of which shall not tip over from the vertical at any point.

Tanks above roofs shall be constructed according to requirements of the Building Code and supporting

# PUBLIC HEARING

res shall be approved by the Superintendent of Buildings. Tanks not enclosed and exposed to the weather shall be covered with a double roof of acceptable construction consisting of a tight flat cover of matched boards and above is a conical roof which shall be covered with an approved roofing.

Where a gravity tank may supply both sprinklers and fire hydrants it shall not be of less than 30,000 gallons capacity and located on a structure altogether independent of buildings and the bottom shall not be less than 75 feet above ground level, and not less than 20 feet above the highest line of sprinklers below the main roof of the highest building in a group of buildings.

Rule 6. Pressure Tank. Pressure tanks shall contain sufficient water to supply twelve and one half per cent (12½%) of the number of sprinklers in the average protected fire area for twenty (20) minutes, but not less than [5,000] 3,000 gallons of water for a wet pipe system where supplemented by an auxiliary water supply, and not less than 5,000 gallons of water for a dry-pipe system. No single tank shall have a capacity greater than 9,000 gallons. The tank shall be kept two-thirds (2/3) full of water under a pressure of seventy-five (75) pounds per square inch, and shall be so proportioned and located that a pressure of not less than fifteen (15) pounds per square inch shall be available on the highest line of sprinklers below the main roof when all the water has been discharged from the tank.

The tank shall be placed either on the roof or in the highest sprinklered story.]

pressure tank or tanks shall not be located below the highest line of sprinklers supplied by tank or tanks.

Where [a tank] the total capacity of the pressure tank supply is in excess of [25,000] 30,000 gallons as required by the rule, the amount of water to be provided in excess of [5,000] 30,000 gallons shall be specified by the Board of Standards and Appeals.

The water shall be supplied through a fixed pipe, independent of the sprinkler piping, not less than [two] one and one-half (1½) inches in size [with a one and one-quarter (1¼) inch connection to the tank], or through a pipe not less than [two (2)] one and one-half (1½) inches in size around the check valve in the discharge pipe provided the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute without reducing the pressure in the tank. The tank shall have a fixed metallic horizontal line at the end opposite the glass gauge, or other acceptable device, to indicate the level of the water when the tank is two-thirds full.

The air compressor shall be of sufficient capacity to increase the air pressure at the average rate of one pound in two minutes in each pressure tank.

Rule 7. Public Water System. Direct connection to the city water supply shall be capable of furnishing water at not less than fifteen (15) pounds per square inch static pressure at the highest line of sprinklers below the main roof.

Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each connection shall be as large as that of the main riser and not less than four (4) inches, and shall have a convenient accessible control valve fixed to it at, or near, the riser, or, when possible, still further away from the building. The control valve shall be fitted with a frost proof box, not less than four (4) feet nor more than six (6) feet below the curb, with a fixed stem extending to a compartment at the level of the sidewalk.

The cover shall be bolted to the casing and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be marked with a distinctive pattern, operated by a special socket which approved by the department of water supply, gas and electricity.

Where it is impractical to install a control valve box at the curb because of a vault under the sidewalk and within 18" thereof, the control valve may be located in the water supply connection at a point not more than two (2) feet from the point of entry into a vault.

Where a water meter is required in the water supply connection to an automatic sprinkler equipment, it shall be of a type which allows free flow of water and approved by the Department of Water Supply, Gas and Electricity, or a type of fire line meter which has been specifically approved by the Fire Commissioner for use in connection with fire extinguishing equipment.

Evidence establishing the fact that water supply conditions and pressures are as may be required shall be submitted to the Fire Department.

Rule 8. Fire Pump. An automatic electric fire pump as an automatic source of water supply is one approved for such use and controlled by an approved automatic controlling device, which shall be adjusted to maintain not less than 15 pounds water pressure at the highest sprinkler below main roof and in pent houses over 2,500 sq. ft., as provided in Rule 5. And shall receive water supply only from a direct connection to the city water main.

As auxiliary sources of water supply steam or electric standard fire pumps shall receive water supply from a suction tank, a direct connection to the city water main or other approved sources capable of supplying the pump at its rated capacity for sixty (60) minutes. The rated capacity of the pump shall be not less than five hundred (500) gallons per minute, and shall be sufficient to supply twenty-five per cent (25%) of the number of sprinklers in the average protected fire area.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

A reliable source of energy for driving the pump shall be provided. For steam pumps, provision shall be made for sufficient steam power to operate the pumps at full rated capacity, and a steam pressure of not less than fifty (50) pounds shall be maintained at the pump at all times. Where there is more than one boiler, the pipes and valves shall be so arranged to permit the cutting out of any one boiler without interrupting the steam supply to the pump from the other boilers. The boiler room shall be cut off from the remainder of the building by fireproof floor and wall construction with approved fire doors at all openings.

Electrical energy from a public service plant shall be acceptable as a source of energy for driving electric fire pumps. When local power plants supply the energy for operating electric pumps, two motor generator units shall be provided, or one generator unit supplemented by a public service break-down switch. Local electric power plants shall be located in rooms of fireproof construction with approved fire doors at openings.

Rule 9. Sprinkler Discharge. For the purpose of computing the capacity of water supplies, standard one-half (½) inch sprinkler heads shall be assumed to have an average discharge of twenty (20) gallons per minute, and the discharge of larger heads shall be computed proportionately in the ratio of the areas of their respective orifices.

Rule 10. Fire Area. A fire area is any floor space enclosed on all sides by exterior walls or fire walls or a combination of both. The number of sprinklers in the average protected fire area shall be determined by the number of sprinklered stories in such section. In

# PUBLIC HEARING

determining the required capacity of water supplies, the number of sprinklers in the average protected fire area need not include those located in low positions, such as under benches, low shelves, closets and platforms and between cars in car barns.

**Rule 11. Fire Department Connection.** All automatic sprinkler systems shall be provided with at least one two-way Siamese connection on each street front of the building for connection to the fire department hose. Buildings fronting on only one street shall be provided with at least two Siamese connections when the street frontage of building exceeds [one hundred and fifty (150)] two hundred (200) feet [in width].

*Where buildings have frontages on more than one street there shall be a fire department connection on each street front where frontage is not continuous but in all cases where more than one fire department connection is required they shall be located as the Fire Commissioner may direct and shall not be grouped.*

All Siamese hose connections hereafter installed, except those on piers or warehouses intended for fire boat use, shall be three (3) inches in size. Fire boat connections shall be three and one-half (3½) inches in size. All hose connections shall be female, with standard fire department threads.

The inlets shall be placed at least eighteen (18) inches and not more than two (2) feet above the sidewalk, in a horizontal position accessible to the fire department, and shall be provided with a four (4) inch discharge connecting with a four (4) inch pipe to the sprinkler system for three (3) inch fire department connection and with a six (6) inch discharge outlet and six (6) inch pipe for three and one-half (3½) inch fire boat connection. Each inlet shall be provided with a clapper valve machined to a true face.

Each Siamese connection shall be designated by raised letters at least one (1) inch in size, cast in the fitting in a clear and prominent manner and reading for the service designated, viz.: "Base. Spkr.," etc., as the case may be. If the entire building is sprinklered, the fitting shall be marked "Auto. Spkr."

*Siamese hose connections may project through a street wall not more than twelve (12) inches beyond the building line except that where there is an angle formed by the street wall and a check piece or the base of a column, pilaster or ornamental projection, they may be so located that no part extends more than fifteen (15) inches from either side of such angle in accordance with the provisions of the Building Code.*

In each fire department connection there shall be an approved straightway check valve installed in a horizontal position, unless suitably designed for vertical position, and the piping shall be arranged to drain between the check valve and the outside siamese coupling by either a ball drip having a one-half (½) inch pipe connection and one-half (½) inch orifice and a bronze ball of proper size, or by a three-quarter (¾) inch drip connection, with plugged valve attached, and when necessary arranged to drain to a sewer. A drain connection may be tapped into the body of check valve only when located in a horizontal position.

**Rule 12. Automatic Sprinkler Systems.** Automatic sprinkler systems shall be classified as:

(a) One Source Systems, supplied with water from any one of the automatic sources; and

(b) Two Source Systems, supplied with water from a combination of any two of the automatic sources; two pressure tanks with a total water capacity twice that required for a one source supply; direct connection to the city water supply on two different streets, so located that the closing of the controlling valve on one main will not eliminate the main on the other street; or a direct connection to the city water supply and one of the auxiliary sources provided the water supply main is at least six (6) inches in size, the main is fed both

ways and a two (2) inch test pipe at the top of the sprinkler riser shows a flowing pressure of fifteen (15) pounds per square inch between the hours of six a. m. to six p. m.

*A gravity tank and pressure tank, or a gravity tank pressure tank and one of the automatic sources or two pressure tanks having a total water capacity for a one source supply may be considered as a two-source supply where the occupancy of the building does not conflict with Rules 38, 39 and 40 hereinafter provided for.*

**Rule 13. Sprinkler Spacing.** Sprinkler heads and lines shall be spaced as herein provided:

**Mill Construction.** Under mill ceiling (smooth solid plank and timber construction, 5 to 12 foot bays) a line of sprinklers shall be placed in the center of each bay and the distance between the heads on each line shall not exceed the following:

- (a) For Standard one-half (½) inch heads—
  - 8 feet in 12 foot bays;
  - 9 feet in 11 foot bays;
  - 10 feet in 10 foot bays;
  - 11 feet in 9 foot bays;
  - 12 feet in 5 to 8 foot bays;
- (b) For Conran\* one (1) inch heads—
  - 20 feet in 5 to 12 foot bays.
- (c) For Conran\* one and one-quarter (1¼) inch heads—
  - 25 feet in 5 to 12 foot bays.
- (d) Vaults used for the storage of nitro-cellulose products and vaults used for the storage of flammable motion picture films shall have a standard one-half (½) inch head for each 250 cubic feet of available storage space, or one inch Conran\* head for each 250 cubic feet of available storage space.

Measurements shall be taken from center to center of timbers.

Ceilings of modified mill construction having joists less than three (3) feet wide shall be treated as standard joist construction and sprinkler heads and lines spaced accordingly.

Bay timbers spaced three (3) feet or more on centers, but less than five (5) feet on centers, will require special ruling by the administrative official having jurisdiction.

**Joisted Construction.** Under open finish joisted construction ceilings, floor, decks and roofs, the sprinkler lines shall be run at right angles to the joists and heads "Staggered spaced" so that heads on one line shall be opposite a point half way between heads on adjacent lines.

(a) For Standard one-half (½) inch heads the distance between lines of sprinklers shall not exceed ten (10) feet and the distance between heads on each line shall not exceed eight (8) feet, the end heads on alternate lines being spaced not more than two (2) feet from wall or partition. Permission may be given by the administrative official having jurisdiction to install but one line of sprinklers, in each bay where girders project below the under side of joists and divide the ceiling into bays ten (10) to eleven and one-half (11½) feet wide from center to center of girders, and the heads shall then be spaced on each line so that the area covered by a single head does not exceed eighty (80) square feet. In all cases where such bays are over eleven and one-half (11½) feet wide, two or more lines of sprinklers shall be installed in each bay as required by the rules for standard construction.

\*Wherever the term "Conran head" is used in these Rules, it is to be taken as meaning either a Conran head of the type tested and approved by the Fire Department, or one that has passed similar tests by the Fire Department.

# PUBLIC HEARING

Fire girders and joists are flush at the bottom, heads shall be spaced according to the general rule.

(c) For Conran\* one (1) inch heads the distance between adjacent lines shall not exceed twenty (20) feet and the distance between the heads on each line shall not exceed six (6) feet, the end heads on alternate lines being spaced more than four (4) feet from wall or partition. Where girders project below the under side of joists and divide ceiling into bays not exceeding twenty (20) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty (20) feet in width at least two (2) lines shall be installed in each bay and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads the distance between adjacent lines shall not exceed twenty-five (25) feet and the distance between the head on each line shall not exceed twenty (20) feet, the end head on alternate lines being spaced not more than five (5) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty-five (25) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty-five (25) feet in width at least two lines shall be installed in each bay, and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Both Finish, Sheathed or Plastered Ceilings.** Under any finish, sheathed or plastered ceilings, in bays six (6) feet wide and over (measurements to be taken from center of timber, girder or other projection or support forming the bay), sprinkler heads and lines shall be spaced as follows:

**For standard one-half ( $\frac{1}{2}$ ) inch heads—**

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twelve (12) feet in width and the distance between the heads on each line shall not exceed the following:

- 8 feet in 12 foot bays;
- 9 feet in 11 foot bays;
- 10 feet in 6 to 10 foot bays.

In bays in excess of twelve (12) feet in width and less than twenty-three (23) feet in width, shall contain at least two (2) lines of sprinklers; bays twenty-three (23) feet wide or over shall have the lines therein not over ten (10) feet apart. In bays in excess of twelve (12) feet in width, not more than one hundred (100) square feet of ceiling area shall be allotted to any single head. (c) For Conran\* one (1) inch heads—

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty (20) feet in width and the distance between the heads on each line shall not exceed twenty (20) feet. Bays in excess of twenty (20) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty (20) feet.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch

One line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty-five (25) feet in width and the distance between the heads on each line shall not exceed twenty-five (25) feet. Bays in excess of twenty-five (25) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

**Roof Construction.** The rules of slow-burning construction shall apply as far as practicable. The rules may be modified, however, the intent being to arrange spacing of heads to protect the contents rather than the ceilings; but in no case shall the distance between heads on one line and a head on an adjacent line exceed the following:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads, 12 feet.
- (b) For Conran one (1) inch heads, 20 feet.
- (c) For Conran one and one-quarter ( $1\frac{1}{4}$ ) inch heads, 25 feet.

**Distance From Walls.** The distance from wall or partition to the first head on a sprinkler line shall not exceed one-half the allowable distance between the heads on such line. Additional heads may be required in the narrow pockets formed by bay timbers or beams and wall. Where beams, girders, columns, walls, partitions or other obstructions prevent the effective discharge of water, additional heads shall be installed to effectively sprinkle the area.

**Vertical Shafts.** In vertical shafts having inflammable sides, heads shall be provided within the shaft in addition to the head or heads at the tops of shafts, as follows:

- (a) One standard one-half ( $\frac{1}{2}$ ) inch head for each 200 square feet of inflammable surface.
- (b) One Conran\* one (1) inch head for each 400 square feet of inflammable surface.
- (c) One Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch head for each 500 square feet of inflammable surface.

Such head or heads shall be installed at each floor when practicable, and always when shaft is trapped. Where practicable, heads shall be "staggered" at the alternate floor levels, particularly when only one head is installed at each floor level.

**Pitched Roofs.** Under a pitched roof sloping more steeply than one (1) foot in three (3) feet, heads shall be located in peak of roof, and those on either side of the peak shall be spaced according to the foregoing requirements. The distance between heads shall be measured on a line parallel with the roof. Where the roof meets the side wall or the floor line, the heads shall be placed not more than the following distance from such intersection:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $3\frac{1}{2}$  feet.
- (b) For Conran\* one (1) inch heads, 7 feet.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $8\frac{1}{2}$  feet.

Heads spaced not to exceed the following distance each way from the peak of roof, measured on a line parallel with the roof, may be used in lieu of heads located in peak of roof:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.
- (b) For Conran\* one (1) inch heads, 5 feet.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

In sawtooth roof construction, the end heads on the branch line shall be spaced not to exceed the following distance from the peak of the sawtooth:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads,  $2\frac{1}{2}$  feet.
- (b) For Conran\* one (1) inch heads, 5 feet.
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads,  $6\frac{1}{4}$  feet.

**Special Locations and Variations.** In special locations, such as over electric generating, power and transforming apparatus, over their controlling devices and switchboards, where water from the fire extinguishing equipment would be detrimental, the sprinkler lines and heads may be omitted at the discretion of the administrative official having jurisdiction, and when in his judgment a slight variation of this rule of spacing is desirable to effect a more efficient distribution of water for fire extinguishing purposes, the sprinkler lines and heads shall be spaced as he may direct.

**Rule 14. Sprinkler Position.** All sprinkler heads shall be located, wherever possible, in an upright position on top of the pipes, except that sprinkler heads on automatic wet pipe systems may be pendant on concealed piping and when construction or occupancy of a room or enclosure makes it preferable.

- (a) Where standard one-half ( $\frac{1}{2}$ ) inch heads are installed sprinkler deflectors shall be parallel to ceilings, roofs or the

# PUBLIC HEARING

incline of stairs, but when installed in the peak of a pitched roof they shall be horizontal. Distance of deflectors from ceilings of mill or other smooth construction, or bottom of joists of open joist construction, shall be not less than three (3) inches nor more than ten (10) inches.

In fireproof buildings, the distance between deflectors and panel ceilings shall not exceed fifteen (15) inches.

Not less than eighteen (18) inches effective clear space shall be left below the sprinkler heads, so that they may discharge an unbroken spray blanket from sprinkler to sprinkler and sides of room when in operation. Any stock piles, racks or other obstructions interfering with such action shall not be permitted. *Sprinkler system piping shall not be used for the support of stock, clothing, etc.*

(b) Where Conran\* heads are installed, the top of head shall be located the same distance below joists or ceiling as specified for deflectors in paragraph (a) of this rule; except that when heads are located under pitched roofs of piers or similar structures, they shall in general be installed in the upright position (not normal to slope of roof) and three (3) feet vertically below the underside of roof. When the administrative official having jurisdiction deems a variation of this rule advisable to obtain a more efficient distribution of water, the heads shall be located with respect to joists or ceiling, as he may direct.

Rule 15. Pipe Sizes. The number of heads on a given size pipe in one fire area in any story shall not exceed the following:

(a) For standard one-half (1/2) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
3/4 inch	1 head
1 " "	2 heads
1 1/4 " "	3 " "
1 1/2 " "	5 " "
2 " "	10 " "
2 1/2 " "	20 " "
3 " "	36 " "
3 1/2 " "	55 " "
4 " "	80 " "
5 " "	140 " "
6 " "	200 " "
7 " "	300 " "
8 " "	420 " "

(b) For Conran\* one (1) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 inch	1 head
1 1/4 " "	2 heads
1 1/2 " "	3 " "
2 " "	4 " "
2 1/2 " "	6 " "
3 " "	9 " "
4 " "	18 " "
5 " "	34 " "
6 " "	51 " "
7 " "	75 " "
8 " "	105 " "

(c) For Conran\* one and one-quarter (1 1/4) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 1/4 inch	1 head
1 1/2 " "	2 heads
2 " "	3 " "
2 1/2 " "	4 " "
3 " "	6 " "
4 " "	12 " "
5 " "	21 " "
6 " "	40 " "
7 " "	60 " "
8 " "	84 " "

When it is desired to use pipe of larger size than (8) inches in diameter, special ruling will be required of the administrative official having jurisdiction as to the missibility of its use and the number of heads that may be fed thereby.

Where practicable, it is desirable to arrange the piping so that the number of heads on a branch line will not exceed eight.

When the piping is arranged on the "gridiron" plan, the permissible number of heads may be doubled, provided the feed main is of the size indicated in the schedule for the total number of heads.

Where feed mains supply branch lines of only two heads each, the conditions approach those of long single lines. Such feed mains shall usually be centrally supplied with branch lines up to fourteen (14) in number may be fed from a two and one-half (2 1/2) inch pipe does not exceed more than sixteen (16) standard one-half (1/2) inch heads in lieu of twenty (20).

Buildings having slatted floors, or large unprotected openings without approved stops, shall be treated as one story with reference to the pipe sizes, and the feed main shall be of sufficient size to accommodate the number of heads on the floor. Larger pipe sizes than are allowed in the schedule for a given number of heads may be required wherever the construction or conditions introduce unusually long runs of mains or many angles. Buildings with blind attics with unprotected openings to floor below, may be piped from a system on the ceiling of floor below, provided pipe size schedule is not overloaded on sizes three (3) inches or under.

Rule 16. Feed Mains. The size of feed mains shall be less than the size of riser and shall be arranged to run direct as possible from source of water supply to riser.

Feed mains for stair or other towers without approved stops between floors, when piped on independent riser, shall be of sufficient size to accommodate the total number of sprinklers in such tower.

Rule 17. Risers. There shall be one or more separate risers in each building and in each section of the building divided by fire walls. Risers shall be arranged to provide "Center Central" or "Side Central" supply to feed risers. Each riser shall be of sufficient size to supply all the heads on said riser in one story, according to the schedule of sizes in Rule 15.

In buildings of fireproof construction, and for the purposes of this rule, a blank wall, or one in which the openings are protected by standard fire doors, may be considered a fire wall, if of equivalent construction.

If the conditions warrant, special permission may be granted allowing the heads in a fire section of small buildings to be fed from the risers in another section, provided the total number of heads in such area does not exceed the following number per floor:

(a) For standard one-half (1/2) inch heads, 48.

(b) For Conran\* one (1) inch heads, 12.

(c) For Conran\* one and one-quarter (1 1/4) inch heads, 12.

Risers shall not be located close to windows, and shall be protected from mechanical injury and freezing and shall be properly supported on foundations and by floor plates, couplings or hangers.

No connections, such as for sill cocks, house service hose outlets, shall be made with a sprinkler system or any part thereof.

Where gravity and pressure tanks feed through a discharge pipe or "dead riser" to the foot of a riser, an air lock is likely to develop the discharge pipe of the tank shall connect with the discharge pipe, or "dead riser" forty (40) feet below the bottom of the pressure tank.

# PUBLIC HEARING

Rule 18. Pipes and Fittings. All pipe shall be full-weight standard wrought iron or steel threaded pipe, well reamed and screwed up tight into fittings without reducing the passageway. Fittings shall be standard cast iron fittings, and shall be long turn pattern on feed mains and risers.

Each fitting shall be designed and guaranteed for a working pressure of 150 pounds per square inch and must be capable of withstanding a hydrostatic test pressure of 750 pounds per square inch without failure.

All pipe shall be secured to the ceiling, walls and other parts of the building with standard steel, wrought or malleable iron hangers.

Extra heavy fittings shall be employed where the normal pressure in the pipe system exceeds one hundred and fifty pounds per square inch, and shall be designed for a working pressure of 250 pounds per square inch and be capable of withstanding a hydrostatic test pressure of 1,250 pounds per square inch without failure.

Underground pipe shall comply with the specifications for cast iron pipe of the American Water Works Association.

Rule 19. Protection of Pipes and Sprinklers. When exposed to moisture, sprinkler pipes and hangers shall be protected against corrosion whenever found necessary by thoroughly cleaning the pipe of all scale and grease and painting with a coat of red lead and linseed oil paint or other suitable moisture resistive paint. When exposed to chemicals, the pipe and fittings shall be coated with graphite or other approved chemical resistive paint. Care shall be taken not to paint the sprinkler heads.

Supply pipes of risers in low basements or low spaces below ground floors exposed to frost, shall be properly protected by a masonry or wood enclosure, properly heated, or covered with mineral wool, sawdust or tar mixed with granular cork, extending below bottom of pipe and through the flooring of ground floor, or the pipe shall be protected by three alternate layers of one-inch hair felt and build-up paper or by other approved method. When of wood, enclosure shall be constructed double with a layer of paper between the two thicknesses of wood.

Where risers, drains, heating pipes, etc., pass through concrete floors or partitions, they shall be protected by a metal sleeve or be grouted with cement mortar.

Where sprinklers are exposed to corrosion, the heads shall be protected with an approved hermetically sealed cover, or with an approved wax coating.

Rule 20. Drainage. All sprinkler pipe and fittings shall be installed that they can be thoroughly drained, and, where practicable, all piping shall be arranged to drain at the lowest point.

Pipes or drip pipes shall be so arranged as not to expose any part of the sprinkler system to frost, and shall be connected, either by check valves or other means, so that they will not [overthrow] overflow domestic service or connections to the same sewer or house drain, or if they are connected through the wall and exposed to the weather, they shall be fitted with hoods or down-turned elbows.

Pipes, pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet, shall be installed:

- At the base of the main riser;
- At each alarm valve;
- At each dry-pipe valve;
- At each gravity tank;
- At each pressure tank;
- At each fire department connection;
- At each floor, if independent floor control valves are used;

At each supply main, when the water in the same can be removed through any of the above drains. Such connections shall be installed with controlling valves so that flow can be made to determine if the water supplies connections from yard mains to the inside of the build-

ing are in order without causing water damage or overflowing service connections to the same house drain. Any such drain shall be not less than two (2) inches in size except that drains at independent floor valves [may be one and one-quarter ( $1\frac{1}{4}$ ) inches in size] shall be not less than 1 inch in size where floor valves are not over  $2\frac{1}{2}$  inches in size and  $1\frac{1}{4}$  inches where floor valves are larger, and connected to a main drain riser of not less than  $1\frac{1}{2}$  inches in size. The drain at the main riser shall discharge into a cone or sight drain, or if carried through the wall and exposed to the weather, it shall be fitted with a hood or down-turned elbow.

*At an alarm valve at the top of a riser in a down-fed system a drain shall not be required.*

*At each gravity or pressure tank erected above roof of a building there shall be a 4-inch valved drain connection so arranged as to discharge on roof of building. And where a tank is on a separate structure altogether independent of buildings drain connection to be arranged to discharge at ground level.*

On automatic wet pipe systems, the horizontal branch pipes shall be pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet to drain towards the sources of supply with drip valves at the low points.

On automatic dry-pipe systems, branch pipes shall be pitched at least one-half ( $\frac{1}{2}$ ) inch in ten (10) feet.

Rule 21. Test Pipe. [On] In all wet-pipe automatic sprinkler systems a test pipe of not less than  $\frac{3}{4}$  inch in diameter shall be connected directly with each [riser] system but shall be connected to a pipe of not less than  $1\frac{1}{4}$  inches in diameter in upper story and arranged to discharge, through a  $\frac{1}{2}$ -inch brass outlet, preferably to a point where it can readily be seen. With long runs or many angles, size of test pipe [shall] should be increased to one (1) inch or larger. Controlling valve should be located at a sufficient distance from where the test pipe passes through the wall of the building so as to reduce to a minimum the chance of freezing of water in test pipe.

*In all dry-pipe automatic sprinkler systems a  $\frac{3}{4}$ -inch inspector's test pipe shall be installed at the end of the most distant branch line and fitted with a  $\frac{3}{4}$ -inch shut-off valve stopped with a brass plug.*

Rule 22. Pressure Gauges. A four and one-half ( $4\frac{1}{2}$ ) inch double-spring Bourdon pressure gauge shall be provided in all automatic sprinkler systems as follows:

- Above dry-pipe valves;
- Below dry-pipe valves;
- At the pressure tank;
- At the air compressor;
- Above the alarm valve;
- Below the alarm valve; and

In the connections from city water supply.

Provision may be made for taking the pressure both above and below the alarm valve and the dry-pipe valve with only one gauge at each valve.

*A gauge shall not be required at an alarm valve located at the top of a riser in a down-fed system.*

Gauge connections shall be taken from the supply main or riser and not from the two-inch drain or test pipe.

Gauges shall be installed in a suitable place protected from freezing and be controlled by a valve with arrangements for draining. A plugged outlet, not less than one-quarter ( $\frac{1}{4}$ ) inch in size, shall be located between each valve and gauge for purpose of installing the inspector's gauge.

Rule 23. Valves. All valves two (2) inches in diameter and under shall be of brass or bronze, or other approved [non-corrodible] non-corrosive material. Valves over two (2) inches in diameter shall be of brass, or bronze or iron body, brass mounted, or of other approved [non-corrodible] non-corrosive material.

All sidewalk Siamese inlet valves, caps and chains shall be of galvanized cast iron or other approved [non-corrodible] non-corrosive material.

# PUBLIC HEARING

All gate valves shall be solid or double wedge disc, sufficing box pattern with hand wheel, outside screw and yoke, or other approved indicator pattern.

All check valves shall be approved straight way regrinding pattern, so built that the clappers may be readily removed for repairs.

Rule 24. Water Supply Gate Valves. The piping connecting each source of water supply with the sprinkler system shall be provided with a gate valve of the outside screw and yoke type, sealed open and tagged to designate its purpose, so located as to control **each source of water** supply except that from fire department hose connections. All such gate valves shall be located within the building where easily visible and readily accessible and as close as possible to the supply inlet.

Rule 25. Water Supply Check Valves. The piping connecting each source of water supply with the sprinkler system, including fire department connections, shall be provided with a check valve.

On two-source systems, check valves shall have a gate valve on each side to permit repair of check without shutting off both supplies, except that where the two sources of supply consist of tanks located above the highest line of sprinklers, a gate valve need only be provided on the downstream side of each check valve.

Rule 26. Control Valves. All automatic sprinkler systems shall be provided with a **main control or shutoff valve** arranged to be readily accessible and sealed in the open position; except that when the sprinkler system is fed from water supplies on the roof of the building, independent and readily accessible floor control valves, sealed in the open position, may be installed.

When not more than ten (10) standard one-half ( $\frac{1}{2}$ ) inch sprinkler heads or three (3) Conran\* heads in any automatic wet pipe system are exposed to cold and subject to freezing, shutoff valves may be provided to discontinue the water supply to such heads between November 1 and April 1. A greater number of heads than specified above, located in places which cannot be properly heated, shall be controlled by an automatic dry-pipe valve.

Rule 27. Dry-Pipe Valves. A dry-pipe valve shall be taken to mean a valve automatically controlling the water supply of the sprinkler system in such a manner that under normal conditions its piping system beyond the valve is maintained dry, but in the event of fire, the valve automatically releases the water into the sprinkler system, for fire extinguishing purposes.

Dry-pipe valves shall, for the purpose of these rules, be classified as follows:

Type A, in which the valve is actuated by the release of compressed air in the sprinkler piping system, due to the opening of a sprinkler head; and

Type B, in which the valve is actuated by an approved trip under electric control of an approved automatic thermostatic fire alarm system.

Dry-pipe valves shall be located as near as practicable to the sprinkler system in an enclosed and accessible place protected from mechanical injury and freezing.

*When anti-columning pipes are used, they shall be either lead lined or of brass.*

Automatic wet-pipe sprinkler systems in which only twenty-five (25) per cent of the heads are required to be maintained dry for protection from freezing, shall have only such heads under dry-pipe valve control.

(a) When "Type A" valve is installed, the air pressure in sprinkler systems under such dry-pipe valve control shall not exceed forty (40) pounds per square inch, nor be permitted to fall below twenty-five (25) pounds per square inch, nor shall it be less than one-sixth ( $\frac{1}{6}$ ) of the water pressure in any case.

The air compressor shall have a capacity of not less than eleven (11) cubic feet per minute and the air supplied to the pump shall be taken, if possible, from a room containing dry air, or it shall be passed through a drying chamber containing calcium chloride, in order to avoid the introduction of moisture into the system.

The air pressure on such dry-pipe systems shall be maintained throughout the year.

Not more than the following number of heads shall be controlled by one "Type A" dry-pipe valve:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

*Where equipped with an approved quick-opening valve, the following number of heads may be controlled by one "Type A" dry-pipe valve:*

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

(b) When "Type B" valve is installed the actuating system shall be designed to operate at a temperature higher than that required to open the sprinkler heads, and all connections between the alarm system and the dry-pipe system shall be adequately protected against injury of any kind.

When required by the administrative official having jurisdiction, the dead end of every feed main in such dry-pipe system shall be provided with an air relief valve or other device so constructed as to be normally open in order to permit the free escape of air from the system, but to close automatically against the escape of water.

Not more than the following number of heads shall be controlled by one "Type B" dry-pipe valve:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

Rule 28. Alarm Valve. All automatic wet pipe systems shall be equipped with an alarm valve so constructed that a flow of water through a one-half ( $\frac{1}{2}$ ) inch orifice will operate an electric or mechanical gong.

Dry pipe valves shall be equipped with a reliable device to give either an electrical or mechanical alarm.

Rule 29. High and Low Water and Pressure Alarm. Gravity tanks shall be equipped with a device to indicate when the water falls below or rises above the normal level of the tank, with an indicator or alarm located in the engine room near the pump.

All pressure tanks shall be equipped with a device to indicate when the pressure in the tank falls below seventy (70) or rises above eighty (80) pounds per square inch, with an indicator or alarm located in the engine room [near the compressor].

Rule 30. Heating of Tanks. The water in all tanks subject to freezing shall be protected by heating the water or enclosing the tank in a fireproof house properly heated and lighted.

Rule 31. Concealed Pipe Systems. All pipe in concealed pipe systems shall be of standard full-weight wrought iron or steel, painted with two coats of protective paint before and one after installation. Such pipe shall be installed in ducts or be encased in cement mortar and be inspected prior to concealment. When installed in concealed space between floor arches and ceiling, the pipe shall be supported by hangers and all pipe, fittings and hangers be protected with two coats of paint.

Rule 32. Preparation of Building. Floor or wall openings and other structural defects which prevent the escape of heated air and retard the automatic action of the sprinkler heads shall be provided with the necessary boards and draft stops to permit specific control of the fire by the local sprinklers.

Curtain boards shall project at least three (3) inches above the lowest sprinkler.

# PUBLIC HEARING

Rule 33. *Approval of Sprinkler System [Tests]. Before acceptance all automatic sprinkler systems, excluding the water supply tanks, shall be subjected after installation to a hydrostatic pressure of a test of at least fifty (50) pounds per square inch in excess of that which will be normally required and observed in the sprinkler system, such test pressure, however, never to be less than one hundred and fifty (150) pounds per square inch in any part of the system.*

*Pressure tanks shall be tested after erection to a test pressure of one and one-half (1½) times the working pressure. To prevent the possibility of serious water damage in case of a break, the pressure shall be maintained by a pump, the main controlling gate being meanwhile closed. Brine or other corrosive chemicals shall not be used for testing systems.*

*Automatic dry-pipe systems with "Type A" valve containing an air pressure of forty (40) pounds per square inch shall be pumped up, be held for twenty-four (24) hours, all leaks stopped which allow a loss of pressure of over two (2) pounds per square inch for the twenty-four (24) hours.*

*In the case of automatic dry-pipe systems with different "Type A" valve, the valve shall be held off its seat during the test to prevent injuring the valve.*

*Automatic systems shall be tested after installation to a pressure of less than fifty (50) pounds per square inch in excess of the pressure necessary to reach the highest line of sprinkler.*

*Tests of installed systems shall be made by the contractor in the presence of the Fire Commissioner, or his authorized representative.*

*Piping, devices nor any portion of a newly constructed sprinkler system shall be covered up or permanently concealed until tested by the Bureau of Fire Prevention and Control, in writing, except piping passing through floors, partitions or beams for distances equal to the thickness of such floors, walls, partitions or beams.*

34. *Non-fireproof Business Buildings. Automatic sprinklers required in non-fireproof business buildings under the provisions of Chapter 5, Article 4, Section 72, Code of Ordinances, unless otherwise specifically provided in these rules, shall consist of at least a One Source System.*

35. *Dangerous or Hazardous Buildings. Automatic sprinklers required in buildings having occupancies considered to be dangerous or hazardous by the Fire Commissioner shall consist of at least a one-source system unless otherwise specifically provided for in these rules.*

36. *Factories and other Buildings. Automatic sprinklers required in buildings under the provisions of the Code of Ordinances and the Labor Law shall consist of at least a one-source system.*

[35] 37. *Theatre Buildings. Automatic sprinklers required in theatre buildings under the provisions of Chapter 25, Section 524, Code of Ordinances, shall consist of at least a One Source System.*

[36] 38. *Firework Storage. Automatic sprinklers required in buildings in which fireworks are stored or sold under the provisions of Chapter 10, Article 6, Section 92, Code of Ordinances, shall consist of a Two Source System.*

Rule [37] 39. *Nitro-Cellulose Products. Automatic sprinklers as required in buildings in which nitro-cellulose products are stored under the provisions of Chapter 10, Article 19, Section 232, Code of Ordinances, shall consist of a system supplied from both approved gravity tank supply and an approved pressure tank supply, except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems, in conformity with the provisions of this rule as in force up to December 1, 1921.*

*In buildings wherein are stored or handled only limited quantities of nitro-cellulose products, not exceeding 500 pounds, the automatic sprinklers may consist of a two source system as provided for in Rule 12.*

Rule [38] 40. *Inflammable Motion-Picture Films. Automatic sprinklers, required in buildings in which inflammable motion-picture films are stored under the provisions of Chapter 10, Article 20, Section 241, Code of Ordinances, shall consist of a system supplied from both an approved gravity tank supply and an approved pressure tank supply except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to December 1st, 1921.*

Rule [39] 41. *Existing Installations and Approvals. Automatic extinguisher systems and devices heretofore approved and accepted by the authorities having jurisdiction shall not be required to conform to the provisions of these rules; and all such systems heretofore installed shall not be required to be altered to conform to these rules so long as the fire hazard due to construction and occupancy of the building is not increased or where substantial additions or extensions in height or area is made to the building when these rules shall apply if deemed advisable or necessary by the Fire Commissioner and the system after inspection is found to be in good working order.*

Rule 42. *Communicating Openings. When a building fully equipped with sprinklers communicates with another not so equipped the openings must be protected by approved fire doors on both sides of the wall, one of which must be automatic.*

Rule 43. *Maintenance Inspections. Automatic sprinkler systems shall be inspected at least once a month by the person in charge of the building, or by other competent person employed by the owner, to see that all parts of the system are in perfect working order, and the fire department connection or connections, if any, ready for immediate use by the Fire Department. A detailed record of each inspection shall be kept for examination by a representative of the Fire Department.*

*There shall be kept available at all times in the premises a supply of extra sprinklers, never less than six (6), to replace promptly any fused or damaged sprinklers. And there shall be one or more employees instructed in the maintenance of sprinkler system.*

Rule 44. *Open Sprinklers. When open sprinklers are required for exposure protection by the Fire Department as specified in the Building Code they shall be installed in accordance with the rules of the National Board of Fire Underwriters. Plans for such installation to be filed with the Fire Department for approval.*

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire Form 13A, for notices to property owners, such forms not to be supplied by this office. Applicant is entitled only to one copy of Form 13A, and must be filled out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board offices of the board and of the further publication calendars in the daily press.

*Fourth*, That no one is entitled to written notice date for the hearing in his case, and that the failure to receive such notice is no excuse for not appear.

*Fifth*, That the business of the board is to dispose all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the appellant or petitioner to file necessary data, or any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

—Municipal Building, Rooms 1001 to 1015.

PHONE—Worth 0184.

HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

Issue of the Bulletin contains, in the order given—  
Index.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, April 20, 1926, at 10 a. m.

Minutes of Regular Meeting, April 20, 1926, at 2 p. m.

Corrections.

Reserve Calendar.

First Quarterly Report.

Files.

Progress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, April 27, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 4, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

THE RESOLUTION:

(61-26-A)

WHEREAS, Surface Combustion Company, for Haffen Realty Company, owner, filed, January 23, 1926, an appeal from a decision of the fire commissioner, affecting premises on the northeast corner of Oak Point avenue at intersection of Barry street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, dated January 30, 1926, reads:

"33. Burner must be of a type approved by the Board of Standards and Appeals.";

and

WHEREAS, the building is fireproof, one story (42 ft.) height, 96 ft. by 112 ft. in area; OCCUPIED as a foundry; 25 persons; a fuel oil burning system having been installed using the Surface Combustion Company fuel oil burner and

WHEREAS, the appellant contends that the fuel oil installation conforms in all respects to the requirements of the fire commissioner, except as to the burner; that the burner is now before the board under Calendar No. 92-23-SA, he requests a temporary permit pending the approval of the burner.

Resolved, that the decision of the fire commissioner and it hereby is modified, and the appeal be and it hereby granted on condition that the use of this burner on the premises shall be restricted to annealing furnaces for industrial operation; that the fuel oil burning equipment shall be installed in accordance with the fuel oil rules in all respects; that the building shall be not increased in height, area or dimension; and that the use and operation of the premises shall be restricted to metal melting foundry.

173-26-A.

IE RESOLUTION:

(1218-25-A)

EREAS, David E. Kennedy, Inc., for American Manu-ing Company, owner, filed, November 23, 1925, an ap-rom an order of the fire commissioner, affecting prem-5 to 78 Second avenue, Borough of Brooklyn; and

EREAS, the order of the fire commissioner, dated Sep-1, 1925 (Order No. 84098-F), reads:

"1. Install a standpipe system with risers 4 inches diameter tested to withstand a pressure of 300 lbs.

per square inch, extending from cellar to roof, with necessary check valves and 2 1/2 inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclo-sure. Each outlet to be provided with sufficient feet of 2 1/2 inch standard hose attached thereto.

"Such standpipe shall be kept constantly filled with water by means of an approved tank or pump supply and be ready for use at all times.";

and

WHEREAS, the building is non-fireproof, the central por-tion being one clerestory (30 ft.) in height, and the north and south portions being two stories (29 ft.) in height; 302 ft. by 94 ft. (approximately 28,000 sq. ft.) in area; subdivided into three subareas by brick walls with auto-matic fire doors at openings; the machine room being ap-proximately 10,800 sq. ft. in area, and the packing and ship-ping subarea being approximately 6,400 sq. ft. in area. OC-CUPIED: Cutting, packing and shipping of cork and rub-ber tile, approximately 50 persons in the entire premises; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system, supplied from two gravity tanks; that the building is equipped with a standpipe system, hav-ing 27 outlets varying from 1 in. to 1 1/2 in. in size; that the premises are low in height, accessible on all sides, and that there are nine city fire hydrants in the immediate vicinity.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the floor area as now subdivided be not changed; that the building be not increased in area, height or dimension; that the existing sprinkler system shall be maintained in good working order; and *granted* so long as the entire premises shall remain in single operation.

1330-25-A.

APPELLANT—Bernard Salouch, for Congregation Shomrei Shaboth of Borough Park, owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—1420 50th street, Brooklyn.

APPEARANCES—

For Appellant: Mark Frackman.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commission-ers Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(1330-25-A)

WHEREAS, Bernard Salouch, for Congregation Shomrei Shaboth of Borough Park, owner, filed, December 22, 1925, an appeal from a decision of the superintendent of build-ings, affecting premises 1420 50th street, Borough of Brook-lyn; and

WHEREAS, the decision of the superintendent of buildings, rendered December 10, 1925, reads:

"Proposition denied as contrary to Section 91 of Code.

"Frame building located within the suburban limits, first floor of which was illegally converted from resi-dence to Public Assembly.";

and

WHEREAS, the building is frame, two stories and attic in height, 25 ft. by 50 ft. in area. OCCUPIED: 1st story, synagogue, 75 persons; 2nd story, residence of sexton; and

WHEREAS, appellant contends that the first story of the building is and has been used for over ten years as a He-brew Sabbath school and synagogue and has filed four affi-davits to this effect, and contends, further, that the prem-ises are amply provided with exits.

# MINUTES

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the ceiling of the cellar story shall be fire-retarded; that the stair enclosure from the cellar to 1st story shall be enclosed in fire-retarded partitions; that a self-closing fireproof door shall be provided at the cellar and 1st story level; that an additional exterior door with stairs shall be provided from the 1st story on the westerly side of building to the yard level; that the congregational occupancy shall be limited to 1st story and shall not exceed 75 persons; the 2nd story to be restricted to dwelling occupancy.

1336-25-A.

APPELLANT—The Tintograph Co., lessee.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—297 Fulton street, Brooklyn.

APPEARANCES—

For Appellant: Joseph F. Grever.  
For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell and Holland and Chief Kenlon .....	4
Negative: Commissioner Guilfoyle .....	1
Absent .....	0

THE RESOLUTION:

(1336-25-A)

WHEREAS, Joseph F. Grever, president of the Tintograph Company, lessee, filed, December 23, 1925, an appeal from an order of the fire commissioner, affecting premises 297 Fulton street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 17, 1925 (Order No. 98809-LC), reads:

"1. Provide fireproof walls, floor and ceiling on drying rooms on 4th story. Sec. 10, Chapter 10, C. of O.

"6. Provide an exhaust ventilating system for all lacquer solution drying rooms on 4th story. Sec. 10, Ch. 10, C. of O.";

and

WHEREAS, the building is non-fireproof, four stories in height at front and three stories in height at rear, 26 ft. by 115 ft. in area. OCCUPIED: 1st story, furniture store; 2nd story, photograph studio, 4 persons; 3rd and 4th stories, occupied by appellant for tinting photographs, 7 persons; and

WHEREAS, appellant contends, having occupied these premises for twenty years, that the process consists of pouring a solution on a glass plate and then placing plate in a rack in the evaporating room; that no gas heat or flame is used in the drying process; that the fumes are carried from this room by patented vents in the roof leading to the open air; and, in regard to Item 6, contends that a more rapid method of drying would militate against the successful operation of the process, and that the existing system of ventilation is successful and that none of the fumes get into the work rooms.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the top story, *on condition* that the evaporating rooms shall be equipped with louver skylight in ceiling; that the evaporating rooms partition shall be covered with plaster board on both sides; and that a self-closing metal-covered door shall be provided at each opening.

43-26-A.

APPELLANT—Jno. B. Snook Sons, for Farmers Loan & Trust Co., trustee.  
SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—167-169 Wooster street, Manhattan.

APPEARANCES—None.

For Appellant: John W. Boylston.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal denied.

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	2
Absent .....	0

THE RESOLUTION:

(43-26-A)

WHEREAS, John B. Snook Sons, for Estate of David I. Einstein, owner, filed, January 19, 1926, an appeal from an order of the fire commissioner, affecting premises No. 167-169 Wooster street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 29, 1926, reads:

"Provide a separate and distinct system of automatic sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1911 as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building is non-fireproof, six stories in height, 49 ft. by 97 ft. in area at 1st story and 49 ft. by 87 ft. in area above. OCCUPIED: Cellar, paper storage, 2 persons; 1st floor, manufacturing paper boxes, 2 persons; 2nd floor, manufacturing paper boxes, 8 persons; 3rd floor, manufacturing leather floor mats, 3 persons; 4th floor, manufacturing dolls, 3 persons; 5th floor, manufacturing dolls, 3 persons; 6th floor, vacant at present; and

WHEREAS, appellant contends that the building is amply provided with exits; that the premises is equipped with a gas shut-off valve, a fire alarm signal system and a thermostat fire alarm system with central office connections; that there is installed in the cellar a "Conran" sprinkler system with siamese at sidewalk, and proposes to provide two 10-gal. chemical fire extinguishers on each story.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

207-26-A.

APPELLANT—Tremley Oil Company, owner.  
SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—19 Division street, Borough of Queens.

APPEARANCES—

For Appellant: Walter W. Schlegel.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioner Connell, Holland and Guilfoyle and Chief Kenlon .....	1
Absent .....	0

THE RESOLUTION:

(207-26-A)

WHEREAS, Tremley Oil Company, owner, filed, March 1926, an appeal from a decision of the fire commissioner affecting premises No. 19 Division street, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, dated October 15, 1925, reads:

"1. Tanks must be buried 2 feet below grade and encased in 12 in. of stone concrete.

"2. Tanks must be designed to withstand 2

# MINUTES

pressure with a factor of safety of 5. Show details  
"3. Show pipe lines, etc., to and from tanks.";

WHEREAS, the premises consist of a large plot of ground, 25 ft. 9 in. by 203 ft. 9 in., containing a one-story brick tank house and office, a filling house, a one-story hollow tile garage and six underground gasoline storage tanks, each 8 ft. by 30 ft.; OCCUPIED as a gasoline storage and filling station; and

WHEREAS, the appellant proposes to erect two cylindrical tanks with convexed heads 10 ft. in diameter, each 10,000 gallons capacity, elevated 10 ft. above the ground on truss work, for the storage of lubricating oil; and

WHEREAS, the appellant contends that the lubricating oil to be stored has a flash point of not less than 380 Fahrenheit; at Items 2 and 3 of the fire commissioner's decision will be complied with.

Resolved, that the decision of the fire commissioner be and hereby is affirmed, and the appeal be and it hereby is denied.

## BUILDING ZONE CASES.

69-25-BZ.

APPLICANT—Ferdinand Savigano, for James S. Schacht, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Northeast corner of Hillside avenue and Springfield boulevard, Springfield Heights, Borough of Queens.

APPEARANCES—

For Applicant: Ferdinand Savigano and A. A. Bertini.

For Opposition: R. W. Bristol.

ACTION OF BOARD—Laid over to May 4, 1926, at 2 p. m., to submit further proof from building department.

6-25-BZ.

APPLICANT—Eugene De Rosa, for Flatbush Associates, Inc., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7c of the building zone resolution, to permit the extension from a business district into a residence district of a proposed theatre.

PREMISES AFFECTED—2101-2121 Church avenue, Brooklyn.

APPEARANCES—

For Applicant: F. H. White.

For Opposition: A. R. Kellegrew and Henry E. Heistad.

ACTION OF BOARD—Laid over to May 4, 1926, at 2 p. m., on request of applicant's representative.

25-BZ.

APPLICANT—William H. Kehoe, for Independent Milk & Cream Corp., lessee.

SUBJECT—Application (re: decision of health commissioner), under section 21 of the building zone resolution, to permit in a business district the use of an existing building as a milk dairy or bottling establishment.

PREMISES AFFECTED—325 East 152nd street, The Bronx.

APPEARANCES—

For Applicant: Barney Guntmacher.

For Opposition: R. Nebbia and Sebastiano La Rosa.

ACTION OF BOARD—Laid over to May 4, 1926, at 2 p. m., on request of applicant's representative.

926-25-BZ.

APPLICANT—Crolier National Fire Prevention Engineering Co., for Frederick Semken, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7e of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—2230-2254 Cropsey avenue, Brooklyn.

APPEARANCES—

For Applicant: None.

For Opposition: Two persons—names not given.

ACTION OF BOARD—Laid over to May 4, 1926, at 2 p. m.

1213-25-BZ.

APPLICANT—Morris L. Kaufman, for Isidore Resnikoff, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7b and 7c of the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a theatre and store building (previously denied).

PREMISES AFFECTED—4001-4011 14th avenue, Brooklyn.

APPEARANCES—

For Applicant: Morris L. Kaufman.

For Opposition: None.

ACTION OF BOARD—Laid over to today's afternoon session.

496-25-BZ.

APPLICANT—Henry Nordheim, for William Held, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—737-741 Huntspoint avenue, The Bronx.

APPEARANCES—

For Applicant: Henry Nordheim.

For Opposition: Sidney Levine, Felix A. Muldoon, Herman Bromberg, Jacob Levinson, David Volk, Dr. Gettenberg and Isaac Gonapol.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners Holland, Connell and Guilfoyle and Chief Kenton ..... 5

Absent ..... 0

THE RESOLUTION:

(496-25-BZ)

WHEREAS, Henry Nordheim, for William Held, owner, filed, May 11, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 737-741 Huntspoint avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Huntspoint avenue and Faile street are in business districts, and that Coster street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 2, 1925, reads:

# MINUTES

"1. Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 75 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, it was stated and admitted at the public hearing by the applicant that the purported owner of the premises under appeal for whom he appeared is not the owner in fact nor of record, and the board therefore deemed that applicant is not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

64-26-BZ.

APPLICANT—William F. Doyle, for Vincent Valentine, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit on a portion of a street between two intersecting streets in which portion there exists an exit and entrance to a public school, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—540-550 West 58th street, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(64-26-BZ)

WHEREAS, William F. Doyle, for Vincent Valentine, owner, filed, January 25, 1926, an application, under the building zone resolution, to permit on a portion of a street between two intersecting streets, in which portion there exists an exit and entrance to a public school, the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 540-550 West 58th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 58th street and West 57th street are in unrestricted districts, and that Tenth avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 23, 1925, reads:

"No. 3. Garage may not be erected on any portion of a street between two intersecting streets, in which portion there exists an exit from an entrance to a public school (Art. 5 of Building Zone Resolution)."; and

WHEREAS, the proposed building is of fireproof construction, six stories in height, with a frontage of 150 ft. and a depth at 1st and 2nd stories 100 ft. 5 in., 90 ft. 5 in. above; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, it appears that the building is located more than 520 ft. from any entrance to or exit from the school; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted to permit a garage for the use, occupancy and operation of an automobile manufacturer's agency and distributing station, on condition that no part of structure will be conducted or operated as a public garage; that there shall be not more than one tank for gasoline storage, not exceeding 550 gallons, which shall be located at the extreme westerly end of the structure at the street front; that no public gasoline selling station shall be conducted or maintained on the premises; that the entire structure shall be constructed fireproof; that the requirements of the building zone resolution shall be complied with in all other respects; that all necessary permits and approvals of plans shall be obtained within nine months and the building completed within eighteen months from the date of the action.

65-26-BZ.

APPLICANT—William F. Doyle, for Sobol Brothers, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the alteration and extension of a gasoline service station.

PREMISES AFFECTED—1313 Fifth avenue, Manhattan.

APPEARANCES—

For Applicant: William F. Doyle.

THE RESOLUTION:

(65-26-BZ)

WHEREAS, William F. Doyle, for Sobol Brothers, owner, filed, January 25, 1926, an application, under the building zone resolution, to permit in a business district the alteration and extension of a gasoline service station; premises 1313 Fifth avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fifth avenue, East 110th street and East 111th street are all in both business and residential districts; and

WHEREAS, the decision of the fire commissioner, rendered April 14, 1926, reads:

"The installation of additional gasoline pumps in business district when the area has been extended shall not be permitted. Appeal may be taken to the Board of Appeals.";

and

WHEREAS, the premises consists of a plot of ground which is located a gasoline selling station, a store building and building occupied as individual garages; it is proposed to remove the stores and relocate the gasoline pumps;

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district

# MINUTES

regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as the existing area of the premises is concerned, *on condition* that additional gasoline storage or gas pumps in excess of any permit now in force be installed on the premises; that any permits required shall be obtained within ninety days and the work completed within six months.

157-26-BZ.

APPLICANT—Sloan & Robertson, for 551 Fifth Avenue Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit partly in a 1¼ times height district and partly in a 2 times height district the erection and maintenance of the street walls to a height exceeding the prescribed limit required by the zone resolution.

PREMISES AFFECTED—547-551 Fifth avenue and 3-7 East 45th street, Manhattan.

APPEARANCES—

For Applicant: John Sloan and John Neville Boyle.

For Opposition: Carl H. Fowler, George M. Boynton, Charles M. Noble and James A. McCarthy.

THE RESOLUTION:

(157-26-BZ)

WHEREAS, Sloan & Robertson, for 551 Fifth Avenue Corporation, owner, filed, February 25, 1926, an application, under the building zone resolution, to permit partly in a 1¼ times height district and partly in a 2 times height district the erection and maintenance of the street walls to a height exceeding the prescribed limit required by the zone resolution; premises 547-549 Fifth avenue and 3-5-7 East 45th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting,

April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that the east side of Fifth avenue to a point 100 ft. east of Fifth avenue is in a 1¼ times height district, and that both East 45th street and East 46th street are in 2 times height districts; and

WHEREAS, the decision of the superintendent of buildings, rendered February 8, 1926, reads:

"2. The proposed height of the building exceeds the height limits imposed by the Building Zone Resolution. Art. 3, Sec. 8. The proposed height of the building is excessive on both street fronts.";

and

WHEREAS, the proposed building is to be of fireproof construction, 36 stories (416 ft. 7 in.) in height, with a frontage of 78 ft. 5 in. on Fifth avenue and a depth of 200 ft. on East 45th street; to be occupied as stores, banking room and offices; it is proposed to erect both street walls 125 ft. in height and to set back the 45th street front a total distance of 26 ft. 2 in. instead of 34 ft. and to erect walls above without required setbacks as shown on plans filed; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the height district regulations of the building zone resolution and that the application be and it hereby is *granted on condition* that the building be erected, as indicated on plans filed in this case, except as modified by this resolution, with a setback as indicated, from Fifth avenue building line to face of tower at 20th story, 125 ft. above curb level, for a depth of not less than 34 ft.; that the main structure as now proposed and indicated setback to the east of the tower shall not be built above the roof of the 27th story, and any part of the structure above that level shall be restricted to the requirements of the zoning regulations permitted for tower construction; that all permits necessary for the prosecution of the work shall be obtained within nine months and that the construction will be forwarded without unnecessary suspension of work or delay.

Adjourned 2 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

PREMISES AFFECTED—449-459 Seventh avenue, 163-167 West 34th street and 160-166 West 35th street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

ACTION OF BOARD—Laid over to April 27, 1926, 10 a. m.

742-25-A.

APPELLANT—Cass Gilbert, Inc., for New York Life Insurance Company, owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—Block bounded by 26th to 27th streets and Fourth to Madison avenues, Manhattan.

APPEARANCES—

For Appellant: J. N. Matteossian.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(742-25-A)

WHEREAS, Cass Gilbert, Inc., for New York Life Insurance Co., owner, filed, July 24, 1925, an appeal from a decision of the superintendent of buildings, affecting premises on the block bounded by 26th to 27th streets, from Fourth to Madison avenues, Manhattan; and

WHEREAS, the decision of the superintendent of buildings, App. No. 295-1924, rendered June 30, 1925, reads:

"10. Not more than two elevators may be placed in any one shaft. Section 373, Par. 13."

and

WHEREAS, the proposed building is fireproof, 23 stories in height, 184 ft. by 388 ft.; OCCUPIED by offices, about 350 persons on each story; and

WHEREAS, plans and application, in part, proposing 12 separate shafts, each shaft to contain three elevators in common, were submitted to and disapproved by the superintendent of buildings; and

WHEREAS, this appeal was denied by the board November 10, 1925; reopened by the board March 9, 1926; and

WHEREAS, the appellant now contends that each car will have a side emergency exit door, leading to adjacent car, in addition to the top exits; that the efficiency of a single elevator operating in a shaft would be greatly reduced, in case of fire, smoke, panic or accident; that it is possible to install two elevators in each shaft by increasing the size of the car, but this would not give the efficient service demanded in a building of this magnitude.

Resolved, that the decision of the superintendent of buildings be and it hereby is modified, and the appeal be and it hereby is granted on condition that the elevators in any individual shaft shall be limited to three passenger cars, and that the elevator rules shall be complied with in all other respects.

23-26-A.

APPELLANT—Samuel Rosenblum, for Neivel Realty Corporation, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—West side of Van Alst avenue 238 ft. south of South Jane street, Long Island City Borough of Queens.

THE RESOLUTION:

(23-26-A)

WHEREAS, Thomas W. Golding, for Neivel Realty Corporation, owner, filed, January 8, 1926, an appeal from an order of the fire commissioner, affecting premises west side of Van Alst avenue, 238 ft. south of the corner formed by the intersection of South Jane street and Van Alst avenue, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated December 23, 1925, reads (Order No. 44227-12):

"5. Install a 4 in. standpipe system tested to withstand a pressure of 300 lbs. per sq. inch, in accordance with the requirements of Sec. 581, Ch. 5, Code of Ordinances."

and

WHEREAS, the building is non-fireproof, one story (16 ft. in height, 100 ft. by 190 ft. (19,000 sq. ft.) in area; OCCUPIED as an automobile service station; and

WHEREAS, appellant contends that the building faces two street fronts, that there are open courts on both sides of the building; that there are city fire hydrants in the immediate vicinity in both streets; that a night and watchman service is maintained and that the building is equipped with an approved automatic (wet) sprinkler system.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be equipped with a standpipe system in accordance with recommendations contained in the resolution of Cal. No. 179-20-S of the Board of standards and appeals.

330-25-A.

APPELLANT—Tobias Goldstone, for Wyckoff Suydam Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—66-70 Wyckoff avenue and 386 Suydam street, Brooklyn.

## THE RESOLUTION:

(330-25-A)

WHEREAS, Tobias Goldstone, for Wyckoff Suydam Corp., per, filed, March 26, 1925, an appeal from an order of the commissioner, affecting premises Nos. 66 and 70 Wyckoff avenue and Nos. 368-86 Suydam street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated March 1925, reads (Order No. 71811-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure."

WHEREAS, the building is non-fireproof, four stories (52 ft. 2 in.) in height, 200 ft. by 75 ft., about 15,000 sq. ft. area. OCCUPIED: 1st story, radio manufacture; 2nd story, shoe manufacture; 3rd and 4th stories, knitting mills; 1 of 120 persons in the building; and

WHEREAS, this appeal was dismissed for lack of prosecution by the board of December 22, 1925, reopened by the board March 23, 1926; and

WHEREAS, the appellant claims the building is equipped with a sprinkler system and a fire alarm signal system; that the building faces practically three streets; that the building has a small occupancy.

Resolved, that the order of the fire commissioner be and hereby is modified, and the appeal be and it hereby is granted on condition that a standpipe system shall be installed with street connection to city main, fed two ways on both street fronts; siamese connections at both street fronts to be provided, properly marked.

## BUILDING ZONE CASES.

1213-25-BZ.

APPLICANT—Edward P. Doyle, for Hargreen Realty Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings) under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station.

1326-25-BZ.

APPLICANT—William F. Doyle, for Alart Building Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a 1½ times height district, the erection and maintenance of a street wall, in part, to a height exceeding the limit required by the zone resolution.

PREMISES AFFECTED—2849-2855 Broadway, southwest corner of West 111th street, Manhattan.

## APPEARANCES—

For Applicant: William F. Doyle.  
 For Opposition: Lawrence N. Morgenstern, William Bonner.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
 Connell, Holland and Guilfoyle and Chief  
 Kenlon ..... 5  
 Negative ..... 0  
 Absent ..... 0

## THE RESOLUTION:

(1326-25-BZ)

WHEREAS, William F. Doyle, for Alart Building Corporation, owner, filed, December 21, 1925, an application, under the building zone resolution, to permit in a 1½ times height district, the erection and maintenance of a street wall in part, to a height exceeding the limit required by the zone resolution; premises 2849-2855 Broadway, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Broadway is in a business district; that West 111th street is in a residence district, and that Riverside drive is in a residence district, and that all three are in a 1½ times height district; and

WHEREAS, the decision of the superintendent of buildings, December 21, 1925, reads:

"1. Building is in excess of 150 feet on 111th Street from building line on Broadway, and should not exceed 90 ft. in height. Bldg. Zone Resolution."

and

WHEREAS, the proposed building is to be of fireproof construction, 15 stories in height, with a frontage of 100 ft. 11 in. and a depth of 165 ft.; to be occupied as stores on 1st story and apartments on 2nd to 15th stories; it is proposed to erect street wall for full frontage to a height of 150 ft., which is the permitted height, for all but the 15 ft. length at westerly end of 111th street front; and

WHEREAS, the increase in height embraces an irregular gore from zero to 15 ft. above the 90 ft. height, the board deemed that this invasion would not adversely affect the adjoining property, and the strict compliance of the zone resolution would be an unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that

the application be and it hereby is granted on condition that the height of the entire building shall not exceed 150 ft. on the basis of the height regulation affecting the Broadway frontage on condition that the requirements of the building zone resolution shall be complied with in all other respects; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1192-25-BZ.

APPLICANT—John M. Baker, for Frank W. Bruns, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7e and 21 of the building zone resolution, to permit in a business district the erection and maintenance of a proposed building to be used as show rooms, service station and garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Northwest corner of 166th street (Bergen street) and 90th avenue (North 1st street), Jamaica, Queens.

## APPEARANCES—

For Applicant: John M. Baker.  
 For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners  
 Connell, Holland and Guilfoyle .....  
 Negative .....  
 Absent: Chief Kenlon .....

## THE RESOLUTION:

(1192-25-BZ)

WHEREAS, John M. Baker, for Frank W. Bruns, owner, filed, November 17, 1925, an application, under the building zone resolution, to permit in a business district the erection of a proposed building to be used as show rooms, gas station and garage for the storage of more than five motor vehicles; premises northeast corner 166th street (Bergen street) and 90th avenue (North 1st street), Jamaica, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 166th street and 90th avenue are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered November 12, 1925, reads:

"1. Contrary to Article 2, Section 4 of the Building Zone Resolution, in that same is intended, arranged designed as a garage and oil station. Not further considered."

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 10 ft. 10 in. on 90th avenue and 62 ft. 6 in. on 166th street to be occupied as show rooms, gas selling station and garage for the storage of more than five motor vehicles;

WHEREAS, it is proposed to maintain these premises as automobile manufacturers' sales agency and distributing station for the accommodation of the cars in the ownership and distribution of the agency; and

WHEREAS, it is not proposed to maintain or conduct premises as a garage for public storage or a gasoline selling station; and

WHEREAS, the applicant has filed the duly acknowledged consents of more than 80 per cent of the property affected within the area fixed by the board.

Resolved, that the board of standards and appeals hereby make a variation in the application of the use district

# MINUTES

regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the use and occupancy of the building shall be restricted to that of an automobile manufacturers' sales agency and distributing station and that not more than one 550-gallon storage tank shall be permitted on the premises, and that the use and occupancy of the premises shall be restricted to the accommodation of cars in the ownership of the agency conducting business on the premises; that the 166th street frontage of the building and for a depth of not less than 40 ft. 190th street shall be maintained and conducted as a show room and office, separated from the garage area of the premises by a wall of approved masonry, with not more than one opening therein, equipped with self-closing fireproof door; that there shall be no signs erected or maintained on the roof of these premises, any advertising to be limited and restricted to the plate glass show windows of the rear front, and that no signs or advertising shall be exposed otherwise on the 90th street or the 166th street fronts; that the rear and gable walls shall be unpierced throughout their entire height and length, the exterior of same to be finished with light-colored paint; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1281-25-BZ.

APPLICANT—Emil Koeppel, architect, on behalf of Isidore S. Koeppel, owner.

SUBJECT—Application (re: decision of superintendent of buildings) to permit in a residence district the alteration and use in part of the 1st story of an apartment house for store purposes.

PREMISES AFFECTED — 668-672 Howard avenue, Brooklyn.

APPEARANCES—

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(1281-25-BZ)

WHEREAS, Emil Koeppel, for Isidore Koeppel, owner, filed, December 11, 1925, an application, under the building zone resolution, to permit in a residence district the alteration and use of part of the 1st story of an apartment house for store purposes; premises 668-672 Howard avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Howard avenue is in a residence district; that Sutter avenue is in a residence district within 100 ft. of Howard avenue and the remainder is in the business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 2, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"Altering a building for stores in a residential district."

WHEREAS, the existing building is to be of non-fireproof construction, four stories in height, with a frontage of 60 ft. and a depth of 100 ft.; to be occupied as apartment house and stores; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, due to the surrounding non-conforming uses.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as it affects the 1st story on the Sutter avenue front, *on condition* that there shall be no entrance to the stores on the Howard avenue front; that the return of the show windows on the Howard avenue front shall not exceed 5 ft. plus the entrance on the splay formed at the corner by the intersection of Howard avenue and Sutter avenue; that the use and occupancy of the stores shall be restricted to retail mercantile shops, specifically prohibiting the conduct of any fish store, delicatessen store or meat market on the premises; and *on further condition* that the entire remainder of the premises shall be restricted to conforming dwelling uses; that the stores shall be separated from the living apartments at the rear of premises by a wall of approved fireproof material with not more than one opening therein, equipped with a self-closing fireproof door; that all necessary permits shall be obtained within six months and all construction work completed within one year.

41-26-BZ.

APPLICANT—Deiches, Goldwater and Flynn, for John Kasser, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—3600 Jerome avenue, The Bronx.

APPEARANCES—

For Applicant: Maurice Deiches, Monroe Goldwater, F. A. Saymore (park department).

For Opposition: Emanuel S. Cohn, Leon London.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(41-26-BZ)

WHEREAS, Deiches, Goldwater and Flynn, for John Kasser, owner, filed, January 18, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 3600 Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue, Bainbridge avenue and East 213th street are in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered December 29, 1925, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 125 ft. and a depth of 200 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

# MINUTES

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulty and unnecessary hardship, and section 7e, due to existing use and surrounding conditions; and

WHEREAS, the applicant has filed duly acknowledged consents of several adjoining and abutting property owners.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be restricted in height to a one-story structure, with no cellar other than for the accommodation of, and only below, the stores; that the entire Jerome avenue front of the structure shall be developed and maintained for a depth of approximately 60 ft. as retail mercantile stores, separated from the garage area at the rear by unpierced walls of approved masonry; that vehicular entrances for the accommodation of the garage use and operation shall be maintained on the Jerome avenue front at each end of the structure, each vehicular entrance not to exceed a width of 10 ft.; that the rear and gable walls of the entire structure shall be unpierced throughout their entire height and length; that the garage area of the structure shall be ventilated with not less than six (6) automatic louvred ventilators, glazed with plain glass, with wire guards above and below; that the structure shall be constructed fireproof throughout; that the garage area of the structure shall be equipped with a sprinkler system, supplied by direct connection to the city main, that there shall be no roof signs erected or maintained and that not more than one 550-gallon tank for gasoline storage shall be permitted on the premises; the street front other than store fronts shall be finished with face brick, etc.; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

259-23-BZ.

APPLICANT—Gregor Feibel, owner.

SUBJECT—Application for reopening—to extend permit (re: decision of superintendent of buildings) to permit in a residence district the maintenance of a garage for the storage of three (3) motor vehicles, two spaces rented to persons not residing on the premises.

PREMISES AFFECTED—636 East 219th street, The Bronx.

APPEARANCES—

For Applicant: Gregor Feibel.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(259-23-BZ)

WHEREAS, John De Hart, for Gregor Feibel, owner, filed, February 28, 1923, an application, under the building zone resolution, to permit, for a period of two years, in a residence district the maintenance of a garage for the storage of three (3) motor vehicles, two spaces rented to persons not residing on the premises; premises 636 East 219th street, Borough of Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, January 22, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 219th street and Olinville avenue are residence districts; and

WHEREAS, the decision of the superintendent of buildings rendered February 8, 1923, reads:

"Your request for a certificate of occupancy for the garage at above premises, permitting the renting of space in same for three automobiles, is hereby denied as the building is located within a residence district."

and

WHEREAS, the existing building is of frame construction, one-story in height, with a frontage of 26 ft. and a depth of 18 ft.; occupied as a garage for three motor vehicles; space for two of which are rented to persons not residing on premises; and

WHEREAS, under the provisions of section 7, subdivision F, the board is empowered to act; and

WHEREAS, this application was granted by the board at its meeting, January 22, 1924, for a temporary period, and applicant requested an extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, for a temporary period of two years from the date of this action, on condition that the capacity and use of the garage be restricted to the storage of three (3) automobiles of the pleasure-car type, and that no gasoline other than in the tanks of the cars be maintained on the premises.

89-24-BZ.

APPLICANT—William F. Doyle, for Estate of Simeon C. Bradley and James F. McGarry, owners.

SUBJECT—Application for reopening—to modify resolution (re: decision of superintendent of buildings) to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—West side of Webster avenue, 120.18 ft. south of 182nd street, The Bronx.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	
Negative .....	
Absent: Chief Kenlon .....	

THE RESOLUTION:

(89-24-BZ)

WHEREAS, William F. Doyle, for Estate of S. C. Bradley and J. F. McGarry, owners, filed, January 21, 1924, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises west side of Webster avenue, 120.18 ft. south of 182nd street and east side of 181st street, 1 ft. south of 182nd street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its special meeting, April 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Webster avenue, 181st street and East 182nd street are business districts; and

WHEREAS, the decision of the superintendent of buildings rendered December 8, 1923, in acting on N. B. Application No. 2908-23, reads:

"Erection of proposed garage for the storage of more than five motor vehicles in business district contrary to provisions of Building Zone Resolution"

and

## MINUTES

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height on East 181st street and three stories in height on Webster avenue, with a frontage of 100 ft. and a depth of 184.93 ft. on one side and 161.4 ft. on the other; to be occupied as a garage for more than ten motor vehicles; and

WHEREAS, there existed on this street between the intersecting streets on July 25, 1916, a stable for more than ten horses, and the board deemed that in view of the wishes of the owners of property frontage on West 181st street that the application should be granted; and

WHEREAS, this application was granted by the board at its meeting April 15, 1924, on certain conditions, and applicant requested a modification of these conditions as to gasoline storage.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district

regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the garage shall be restricted to the layout and dimensions as described on plans filed in this case, restricting the structure to a three (3) story building on the Webster avenue front and limiting the said structure to one-story building above grade on the 181st street (or Folin avenue) front, and that the front elevation on East 181st street and Webster avenue shall be finished in face brick with architectural terra cotta or stone trimmings;

Resolved, further, that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

Adjourned 6.35 p. m.

WILLIAM J. O'GORMAN, Secretary.

## MINUTES

### \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held March 23, 1926, as they appeared in Bulletin No. 13, Vol. XI, are hereby corrected to read as follows:

(977-25-BZ)

WHEREAS, Emil Guterman, for Michael DeStefen, owner, filed, September 24, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises north-east corner of Roosevelt avenue and 63rd street (Trimble place), Borough of Queens; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, March 23, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

Correction—Words “fire commissioner” substituted for “superintendent of buildings” in lines 14 and 29.

WHEREAS, the use district maps accompanying the building zone resolution show that Roosevelt avenue and 63rd street (Trimble place) are in a business district; and

WHEREAS, the decision of the fire commissioner, rendered September 3, 1925, reads:

“1. A gasoline service station may not be permitted in a business district; appeal may be taken to the Board of Appeals.”;

and

WHEREAS, the premises consist of a plot of ground having a frontage of 87 ft. on Roosevelt avenue and 20 ft. on 63rd street, upon which it is proposed to erect a gasoline selling station, consisting of four 550-gallon tanks, pumps and a small one-story office; and

WHEREAS, the board deemed that the applicant was not entitled to relief under section 21 of the building zone resolution, on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decision of the fire commissioner be and it hereby is affirmed, and that the application be and it hereby is denied.

## MINUTES

### \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held December 29, 1925, as they appeared in Bulletin No. 1, Vol. XI, are hereby corrected to read as follows:

### THE RESOLUTION:

(557-25-S)

WHEREAS, Samuel Rosenblum, for Duman Textile Mills, filed, May 29, 1925, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises 464 Liberty avenue, Brooklyn;

WHEREAS, the order of the fire commissioner reads:

“1. Arrange the iron bars on all windows on north, south, east and west sides of 1st story and basement so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress,

Correction—Word “westerly” changed to “easterly” in line 4.

as per Section 272 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, two stories and basement in height, 100 ft. by 85 ft. in area. OCCUPIED: Basement, wet finishing of cloth, 1 person; 1st story, manufacture of knit goods, 50 persons; 2nd story, manufacture of undergarments, 55 persons. EXITS: Three interior non-fireproof stairways, extending from the 1st story to top story; enclosed in wood board partitions with wooden doors at openings; a fire escape on the south side of the building, having metal covered doors at openings therein, extending from the 2nd story to the courtyard, with EGRESS from the termination of the fire escape by means of court to street; and

WHEREAS, there are approximately 34 barred windows in the basement and approximately 36 barred windows on the 1st story, and petitioner contends that the windows in the basement are 6 ft. above the floor; and that there are ample means of exit provided, there being five in the 1st story, and contends that the bars are necessary as a protection against burglary, and proposes to select one or two windows on each front on the 1st story and arrange the bars to open outwardly to afford additional egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the la-

# MINUTES

bor law, and that the petition be and it hereby is *granted*, only so far as it affects the basement and 1st story, *on condition* that existing high set openings in the basement shall be of the transom type for ventilating purposes and so maintained, the sills of which shall be not less than 6 ft. above the cellar level, and *on further condition* that a

direct exit from the rear easterly end of the basement shall be provided direct to the Liberty avenue grade level and *granted*, so far as it affects the 1st story, *on condition* that not less than the existing five direct doorway exit shall be maintained as indicated on the plans filed in this petition.

an appeal from a decision of the fire commissioner, affecting premises 240-56 East 139th street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered October 30, 1925 (Alteration Application No. 1729-24) reads:

"No. 11—Type 'A' dry pipe valves may not carry more than 400 sprinkler heads. Your layout shows each of the two dry pipe valves is considerably overloaded."

and

WHEREAS, the building is non-fireproof, four and three stories in height, separated by a one-story section; irregular in area, having a frontage of 225 ft. facing East 139th street and a frontage of 100 ft. on Rider avenue; OCCUPIED a wood working factory, 130 persons in entire premises; a

WHEREAS, appellant contends that 475 heads and 525 heads have been installed on each of two dry pipe valves and that each valve is equipped with an exhaustor (approved by various recognized laboratories), and contends, further, that the exhaustor accelerates very materially the operation of a dry pipe valve.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the number of heads shall not exceed by 25 per cent the present allowance under the sprinkler rules, and that the sprinkler equipment shall comply with the rules in all other respects; that the building shall not be increased in height, area or dimension; and *granted* so long as conditions as to occupancy and use shall remain *unchanged*.

# RULES

## FIRE RETARDING RULES

Adopted by the Board of Standards and Appeals August 1, 1917; Amended November 1, 1917, and Feb. 3, 1922.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations the material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame and heat when subjected to a continuous fire for one hour at an average temperature of seventeen hundred (1700) degrees Fahrenheit without the passage of flame, and with a maximum temperature rise to four hundred (400) degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted heat is measured shall be protected from external air under weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet. During the fire, the floor construction shall support a live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood joisted floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and lower sides with the fire-retarding materials specified in these rules for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following forms of construction shall be accepted as fire-retarding floor covering of the upper sides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or metal lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1917.)

**Rule 4. Ceiling Covering.** Any one of the following forms of construction shall be accepted as fire-retarding ceiling covering of the undersides of wood floor beams in joisted floor construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal with one (1) inch lapped seams nailed to the wood beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when the floor beams are spaced more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Phone—Worth 0184.

Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

Index.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Special Meeting, April 23, 1926, at 10 a. m.

Minutes of Special Meeting, April 23, 1926, at 2 p. m.

Minutes of Regular Meeting, April 27, 1926, at 10 a. m.

Minutes of Regular Meeting, April 27, 1926, at 2 p. m.

Res.

Progress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 4, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 11, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## MINUTES

### BOARD OF STANDARDS AND APPEALS

SPECIAL MEETING.

FRIDAY MORNING, APRIL 23, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Martin.

#### PETITIONS FOR VARIATIONS.

927-25-S.  
PETITIONER—Croker National Fire Prevention Engineering Co., for B. Geller & Sons, Inc., lessee.  
SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—202-204 West 30th street and 352-354 7th avenue, 9th story, Manhattan.

#### APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

#### THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Martin .....	5
Negative .....	0
Absent .....	0

#### THE RESOLUTION:

(927-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for B. Geller & Sons, Inc., lessee, filed, September 11, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 202-4 West 30th street and 352-4 Seventh avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 24, 1924 (Order No. 64893-LD), reads:

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law."

and

WHEREAS, the building is fireproof, 17 stories in height, "L" shape, having a frontage of 38 ft. on Seventh avenue and a frontage of 46 ft. on West 30th street; OCCUPIED as a tenant factory, approximately 500 persons above the 1st story; lessee occupying the 9th story as manufacturing furriers, 60 persons; EQUIPPED with a sprinkler system and an interior fire alarm signal system. EXITS: Two fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner contends that the partitions enclosing the entrance hall, office and showrooms are constructed of ornamental wood, and proposes to back up the factory side of the entrance hall and office partitions with approved fire-retarding material, and proposes, further, to remove all glass panels between the tops of these partitions and the

ceiling and proposes to remove all combustible partitions excepting said partitions at entrance hall, office and showrooms.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law; and that the petition be and it hereby is granted, on so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that a door not less than 36 in. wide shall be provided in said partition, leading direct from workroom and opening out to exit hall; that an exit sign at least 8 inches in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partition subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material specified under subdivisions A to H of section 355 of building code, or any approved fireproof partition; and the occupancy and use shall remain substantially unchanged.

928-25-S.

PETITIONER—Croker National Fire Prevention Engineering Co., for Grauer & Herskowitz, lessee.  
SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—202-204 West 30th street and 352-354 7th avenue, 11th story, Manhattan.

#### APPEARANCES—

For Petitioner: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

#### THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Martin .....	5
Negative .....	0
Absent .....	0

#### THE RESOLUTION:

(928-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Grauer & Herskowitz, lessees, filed, September 11, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 202-4 West 30th street and 352-4 Seventh avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 24, 1924 (Order No. 64895-LD), reads:

# MINUTES

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law.";

and  
WHEREAS, the building is fireproof, 17 stories in height, "L" shape, having a frontage of 38 ft. on Seventh avenue and a frontage of 46 ft. on West 30th street; OCCUPIED as a tenant factory, approximately 500 persons above the 1st story; lessee occupying the 11th story as a manufacturing furrier, 50 persons; EQUIPPED with a sprinkler system and an interior fire alarm signal system. EXITS: Two fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner contends that the partitions enclosing the entrance hall, offices and showrooms are constructed of ornamental wood, and arranged so as not to interfere in any way with the sprinkler system, and proposes to back up the factory side of the entrance hall and office partitions with approved fire-retarding material, and proposes to remove all combustible partitions excepting said partitions at entrance hall, offices and showrooms.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that exit door not less than 36 in. wide shall be provided in said partition, leading direct from workroom and opening out to exit hall; that an exit sign at least 8 inches in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partition subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

929-25-S.

## THE RESOLUTION:

(936-25-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Fit Well Dress Co., lessee, filed, September 11, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises Nos. 202-4 West 30th street and Nos. 352-4 Seventh avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 24, 1924, reads (Order No. 64887-LD):

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, 17 stories in height, "L" shape, having a frontage of 38 ft. on Seventh avenue and a frontage of 46 ft. on West 30th street; OCCUPIED as a tenant factory, approximately 500 persons above the 1st story, lessee occupying the 30th street front of the 5th story for the manufacture of dresses, approximately 26 persons; EQUIPPED with a sprinkler system and an interior fire alarm signal system. EXITS: Two fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner proposes to back up with approved fire-retarding material the workroom side of the wooden partitions forming the office, and requests the acceptance, as incombustible, of the sheet rock partitions, extending to the ceiling between the two tenants on this story and forming also a part of the office and the vestibule.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, *on condition* that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that exit door not less than 36 in. wide shall be provided in said partition, leading direct from workroom and opening out to exit hall; that an exit sign at least 8 inches in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partition subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

952-25-S.

## THE RESOLUTION:

(952-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Hundys & Gross, lessees, filed, September 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner affecting premises No. 1364-70 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated September 28, 1924, reads (Order No. 68823-LD):

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, 17 stories in height, 105 ft. 9 in. by 170 ft. in area; OCCUPIED as a tenant factory, approximately 400 persons above the 1st story, lessee occupying the 15th story for the manufacture of skirts, 15 persons; EQUIPPED with a sprinkler system and interior fire alarm signal system. EXITS: Two interior fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner contends that the partitions enclosing the entrance hall, office and showrooms are constructed of ornamental wood and do not interfere in any way with the sprinkler system; and proposes to back up these partitions with approved fire-retarding material and remove any panels between these partitions and the ceiling, and propose further, to remove all other combustible partitions enclosing said entrance hall, office and showroom partitions.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, *on condition* that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that exit door not less than 36 in. wide shall be provided in said partition leading direct from workroom and opening out to exit hall; that an exit sign at least 8 in. in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant, the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partition subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

THE RESOLUTION:

(953-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Lustberg & Lipschitz, lessees, filed, September 15, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 1364-70 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 28, 1924, reads (Order No. 68842-LD):

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law."

WHEREAS, the building is fireproof, 17 stories in height, 105 ft. 9 in. by 170 ft. in area; OCCUPIED as a tenant factory, approximately 400 persons above the 1st story, lessees occupying the westerly portion of the 7th story for manufacture of dresses, 14 persons; EQUIPPED with sprinkler system. EXITS: Two interior fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner contends that the partitions enclosing entrance hall, office and showrooms are constructed of ornamental wood and do not interfere in any way with the sprinkler system; and proposes to back up these partitions with approved fire-retarding material and remove any glass partitions between these partitions and the ceiling, and proposes, further, to remove all other combustible partitions except said entrance hall, office and showroom partitions.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that the floor not less than 36 in. wide shall be provided in said partition leading direct from workroom and opening out to exit hall; that an exit sign at least 8 in. in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant, the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partition subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

THE RESOLUTION:

(954-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for J. Tenenbaum & Sons, lessees, filed, September 15, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 1364-70 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 28, 1924, reads (Order No. 68840-LD):

"1. Remove all partitions not built of incombustible material, as per Sections 263 and 270 of the Labor Law."

and

WHEREAS, the building is fireproof, 17 stories in height, 105 ft. 9 in. by 170 ft. in area; OCCUPIED as a tenant factory, approximately 400 persons above the 1st story, lessees occupying the entire 9th story and the northerly portion of the 10th story for the manufacture of millinery, 30 persons on the 9th story and approximately 10 persons on the 10th story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, petitioner contends that there is a fireproof accommodation stairway between the 9th and 10th story workrooms; that the partitions on the 9th story, enclosing the entrance hall, office and showrooms, are constructed of ornamental sheet rock and do not, in any way, interfere with the sprinkler system; that the factory portion of the 9th story is separated from the remainder of the floor by a fireproof partition, and petitioner requests the acceptance of these sheet rock partitions as incombustible; and in regard to the 10th story, contends that the partitions in question are mostly wooden dwarf partitions 7 ft. to 8 ft. high, and that fireproof partitions separate the spaces occupied by the two tenants on this story.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that the exit door not less than 36 in. wide shall be provided in said partition leading direct from workroom and opening out to exit hall; that an exit sign at least 8 in. in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant, the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partition subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

THE RESOLUTION:

(664-25-S)

WHEREAS, H. Davis & Son, lessee, filed, June 26, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 240-46 West 35th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 19, 1925, reads (Order No. 77859-LD):

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law.";

and

WHEREAS, the building is fireproof, 17 stories in height, 100 ft. by 98 ft. 9 in. in area; OCCUPIED as a factory building, 45 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system, also stand-pipes. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner, occupant of the 8th story, proposes to remove the centre cross partition; he contends that

the hardwood partitions, 7 ft. high, enclosing the women's dressing room on the west side, also the partitions of plaster boards on studs extending from floor to ceiling at north west corner of loft, is a very necessary adjunct to his business, and requests the board to permit them to remain intact and

WHEREAS, this petition was granted by the board at its meeting February 16, 1926, on certain conditions, and petitioner requested a modification of these conditions.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the existing plasterboard partitions of the 8th story enclosing the workroom at the northwest corner front of building, and the existing 3 in. block partition with self-closing hardwood doors at the northeasterly corner front of 8th story, and that all other non-fireproof partitions shall be removed; the entire premises shall be equipped with approved sprinkler system and the order comply with in all other respects.

Absent ..... 0

## THE RESOLUTION—

(1286-25-S)

WHEREAS, Samuel Rosenblum, for Abraham L. Werner, et al., trustees, owners, filed, December 14, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 736 Broadway, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 17, 1925 (Order No. 87176-LD), reads:

"1. Provide safe and unobstructed egress from the lower termination of the exterior stairway at the rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, \* \* \*";

and

WHEREAS, the building is fireproof, 11 stories in height, 24 ft. 3 in. by 107 ft. in area. OCCUPIED: 1st story, restaurant, and upper stories as tenant factory, manufacture of coats, suits, etc., 260 persons above the 1st story (the occupancy of the building above the 1st story to be limited to the capacity of the interior stairs); EQUIPPED with a fire alarm signal system. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; an exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the 2nd story balcony; with EGRESS from the termination of the fire escape by means of an iron platform connecting to the fire escape balconies on No. 738 Broadway, No. 740 Broadway and No. 440 Lafayette street; also an iron stair leads to the yard of No. 738 Broadway: ROOFS of adjoining buildings are six stories lower; and

WHEREAS, petitioner contends that the occupancy of the premises will be limited to the capacity of the stairway only; and contends, further, that the existing means of egress from the termination of the exterior screened stairway were accepted by the building department; and

WHEREAS, the exits were approved by the bureau of buildings for factory use under Alt. Application No. 3362-1916.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from termination of the standard, approved rear exterior screened stairway, on con-

# MINUTES

dition that iron platform and balconies shall be provided at the termination of the exterior screened stairway at 2nd story level, connecting with three buildings to the north by means of iron balconies; that the occupancy of the building shall be restricted to the legal capacity of the interior stairs only; that a separate and independent exit shall be provided from the store at the street level, independent of the main entrance to the building; and *granted* so long as conditions as to occupancy and use otherwise remain substantially unchanged.

THE RESOLUTION—

(1289-25-S)

WHEREAS, Samuel Rosenblum, for Arthur Mueller, owner, filed, December 14, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 780 Madison street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 14, 1925, reads (Order No. 82584-LD):

"1. Enclose the interior stairway at south side of building on 1st story with partitions of fire resisting material extending from floor to the underside of the 2nd story as per Rule 2, Board of Standards and Appeals, adopted July 29th, 1924.

"2. Arrange the fire escape on the west side of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Section 273 and 274 of the Labor Law.

"Note: No stairway from top balcony to roof.

"3. Provide a second means of exit from 4th story as per Section 271 of the Labor Law."

and

WHEREAS, the building is non-fireproof, three stories in height at front and four stories in height at rear, 20 ft. by 100 ft. in area, the four-story section being 28 ft. by 28 ft. in area. OCCUPIED: 1st story, showroom and shipping, 17 persons; 2nd story, manufacture of upholstered furniture, 15 persons; 3rd story, finishing, 1 person; 4th story, storage, no occupancy; EQUIPPED with a fire alarm signal system. EXITS: Two interior wooden stairways, extending from the 1st story to top story; enclosed in wooden partitions with wooden doors at openings; a 60 degree fire escape on the west wall of the building, having fireproof openings along the course thereof, extending from the top story balcony (with gooseneck ladder to roof) to the 2nd story balcony; with counterbalanced stair to side yard; with EGRESS from the termination of the fire escape by means of yard directly to the street; ROOFS of adjoining building to east one story higher; and

WHEREAS, petitioner contends that a second means of egress from the 4th story may be had by means of windows opening on roof of the three-story section and thence by means of gooseneck ladder leading to fire escape balcony at 3rd story, and contends, further, that the existing means of

exit are adequate for the small occupancy of the premises.

*Resolved*, that the board of standards and appeals do hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Item 2, only so far as it affects stairway from the top story balcony to roof; as to Item 3, *on condition* that a gooseneck ladder shall be provided from 3rd story balcony to roof level; and that the 4th story shall be maintained unoccupied and restricted to storage use only; as to Item 1, the petition be and it hereby is *denied*.

## THE RESOLUTION—

(1309-25-S)

WHEREAS, Herbert Wilson, for 348 West 36th Street Corporation, owner, filed, December 17, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 348 West 36th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated November 24, 1925, reads (N. B. Applic. No. 565-1925):

"14. Windows should comply with Rule 503 of Industrial Code.";

WHEREAS, the building is fireproof, 12 stories in height, 25 ft. by 98 ft. 9 in. in area at 1st story and 25 ft. by 88 ft. 10 in. in area above. OCCUPIED: 1st story, stores; 2nd story occupancy above; 50 persons on each story; and

WHEREAS, the petitioner proposes to use plate glass for show windows at 1st story street front; the maximum size to be 8 ft. 6 in. by 10 ft. 6 in.; to be used for the display of merchandise.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the show windows of store fronts on 1st story level, on condition that the openings shall be equipped with approved metal frames glazed with 1/4 in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION—

(980-25-S)

WHEREAS, Raymond Irrera, for Frank Suglia, owner, filed, September 29, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the health commissioner, affecting premises No. 308 Hopkins Avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the department of health reads: "At a meeting of the Board of Health of the Department of Health of The City of New York, held July 21, 1925, your application for a Sanitary Certificate for a cellar bakery at No. 308 Hopkins Avenue, Astoria, Long Island, in the Borough of Queens, was denied.";

WHEREAS, the building is of frame construction, one story cellar in height, 25 ft. by 52 ft. in area. OCCUPIED: 1st story, bakery; 1st story, two living apartments; the height of the bakery from floor to ceiling is 9 ft. 10 in.; the ceiling of the bakery is 1 ft. above curb level; the rear area is 6 in. above the bakery floor; the means of ventilation consisting of show windows, 2 ft. by 3 ft. in area, opening to yard;

WHEREAS, Calendar No. 125-24-S, requesting permit for a cellar bakery on these premises, was denied March 18, 1924, by the board under certain conditions claimed by the petitioner; and

WHEREAS, the petitioner has since increased the height of the bakery from floor to ceiling, and constructed a rear area extending 6 in. below bakery floor; the petitioner now contends that the bakery conforms to law with the exception of the height of bakery from floor to ceiling, which is only 2 in. under the required height.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the story height in the clear in the cellar bakery, on condition that no portion of the bakery shall be less than 9 ft. 10 in. in height; and that the requirements of the labor law, affecting the operation and conduct of this bakery, shall be complied with in all other respects.

THE RESOLUTION—

(908-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for Estate of Levi P. Morton, owner, filed, September 9, 1925, a petition for variation from the requirements of the labor law, as cited in the orders of the fire commissioner, affecting premises Nos. 110-116 Nassau street and Nos. 43-5 Ann street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 30, 1925, read (Order No. 81613-LD):

"1. Provide approved self-closing fire doors at openings leading to stairway at Ann St. side of building on all stories, opening outwardly so as not to obstruct the stairway, as per Sec. 271 of the Labor Law and Rule 507 of the Industrial Code.

"2. Reduce the area of wire glass in doors leading to stairhall enclosure at Ann St. side of building on all stories, so that same does not exceed 720 square inches and no one pane to exceed 360 square inches per Rule 505 of the Industrial Code."

(Order No. 81614-LD)

"1. Enclose the interior stairway at Nassau St. side of building serving as a required means of exit, at the landings, platforms, and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to 3 ft. above the roof, \* \* \*";

and

WHEREAS, the building is fireproof, 12 stories in height, irregular in area; having a frontage of 33 ft. 6 in. on Ann street, 73 ft. on Nassau street and a maximum depth of 110 ft. EXITS: A fireproof stairway, in the Ann street section of the premises, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; an open fireproof stairway in the Nassau street section, extending from the 1st story to roof; ROOFS of adjoining buildings to east 5 stories lower, to north 7 stories lower; and

WHEREAS, petitioner proposes to rearrange all doors leading to the Ann street stairway so that they will swing into the stairway; to subdivide the glass panels, in doors leading into the stairway, so that no panel will exceed 360 sq. in. area; and requests the acceptance of the open stairway view of the proposed reduction of the number of persons engaged at factory work, proposing to limit this number to 25 persons; and

WHEREAS, a committee of the board inspected the premises and reports:

March 26, 1926

Re:—Cal. No. 908-25-S,

Premises:—110-116 Nassau Street and 43-45 Ann Street, Manhattan.

REPORT OF COMMITTEE:—

On March 25, 1926, the entire Board, consisting of Chairman Walsh, Chief Kenlon and Commissioners Guilfoyle, Connell and Holland, visited these premises regarding an order of the Fire Commissioner now before the Board for the enclosure of the stairs on the Nassau Street section.

The building is "L" shaped, running from Nassau Street around and through to Ann Street. The construction and partitions are of fireproof construction. In the Ann Street section of the building there are enclosed fireproof stairs. The stairway on the Nassau Street front is the main stairway of the building and is located directly beside the elevator shafts. The elevator shafts are enclosed with wire glass. The elevator shaftway at the roof is provided with a skylight.

# MINUTES

the full extent of the shaftway. The rear wall of the elevator shaftway has windows in it in the run of the shaft. The office doors opening into the hallway where not provided with self-closing devices should be so equipped.

The Board is of the opinion that, with the fire-fighting appliances as required by law installed and maintained and the absence of any combustible occupancy, the order might be waived, as the only way of complying with it would be to erect a vestibule enclosure for the full length of the main stairs on each floor, which would cut down the width of the corridor in each story and create an obstruction, and would not go for an orderly and direct egress in the event of an emergency dismissal, and as to erect the fireproof partition on the line with the stairway all doors to stairs would open in the run of the stairs overhanging the steps at the top and bottom of each flight, which could not be considered a safe proposition.

WILLIAM E. WALSH,  
JOHN KENLON,  
HENRY L. CONNELL,  
JAMES P. HOLLAND,  
JOHN GUILFOYLE.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that all doors on the corridors throughout the building shall be equipped with self-closing devices; that all transom and partition sash of corridors are made fireproof; that all fire-fighting appliances required by law shall be installed and maintained; and granted only so long as conditions as to occupancy and use remain unchanged.

10-25-S.

PETITIONER—Margaret C. Howard, lessee.  
SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—602 Madison avenue, Manhattan.

APPEARANCES—

For Petitioner: John M. Downes.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioners Connell and Holland and Chief

Kenlon . . . . . 4

Negative: Commissioner Guilfoyle . . . . . 1

Absent . . . . . 0

THE RESOLUTION—

(1110-25-S)

WHEREAS, Margaret C. Howard, lessee, filed, October 28, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises No. 602 Madison avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 8, 1925, reads (Order No. 86009-LD):

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law; or

"Comply with conditions as stated in Calendar 1023-21-S of the Board of Standards and Appeals."

WHEREAS, the building is non-fireproof, five stories in area at 1st story, 25 ft. by 70 ft. in area at 2nd story and 25 ft. by 54 ft. in area above.

USED: 1st story, store, salesroom and stockroom, 2nd story, workroom, millinery and dresses, 22

persons; upper stories, living apartments. EXITS: An interior wooden stairway, extending from the 1st to top story (with iron ladder to scuttle in roof), enclosed on the 1st and 2nd stories in fireproof partitions with fire doors at openings; and on the upper stories enclosed in wood studs, lath and plaster, with wooden doors at openings; a fire escape on the rear of the building (having gooseneck to roof) extending from the top story balcony to rear yard; having fireproof windows on the course thereof, on the 1st and 2nd stories only; ROOFS of adjoining building, to north same height, to south 12 ft. higher; and

WHEREAS, under Cal. No. 1023-21-S, egress from the termination (in the yard) of the fire escape by means of an opening in the fence leading to the yard to the north, was accepted; this egress has been blocked by the construction of a three-story and a two-story extension to the building to the north, No. 604 Madison avenue; and

WHEREAS, petitioner proposes to connect the 2nd story fire escape balcony with the roof of the two-story extension (at the west) of No. 604 Madison avenue, and to provide an iron gooseneck ladder leading from extension roof to yard of premises No. 28 East 58th street, and also to extend the 3rd story fire escape balcony to the roof of the three-story extension (to the north) of No. 604 Madison avenue.

*Resolved*, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that balcony fire escape shall be provided at level of 2nd story, connecting with a bridge to be provided across the roof of extension of building to the west; that a 60 degree iron stair shall be provided from said balcony extension to the yard of 28 East 58th street, with egress therefrom through plain glass opening direct to the street; that the factory occupancy shall be restricted to the 2nd story; and that the rest of the building shall remain substantially unchanged as to occupancy and use; and that the conditions herein stipulated shall be in addition to any other conditions imposed by any former resolution adopted by this board on these premises.

1235-25-S.

PETITIONER—Charles A. Platt, for Vincent Astor, owner.

SUBJECT—Application for reopening—amendment—variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—697 Fifth avenue, Manhattan.

APPEARANCES—

For Petitioner: Abel I. Smith.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition reopened and resolution amended.

Negative . . . . . 0

Absent: Chief Kenlon . . . . . 1

THE RESOLUTION—

(1235-25-S)

WHEREAS, Charles A. Platt, for Vincent Astor, owner, filed, December 2, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 697 Fifth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 30, 1925 (N. B. Applic. No. 538-1925), reads:

"1. Exits should comply with Sec. 270, Subd. 3 of Labor Law for all floors."

and

# MINUTES

WHEREAS, an application was filed in the bureau of buildings (N. B. 538-1925) for the construction of a five-story fireproof building, 25 ft. by 100 ft. in area at 1st story and 25 ft. by 88 ft. in area above; and under date of November 24, 1925, an amendment was filed to change the occupancy of the building as follows: Cellar, storage, 5 persons; 1st story, store, 25 persons; 2nd story to 5th story, showrooms, 25 per cent manufacturing, 30 persons per story; means of EGRESS to consist of an interior fireproof stairway, extending from 1st story to roof, enclosed in 6 in. terra cotta partitions with fireproof self-closing doors at openings; the proposed second means of EXIT to consist of a 24 in. wide exterior screened stairway on the rear of the building from the mezzanine floor to the roof, connected to fireproof building at the rear by bridge at the 3rd story level, building at the rear being under same ownership; it was proposed to have the store entrance door on the 1st story and the door from store to exit hall 3 ft. wide and swinging in; the cellar exits consist, in addition to the fireproof stairway to the 1st story, of an engineer's ladder to the sidewalk; there will be no heating plant in the cellar, heat being obtained from the adjoining premises; and

WHEREAS, this petition was denied by the board at its meeting March 2, 1926, and petitioner requested a reopening of his case on the basis of providing additional protection.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects direct egress from the second means of exit, *on condition* that the building shall not exceed a height of five (5) stories; that any industrial operation and occupancy shall be restricted to the conduct of the business of lessee of the premises for light needlework incidental to haberdashery or similar business; that an iron platform 6 ft. wide with railings not less than 6 ft. in height shall be constructed and maintained from termination of exterior screened iron stairway on rear of building leading directly to the building adjoining to the north, in the same ownership, with egress through fireproof passageway to public corridor of said adjoining building; that the occupancy of building shall be limited to the legal capacity of the interior stairs.

21-26-S.

PETITIONER—W. L. Rouse and L. A. Goldstone, for 15 East 53rd Street Corporation, owner.

SUBJECT—Application for reopening—modification—variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—15 East 53rd street, Manhattan.

APPEARANCES—

For Petitioner: James A. O'Gorman, Jr.

ACTION OF BOARD—Petition reopened and granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE TO REOPEN—

THE RESOLUTION:

(21-26-S)

WHEREAS, W. L. Rouse and L. A. Goldstone, for the 15 East 53rd Street Corporation, owner, filed, January 7, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 15 East 53rd street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings rendered December 23, 1925, reads:

"5. Provide two exits remote from each other as per Section 270-3 of Labor Law.

"6. Provide two exits from cellar.

"7. Width of vestibule and exit doors leading to street may be not less than aggregate width of stairways leading to same (Section 270-5 of Labor Law). Fireproof stair enclosure in first story should be continued to building line.

"9. Front and rear windows should be fireproof windows as per Sec. 264-7 of Labor Law and Rule 5 of Industrial Code. Show complete compliance with same."

and

WHEREAS, the building is fireproof, nine stories in height, 25 ft. by 97 ft. 4½ in. in area on the 1st story and 25 ft. by 90 ft. ½ in. above. OCCUPIED: Cellar, storage, 5 persons; 1st story, stores, 30 persons; 2nd to 9th stories, loft, offices and showrooms, with 25 per cent manufacturing, 30 persons per story, the building being equipped with a sprinkler system; the means of egress consisting of two interior stairways, adjoining each other in a central shaft with landing on the 1st story, one in the open corridor and other in the open vestibule leading to street; the means of egress from the cellar consisting of an interior stairway leading to the 1st floor store; and

WHEREAS, the petitioner contends that the access doors to the stairways are 25 ft. apart; owing to the small size of the building the doors to the stairs on the rear are 25 ft. from the rear and at the front 45 ft. from the front wall; that the area of the cellar is less than 1,800 sq. ft.; that the cellar is only used for storage; that the vestibule is an open one with no doors at street; the partition between vestibule and store will be of metal and wire glass; that the vestibule is only 14 ft. in length and the opening to street is 4 ft. 9 in. in width; that the occupancy of building will be small, approximately one-quarter of the capacity of the stairs, and petitioner requests acceptance of the plate glass of large area in the show windows on 1st and 2nd stories and the center window in the street front in the 3rd to 9th story, inclusive; and

WHEREAS, this petition was denied by the board at its meeting March 16, 1926, and petitioner requested a reopening of the case.

*Resolved*, that the board of standards and appeals hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on the street front of four (4) lower stories, *on condition* that the openings shall be equipped with approved metal fire glazed with ¼ in. polished plate glass; and that the decision of the superintendent of buildings, Items 5, 6, 7 and remainder of Item 9, be *affirmed*, and that the petition on these items be *denied*.

1588-21-S.

PETITIONER—Samuel Rosenblum, for Lawrence H. Co., owner.

## THE RESOLUTION:

(1588-21-S)

WHEREAS, Charles B. Meyers, for Lawrence Holding Co., owner, filed, December 7, 1921, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 2-6 East Broadway, 10-12 Catherine street and 18-19 Chatham square, Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"1. Provide an exterior screened iron stairway on the south side of building as per Section 79B-1 of the Labor Law, not less than 44 ins. in width extending from ground to roof, with a balcony on each floor and an independent means of egress from its lowest termination by means of an open court or courts or a fireproof passageway leading to the street, constructed as per Section 79F-10 of the Labor Law or carry out a proper alternative method of complying with the requirements of Section 79B-1 of the Labor Law."

and  
WHEREAS, the building is fireproof, ten stories in height, 7 ft. by 61 ft., irregular in area. OCCUPIED: 2nd story, mfg. raincoats, 25 persons; 3rd story, mfg. clothing, 30 persons; 4th story, mfg. clothing, 15 persons; 5th story, mfg. clothing, 55 persons; 6th story, mfg. coats, 55 persons; 7th story, mfg. pants, 60 persons; 8th story, mfg. coats, 30 persons; 9th story, mfg. pants, 60 persons; 10th story, mfg. coats, 50 persons; the building being equipped with a sprinkler system and a fire alarm signal system; the means of egress consisting of an interior stairway extending from the 1st story to the roof, enclosed in brick partitions with flame doors at openings; a fire escape on the Catherine street front of the building; two fire escapes on the East Broadway front of the building; a fire escape on the Chatham square front of the building, with fireproof windows along the course of the fire escapes; balconies being connected by 5 degree screened stairs; and

WHEREAS, petitioner contends that on March 5, 1914, the owners of the property complied with the orders of the department of labor requiring reconstruction of windows along the course of the fire escapes and provided counterbalanced stairs to the street and that the work was done and the orders dismissed and this would indicate that the fire escapes were considered a second means of egress; and

WHEREAS, this petition was granted by the board at its meeting May 2, 1922, on certain conditions, and owner, through his representative, Samuel Rosenblum, requested a reopening of the case and a modification of the resolution. Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a counterbalanced stairway shall be provided from the lowest balcony of each fire escape to the street; that the sash on windows opening to the 2nd story balcony, north and Chatham square front, be replaced with metal frames and sash, glazed with wire glass, sash made self-closing, the opening to this fire escape, 2nd to 9th stories to be provided with fireproof self-closing casement door; that a wet sprinkler system, fire alarm system and a monthly fire drill shall be installed and maintained; and that the occupancy shall not exceed 65 persons on any one floor.

## THE RESOLUTION:

(29-26-A)

WHEREAS, Morris Schwartz, for Shea Theatre Corporation, owner, filed, January 11, 1926, an appeal from an order of the fire commissioner, affecting premises 111-117 East Houston street and 229 Chrystie street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 23, 1925 (Order No. 61-A), reads:

"1. Provide a new suction tank of steel or concrete to supply fire pump in basement. Capacity to be 5,000 gallons.

"Chapter 5, Article 25, Section 524, Code of Ordinances."

and

WHEREAS, the building is fireproof, eight stories in height, 86 ft. by 155 ft. in area. OCCUPIED: Houston street front, preparatory school, 66 persons per story, and the remainder of the premises as a theatre; orchestra, 920 persons; 1st balcony, 536 persons; 2nd balcony, 485 persons; roof garden portion, orchestra, 735 persons; balcony, 246 persons; the theatre having a total capacity of 1,941 persons and the roof garden a total capacity of 981 persons; and

WHEREAS, applicant proposes to omit the required suction tank to supply the fire pump, contending that the present 2 in. supply pipe taken directly from the 20 in. street main affords an adequate supply; and

WHEREAS, the fire department representative at the hearing reported that there is not a sufficient or adequate water supply, without the tank supply, for use and operation of fire lines when required.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1327-25-A.

APPELLANT—William F. Doyle, for Redwood Garage Corp., lessee.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—2227 Webster avenue, The Bronx.

WHEREAS, Wm. F. Doyle, for Redwood Garage Corp., lessee, filed, December 21, 1925, an appeal from a decision of the fire commissioner, affecting premises 2227 Webster avenue, The Bronx; and

WHEREAS, the decision of the fire commissioner, dated December 1, 1925, reads:

"With reference to your application, dated October

# MINUTES

26, 1925, for a permit to conduct business at above premises—2227 Webster Ave. (motor vehicle repair shop)—this location appears to be shown on the use district map accompanying the building zone resolution of the Board of Estimate and Apportionment as a business district. Inasmuch as you are conducting or propose to conduct a business which is prohibited use at this location, your application is denied.

"No further consideration can be given unless the Superintendent of Buildings having jurisdiction advises or certifies that the business conducted or proposed to be conducted is a lawful one at this location.

"Be further advised that the occupancy as above noted without a permit from the Fire Commissioner is in violation of the Code of Ordinances and subject to penalty."

and

WHEREAS, the building is non-fireproof, three stories in height, 102 ft. by 172 ft. in area; OCCUPIED as a garage for the storage of more than five (5) motor vehicles; and

WHEREAS, the appellant contends that the minor auto repair work done on the 1st story of the Webster avenue front consists of greasing cars, repairing motors, replacing old parts; that there is no heavy machinery other than a one-half horsepower electric drill used on the premises.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, only so far as it affects the lowest story, street grade, on the Webster avenue frontage for minor repairs and adjustments of manual operation incidental to the conduct and operation of a public garage, on condition that no motor-driven machinery be employed other than a one-half horsepower drill; no anvil, forges or devices of open flames shall be used in the conduct of such work; and that the stipulations of resolution under Cal. No. 89-24-BZ otherwise shall be complied with in all respects.

35-26-A.

APPELLANT—C. E. Hicks, for New York Dock Company, owner.

SUBJECT—Appeal from order of fire commissioner. PREMISES AFFECTED—West side of Van Brunt street, 58 ft. 2 in. south of Harrison street, Warehouse No. 137, Brooklyn.

APPEARANCES—

For Appellant: G. A. Eweler.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition. CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent: Chief Kenlon.....	1

THE RESOLUTION:

(35-26-A)

WHEREAS, C. E. Hicks, chief engineer, for New York Dock Company, owner, filed, January 14, 1926, an appeal from an order of the fire commissioner, affecting premises on west side of Van Brunt street, 58 ft. 2 in. south of Harrison street, Warehouse No. 137, foot of Harrison street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 14, 1925 (Order No. 87818-F), reads:

"Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, seven stories (87 ft. 3 in.) in height, 59 ft. 1 in. by 170 ft. (10,044 sq. ft.) in area; OCCUPIED as a storage warehouse, not more than 6 persons in the building at any time; used for the storage of cocoa beans, nutmegs and hides since 1885; and

WHEREAS, the appellant contends the building is of slow burning semi-mill construction; that the use is restricted by the New York Fire Insurance Exchange to the storage of non-inflammable and incombustible commodities; that watchmen are on duty all day and night; and that the occupancy is small.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be not increase in height, area or dimension; that there shall be no heating appliance or apparatus maintained in the premises; that no hazardous storage or material shall be maintained on the premises; and granted only so long as conditions as to operation and use shall otherwise remain substantially unchanged.

66-26-A.

APPELLANT—William Higginson, for Anable Avenue Factory Corp., owner.

SUBJECT—Appeal from order of fire commissioner. PREMISES AFFECTED—East side of Pearson street, 280 ft. north of Creek street, Long Island City, Borough of Queens.

## THE RESOLUTION:

(40-25-A)

WHEREAS, The Acton Gas Stations, Inc., lessee, filed, January 9, 1926, an appeal with the board of appeals from an order of the fire commissioner, affecting premises Spuyten Duyvil parkway and West 227th street, The Bronx; and

WHEREAS, the order of the fire commissioner reads:

"Referring to your application for a permit to maintain an oil storage plant for the storage of gasoline, at the above address, your attention is respectfully invited to Section 111-5, Chapter 10, Code of Ordinances, which reads in part as follows:

"All storage tanks comprising or forming part of an oil storage plant shall be buried so that the tops thereof shall be at least 2 ft. below the grade level.

"Inspection of the above premises shows the following conditions exist:

"1. Tanks are not buried. Section 111-5, Chapter 10, Code of Ordinances.

"3. One tank exceeds the maximum capacity permitted in Section 111-5, Chapter 10, viz., 100,000 gals.

"4. The total capacity of the group of tanks for which permit is requested exceeds the maximum quantity permitted, viz., 250,000 gals. Chap. 10, Section 111-5, Code of Ordinances."

nd

WHEREAS, the premises consist of a plot of ground along the Harlem Ship Canal, upon which is located, 30 ft. from each other, two steel gasoline storage tanks (cross connected with a 6 in. pipe) of respectively 200,000 and 75,000 gallons capacity; and

WHEREAS, applicant contends that there are no buildings within 5,000 ft. of the location and proposes to increase the height of the ½ in. steel wall forming the pit around the tanks to a point so that the pit will be of such a capacity as to take care of the contents of the tank; and

WHEREAS, a committee of the board inspected the premises and reported:

April 28th, 1925.

Cal. No. 40-25-A.

Premises—Spuyten Duyvil Parkway,  
& West 227th St., The Bronx.

## REPORT OF COMMITTEE:

A Committee of the Board, consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Holland and Connell, on April 23rd, 1925, visited the above premises under appeal, on an objection of the Fire Department as to location of the proposed gasoline oil storage.

There are two (2) existing tanks, used for a number of years, from record, for the storage of oil. They are located on the neck of land projecting into the Spuyten Duyvil Creek of the Harlem Ship Canal, formerly a part of the now discontinued Johnston Iron Works, which land has been taken over by the State.

All buildings and structures from the Creek to the next nearest public roadway, a distance of at least 500 feet or more, have been entirely demolished or removed. There is no structure of any nature that would be involved and as a result, the tanks are isolated from any improvement, structure or condition that would be impaired or adversely affected by any fire menace or hazard, and as the use is temporarily subject to notice

of removal, the Committee recommends the granting of a temporary permit for one (1) year, on condition that reasonably sufficient excess capacity be provided in the nature of surrounding enclosure reservoir, equal in capacity to not less than one-half of the capacity of the tank in each case, to retain and control any leakage or discharge.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
JAMES P. HOLLAND,  
HENRY L. CONNELL.

and

WHEREAS, the board granted this appeal under date of April 28, 1925, the resolution reading:

"Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, for a temporary period of one (1) year from the date of this action, on condition that a dike wall shall be constructed outside of each tank, providing thereby a reservoir, equal in capacity to not less than 50 per cent of the tank itself. \* \* \*";

and

WHEREAS, a letter was filed alleging a violation of the resolution and requesting a revocation of the action of the board of April 28, 1925; and

WHEREAS, a hearing was held on this request at the meeting of the board February 23, 1926, and a representative of the fire prevention bureau reported that the premises and the conditions thereon complied with the resolution adopted by the board April 28, 1925, and that he recommended the issuance of a permit; and

WHEREAS, this appeal was granted by the board under date of April 28, 1925, on certain conditions, and appellant requested a modification of the time limit imposed.

Resolved, that the board reaffirm its action of April 28, 1925, and that the request to revoke the permit is denied; and that the temporary period be extended for one year from this date, April 27, 1926.

## BUILDING ZONE CASES.

845-25-BZ.

APPLICANT—John J. Dunnigan, for Walter Eveleth, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7c and 21 of the building zone resolution, to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

THE RESOLUTION:

(1120-25-BZ)

WHEREAS, John J. Dunnigan, for Folpad Realty Corporation, owner, filed, October 29, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline selling station; premises southwest corner of Atlantic avenue and Howard avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Atlantic avenue, west of a point 100 ft. west of Howard avenue, is in an unrestricted district; and that Atlantic avenue, east of Howard avenue, is in a business district, and that Howard avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings rendered October 16, 1925, reads:

"1. A Gasoline station may not be permitted in a business district. Appeal may be taken to the Board of Appeals.";

and

WHEREAS, the premises consist of a plot of ground, 100 ft. by 100 ft. in area, upon which it is proposed to install a gasoline selling station, including two 550-gallon tanks, pumps, etc.; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21 of the building zone resolution, on the ground of unnecessary hardship or practical difficulty, the basis offered for consideration of variance of the zoning resolution.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application and it hereby is denied.

38-26-BZ.

APPLICANT—John J. Dunnigan, for Alfred B. Maclay, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7e and 7c of the building zone resolution, to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—2044-2086 Webster avenue, The Bronx.

zone resolution, to permit the extension, from an unrestricted district into a business district, of a proposed garage for the storage of more than five motor vehicles; premises 2044-2086 Webster avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Webster avenue is in a business district, and that Park avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 28, 1925, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in an unrestricted district extending into a business district is contrary to provisions of Building Zone Resolution."

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 241.28 ft. on Park avenue and 251.03 ft. on Webster avenue; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant was entitled to consideration under section 7e and 7c of the building zone resolution on the ground that there was a non-conforming use in the nature of the stable on the premises prior to the adoption of the zoning resolution, permit for which is still in force.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed garage shall be limited in height on the Webster avenue front for a depth of 100 ft. therefrom to a one-story structure above grade; that the roof shall be ventilated with movable louvre skylights, glazed with plain glass, protected with wire guards above and below; that the rear wall of the Park avenue section above roof of Webster avenue section shall be finished in light-colored face brick; that the front elevation on both street fronts shall be finished in face brick, with architectural terra cotta or stone trimmings; that there shall be no roof signs erected and no advertising permitted on the Webster avenue front of the building, other than one projecting electric sign, indicating the title of the garage; that any openings in the rear wall of the Park avenue section shall be glazed with wire glass; that the building shall be constructed fireproof throughout; that the gable walls shall be unpierced throughout their entire height and length; that any gasoline storage equipment installed shall be located on the Park avenue front of the structure; all permits necessary for the prosecution of the work shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

1134-25-BZ.

APPLICANT—Edward P. Doyle, for Morris Levine, owner.

SUBJECT—Application for reopening (re: decision of superintendent of buildings), under section 7g of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously before the board under section 7e).

PREMISES AFFECTED—861-863 Park avenue, Brooklyn.

APPEARANCES—

For Applicant: Edward P. Doyle.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

## THE RESOLUTION:

(1134-25-BZ)

WHEREAS, Edward P. Doyle, for Morris Levine, owner, filed, November 5, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 861-863 Park avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Park avenue, Summer avenue and Ellery street are all in business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered November 4, 1925, reads:

"The proposition is therefore contrary to the Zone Resolution, Art. II, Sec. 4a 15.

"The erection of a garage for more than five motor vehicles in a business district."

and

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 55 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant has filed the verified and duly acknowledged consents of 83 per cent of the affected property owners within the area fixed by the board, under the requirements of section 7, subdivision G.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be constructed fireproof throughout; that the height of the building shall not exceed two (2) stories above grade; that the gable walls shall be unpierced throughout their entire height and length; that the rear wall projecting easterly beyond the easterly gable wall of the Ellery street garage shall be unpierced throughout its entire height and length; no gasoline storage equipment shall be installed or maintained in this section of the structure; no signs or advertising of any nature or description shall be displayed on the structure other than one projecting electric sign on the street front; that the front elevation shall be finished in face brick, with architectural terra cotta or stone trimmings; all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

## THE RESOLUTION:

(20-26-BZ)

WHEREAS, Walter B. Wills, for Frank Hartman, owner, filed, January 7, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1219-1223 Putnam avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, April 27, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Putnam avenue is in a residence district; that Evergreen avenue is in a business district, and that Central avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 26, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 3.

"A public garage for more than five motor vehicles in a residential district.";

and

WHEREAS, the proposed building is of non-fireproof construction, two stories at front and one story at rear in height, with a frontage of 60 ft. and a depth of 100 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the applicant filed 82 per cent of consents of affected property owners in support of his application under section 7g of the building zone resolution, and the board deemed that applicant is entitled to relief under section 21 of the zoning resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed one story in height; that there shall be no cellar other than for the accommodation of the boiler room and heating apparatus; that the rear and gable walls shall be unpierced throughout their entire height and length; that the roof shall be ventilated with eight louvre skylights, with movable vents, glazed with plain glass protected above and below with wire guards; that there shall be no roof signs erected and no advertising of any nature or description displayed on the premises; that the finish of the front wall shall be of the same design, material and texture as the existing garage adjoining these premises; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

1034-21-BZ.

APPLICANT—Mrs. B. Meehan, owner.

SUBJECT—Application for reopening—extension of permit (re: order of fire commissioner) to permit the maintenance of a garage for three cars.

PREMISES AFFECTED—1226 Nelson avenue, The Bronx.

APPEARANCES—

For Applicant: Mrs. B. Meehan.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(1034-21-BZ)

WHEREAS, Anna Murphy, for Bridget Meehan, owner, filed, July 6, 1921, amended November 23, 1921, an application under the building zone resolution to permit in a residence district the maintenance of a garage for more than three cars, space in which is rented to persons not residing on the premises; premises 1226 Nelson avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting December 6, 1921, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Nelson avenue and Woodcrest avenue are residence districts and West 168th street is a business district; and

WHEREAS, the order of the fire commissioner, No. 7240-C, dated June 11, 1921, reads:

"1. Deliver and surrender to the Chief of the Bureau of Fire Prevention, Room 1100, Municipal Building, Manhattan, your Fire Department permit No. 50179 said permit is hereby revoked.";

and

WHEREAS, the premises consists of a plot of ground 20 ft. by 100 ft. in area, located in a residence district, on the front of which is a dwelling and on the rear a one story metal building 25 ft. by 18 ft. in area; occupied as a garage for three cars, space being rented to persons not residing on the premises; this lot adjoining a lot in a business district on which there are three metal garages for five cars operating under fire department permits; and

WHEREAS, the board deemed that this application might be granted under the provisions of section 7, subdivision F, of the building zone resolution; and

WHEREAS, this application was granted by the board at its meetings of December 6, 1921, and December 23, 1921, for a period of two years, and the applicant requested a extension of the permit for a further period of two years

*Resolved*, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted to maintain three individual metal garages for the storage of three pleasure type automobiles on the rear lot 25 ft. front on Nelson avenue, 125 ft. depth, known as No. 1226 Nelson avenue, for a period not to exceed two years from this date.

1054-23-BZ.

APPLICANT—Frank R. Hewett, owner.

SUBJECT—Application for reopening—extension of permit (re: order of fire commissioner) to permit in a residence district the maintenance of a garage for the storage of two (2) pleasure motor vehicles, two spaces rented to persons not residing on the premises.

PREMISES AFFECTED—2250 Aqueduct avenue, The Bronx.

APPEARANCES—

For Applicant: Frank R. Hewett.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Negative ..... 0

Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(1054-23-BZ)

WHEREAS, F. W. Rinn, for Frank R. Hewett, owner, filed, September 4, 1923, an application, under the building zone

# MINUTES

resolution, to permit in a residence district the maintenance of a garage for the storage of two pleasure motor vehicles, no spaces rented to persons not residing on the premises; premises 2250 Aqueduct avenue, Borough of Bronx; and WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, February 5, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Aqueduct avenue and Buxton place are residence districts; and

WHEREAS, the order of the fire commissioner, dated August 16, 1923, Order No. 19432-C, reads:

"1. Discontinue the use of premises as a garage which is not used as an accessory to dwelling on same lot.";

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 18½ ft. and a depth of 25 ft., located at the rear of a frame dwelling; occupied as a garage for two motor vehicles; and

WHEREAS, applicant has filed the duly acknowledged consent of the owners of 85 per cent of the property frontage owned by the board, to be affected; and

WHEREAS, this application was granted February 5, 1924, for a temporary period of two years, and applicant requests further extension of time.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the capacity of the garage be limited to two automobiles of the motor car type, space for which may be rented to persons not residing on the premises; that the ceiling shall be maintained in accordance with the rules of the board of standards and appeals and fire-stopped at junction of side walls and ceiling; that the wall shall be of unpierced masonry; and that this permission shall be granted for a temporary period of two years from the date of this action.

25-BZ.

APPLICANT—Lee J. Eastman, for Packard Motor Car Co., owner.

SUBJECT—Application for reopening—extension of time to obtain permits (re: decision of superintendent of buildings), to permit partly in a business district and partly in a residence district the erection and maintenance of an automobile show room, sales, and distributing and service station.

PLACES AFFECTED—4650-4664 Broadway and 2-16 Sherman avenue, Manhattan.

APPEARANCES—None.

ACTION OF BOARD—Chairman read request for extension of time; application reopened and time extended.

VOTE TO REOPEN AND EXTEND TIME TO OBTAIN PERMITS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon.....	1

## THE RESOLUTION:

(681-25-BZ)

WHEREAS, James J. Walker, for Elizabeth Schindler, owner, filed, July 1, 1925, an application, under the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of an automobile show room, sales room, distributing and service station; premises 4650-4664 Broadway and 2-16 Sherman avenue, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, July 28, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Sherman avenue and Broadway are business districts; and

WHEREAS, the decision of the superintendent of buildings, rendered July 21, 1925, in acting on N. B. App. No. 347-25, reads:

"1. Garages for more than five cars or automobile repair shops are not permitted in a business or residence district.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 180 ft. and a depth of 202 ft.; to be occupied as an automobile sales room, show room and distributing and service station, no gasoline storage on premises other than that in tanks of cars and in a 50-gallon portable tank necessary for receipt and discharge of cars on premises incidental to the operation and conduct of the automobile business conducted; and

WHEREAS, the board deemed that applicant substantiated his basis of appeal, and that it would be a hardship to deny the adjustment requested, and the use for public garage purposes is neither requested nor invoked; and

WHEREAS, this application was granted by the board at its meeting July 28, 1925, on certain conditions, and applicant requested a modification of the time limit imposed.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure be limited to two stories in height above grade; that no gasoline equipment shall be maintained or installed on the premises, other than portable tank of not exceeding 50 gallons capacity; that the use, conduct and operation of the structure shall be restricted to automobile manufacturer's sales and distributing agency; that no part of the structure shall be rented, leased or hired for live garage storage use; that there shall be no advertising signs or display exposed on the front of the building, other than the name and title of the business; that no portion of the roof within the residence use area shall be rented, leased or hired for advertising signs or display; any roof advertising to be limited to that of the occupants or lessees of the premises; authorized under the code of ordinances; that the front elevation shall be finished substantially in accordance with the photographic reproduction filed in this case, as to design and material that all permits necessary for the prosecution of the work shall be obtained within sixty days and the building completed within eighteen months from the date of this action.

Adjourned 2.10 p. m.

WILLIAM J. O'GORMAN, Secretary.

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland, Guilfoyle and Chief Ken-  
lon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(18-24-S)

WHEREAS, Emery Roth, for Greenwill Construction Co.,  
owner, filed, January 7, 1924, a petition, with the board of  
standards and appeals, for variation from the requirements  
of the labor law, as cited in a decision of the superintend-

ent of buildings, affecting premises 14-16 East 38th street,  
Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings,  
rendered January 3, 1924, reads:

"1. The area of glass in fireproof windows in front  
wall is in excess of 720 sq. inches per pane and more  
than 48 inches in one dimension.

"3. Partitions of nonfireproof material have been  
erected on several floors, contrary to Section 264 La-  
bor Law.";

and

WHEREAS, the building is fireproof, 14 stories in height,  
50 ft. by 98 ft. 9 in. in area; equipped with a fire alarm  
signal and sprinkler system. OCCUPIED: 1st story, stores,  
10 persons; upper stories, show rooms and 25 per cent  
factory, 75 persons per story. EXITS: Two fireproof  
stairways extending from the 1st story to roof, enclosed  
in fireproof partitions with fire doors at openings; and

WHEREAS, the windows on the front of the building are  
double hung, glazed with glass  $\frac{1}{4}$  in. thick, about 3 ft. 8 in.  
by 7 ft. 2 in. (3,780 sq. in.) in area, and the windows in  
the center portion from the 2nd to 11th stories are  $\frac{1}{4}$  in.  
thick and approximately 5 ft. by 5 ft. (3,600 sq. in.) in  
area; and

WHEREAS, petitioner contends to comply with the labor  
law in re: size of glass in windows would destroy the  
architectural effect of the building; and that the partitions  
subdividing the loft are of only a temporary nature and  
do not obstruct the means of egress; and

WHEREAS, this petition was granted by the board at its  
meeting March 18, 1924, as to Item No. 1, so far as it af-  
fects the three lowest stories on the street front, on con-  
dition that the center panels of the mezzanine, 2nd and 3rd  
story windows shall be made stationary; and that the sash  
and frames shall be of metal, glazed with plate glass, not  
less than  $\frac{1}{4}$  in. in thickness, and that the windows through-  
out the building otherwise shall comply with the requirements  
of the labor law; as to Item No. 3, the question of non-  
fireproof partitions, the decision of the superintendent of  
buildings is affirmed, and the petition as to this item is de-  
nied, and under date of June 2, 1925, the board reopened  
the case as to Item 3; and

WHEREAS, petitioner now requests that the existing parti-  
tions of non-fireproof material, except where they obstruct  
access to the exits be accepted.

Resolved, that the board of standards and appeals does  
hereby *make a variation* from the requirements of the la-  
bor law, and the petition be and it hereby is *granted*, as to  
Item 1, reaffirming the resolution of the board of March 18,  
1924, and the conditions imposed therein; and that the peti-  
tion, as to Item 3, be and it hereby is *denied*.

1090-25-S.

PETITIONER—Kenneth B. Norton, for Leah L. P. Nor-  
ton, owner.

SUBJECT—Variation of labor law, as cited in order of  
fire commissioner.

PREMISES AFFECTED—16 West 45th street, Manhat-  
tan.

## APPEARANCES—

For Petitioner: Kenneth B. Norton.

For Administration: Inspector Maher of fire de-  
partment.

## THE RESOLUTION:

(1090-25-S)

WHEREAS, Kenneth B. Norton, for Leah L. P. Norton,

# MINUTES

owner, filed, October 26, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 16 West 45th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated July 3, 1925, read:

(Order No. 81869-LD)

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the Rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law. \* \* \* Among the defects noted on this fire escape are the following:

"a. Windows on course not self-closing. b. No 45 degree stairways connecting balconies. c. No gooseneck ladder from top balcony to roof. d. Not screened to a height of 4 feet 6 inches. No fireproof passageway leading to street from the termination.

"2. Enclose the interior stairway at west side of building serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire-resisting material extending continuously from the cellar to 3 feet above the roof, constructed as per Section 271, Labor Law, or carry out a proper alternative method of complying with the requirements of Section 271, Labor Law."

(Order No. 81871-LD)

"1. Arrange the doors leading to fire escape at rear of building on all stories so that same can be opened from the outside from the balconies, as per Section 271 and 274 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, seven stories in height, 21 ft. by 100 ft. 5 in. in area at 1st story and 21 ft. by 90 ft. 5 in. above the 2nd story. OCCUPIED: 1st story, store; 2nd story, jeweler's tools and supplies, 8 persons; 3rd story, uniforms, 2 persons; 4th story, advertising, 6 persons; 5th story, vacant; 6th story, dressmaking, 10 persons; 7th story, manufacturing embroidery, 10 persons. EXITS: An interior wooden stairway, extending from the basement to top story, and iron ladder to roof scuttle, enclosed in partitions of wire lath and cement plaster on stair side, and 26 gauge metal on loft side, with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from top story to the 2nd story, with EGRESS from the termination of the fire escape by means of inside stairway to passageway in cellar, leading to the street; a gooseneck ladder from top story to roof; ROOFS of adjoining buildings 12 stories above at west, 3 stories below at east; and

WHEREAS, the petitioner claims that a similar order to No. 81869-LD was complied with during 1920 in accordance with modifications granted by the board of review, by providing fireproof windows on the course of rear fire escapes, a gooseneck ladder from top balcony to roof, constructing a fireproof passageway to street, of 6 in. terra cotta blocks in angle iron frames, and enclosing the interior stairway with wire lath and cement mortar on stair-hall side, and 26 gauge sheet metal on the loft side, from basement to roof; that the extension of stairway to 3 ft. above the roof was waived by the department of labor in 1916; the petitioner contends, with regard to Order No. 81871-LD, that the tenants lock the doors to prevent theft.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 81869, Items 1 and 2, ratifying the actions of the board of review of the fire prevention bureau, dated July 1, 1919, and June 3, 1920, on condition that the stipulations of said actions shall be complied with and maintained

and all conditions remain unchanged, and that the requirements of the labor law in all other respects shall be complied with; as to Order 81871, Item 1, the petition be and it hereby is denied.

1121-25-S.

PETITIONER—Samuel Rosenblum, for L. H. N. W. Co. owner.

SUBJECT—Variation of labor law, as cited in order of fire commissioner.

PREMISES AFFECTED—130-132 West 25th street, Manhattan.

Negative

Absent

THE RESOLUTION:

(1121-25-S)

WHEREAS, Samuel Rosenblum, for L. H. N. W. Company, filed, October 29, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 130-32 West 25th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated October 8, 1925 (Order No. 86017-LD), reads:

"1. Arrange the exterior screened stairway at rear of building and the openings leading thereto so that same are in compliance with the provisions of Section 268 of the Labor Law \* \* \*.

"NOTE: Among the defects noted on this stairway are the following:

"No independent passageway to street.";

and

WHEREAS, the building is fireproof, 12 stories in height, 50 ft. by 81 ft. 8 in. in area at 1st story and 50 ft. by 50 ft. 8 in. in area above; OCCUPIED as a tenant factory, 347 persons above the 1st story, petitioner requesting an occupancy of 50 persons per story, a total of 550 persons above the 1st story; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; an exterior screened stairway on the rear of the building, having fireproof openings along the course thereof, extending from the roof to a balcony at the mezzanine story level; with EGRESS from the termination of the fire escape by means of a fireproof passageway leading to the main hall at mezzanine level and thence by means of stair and hall to street; ROOFS of adjoining buildings west 6 stories lower, to east 7 stories lower; and

WHEREAS, petitioner contends that the building was erected in 1910 and at that time the exit from the termination of the exterior stairway was considered acceptable, but since that time the labor law has been amended requiring the passageway to street must be independent.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, so far as it affects the egress from termination of rear fire escapes, on condition that a mezzanine passageway shall be provided therefrom in 1st story, connecting with main stair and leading directly to street; and that the requirements of the labor law shall be complied with in all respects.

WHEREAS, Criterion Construction Company, for East N. Y. Knee Pants Company, owner, filed, June 24, 1925, petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 539 Schenck avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 7, 1925 (Order No. 75690-LD), reads:

"1. Extend the interior stairway at east side of building to the roof and enclose the said stairway serving as a required means of exit, and the landings, platforms and passageways connecting therewith on all sides, with partitions of fire resisting material extending continuously from the cellar to and including the bulkhead on roof, constructed as per Section 271 of the Labor Law and Rule 1 of the Board of Standards and Appeals revised and adopted July 29th, 1924, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.";

WHEREAS, the building is frame, three stories in height, 200 ft. by 35 ft. in area. OCCUPIED: 1st story, paper boxes, 15 persons; 2nd story, jewelry boxes, 15 persons; 3rd story, clothing manufacturing, 30 persons; EQUIPPED with a sprinkler system, and it is proposed to install a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron ladder scuttle in roof); enclosed in wood stud and sheathing (metal covered on each side) partitions with fireproof doors at openings; a fire escape on the Dumont avenue front of building, having fireproof openings along the course of roof, extending from the top story balcony to the street, with a gooseneck ladder from the top story balcony to roof; ROOFS of adjoining buildings to east one story lower, to within 2 ft. 6 in. lower; and

WHEREAS, this case was dismissed for lack of prosecution by the board on December 22, 1925, and reopened by vote of the board on March 2, 1926; and

WHEREAS, petitioner contends that the sprinkler system installed subsequent to the issuance of the fire department order and, also, that due to said installation the fire department has agreed to waive the part of the order relating to the stairway enclosure; and petitioner contends, further, that the existing means of egress are adequate.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

THE RESOLUTION:

(871-25-S)

WHEREAS, Croker National Fire Prevention Engineering Co., for William I. Cohen, owner, filed, August 27, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 241 Wythe avenue, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated May 16 and June 1, respectively, read:

(Order No. 77575-LD)

"1. Arrange wire mesh on windows on front and north side of building, also iron gratings on south side of building, 1st, 2nd and 3rd stories, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purpose of egress, as per Section 272 of the Labor Law."

(Order No. 78823-LD)

"1. Enclose the interior stairways at the north and east sides (Metropolitan Avenue) serving as a required means of exit and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the 1st story to the underside of the roof beams, constructed as per Section 271 of the Labor Law and Rule 1 of the Board of Standards and Appeals adopted July 29th, 1924.";

and

WHEREAS, the building is non-fireproof, three stories in height, 200 ft. by 35 ft. and 126 ft., irregular in depth, about 18,375 sq. ft. in area at 1st story and 7,475 sq. ft. in area above. OCCUPIED: Manufacture of cans, and the canning of honey; 1st story, 10 persons; 2nd story, 10 persons; 3rd story, 27 persons; EQUIPPED with a fire alarm signal system. EXITS: Three interior wooden stairways, extending from the 1st story to top story; only the 2nd and 3rd stories of stairway in building "B" is enclosed in wooden partitions with wooden doors at openings; roofs of adjoining buildings same level at east, open space otherwise; and

WHEREAS, the petitioner contends that Order No. 78823-LD to enclose stairways was filed on account of having 27 persons instead of 25 persons on the 3rd story; re: to Order No. 77575-LD, that all windows except the two on 2nd story of building "A" facing North 1st street have guards constructed of chicken wire on wooden frames which may be readily unhooked, except all those on the 1st story, and those on the 2nd story of building "A" which are stationary but may be easily forced out; that, furthermore, the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition, as to Order No. 77575, be and it hereby is granted, only so far as it affects the openings on 1st story, now equipped with wire screen guards, fastened with staples, on condition that all required labor law

# MINUTES

exits shall be provided and maintained; and that the conditions as to occupancy and use otherwise shall remain unchanged; the petition, as to Order No. 78823, is *withdrawn*, order having been rescinded of record in fire department.

THE RESOLUTION:

(1037-25-S)

WHEREAS, George Kean, for Keabro Realty Corp., owner, filed, October 21, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 235 West 27th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 6, 1925, reads (Order No. 81939-LD):

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building, by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, \* \* \*";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 80 ft. in area. OCCUPIED: 1st story, stores; upper stories, tenant factory, 15 persons per story; EQUIPPED with a fire alarm signal system. EXITS: An interior non-fireproof stairway, extending from the 1st story to roof; enclosed in fire-retarding partitions with kalameined doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the rear yard; with egress from yard through gate in fence to open yards of tenement houses at rear, with direct egress through 1st story hall to street; ROOFS of adjoining buildings at same level; and

WHEREAS, petitioner contends that the means of egress from the termination of the fire escape are adequate owing to the door in fence leading to open yards at rear and hallways through tenements to street.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from termination of fire escape, *on condition* that the fire escape, continuous from yard to roof, be maintained, with exit at yard level, unobstructed, at rear of premises to two adjoining yards, with egress therefrom directly to street, through unobstructed passageway direct to 28th street; that the occupancy shall not exceed 25 persons above 2nd story, unless the interior stairs are enclosed in fire-resisting partitions, in which event the occupancy of the building shall not exceed the legal capacity of the stairs so enclosed.

THE RESOLUTION:

(1124-25-S)

WHEREAS, Edward A. Muller, for Muller Paper Good Co., owner, filed, October 15, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 2350 Linden street, Ridgewood, Borough of Queens; and

WHEREAS, the orders of the fire commissioner, dated September 25, 1925, read:

(Order No. 83660-LD)

"1. Provide fireproof doors and windows on course of fire escape at west side on 2nd, 1st and cellar stories as per Section 274 of the Labor Law."

(Order No. 82702-LD)

"1. Arrange bars on windows on north side and rear of cellar and rear of 1st story, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Section 272 of the Labor Law.";

and

WHEREAS, the building is non-fireproof, three stories and basement in height along Linden street front and one story in height on Prospect avenue, 75 ft. by 90 ft. in area. OCCUPIED for the manufacture of paper goods; basement, 2 persons; 1st story, 35 persons; 2nd story, 3 persons; 4th story, storage only, no occupancy. EXITS: An interior open wooden stairway extending from the basement story to top story and also a stairway leading from the basement to Linden street; a fire escape on the west side of the building, with non-fireproof openings along the course thereof on the basement, 1st and 2nd stories, extending from the roof to 2nd story balcony, with counterbalanced stair side yard of premises; and

WHEREAS, there are iron bars on all windows in the basement and also iron bars on the window at the southwest corner of the three-story section of the building; and

WHEREAS, petitioner proposes to remove the bars on the window on the 1st story, and contends that the basement is adequately provided with exits, and in re: to fire escape contends that it affords egress from the three-story section of the building and that in this section there are only four persons above the 1st story.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, to Order No. 83660, *on condition* that the building shall be equipped with an approved sprinkler system, the contributing lines to be carried within 18 in. of windows at rear wall and equipped with standard sprinkler heads; to Order No. 82702, the petition be and it hereby is *granted* *on condition* that stairs with direct egress from cellar to street be provided, also a horizontal exit to the adjoining building to the south, both additional to main interior stairs.

## THE RESOLUTION:

(1170-25-S)

WHEREAS, A. Berkman, owner, filed, November 12, 1925, petition for variation from the requirements of the labor law, as cited in a decision of the board of health, affecting premises No. 2515 Amsterdam avenue, Borough of Manhattan; and

WHEREAS, the decision of the board of health, dated September 16, 1925, reads:

(Denial No. 2713/25)

"At a meeting of the Board of Health of the Department of Health of The City of New York, held September 16, 1925, your application for a sanitary certificate for a cellar bakery at 2515 Amsterdam Avenue in the Borough of Manhattan, was denied."

WHEREAS, the building is non-fireproof, six stories in height, 40 ft. by 87 ft. in depth. OCCUPIED: Cellar, store and bakery; 1st story, stores and apartments; 2nd to 6th story, 4 apartments on each story; and

WHEREAS, the petitioner contends that the bakery in cellar is ventilated by three windows to court, size 2 ft. 4 ft. 2 in. each; two windows to yard, size 9 ft. 7 in. 1 ft. 10½ in. each; that it is 8 ft. high from floor ceiling; that the ceiling is 1 ft. 6 in. below curb level; that the bakery was installed when the building was erected in 1905; that the bakery has been conducted from time of erection until September of 1925; and he has filed four affidavits as to the existence of a bakery on these premises. *Resolved*, that the decision of the health department be *affirmed*, and the petition be and it hereby be *denied*.

(1251-25-S)

WHEREAS, William G. Walters, for 358 West 36th Street Corp., owner, filed, December 4, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 356-58-60 West 36th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated November 24, 1925, reads (N. B. 342-25):

"1. Size of panes of glass must conform to Section 264 of Labor Law."

WHEREAS, the building is fireproof, 12 stories in height, by 98 ft. 9 in. in area at 1st story and 75 ft. by

88 ft. 10 in. in area above. OCCUPIED: 1st story, stores; upper stories, tenant factory, approximately 125 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st story, in the street wall of the building glazed with ¼ in. plate glass; the maximum area of the glass being 8 ft. 6 in. by 8 ft. 8 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the 1st story.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the windows on street front of 1st story, *on condition* that openings shall be equipped with approved metal frames, glazed with ¼ in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(1258-25-S)

WHEREAS, Emanuel M. Cohn, for Lanabel Realty Company, owner, filed, December 7, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 571-583 Eighth avenue, northwest corner of 38th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered November 30, 1925 (N. B. Applic. No. 146-1925), reads:

"1. Exterior openings at 1st, 2nd and 3rd stories facing 38th Street and 8th Avenue should comply with Section 264 of Labor Law and Rule 503 of Industrial Code."

and

WHEREAS, the building is fireproof, 23 stories in height, 98 ft. 9 in. by 100 ft. in area. OCCUPIED: 1st story, stores; 2nd story to 21st story, tenant factory and showrooms, 180 persons per story; 22nd story and 23rd story, tenant factory and showrooms, 110 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, there are openings in the 38th street front walls and also in the Eighth avenue front walls of the building on the 1st, 2nd and 3rd stories, part pivoted and part stationary, glazed with  $\frac{1}{4}$  in. plate glass; the maximum area of the glass, as shown upon plans, being: 1st story, 18 ft. 6 in. by 10 ft. 8 in.; and on the 2nd and 3rd stories 14 ft. 8 in. by 6 ft. 6 in.; and

WHEREAS, the petitioner contends that a strict compliance with the labor law as to the area of the glass would affect the architectural appearance of the building and would also destroy the intended use of the lowest three stories.

Resolved, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects windows on street fronts on three lowest stories, *on condition* that the openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(1271-25-S)

WHEREAS, Edward P. Doyle, for Elizabeth S. Lufborrow, owner, filed, December 10, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the fire commissioner, affecting premises 209 West 48th street and 1599 Broadway, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered November 2, 1925, reads:

"Relative to your request to accept the termination of the fire escape, same would be a variation from the requirements of the labor law and as the Fire Commissioner is without power to grant such variation your request is also denied."

and

WHEREAS, the building is non-fireproof, six stories in height, 49 ft. 6 in. by 93 ft. in area at 1st story and 49 ft. 6 in. by 87 ft. in area above (connected on the 1st story to 1599 Broadway, a non-fireproof building facing Broadway); said building is 30 ft. 3 in. by 176 ft. 3 in. in area at 1st story and 30 ft. 3 in. by 96 ft. in area at 2nd story; 1st story being occupied as a restaurant and 2nd story as offices). OCCUPIED: 1st story, restaurant; 2nd story, dining room and kitchen, 9 persons; 3rd story, manufacturing hair tonic, 16 persons; 4th story, photographers, 38 persons; 5th story, publishers, 16 persons; 6th story, manufacture of shoes, 40 persons (119 persons above the 1st story). EQUIPPED with a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fire doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the 2nd story balcony; with EGRESS from the building by means of a connecting stair from the 3rd story balcony to the roof of 1599 Broadway; and also a connecting stair from the 2nd story fire escape balcony to the roof of the one-story extension of 1599 Broadway; with EGRESS from this extension roof by means of a door to a corridor leading to Broadway; ROOFS of adjoining buildings are from 30 ft. to 60 ft. lower; and

WHEREAS, petitioner contends that the existing means of egress, from the termination of the fire escape, are inadequate.

Resolved, that the board of standards and appeals hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects egress from the fire escape on the rear, *on condition* that the 3rd story rear fire escape be provided with iron stairs to roof of two-story extension adjoining to the rear; that iron stairs shall be provided to fire escape balcony at 2nd story level to roof of one-story extension at the rear, with egress from roof through plain glass panel to corridor of the premises at rear, and through plain glass windows of adjoining premises to the west; that an exit shall be provided at the rear 1st story by short flight of stairs, connecting with the premises at rear on Broadway; and *granted* so long as compliance as to occupancy and use shall remain substantially unchanged; and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(1325-25-S)

WHEREAS, John J. Gilmartin, for Ludin Realty Company, owner, filed, December 21, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 240-244 West 41st street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, No. 86624-1, dated November 5, 1925, reads:

"1. Arrange the fire escape on the rear of the building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law. Among the defects noted on this fire escape are the following:

"No fireproof passageway leading to the street from the termination.";

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 88 ft. in area. OCCUPIED: 1st story, vacant at present; 2nd story, advertising, 15 persons; 3rd story, advertising, 50 persons; 4th and 5th stories, now vacant, to be used for manufacturing; 6th story, machine room, 25 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway extending from the 1st story to the roof, enclosed in fire-retarding partitions with fire doors at openings; a fire escape on the side wall of the building, having fireproof openings along the course thereof, extending from the roof to the 1st story, with EGRESS from the termination of the fire escape by means of an iron bridge to the adjoining yards at the south and at the west; ROOFS of adjoining buildings are 25 ft. lower; and

WHEREAS, petitioner contends that egress may be had from adjoining yards, at south and west, by means of open way to street.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted, only on condition that the balcony at 1st story level shall be extended to the west and south at the yard level, connecting adjoining open yards at the west and at the rear, with therefrom through hall of adjoining premises to the street; and that the occupancy shall not exceed the legal capacity of the interior stairs.

"26. All windows in a factory building exceeding 70 feet in height if glazed with plate glass must have panes not in excess of 720 square inches in area. Section 264 of Labor Law.";

and

WHEREAS, the building is fireproof, 12 stories in height, 50 ft. by 98 ft. 9 in. in area at 1st story and 50 ft. by 88 ft. 10 in. in area above. OCCUPIED: 1st story, stores; upper stories, light manufacturing, 75 persons per story; EQUIPPED with a sprinkler system and a fire alarm sig-

# MINUTES

nal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in the street walls of the building on the 1st story glazed with plate glass, the maximum area of the glass being 8 ft. 6 in. by 12 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the 1st story.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the store show windows on the 1st story street front, on condition that the openings shall be equipped with approved metal frames glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

1293-25-S.

PETITIONER—William F. Doyle, for Felcourt Realty Corp., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—625-627 Sixth avenue, Manhattan.

APPEARANCES—

For Petitioner: William F. Doyle.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(1293-25-S)

WHEREAS, William F. Doyle, for Felcourt Realty Corporation, owner, filed, December 14, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 625-27 Sixth avenue, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered December 21, 1925 (N. B. Applic. No. 650-25), reads:

"7. All windows which are required to be fireproof must be stationary or self-closing windows of wired glass with panes not greater than 720 square inches in area to conform with the requirements of Section 264 of Labor Law and Rule 503 of the Industrial Code.";

and

WHEREAS, the building is fireproof, 20 stories in height, 50 ft. by 100 ft. in area at 1st story and 50 ft. by 88 ft. in area above. OCCUPIED: 1st story, stores; upper stories, lofts and showrooms; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, there are openings in the street walls of the building on the 1st, 2nd, 3rd and 4th stories glazed with plate glass; the maximum area of the glass on the 1st story being 8 ft. 6 in. by 9 ft. 6 in. and the maximum area of the glass on the 2nd, 3rd and 4th stories being 6 ft. by 8 ft.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lowest four stories and would also detract from the architectural features of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the store show windows of the 1st story, on condition that the openings shall be equipped with metal frames glazed with  $\frac{1}{4}$  in. plate glass; and granted, only so far as it affects the windows of the three stories

immediately above, on condition that the openings shall be equipped with approved metal frames and sash glazed with  $\frac{1}{4}$  in. wired plate glass, and on the further condition that the requirements of the labor law shall be complied with in all other respects.

PETITIONER—Samuel Rosenblum, for 469 Broome Street Inc., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—469-471 Broome street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle .....

Negative .....

Absent: Chief Kenlon .....

THE RESOLUTION:

(1333-25-S)

WHEREAS, Samuel Rosenblum, for 469 Broome Street Inc., owner, filed, December 23, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 469-71 Broome street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 2, 1925, reads (Order No. 87648-LD):

"1. Extend the interior stairway at the south end of building to the roof, as per Section 271 of the Labor Law, said extension and the landings and passages connecting therewith to be enclosed on all sides with partitions of fire resisting material extending at least 1 ft. above the roof, as per Sections 271 and 272 of Labor Law.";

and

WHEREAS, the building is non-fireproof, six stories in height, 50 ft. by 60 ft. 4 in. in area. OCCUPIED: 1st story, store; 2nd story, manufacture of aprons, 25 persons; 3rd story, manufacture of lace curtains, 25 persons; 4th story, manufacture of girdles, 15 persons; 5th story, manufacture of underwear, 35 persons; 6th story, manufacture of coats, 32 persons (the requested occupancy being permitted by the capacity of the exits); EQUIPPED with a sprinkler system and a fire alarm signal system and a thermostatic alarm. EXITS: An interior wooden stairway extending from the 1st story to top story (with iron doors to scuttle in roof); enclosed in fire-retarding partitions with fire doors at openings; a screened party wall fire escape having 60 degree connecting stairs on the front of the building, and having fireproof openings along the course of the escape extending from the roof to the 2nd story balcony; counterbalanced stairs to street; ROOFS of adjoining buildings to west same height, to south 10 ft. lower; and

WHEREAS, petitioner contends that there is a horizontal exit on the top story and also on the other story, and tends, further, that the existing means of egress are adequate.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, on condition that the existing scuttle cover shall be counterbalanced; that the double rung iron ladder as now installed on the top story and the party wall fire escape on the 5th story of the building with 60 degree stairs to the roof shall be maintained; and that the horizontal exits on the top story shall be maintained available at all times; and granted, so long as conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION:

(1347-25-S)

WHEREAS, George Keister, for Frederick Hussey, owner, filed, December 29, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 233-5 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered December 7, 1925, reads:

"In reply to your letter of November 21st, relative to your request for a Certificate of Occupancy, for the above premises, you are advised, in view of the change in occupancy, it will be necessary to inclose the interior stairs with fireproof material from the lowest story to three feet above the roof, in accordance with Violation 5035/25.";

WHEREAS, the building is fireproof, four stories and basement in height, 42 ft. by 98 ft. 9 in. in area at 1st story 42 ft. by 88 ft. 9 in. in area above. OCCUPIED: Basement, 1st story and mezzanine, plumbers' supplies, 10 persons; 2nd story, storage of plumbers' supplies, no occupants; 3rd story, printer, 19 persons; 4th story, manufacture of shoes, 3 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fire doors at openings; a boxed fireproof stairway, with no corridors, at the center of the building, extending from the 1st to the top story; and

WHEREAS, petitioner contends, in view of the light occupancy and the type (fireproof) of the building, that the existing means of egress are adequate.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(11-26-S)

WHEREAS, Samuel Rosenblum, for Charles and Victor Goldstein, owners, filed, January 4, 1926, a petition for variation from the requirements of the labor law, as cited in order of the fire commissioner, affecting premises No. 8½-12 Jones street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 3, 1925, reads (Order No. 78095-LD):

"You are hereby notified that an inspection of premises 8½ to 12 Jones Street, Manhattan, used for the storage and use of paint, shows that the following must be done before permit requested by you can be issued:

"The following orders pending against this building must be complied with.

"(No. 78095-LD.) 1. Enclose the interior stairway at the front of building serving as a required means of exit and the landings, platforms, and passageways connecting therewith, etc.";

and

WHEREAS, the building is non-fireproof, six stories in height, 75 ft. by 85 ft. in area. OCCUPIED: A portion of the 6th story for the manufacture of paper boxes and the remainder of the premises by one tenant for the manufacture of toys and also washboards, a varying occupancy on each story, but the total not to exceed 100 persons above the 1st story; EQUIPPED with a sprinkler system and a standpipe system. EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron ladder to scuttle in roof); enclosed in wood studs, lath and plaster partitions, covered on the loft side with 26 gauge metal with fireproof doors at openings; two fire escapes on the front of the building, both having fireproof openings along the course thereof, and both extending from the top story balcony (gooseneck ladder to roof) to the 2nd story balcony with counterbalanced stairs to street; ROOFS of adjoining buildings to east and west are one story lower; and

WHEREAS, petitioner contends that a similar order was acted upon by the board of review of the fire department, and accepted as having been complied with after certain work was done; and requests the acceptance of the stairway enclosure in view of the facts that the building is protected with a sprinkler system and equipped with three exits.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

THE RESOLUTION:

(22-26-S)

WHEREAS, Samuel Schlau, for Sylvania Realty Corp., owner, filed, January 8, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 329-31 West 46th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated December 2 and 9, 1925, respectively, read (Order No. 87627-LD):

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at east side of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, \* \* \*"

(Order No. 88009-LD)

"1. Arrange the bars on windows on north and east sides of building on 1st, 2nd and 3rd stories, so as to be readily movable or removable from both sides in

# MINUTES

such a manner as to afford the free and unobstructed use of such windows for purposes of egress, as per Sec. 272 of the Labor Law.”;

and

WHEREAS, the building is non-fireproof, three stories in height, “L” shape, having a frontage of 50 ft., a depth of 67 ft. and 25 ft. wide at the rear. OCCUPIED: 1st story, garage for two automobiles and the remainder of the premises as a dry cleaning establishment, 12 persons on the 1st story; 2nd story, 3 persons; 3rd story, 22 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway extending from the 1st story to roof; enclosed in fire-retarding partitions on the 1st story and open above; a fire escape on the easterly wall of the building, extending from the roof to 2nd story balcony, with counter-balanced stair to yard; with EGRESS from the termination of the fire escape through the garage portion of the 1st story to street; and

WHEREAS, there are eight barred windows in the northerly walls and also eleven barred windows in the easterly wall of the premises; and

WHEREAS, petitioner proposes to fire-retard the ceiling and walls (where there are no brick walls) of the garage with plaster board and 26 gauge metal; and in re: the barred windows, contends that they are a necessary protection against theft and that the building is adequately equipped with exits.

Resolved, that the orders of the fire commissioner be and they hereby are affirmed, and the petition be and it hereby is denied.

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(994-25-S)

WHEREAS, American Brass & Elec. Supply Co., for S. J. Philips, owner, filed, September 29, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 2517 Atlantic avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April 21, 1925, reads (Order No. 75865-LD):

“1. Provide an additional means of exit remote from interior stairway on 1st and 2nd stories as per Rule 3 of the Board of Standards and Appeals adopted July 29th, 1924.”;

and

WHEREAS, the building is frame, two stories in height at front and one story in height at rear, 26 ft. by 76 ft. in area at 1st story and 26 ft. by 26 ft. 6 in. in area at 2nd story; OCCUPIED for the manufacture and storage of electric lighting fixtures; 1st story, 9 persons; 2nd story, 2 persons. EXITS: An interior wooden stairway extending from the 1st to 2nd story, enclosed in wood lath and plaster partitions; and

WHEREAS, petitioner contends that the work done on the premises is non-hazardous; that only two persons are occupied on the 2nd story and additional egress may be had from this story by means of windows leading to the one-

story extension roof and thence to adjacent roofs of same height, and contends, further, in re: to the exit from the 1st story, same may be had by door leading to the rear yard.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a portable, hooked, iron ladder shall be maintained on the roof of the 1st story extension, of sufficient length to reach the yard, and that an opening shall be provided at the rear of the premises to the adjoining open yard of the premises to the rear; that the building shall not be increased in height, area or dimension; and granted only so long as the conditions as to occupancy and use remain substantially unchanged.

THE RESOLUTION:

(1340-25-S)

WHEREAS, The Peelle Company, owner, filed, December 24, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner affecting premises No. 47 Stewart avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 14, 1925, reads (Order No. 87099-LD):

“1. Provide an additional means of exit from 1st story remote from interior stairway. Rule 3, Board of Standards and Appeals, adopted July 29, 1924.”;

and

WHEREAS, the building is non-fireproof, two stories in height, irregular in area, having a frontage of 200 ft. on Stewart avenue, 164 ft. 8 in. on Ingraham street and 58 ft. on Harrison place. OCCUPIED: 1st story, manufacture of fireproof doors, 100 persons; mezzanine story, manufacture of fireproof doors, 15 persons; 2nd story (south), 20 persons. EXITS: A wooden stairway, enclosed in plaster partitions, leading to the 2nd story south and open wooden stairway leading to mezzanine story; and

WHEREAS, petitioner contends that an additional exit from the 2nd story (south) may be had by means of window leading to the roof of the one-story section, and propose to provide at the westerly side of this roof an iron ladder (in guides) leading to ground; and in re: to the mezzanine story, proposes to provide, at the westerly end of same, an outside iron stairway leading to the ground; the door leading to this stairway to be self-closing and fireproof.

Resolved, that the board of standards and appeals do hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that an exterior iron fire escape balcony be provided at the westerly end of the mezzanine floor, with iron stairs to the ground level, and that the 2nd story section at the southerly end of the premises shall be provided with a casement door at the westerly end to the roof of the one-story section of premises, with two portable hook ladders of sufficient length to reach from the roof of the one-story building to the ground level; granted so long as present occupancy and use remain unchanged.

THE RESOLUTION:

(44-26-S)

WHEREAS, Frank S. Parker, for Varick Street Corporation, lessee, filed, January 19, 1926, a petition for variation from the requirements of the labor law as cited in a decision of the superintendent of buildings, affecting premises 136-154 Varick street, 247-255 Spring street and 32-40 Van Dam street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered December 29, 1925, reads:

"12. All windows in the building should be fireproof windows having panes not more than 720 square inches in area. Section 264 of Labor Law and Rule 503 of the Industrial Code."

WHEREAS, the building is fireproof, ten stories in height, 100 ft. by 100 ft. in area. OCCUPIED: 1st story, stores; 2nd story, manufacturing, 180 persons per story; EQUIPPED with a sprinkler system and an interior fire alarm system. EXITS: Three interior fireproof stairways extending from the 1st story to roof, enclosed in fireproof partitions with fire doors at openings; and

WHEREAS, there are openings on the 1st story in the street front of the building on the Spring street front, the Varick street front and the Van Dam street front of the premises, enclosed with plate glass; the maximum area of the glass being sixty-four (64) sq. ft.; and

WHEREAS, petitioner contends that a strict compliance with labor law as to the area of the glass would destroy the intended use of the 1st story and would also affect the architectural appearance of the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law and that the petition be and it hereby is granted, only insofar as it affects the store show windows on the front of the building, 1st story, on condition that the openings be equipped with approved metal frames glazed with

polished plate glass, and that the requirements of the law shall be complied with throughout in all other respects.

# RULES

## FIRE ESCAPE RULES

ADOPTED JULY 2, 1918; CAL. NO. 1218-18-S; AMENDED DEC. 12, 1918; CAL. NO. 1708-18-S; AMENDED MAY 9, 1924; CAL. NO. 414-24-SR.

Rule 1. In any building erected prior to October 1, 1918, now occupied or to be occupied as a factory, more than five stories in height and not exceeding nine stories in height, nor in any case more than 90 ft. from curb level to top floor level, one of the required means of exit or egress under Section 271-1 of the Labor Law may consist of an outside fire escape, provided that:

(1) Any such fire escape hereafter erected shall comply with all the provisions of Section 273, labor law, and in addition thereto:

(a) The balconies and stairs shall be protected on the outside by substantial railings to a height of at least 4 ft. 6 in., measured from floor of balcony or center of stair tread, constructed of bars at least one-half (1/2) inch in diameter, spaced not more than six (6) inches on centers, or of substantial grill work, or of screening not less than No. 10 U. S. gauge wire with not more than one and one-half (1 1/2) inches mesh, all rigidly braced;

(2) When there is safe egress from the roof of the building to any adjoining structure, the fire escape stairway shall continue to the roof, and if there be no safe means of egress, a gooseneck ladder shall be provided from the top story balcony to the roof.

Any such fire escape erected prior to October 1, 1918, shall conform in every respect with the requirements of paragraph (a) of this rule, except that balconies may be less than 3 feet in width; the connecting stairs not less than 20 inches in width, and placed at an angle not exceeding 60 degrees if the building is not over six stories in height, otherwise at an angle of 45 degrees; fire window leading to balconies may be at window sill level if steps not less than sixteen (16) inches wide are provided on the inside from floor level, leading thereto. Any such fire escape erected subsequent to October 1, 1918, and prior to these rules taking effect, unless previously accepted as one of the required means of exit or egress by the administrative official having jurisdiction, shall conform in every respect to paragraph (a) of this rule.

2. A fire escape shall not hereafter be accepted as constituting one of the required means of exit or escape under Section 271-1 of the Labor Law, in any building erected prior to October 1, 1913, now occupied or to be occupied as a factory, exceeding nine stories in height, or more than 90 feet from curb level to top floor level.

Rule 3. When in addition to the required exits from any factory or factory building, there exist other means of egress which are not entirely in accordance with the requirements of the Labor Law and the Rules of the Board of Standards and Appeals, such means of egress may be retained under the following conditions:

(a) Fire Escapes.—All substandard fire escapes on factory buildings shall be removed or reconstructed in accordance with Section 274 of the Labor Law, except that in lieu of a counterbalanced stair a drop ladder in guides from the lowest balcony to ground may be provided. Substandard fire escapes shall not be considered as a basis for increased occupancy of the building. When such substandard fire escapes are located in any court or on the side or rear of a building, proper egress to a point of safety shall be provided, either to open adjoining yards, or the lowest balcony may be connected to an adjoining fire escape, exterior stairway, or to roof of adjoining extension, or other egress satisfactory to the Fire Commissioner. All such fire escapes shall be maintained structurally safe and properly painted.

(b) Interior Stairways.—All interior stairways not conforming to the requirements of the Labor Law or rules of the Board of Standards and Appeals may be retained, provided that egress to same is maintained unobstructed, halls are properly lighted, and all landings, passageways, etc., are maintained free and unobstructed. An easily operated panic bolt or other similar device may be installed at street exit door.

(c) Exterior Screened Stairways.—Exterior screened stairways not serving as a required means of egress shall be either removed or maintained structurally safe and properly painted, exits thereto and all platforms and passageways thereof shall be maintained unobstructed, and egress from termination shall be provided for sub-standard fire escapes in subdivision a.

(d) Horizontal Bridges.—Horizontal bridges and party wall balconies between buildings shall be removed or maintained structurally safe and properly painted, and access thereto and all passageways thereof shall be maintained unobstructed.

(e) No sign of any character shall be placed at openings leading to these sub-standard exits.

WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

fore the board—  
First, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in the offices of the board and of the further publication of the calendars in the daily press.

*Fourth,* That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the appellant or petitioner to file necessary data, or by any other method of delay.

### DIRECTORY

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Municipal Building, Rooms 1001 to 1015.

Phone—Worth 0184.

HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 12 p. m.

Communications should be addressed to the chairman of the board.

### CONTENTS

Table of Contents of the Bulletin contains, in the order given—

Clerk's Calendar.

Special Calendar.

Cases in Building Zone Cases.

Minutes of Regular Meeting, May 4, 1926, at 10 a. m.

Minutes of Regular Meeting, May 4, 1926, at 2 p. m.

Announcements.

Minutes of Public Hearing.

Annual Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 11, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 18, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

APPEARANCES—  
For Appellant: George Place.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal withdrawn.  
THE VOTE TO WITHDRAW—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

1071-25-A.  
APPELLANT—Croker National Fire Prevention Engineering Co., for Art Ivory Mfg. Co., lessee.  
SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—1078 Willoughby avenue, Brooklyn.

APPEARANCES—  
For Appellant: Herman E. Horwood.  
For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

### THE RESOLUTION:

(893-25-A)  
WHEREAS, Croker National Fire Prevention Engineering Company, for Art Ivory Manufacturing Company, lessee, on September 1, 1925, an appeal from a decision of the fire commissioner, affecting premises 1078 Willoughby avenue, Borough of Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered August 7, 1925, reads:

"1. Calendar No. 61-23-A is only applicable to 1078 Willoughby Avenue, 200 feet south from Wilson Avenue as shown by Board of Appeals plans, papers and resolutions. Plans cannot be accepted as far as extension is concerned.

"2. Provide a two-source sprinkler equipment (gravity tank and pressure tank) as per Rule 37, amended December 30, 1921."

WHEREAS, the building is fireproof, three stories in height, 30 ft. by 80 ft. (2,400 sq. ft.) in area; OCCUPIED for the manufacture of celluloid articles, 106 persons in the building; EQUIPPED with an approved two-source sprinkler system, fed from a 10,000 gallon gravity tank with these connections at front; and

WHEREAS, the appellant proposes to install a two-source

sprinkler system in the one-story non-fireproof building, 48 ft. by 91 ft. 4 in. (4,384 sq. ft.) in area, known as No. 1080-1082 Willoughby avenue, by making a 4 in. connection to the existing sprinkler system in No. 1078 Willoughby avenue; the two buildings are connected by doorways in the division wall and occupied by one tenant; and

WHEREAS, the appellant contends that the proposed extension of the sprinkler system is lawful; that the law does not require an independent system for building No. 1080-1082 Willoughby avenue; and

WHEREAS, this is a one-story addition to an existing three-story building which is equipped with sprinkler system, granted under Cal. No. 61-23-A.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the sprinkler system equipment of three-story adjoining building shall be extended to this one-story building in accordance with the sprinkler regulations; that this part of plant shall not exceed a height of one story in the same tenancy and operation; and that plans shall be filed for approval in bureau of fire prevention.

1071-25-A.  
APPELLANT—Croker National Fire Prevention Engineering Co., for New York Manufacturers Real Estate Co., lessee.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—626-630 West 44th street, Manhattan.

APPEARANCES—  
For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

### THE RESOLUTION:

(1071-25-A)  
WHEREAS, Croker National Fire Prevention Engineering Co., for Eugene Higgins, owner, filed, October 20, 1925, an appeal from an order of the fire commissioner, affecting premises Nos. 626-30 West 44th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 13, 1925, reads (Order No. 83345-F):

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs).";

and

WHEREAS, the building is non-fireproof, five stories (65 ft. 6 in.) in height, 74 ft. by 150 ft. (inside area being 10,650 sq. ft.) in area; OCCUPIED as a printing establishment, excepting the 3rd story, which is used for the assembling and storage of metal farming implements; 127 persons above the 1st story; and

WHEREAS, appellant contends that the building is equipped with a sprinkler system supplied from a 25,000 gallon gravity tank, also a 6 in. street connection and sidewalk siamese; that there is a National District fire alarm station on each floor; that the premises are patrolled night and day by a watchman service, and contends, further, that the area is but slightly in excess of the 10,000 square feet limit.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be extended or increased in height, area or dimension; that the building

# MINUTES

shall be equipped throughout with an approved two-source sprinkler system, maintained in good working order; and *granted* so long as occupancy and use by the same or similar operation shall remain unchanged; and that an interior fire alarm system and central office supervisory system shall be maintained.

5-26-A.

APPELLANT—Henry W. Burt, lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—Northwest corner of Jamaica avenue and 256th street, Floral Park, Borough of Queens.

APPEARANCES—

For Appellant: J. Gerard McLouglin and Henry W. Burt.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative ..... 5

Absent ..... 0

THE RESOLUTION:

(5-26-A)

WHEREAS, Henry W. Burt, lessee, filed, January 2, 1926, an appeal from an order of the fire commissioner, affecting premises situate on the northwest corner of Jericho turnpike (Jamaica avenue) and Little Neck road (256th street), Floral Park, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 15, 1924, reads (Order No. 53021-F):

"1. Provide a pump of 1,000 gallons per minute capacity suctioning from tank or pump of at least 30,000 gallons capacity. Section 776, Greater New York Charter."

and

WHEREAS, the premises consist of an irregular-shaped plot of ground having a frontage of 449 ft. on Jamaica avenue and a maximum depth of 264 ft., upon which is located the lumber yard of Henry Burt, consisting of several one-story sheds, a two-story office, a one-story building 48 ft. by 96 ft. in area, lumber piles and four 20 ft. driveways; and

WHEREAS, appellant contends that the premises are isolated, the nearest building being distant 120 ft.; that numerous exits are provided; that the premises is equipped with water casks, each equipped with 6 water buckets, and contends, further, that there is a fire hydrant within 80 ft. of the premises.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* so long as present conditions as indicated on plans filed in this appeal—cross aisles and passageways of not less than 20 ft. in width—shall be maintained; that no lumber stack shall exceed a height of 15 ft.; that the existing buildings shall be not increased in height or area; and that the yard throughout shall be equipped with not less than twenty 40 gallon water casks, painted red, equipped with 6 water buckets to each cask.

63-26-A.

APPELLANT—Adams Street Realty Corp., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—291-293 Adams street, Brooklyn.

APPEARANCES—

For Appellant: Herman Torjesen.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

THE RESOLUTION:

(63-26-A)

WHEREAS, Adams Street Realty Corp., owner, filed, January 25, 1926, an appeal from an order of the fire commissioner, affecting premises No. 291-3 Adams street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 15, 1925, reads (Order No. 83828-F):

"1. Install an automatic dry pipe sprinkler system in cellar and on 1st story, etc."

and

WHEREAS, the building is non-fireproof, five stories (ft.) in height, 46 ft. by 72 ft. 8 in. in area. OCCUPIED: Cellar and 1st story, manufacture of paper goods, 5 persons; 2nd story, hair tonic, 2 persons; 3rd story, 18 persons; 4th story, shoe ornaments, 12 persons; 5th story, dressmaking, 8 persons.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* on condition that the cardboard storage, lying flat, shall be restricted to the cellar occupancy and than a single fire-resisting vault for the storage of trade waste; and *granted* only so long as conditions of occupancy and use otherwise shall remain unchanged.

73-26-A.

APPELLANT—Samuel Rosenblum, for Conreco Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—16-18 West 3rd street, Manhattan.

APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(73-26-A)

WHEREAS, Samuel Rosenblum, for Conreco Co., owner, filed, January 26, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 16-18 West 3rd street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 31, 1925, reads (Order No. 88619-F):

"1. Install a standpipe system with risers of 4 in. diameter tested to withstand a pressure of 100 lbs. per square inch, extending from cellar to 1st story, with necessary check valves and 2½ inch regulation outlets on each story (including cellars and roofs) placed within main stairway. Each outlet to be provided with sufficient hose of 2½ inch standard hose attached thereto."

and

WHEREAS, the building is non-fireproof, seven stories (ft.) in height, 40 ft. by 75 ft. in area at 1st story, 40 ft. by 69 ft. in area above. OCCUPIED: 1st story, restaurant; upper stories, tenant factory, 55 persons.

WHEREAS, appellant contends that the building is adequately provided with exits; and

# MINUTES

installed an interior fire alarm system with automatic fire alarm connection to fire headquarters, and that the height of the building is only 3 ft. above the 85 ft. limit requiring a standpipe installation.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped with an interior fire alarm system, with direct central office connection to fire headquarters; that an approved 2½ gallon extinguisher shall be provided at front and rear on each story throughout the premises; that all required legal exits shall be provided and maintained; and *granted* so long as occupancy and use remain substantially unchanged.

62-26-A.  
APPELLANT—Ballard Oil Equipment Co., for Cecilia Toop, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—546 West 252nd street, The Bronx.

APPEARANCES—

For Appellant: David Kaufman.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(76-26-A)

WHEREAS, David Kaufman, for Ballard Oil Equipment Co., for Cecilia Toop, owner, filed, January 27, 1926, an appeal from an order of the fire commissioner, affecting premises 546 West 252nd street, The Bronx; and

WHEREAS, the order of the fire commissioner, dated January 2, 1926, reads (Order No. 32768-LC):

"1. Provide fuel oil pump or pumps of a type approved by Board of Standards and Appeals as per Rule 1, Section a of the Fuel Oil Rules.

"5. Provide fuel oil burner or burners of a type approved by the Board of Standards and Appeals, as per Rule 12 of the Fuel Oil Rules."

WHEREAS, the building is non-fireproof, two stories in height, 28 ft. by 60 ft. in area; OCCUPIED as a dwelling;

WHEREAS, a fuel oil burning system has been installed, consisting of a 550 gallon storage tank (buried outside the premises), a Cook electric pump, a Ballard Super Domestic burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant requests a temporary permit to operate the system, pending the approval of the pump and burner by the board.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 1, for a temporary period of ninety days, pending determination of the board on proposed amendments to the fuel oil rules, only so far as the pump is concerned, *on condition* that the fuel oil burning system comply with the fuel oil rules in all other respects.

APPELLANT—Astoria Properties Company, owner.

THE RESOLUTION:

(92-26-A)

WHEREAS, Astoria Properties Company, owner, filed, February 1, 1926, an appeal from order of the fire commissioner, affecting premises 45 to 59 Mills street, Astoria, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated May 15, 1924, Order No. 57456-F, reads:

"Install a standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure, \* \* \*";

and

WHEREAS, the building is non-fireproof, four stories (60 ft.) in height, 181 ft. 6 in. by 228 ft. (30,880 sq. ft.) in area. OCCUPIED: 1st story, machine shop, 45 persons; 2nd story, manufacture of machines, also underwear, 90 persons; 3rd story, manufacture of ribbons, 20 persons; 4th story, manufacture of silks, 100 persons; and

WHEREAS, the appellant contends that the building is equipped with a sprinkler system and fire alarm system and also provided with adequate exit facilities.

*Resolved*, that the order of the fire commissioner be and it hereby is *granted on condition* that the building shall not be increased in height or area; that the required legal exits shall be provided and maintained, with an interior fire alarm system and a watchman supervisory system maintained on each floor; and that an approved sprinkler system shall be maintained throughout the premises.

62-26-A.

APPELLANT—Joseph Strenger, for M. Stylianos, et al., owners.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—1564 Bryant avenue, The Bronx.

APPEARANCES—

For Appellant: Julius Paull and Joseph Strenger.

For Opposition: John J. Dunnigan and Louis Held.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(62-26-A)

WHEREAS, Joseph Strenger, for M. Stylianos, et al., owners of surrounding properties, filed, January 25, 1926, an appeal from a decision of the superintendent of buildings, affecting premises No. 1564 Bryant avenue, Borough of The Bronx; and

WHEREAS, the decision of the superintendent of buildings, rendered December 8, 1925, reads:

"Your letter of December 23rd received, in reference to the alteration of property at the southeast corner of Bryant Avenue and 173rd Street, Bronx.

"The records of this Bureau show that certificate No. 58 of 1919 was issued by this Bureau for the occupancy of a one-story building at above location as a wet wash laundry.

# MINUTES

"The affidavit and report filed with said application for certificate of occupancy show that the building was occupied previously to 1916 for light manufacturing and as a laboratory, club house, embroidery manufacturing, and at the time of the issuance of certificate, as a paint shop.

"As there is no contradictory evidence on file in this Bureau to the facts set forth as above, your request to revoke the permit issued to Leo Held, Inc., to alter and convert the premises to be used for stores is hereby denied.";

and WHEREAS, the building is non-fireproof, one story in height, 50 ft. by 100 ft. in area; now vacant; and

WHEREAS, the appellant contends that the work involved under permit issued December 7, 1925, by the superintendent of buildings to alter and convert the premises in question for store purposes will entail an expense greater than 50 per cent of the value of the building, exclusive of foundations; that the premises was not used for business purposes during the year of 1916, and he has filed two affidavits to that effect; that the certificate of occupancy issued for the premises in 1919 was without authority; and

WHEREAS, it appears that the premises was occupied for a business use prior to July 25, 1916, as indicated by permit issued by the superintendent of buildings after investigation; and

WHEREAS, there was no proof submitted at the hearing that the superintendent of buildings or his subordinates acted in anything but good faith based on absolute knowledge of conditions prior to 1916 at these premises.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

## BUILDING ZONE CASES.

1143-25-BZ.

APPLICANT—William J. Russell, for Estate of Giuseppe DeMari, owner.

## THE RESOLUTION:

(1313-25-BZ)

WHEREAS, John J. Dunnigan, for Louis Held, Inc., owner, filed, December 17, 1925, an application, under the building zone resolution, to permit in a residence district the alteration and extension of a business building; premises 1564 Bryant avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals;

WHEREAS, the use district maps accompanying the building zone resolution show that Bryant avenue, East 17th street and Longfellow avenue are all in residence district; and

WHEREAS, the decision of the superintendent of buildings rendered December 10, 1925, reads:

"1. Proposed extension of business building in residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 75 ft., a depth of 50 ft.; to be occupied as a business building; stores on first floor; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals hereby *make a variation* in the application of the use district regulations of the building zone resolution, and the application be and it hereby is *granted*, only so far as affects a 25 ft. extension on street frontage to an existing business occupancy, on condition that the occupancy and of the proposed extension shall be restricted to retail cantile business use; that no meat market, delicatessen or fish store shall be permitted; that any advertising or fish store shall be restricted to the plate glass windows on store front; that no produce or merchandise shall be played beyond the building line of the store front of the proposed addition nor existing business occupancy; that the building shall be restricted to a one-story structure height and the rear and gable walls shall be uniform throughout their entire height and length; that all necessary permits shall be obtained within six months after construction work involved shall be completed within one year from the date of this action.

1044-25-BZ.

APPLICANT—John J. Dunnigan, for Carmine Genio, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit partly in a business district and partly in a residence district the erection and maintenance of a garage for storage of more than five motor vehicles.

Negative ..... 0

Absent ..... 0

## THE RESOLUTION:

(1328-25-BZ)

WHEREAS, William F. Doyle, for 107-108 First Avenue Corporation, owner, filed, December 21, 1925, an application, under the building zone resolution, to permit in a business district the maintenance of a junk shop and also a blacksmith shop occupancy of an existing building; premises 324-328 East 108th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 108th street and East 109th street are in business districts, and that First avenue is in an unrestricted district; and

WHEREAS, the order of the superintendent of buildings, rendered May 28, 1925, reads:

"A reinspection of the above premises has been made by this Bureau relative to Zoning Violation 12-1925.

"Our inspector reports as a result that a junk shop and a blacksmith shop are still being maintained in these premises contrary to the Zoning Resolution.

# MINUTES

"A final reinspection will be made ten days from the date of this letter when it is expected the unlawful occupancies specified will have been vacated.

"Otherwise we shall be compelled to prosecute the case to enforce compliance with the law in the matter.";

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 30 ft. and a depth of 60 ft.; to be occupied as a junk shop and also a blacksmith shop; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects premises No. 324, a one-story structure, 15 ft. front by 60 ft. in depth, to be used as a junk shop, on condition that all permits required shall be obtained within sixty days; and that this variation is granted pending the expiration of lease now in force, for a period of two years from the date of this action.

34-26-BZ.

APPLICANT—Emil Guterman, for Emerson Stidd, owner.  
SUBJECT—Application (re: decision of fire commissioner)

under section 21 of the building zone resolution to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—North side of Merrick road, 125 ft. west of Leslie road, Springfield, Borough of Queens.

THE RESOLUTION:

(1253-25-BZ)

WHEREAS, John J. Dunnigan, for Bronx Heights Development Corporation, owner, filed, December 4, 1925, an application, under the building zone resolution, to permit in a business district and partly in a residence district the erection and maintenance of a stable for the accommodation of more than five (5) horses, for use in connection with a riding academy; premises 2131-2149 White Plains avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that White Plains avenue is in a business and residence district, and that Bronx Park East is a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 3, 1925, reads:

"1. Erection of proposed riding academy or stable for more than five (5) horses in business and residence district is contrary to provisions of building zone resolution."

WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 111 ft. and a depth, irregular, of 101 ft. 4 in. and 102 ft.; occupied as a stable for more than five (5) horses;

WHEREAS, the board deemed that applicant is entitled to and in view of the fact that he has filed over 80 per cent of consents of affected property owners in support of application.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that application be and it hereby is granted to permit the use of the premises for the conduct of a public riding academy, with accommodation for uses incidental to the operation of an equestrian riding academy, on condition that the structure shall not exceed two stories above grade in that the rear and gable walls shall be unpierced throughout their entire height and length; that there shall be no advertising signs displayed other than a flat wall sign bearing the name or title of the occupancy; that there shall be no roof signs erected; that all permits necessary for prosecution of the work shall be obtained within thirty days and the building completed within eighteen months from the date of this action.

zone resolution, to permit in a business district the erection and maintenance of a motor vehicle repair shop; premises 745 Richmond avenue, Port Richmond, Borough of Richmond; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Richmond avenue and Forest avenue are in business districts and that Willow Brook road is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered January 20, 1926, reads:

"Application No. 821-1925 for garage and auto repair shop at 745 Richmond Avenue, south of Willow Brook Road, is disapproved on account of its being contrary to zone resolution to erect an auto repair shop in a business district.";

and

WHEREAS, the premises consist of a plot of ground having a frontage of 107 ft. on Richmond avenue and 110 ft. on Willow Brook road, upon which is located a gasoline selling station and also a metal two-car garage; it is proposed to construct on the plot, abutting the garage, a one-

story metal building, 20 ft. by 20 ft. in area, and use a motor vehicle repair shop; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary ship.

*Resolved*, that the board of standards and appeals hereby *make a variation* in the application of the strict regulations of the building zone resolution, and the application be and it hereby is *granted on condition* the proposed extension shall be limited to a one-story structure in height, not exceeding in area 20 ft. by 20 ft.; any motor vehicle repair work shall be restricted to performed by manual operation; that there shall be no stoves, machinery or open-flame apparatus installed or located on the premises, other than a one-half horsepower electric drill; that the repair work shall be restricted to alterations and repairs incidental to the conduct of a garage now conducted on the premises; that all permits necessary for the prosecution of the work shall be obtained within six months and the work incidental thereto completed within nine months from the date of this action.

THE RESOLUTION:

(1217-25-A)

WHEREAS, Warren Brothers Co., for City of New York,  
Borough of Brooklyn, owner, filed, November 23, 1925, an  
appeal from a decision of the fire commissioner, affecting  
premises No. 456 Hamilton avenue, Borough of Brooklyn;

WHEREAS, the decision of the fire commissioner, dated No-  
vember 2, 1925, reads (Alt. Applic. No. 1155-25):

"1. Pumps and burners must be approved by the  
Board of Standards and Appeals.

"2. Asphalt tanks must be buried and protected as  
per Code of Ordinances, Chapter 10, Section 111.";

WHEREAS, the premises consist of an irregular plot of  
ground having a frontage of 509 ft. along Hamilton avenue  
and a frontage of approximately 660 ft. along Gowanus  
Canal, upon which is located the Brooklyn Municipal As-  
phalt Plant consisting of two fuel oil storage tanks, fuel oil  
asphalt pumps, two boilers equipped with approved fuel  
burners, three aggregate dryers equipped with Gem fuel  
burners and two 60,000 gallon asphalt tanks; and

WHEREAS, appellant contends that the Warren Brothers  
Company propose installing in the Brooklyn Municipal As-  
phalt Plant, as their part of the contract, two asphalt stor-  
age tanks (filled by means of Warren asphalt pumps), and  
two dryers for heating sand and stone aggregate—said  
dryers being equipped with Gem fuel oil burners; that the  
burner (used in connection with the dryers only) is  
the only device which will furnish the results required by  
the contract, and request their acceptance in this installation  
contract; and in re: the asphalt tanks, contends that if the tanks  
are buried, the location of the water table would cause  
seepage of the tanks when empty and that if any water  
seeps through and came in contact with this asphalt it  
would deteriorate the contents of the tanks.

Resolved, that the decision of the fire commissioner be  
modified, and the appeal be and it hereby is  
granted, as to Item 1, only so far as the pumps are con-  
sidered, restricted to the conveyance of asphalt from the  
tanks to the conveyors; granted, as to the Gem burner, for  
the specific installation, for use and operation of the ag-  
gregate heating containers; as to Item 2, granted on con-  
dition that a reservoir of reinforced concrete construction  
be provided, the capacity of which shall be equal to 50

per cent of the combined storage capacity of the asphalt  
tanks enclosed thereby.

583-25-A.

APPELLANT—Henry F. Cochrane, for Brooklyn Cooper-  
age Co., owner.

SUBJECT—Application for reopening—extension of per-  
mit—appeal from order of fire commissioner.

PREMISES AFFECTED—151-165 Kent avenue, Brooklyn.

APPEARANCES—

For Appellant: Alfred J. Jollon.

ACTION OF BOARD—Extension of permit granted.

CONDITIONS—As specified in resolution.

THE VOTE TO EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners  
Connell, Holland, Guilfoyle and Chief Ken-  
lon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(583-25-A)

WHEREAS, Ferdinand Tannenbaum, for Brooklyn Coop-  
erage Company, owner, filed, June 5, 1925, an appeal with  
the board of standards and appeals from an order of the  
fire commissioner, affecting premises 151-65 Kent avenue,  
Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated April  
20, 1925, reads:

"1. Install a standpipe system with risers 4 inches  
in diameter tested to withstand a pressure of 300 lbs.  
per square inch, extending from cellar to roof, with  
necessary check valves and 2½ inch regulation Fire  
Department outlets on each story (including basements,  
cellars and roofs), placed within main stairway enclo-  
sure. Each outlet to be provided with sufficient feet  
of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, 3 stories in height,  
100 ft. by 200 ft. in area. OCCUPIED: Manufacturing  
wooden boxes; 1st story, 10 persons; 2nd story, 20 persons;  
3rd story, 2 persons; and

WHEREAS, the appellant claims the building is equipped  
with adequate exits; water pails and chemical extinguishers;  
a 2½ in. standpipe line connected with the city main; also  
a fire alarm box connected with the fire headquarters; he  
further contends that the building is under constant super-  
vision during 24 hours of the day; and

WHEREAS, the appellant contends that the building will  
be demolished and discontinued on or before May 1, 1926;  
and

WHEREAS, this appeal was granted by the board at its  
meeting February 2, 1926, on certain conditions, and appel-  
lant requested an extension of time.

Resolved, that the order of the fire commissioner be and  
it hereby is modified, and the appeal be and it hereby is  
granted on condition that the present occupancy shall be dis-  
continued and building vacated on or before October 1, 1926.

THE RESOLUTION:

(820-25-BZ)

WHEREAS, William F. Doyle, for Washington Improvement Corporation, owner, filed, August 10, 1925, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a building to be used for store and theatre purposes; premises 1714-26 Kings highway, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, January 12, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings highway is in a business district; and that East 18th street and East 17th street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings rendered August 6, 1925, reads:

"Proposition contrary to the Zone Resolution.

II, Sec. 3.

"The erection of a theatre extending into a residence district."

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 108.1 ft. and a depth of 160 ft. 6 in. and 119 ft. 3 in., irregular, to be occupied for store and theatre purposes; and

WHEREAS, the following resolution was adopted by board on January 12, 1926:

"Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the occupancy of the premises for motion picture theatre building and business use shall be restricted to and not exceed a depth of 129 ft. south from the corner formed by the intersection of Kings highway and East 18th street; the rear wall run parallel with Kings highway; that there shall be no opening from the theatre structure on the East 18th street front of any nature or description other than doorways required by the building code as emergency exits, which doors shall remain closed at all times; that there shall be a return brick pier of not less than 12 in. on Kings highway at the corner formed by the intersection of East 18th street and Kings highway; that the remaining parcel of this property, approximately 100 ft., more or less, fronting on East 18th street shall be developed for conforming use, private dwelling, and no structure shall be erected at the same time as the proposed motion picture theatre, and the frame and structure shall be enclosed before the first tier of beams of the theatre is installed; that there shall be no advertising billboards, signs or display of any nature or description permitted on the East 18th street front of said proposed theatre structure; that the street frontage shall be finished in face brick or natural stone, with tectural terra cotta or stone trimmings; that the exterior of the rear (southerly) wall shall be finished in light-colored face brick; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within nine months."

and

WHEREAS, the applicant, through his attorney, John J. O'Connor, requested a modification of this resolution to the depth of the building; and

# MINUTES

WHEREAS, a public hearing was held on the request, and the request denied, and the board deemed that the original resolution of the board adopted January 12, 1926, should be affirmed.

*Resolved*, that the board of standards and appeals does hereby affirm its action of January 12, 1926.

125-26-BZ.

APPLICANT—Joseph Burke, for New York Evening Journal, Inc.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7c and 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a theatre building.

PREMISES AFFECTED—301-315 West 56th street, 300-314 West 57th street and 955-969 Eighth avenue, Manhattan.

APPEARANCES—

For Applicant: Joseph Burke and Martin F. Huberth.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Negative .....	0
Absent .....	0

THE RESOLUTION:

(125-26-BZ)

WHEREAS, Joseph Burke, for New York Evening Journal, Inc., owner, filed, February 13, 1926, an application, under the building zone resolution, to permit in a residence district extending from a business district, the erection and maintenance of a theatre building; premises 301-315 West 56th street, 300-314 West 57th street and 955-969 Eighth avenue, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that West 56th street is in a residence district; that West 57th street is in a business district, and that Eighth avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 8, 1926, reads:

"1. Business building may not project into a residence district. Building Zone Resolution, Section 3.";

WHEREAS, the proposed building is to be of fireproof construction, one story in height, with a frontage of 140 ft. and depth of 143 ft., and an entrance lobby 37 ft. 6 in. by 10 ft.; to be occupied as a theatre; and

WHEREAS, the premises embraces two use district areas, has been in single ownership for the past 200 years, during which time no improvements have been made; and the board deemed that the circumstances entitled the applicant for relief from the strict compliance with the zoning resolution under sections 7c and 21.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed theatre building shall be restricted to one-story structure, erected in accordance with the code of ordinances and section 25 of the building code; that there shall be no signs or advertising display of any nature or description within the residence use area invaded; that the exterior of this building on the 56th street front shall be finished with face brick with architectural terra cotta or natural stone trimmings; that all permits required shall be obtained within nine months and the building completed with-

in eighteen months; that the return drawings of the proposed elevation on the 56th street front shall be returned to this board for approval before submitting same to the superintendent of buildings specifically. The board action in this appeal was confined to the question of variation of the use district regulations of the building zone resolution.

1169-25-BZ.

APPLICANT—Ferdinand Savignano, for James S. Schacht, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—Northeast corner of Hillside avenue and Springfield boulevard, Springfield Heights, Borough of Queens.

APPEARANCES—

For Applicant: Ferdinand Savignano and A. A. Bertini.

For Opposition: None.

THE RESOLUTION:

(1169-25-BZ)

WHEREAS, Ferdinand Savignano, for James S. Schacht, owner, filed, November 12, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; northeast corner Hillside avenue and Springfield boulevard, Springfield Heights, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Hillside avenue is in a business district; that Springfield boulevard is in both a business and residence district, and that Rocky Hill road is in a business district; and

WHEREAS, the decision of the fire commissioner, rendered October 6, 1925, reads:

"1. A gasoline service station may not be permitted in a business district. Appeal may be taken to the Board of Appeals. NOTE—If the above is waived by the Board of Appeals, then \* \* \*";

and

WHEREAS, the premises consists of a plot of ground on which it is proposed to erect an office, six gas pumps and to bury six tanks of 550 gallons capacity each and to occupy the premises as a gasoline selling station; and

WHEREAS, documentary proof was submitted at hearing showing that application had been made to the proper authorities for the erection and maintenance of a gasoline service station previous to the adoption of amendment to building zone resolution prohibiting gasoline selling in business district; and

WHEREAS, depending upon the approval of these plans, the applicant entered into a contractual obligation for the use and operation of these premises.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that all permits required by law shall be obtained within six months; that all work required thereby shall be completed within one year from date of action by this board; and that pumps and tanks in no instance shall project beyond building line of the plot involved.

Absent ..... 0

THE RESOLUTION:

(771-25-BZ)

WHEREAS, William H. Kehoe, for Independent Milk and Cream Corporation, owner, filed, July 25, 1925, an application, under the building zone resolution, to permit in a business district, the use of an existing building as a milk dairy or bottling establishment; premises 325 East 152nd street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 152nd street is in a business district, and that Morris avenue is in an unrestricted district; and

WHEREAS the decision of the commissioner of health, rendered July 17, 1925, reads:

"Application for permit to sell milk and milk products at 325 East 152nd Street, Bronx, made by you on July 8, 1925, is being forwarded to the Board of Health with a recommendation that permit be denied. This is being done because of the fact that premises to be used as a depot is within a restricted district as designated in 'Use District Map—Section 6.' The business of conducting a dairy or bottling establishment within a restricted district is prohibited by the Zoning Law."

and

WHEREAS, the existing building is of non-fireproof construction, three stories at front and one story at rear in height, with a frontage of 25 ft. and a depth of 100 ft.; to be occupied as a milk dairy or bottling establishment; and

WHEREAS, the health department voiced its objection by its refusal of permit to the storage of milk on these premises, wherein there exists a garage by authority of permit now in force; and

WHEREAS, it does not seem right or proper to cause the rescindment of the garage permit for the intermittent storage of milk overnight, as claimed by applicant.

Resolved, that the decision of the health department be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION:

(926-25-BZ)

WHEREAS, Croker National Fire Prevention Engineering Company, for Frederick Semken, owner, filed, September 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles, premises 2230-2254 Cropsey avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Cropsey avenue is in a business district; that 22nd avenue is in a residence district; that Bay 32nd street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 4, 1925, reads:

"Construction—Denied as contrary to Zone Resolution. Art. 2, Sec. 4-A (15).";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 25 ft. and a depth of 105 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant had substantiated his basis of appeal under section 7e and a permit had been issued for more than twenty-four (24) hours.

Resolved, that the board of standards and appeals hereby make a variation in the application of the building zone regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed building shall set back not less than 10 feet from the existing westerly street line of Cropsey avenue; that the rear and gable walls shall be unpierced through the entire height and length; that the structure shall be restricted in height to one story above grade; that the vehicular entrance shall be restricted to the roadway; that the private right of way on the northerly elevation of the proposed structure; any gasoline storage equipment installed shall be installed at the extreme westerly front of the structure on the private right of way; all permits necessary for the prosecution of the work shall be completed within six (6) months and the building completed within twelve (12) months from the date of this action.

## THE RESOLUTION:

(1267-25-BZ)

WHEREAS, Thomas I. Sheridan, for Louis Kramer, owner, December 9, 1925, an application, under the building zone resolution, to permit in a business district the alteration and change of occupancy of a building, formerly used as a stable, to a garage for the storage of more than five motor vehicles; premises 266-272 St. Nicholas avenue and West 124th street, Borough of Manhattan; and  
WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and  
WHEREAS, the use district maps accompanying the building zone resolution show that St. Nicholas avenue, West 124th street and Eighth avenue are all in business districts;

WHEREAS, the decision of the superintendent of buildings rendered September 14, 1925, reads:

"This amendment is disapproved with the following objection repeated:

"1. Proposed garage is contrary to Article II of the Zone Resolution.";

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 118 ft. on St. Nicholas avenue and 50 ft. on West 124th street; altered and occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant had substantiated his basis of appeal under section 7e as an unintended non-conforming use before and since the adoption of the building zone resolution; and, due to the surrounding abutting conditions, the proposed alteration to the existing building would be an improvement over the present conditions.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed alteration to the building shall not exceed a two-story structure above grade; that the building as constructed shall be constructed fireproof throughout; that the garage on St. Nicholas avenue for a depth of approximately 50 ft. throughout the 1st story shall be restricted to store use, and shall be separated from the garage area structure by a wall of approved masonry unpierced throughout; any gasoline storage equipment installed shall be located on the 124th street front of the structure; that there shall be no roof signs erected or advertising signs on the structure other than one projecting electric sign indicating name or title of garage on the 124th street front; that there shall be no signs or advertising display of nature or description on the St. Nicholas avenue front, other than fixed letters confined to the plate glass show window; that the St. Nicholas avenue street front on the 2nd story shall be finished in triple mullioned window openings, other than the two end openings, which shall be double mullioned openings; all openings to be equipped with approved frames and stationary sash, with not less than one sash to each opening, upper and lower sash, and that the openings on the street front of the 2nd story shall be equipped with translucent wire glass; all permits necessary for prosecution of the work shall be obtained within nine months and the construction work required thereby shall be completed within eighteen (18) months from the date of action.

## THE RESOLUTION:

(1213-25-BZ)

WHEREAS, Morris L. Kaufman, for Isidore Resnikoff, owner, filed, November 23, 1925, an application, under the building zone resolution, to permit in a residence district extending from a business district, the erection and maintenance of a theatre and store building; premises 4001-4011 Fourteenth avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fourteenth avenue is in a business and unrestricted district; and that 40th street and 41st street are in residence districts; and

WHEREAS, the decision of the superintendent of buildings rendered March 12, 1926, reads:

"Proposed theatre as per revised plans, to be located partly in a business district and partly in a residence district is contrary to Art. II, Section 3 of Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 90 ft. and a depth of 120 ft.; to be occupied as a theatre and stores; and

WHEREAS, the board deemed that the applicant had substantiated his basis of appeal under sections 7b and 7c, and that the store use will be located within the business district, the theatre to extend only 20 ft. into the residence district.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed projection of 20 ft. into the residence use district and shall be restricted to the use and operation of a moving picture theatre and shall be erected in accordance with section 25 of the building code; that the street wall on the 40th street front shall be finished with face brick, architectural terra cotta or stone trimmings; that there shall be no openings on 40th street other than a stairway from a fire escape and two emergency exit doors; that there shall be no signs of any nature or description erected or displayed on the 40th street front of the building; that the rear wall shall be unpierced throughout its entire height and length; all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

Adjourned 6.20 p. m.

WILLIAM J. O'GORMAN, Secretary.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday afternoon, April 27, 1926, as they appeared in Bulletin No. 18, Vol. XI, are hereby corrected to read as follows:

### THE RESOLUTION:

(11-26-S)

WHEREAS, Samuel Rosenblum, for Charles and Victor Goldstein, owners, filed, January 4, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 8½-12 Jones street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated August 13, 1925, reads (Order No. 78095-LD):

"You are hereby notified that an inspection of premises 8½ to 12 Jones Street, Manhattan, used for the storage and use of paint, shows that the following must be done before permit requested by you can be issued:

"The following orders pending against this building must be complied with.

"(No. 78095-LD.) 1. Enclose the interior stairway at the front of building serving as a required means of

exit and the landings, platforms, and passageways connecting therewith, etc.";

and

WHEREAS, the building is non-fireproof, six stories height, 75 ft. by 85 ft. in area. OCCUPIED: A portion of the 6th story for the manufacture of paper boxes, the remainder of the premises by one tenant for the manufacture of toys and also washboards, a varying occupancy on each story, but the total not to exceed 100 persons at the 1st story; EQUIPPED with a sprinkler system and standpipe system. EXITS: An interior wooden stairway, extending from the 1st story to top story (with iron lath to scuttle in roof); enclosed in wood studs, lath and plaster partitions, covered on the loft side with 26 gauge iron with fireproof doors at openings; two fire escapes on front of the building, both having fireproof openings at the course thereof, and both extending from the top story balcony (gooseneck ladder to roof) to the 2nd story balcony with counterbalanced stairs to street; ROOFS of adjoining buildings to east and west are one story lower; and

WHEREAS, petitioner contends that a similar order acted upon by the board of review of the fire department and accepted as having been complied with after certain work was done; and requests the acceptance of the stairway enclosure in view of the facts that the building is protected with a sprinkler system and equipped with three exits.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the petition be and it hereby is denied.

\*Correction—Words "order of the fire commissioner" substituted for words "decision of superintendent of buildings" in line 42.

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held April 20, 1926, as they appeared in Bulletin No. 17, Vol. XI, are hereby corrected to read as follows:

157-26-BZ.

APPLICANT—Sloan & Robertson, for 551 Fifth Avenue Corporation, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit partly in a 1¼ times height district and partly in a 2 times height district the erection and maintenance of the street walls to a height exceeding the prescribed limit required by the zone resolution.

PREMISES AFFECTED—547-551 Fifth avenue and 3-7 East 45th street, Manhattan.

APPEARANCES—

For Applicant: John Sloan and John Neville Boyle.

For Opposition: Carl H. Fowler, George M. Boynton, Charles M. Noble and James A. McCarthy.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

### THE RESOLUTION:

(157-26-BZ)

WHEREAS, Sloan & Robertson, for 551 Fifth Avenue Corporation, owner, filed, February 25, 1926, an application, under the building zone resolution, to permit partly in a 1¼ times height district and partly in a 2 times height district the erection and maintenance of the street walls to a height exceeding the prescribed limit required by the zone resolution; premises 547-549-551 Fifth avenue and 3-5-7 East 45th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application

by the board of standards and appeals, at its regular meeting, April 20, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

WHEREAS, the district maps accompanying the building zone resolution show that the east side of Fifth avenue to a point 100 ft. east of Fifth avenue is in a 1¼ times height district, and that both East 45th street and East 46th street are in 2 times height districts; and

WHEREAS, the decision of the superintendent of buildings rendered February 8, 1926, reads:

"2. The proposed height of the building exceeds height limits imposed by the Building Zone Resolution, Art. 3, Sec. 8. The proposed height of the building is excessive on both street fronts.";

and

WHEREAS, the proposed building is to be of fireproof construction, 36 stories (416 ft. 7 in.) in height, with a depth of 78 ft. 5 in. on Fifth avenue and a depth of 26 ft. 2 in. on East 45th street; to be occupied as stores, banking and offices; it is proposed to erect both street walls to a height of 125 ft. in height and to set back the 45th street front a total distance of 26 ft. 2 in. instead of 34 ft. and to erect walls without required setbacks as shown on plans filed; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical and unnecessary hardship.

Resolved, that the board of standards and appeals hereby make a variation in the application of the district regulations of the building zone resolution and that the application be and it hereby is granted on condition that the building be erected, as indicated on plans filed in this case, except as modified by this resolution, with a setback as indicated, from Fifth avenue building line to face of building at 20th story, 125 ft. above curb level, for a depth of less than 34 ft.; that the main structure as now proposed and indicated setback to the east of the tower shall be built above the roof of the 27th story, and any part of the structure above that level shall be restricted to the requirements of the zoning regulations permitted for tower construction; that all permits necessary for the prosecution of the work shall be obtained within nine months and that construction will be forwarded without unnecessary delay or suspension of work or delay.

\*Correction—Number "551" added in line 7 of resolution.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO FUEL OIL RULES.

(217-21-SR)  
(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, May 21, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

*Matter in italics is new. Matter in [ ] is old matter to be removed.*

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

#### [Rule 33.] Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

(e) [(a)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

### [GRADE A FUEL OIL.]

#### Rule 2. Manner of Storage for [Grade A] Fuel Oil.

Fuel oil, to be used for [commercial] heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

#### Rule 3. General Location of Tanks for [Grade A] Fuel Oil.

(a) In all *except fireproof* buildings fuel oil storage tanks shall be buried below the floor of the lowest story

in the manner required for tanks outside of the building or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

#### Rule 4A. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

##### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

##### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

[(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.]

[(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.]

##### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# PUBLIC HEARING

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 4B [19.] Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, *unless an approved anti siphon valve is used*, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Material and Construction of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free

from physical imperfections, such as, laminations, cracks etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of (6) inches center to center on these members.

(f) When structural reinforcing members are used together with braces, in order to reduce the effective length, the braces shall not be stressed higher than thousand (9,000) pounds per square inch taken on minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or these members should not be spaced greater than twenty-four (24) inches center to center in all directions. Unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings and ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of plates  $\frac{1}{8}$  inch.

# PUBLIC HEARING

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

t equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plate shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

In all cases, steel tanks for the storage of fuel must be built metal to metal. No filler of any kind be permitted.

[Rule 20 (a)] Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule except that tanks of a capacity of over 60 gallons and more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

[Rule 20 (b)] Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

Where welding is to be used for a part or for the tank, the tank shall be fabricated as required under

5. All welded seams of plates shall be lapped or

When the joint is a lapped joint, the sheet shall be not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal before welding and kept tight together during welding. Both inside and outside welds shall be of full V groove fillet.

Where a butt joint is used, it shall be of the 90 deg. V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

All heads shall be flanged, the straight part of flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For 1/4 inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For 3/8 inch heads, 2 1/4 inch flange.

For heads over 120 inches diameter the flange shall be sized in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a close fit and the shell shall fit the head closely all around.

If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head for tanks of 1,100 gallon capacity or less and not over 3 inches in diameter, shall be of the 90 deg. single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

Where tanks are made up of two or more rings welded longitudinal joints of adjacent sections shall be made tight. At no point of a butt girth joint shall the metal on one side be offset with the sheet on the other side by an excess of one-half of the thickness of the plate. All girth joints shall be welded inside and out and

reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half (1 1/2) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth (1/4) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half (1 1/2) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half (1/2) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks,

# PUBLIC HEARING

shall withstand after being set in place, a hydrostatic *or oil* test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic *or oil* pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic *or oil* test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

## Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic *or oil* test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

## Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

## Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for [Grade A] Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted. *Except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.*

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic *or oil* pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of a pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in. the spring type with working parts of non-corrosive construction and shall be set to discharge at not less than fifty (50) per cent above the maximum working pressure.

(b) Where pressure systems are used an automatic by-pass valve of size equivalent to that of the discharge pipe shall be installed between each pump and the first shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

### Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate rate fill pipe. Fill pipes when installed near any opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through the building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or air break carried within four (4) inches of the lowest point of the tank.

(d) Fill pipe shall be made up with screw threaded fittings and shall be oil tight and secure in place.

### Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without a float valve and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend below the top of the tank more than one inch.

(b) Where a battery of tanks designed to contain the same class of liquids is installed, vent pipes may be connected into a main header. Connections to the header shall not be less than one foot above the level of the highest reservoir from which the tanks may be supplied. The main vent pipe from the header shall be of an area not less than the aggregate area of vent pipes connected to the header.

(c) Vent openings shall be screened by 40 mesh wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation.

# PUBLIC HEARING

s shall be not less than two (2) inches in diameter tanks over 1,100 gallons capacity, and in no case less than one and one-quarter ( $1\frac{1}{4}$ ) inches in diameter.

Vent pipes shall be provided with weather hoods and terminate outside the building above the surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway or fire escape, nor shall vent pipes be placed in dumb-waiter shafts, or in an enclosed court.

If compelled, because of structural conditions, the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to the tanks by tight connections and filled by pressure, a one (1) inch line shall be connected to tank and parallel the fill line and terminate in the fill box with threaded end. A check valve shall be installed in the line so as to permit excess oil in the tank to flow into the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, shall be connected into the suction line near the burner or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

Heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of water coils thermostatically controlled and the oil shall not be heated above one hundred and forty degrees Fahrenheit.

## Section 9. Valves and Control of Flow for Grade A Fuel Oil.

Control valves at the burners shall be of a subtype, provided with a stuffing box of liberal size having a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the wheel. The use of packing which may be affected by heat is prohibited.

A shut-off valve shall be provided in discharge lines near each pump; in discharge line of each tank as near the tank as practicable, and in lines near each burner.

## Section 10. Oil Level Indicating Device for Grade A Fuel Oil.

A well or gauging device shall be installed and so arranged as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept closed when not in use.

## Section 11. Pumps for Grade A Fuel Oil.

Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

Pumps shall be installed in duplicate where fire heating equipment is dependent on the use of fuel for heating or steam.

Pumps located in the same room where burners are located shall be provided with a remote control. Pumps used in connection with outside above ground storage tanks shall be located outside embankments, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

Pumps may be located below the top of the oil tank or tanks where heavy oil is used having a flash point not more than eighteen (18) degrees Baume

and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. [Rule 24.] Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for [Grade A] Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## [Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.]

## [GRADE B FUEL OIL.]

## [Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.]

## [Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal

# PUBLIC HEARING

outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

## 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.]

### [Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.]

### [Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.]

### Rule 17. [22.] Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

### [Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

### [Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).]

### [Rule 25. Piping for Grade B Fuel Oil.

#### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

#### Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

#### Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

#### Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

#### Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.]

### Rule 18. [26.] Valves and Control of Flow Grade B Fuel Oil.

(a) Readily accessible valves shall be provided for each burner and in the discharge line from each storage tank.

[(b) See Rule 9 (a) for construction of valves.]

(b) [(c)] A remote or thermostatic control for shutting off the supply of oil to the burners shall be provided.

(c) [(d)] An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the supply line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-combustive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valve shall be set at not more than fifty (50) per cent of the maximum working pressure.

### [Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.]

### Rule 19. [28.] Pilot Light.

Automatic systems unless electrically ignited shall be designed that the flame cannot be extinguished by opening of the automatic control valve and a [A] pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

### Rule 20. [29.] Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless such in which vapors might collect are adequately vented and if used shall be of such construction as to withstand the maximum temperature of which the oil burner device to be installed is capable.

(b) No damper for closing of more than eighty per cent of the effective area of the flue shall be provided in a smoke pipe or flue.

### Rule 21. [30.] Fire Protection in Domestic Installations.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster or other approved incombustible material. Above each furnace there shall be constructed a ceiling consisting of a plaster board covered with 26 U. S. gauge sheet metal or three-fourths (3/4) of an inch of Portland cement on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type for use on oil fires.

### [Rule 31. Instruction Cards.]

See Rule 14.

### [Rule 32. Installation.]

See Rule 16.

# PUBLIC HEARING

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately vented direct to the outer air.]

## Rule 22. [34.] Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by

gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 23. [35.] Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### ARTICLE 1. PERMIT.

(a) **Prohibition.** No person shall smoke, or carry a lit cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and the lessee or lessees of the building containing such factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall require, a notice of such prohibition, and the penalty for its violation.

(b) **Application.** Application for such permit shall be made only by the owner of the building on suitable forms to be furnished by the fire commissioner.

(c) **Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed after expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

(d) **Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

(e) **Revocation.** Violation of any of the conditions stated in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

## RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
Boiler making;  
Brick, terra cotta or artificial stone works;  
Forge shops;  
Foundries;  
Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed; waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

BOARD OF STANDARDS AND APPEALS,  
Room 1001, Municipal Building,  
New York City.

### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Phone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to noon.

All communications should be addressed to the chairman of the board.

## CONTENTS

This issue of the Bulletin contains, in the order given—

ocket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, May 11, 1926, at 10 a. m.

Minutes of Regular Meeting, May 11, 1926, at 2 p. m.

Correction

Notice of Public Hearing.

ules.

Progress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 18, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, May 25, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## BOARD OF STANDARDS AND APPEALS

REGULAR MEETING.

TUESDAY MORNING, MAY 11, 1926.

Present: Chairman Walsh, Commissioners Connell, and Guilfoyle and Chief Kenlon. The minutes of the regular meeting of the board, held on Tuesday morning, May 4, 1926, and the minutes of the regular meeting held Tuesday afternoon, May 4, 1926, were approved as printed in the Bulletin, No. 19, Vol. XI.

APPEALS FROM ADMINISTRATIVE ORDERS.

890-25-A.

APPELLANT—George B. Buck, lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—25 Frankfort street, Manhattan.

APPEARANCES—

For Appellant: James F. Conway, Jr.

# MINUTES

For Administration: Inspector Maher of fire department.  
ACTION OF BOARD—Laid over to May 18, 1926, at 2 p. m., on request of appellant.

1450-21-A.  
APPELLANT—Frank Glanz, of Preferred Utilities Company, for Utility Oil Corporation, owner.  
SUBJECT—Application for reopening—amendment to resolution (re: appeal from decision of fire commissioner).

PREMISES AFFECTED—Southeast corner of Third and Creek streets, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Frank Glanz.

ACTION OF BOARD—Laid over to May 18, 1926, at 10 a. m., to secure objection from fire department.

896-25-A.

APPELLANT—William Wrigley, Jr., Co., owner.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—1389 Metropolitan avenue, Borough of Queens.

APPEARANCES—

For Appellant: R. E. Meany.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to June 1, 1926, at 2 p. m., on request of appellant.

71-21-A.

APPELLANT—James M. Vincent, for August Heckscher, owner.

SUBJECT—Application for reopening—modification of resolution—appeal from decision of superintendent of buildings.

PREMISES AFFECTED—1230-1237 Fifth avenue, Manhattan.

APPEARANCES—

For Appellant: R. M. De Acosta.

ACTION OF BOARD—Application to reopen denied.

THE VOTE TO REOPEN—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon ..... 1

68-25-A.

APPELLANT—Dictograph Products Corp., owner.

SUBJECT—Application for reopening—reconsideration of case previously dismissed for lack of prosecution (re: appeal from order of fire commissioner).

PREMISES AFFECTED—Northeast corner Schooley place and Beaufort street, Jamaica, Borough of Queens.

APPEARANCES—

For Appellant: E. P. Manuel.

ACTION OF BOARD—Appeal reopened and set for hearing May 18, 1926, at 2 p. m.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on conditions.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(263-26-A)

WHEREAS, Gaffney Construction Corporation, owner, filed, March 26, 1926, an appeal from a decision of fire commissioner, affecting premises east side of Zerega avenue, 236.15 ft. south of Quimby avenue, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered March 4, 1926, reads (N. B. Applic. No. 435-1926):

"6. A separate fill pipe must be provided for each fuel oil tank.

"28. Show fuel oil tanks enclosed and protected per Rule 6 and Rule 4, Section 3.

"29. Asphalt tanks must be buried and equipped with a fire extinguishing system and a fire alarm telegraph system as per Chapter 10, Section 111 of the Code of Ordinances.

"35. This plant must be equipped with a stand-by system in accordance with Rule 37 of the Standard Rules."

and

WHEREAS, the premises consist of a large plot of ground 353 ft. by 266 ft., about 93,898 sq. ft. in area, where proposed to install two 20,000 gallon fuel oil storage tanks, three 23,500 gallon asphalt storage tanks, enclosed in a corrugated iron shed, 42 ft. by 65 ft. in area; and

WHEREAS, the appellant proposes (re: Item 6) to provide one 4 in. fill pipe from the dock, and rising between the two fuel oil tanks with a swinging extension at reaching the inlet of either tank; (re: Item 28) to enclose the two vertical fuel oil tanks above ground of proper clearance apart with a surrounding reinforced concrete

# MINUTES

1 ft. in thickness by 4 ft. 2 in. in height; (re: Item to erect three horizontal asphalt tanks above ground 2 in. by 12 in. wooden saddles over a heavy pile foundation, a surrounding concrete wall, 6 in. in thickness by 1 ft. in height, forming a reservoir under tanks; the appellant contends (re: Item 35) that there is no building within 50 ft. of the tanks; that the premises is vacant land and bounded at the east by Westchester Creek.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 6, *on condition* that the single fill pipe be limited to the supply of but two oil tanks; as to Item 28, *on condition* that a reservoir of reinforced concrete, equal to 60 per cent of the combined capacity of the tanks, shall be provided; as to Item 29, *on condition* that the asphalt tanks shall be enclosed in a metal structure; that the reservoir of not less than 60 per cent of the capacity of the single tank shall be provided; as to Item 35, *on condition* that fire hydrants shall be installed throughout the premises with 4 in. direct connection to the city water main, and that the hydrants to be spaced not more than 250 ft. apart, equipped with hose sufficient to cover intervening areas.

1300-25-A.  
APPELLANT—C. E. Hicks, for New York Dock Company, owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—Foot of Van Dyke street (Warehouses Nos. 326 and 327), Brooklyn.

APPEARANCES—  
For Appellant: G. A. Eweler.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:  
(53-26-A)  
WHEREAS, C. E. Hicks, chief engineer for the New York Dock Co., owner, filed, January 21, 1926, an appeal from the order of the fire commissioner, affecting premises at foot of Van Dyke street (Warehouses 326-327), Brooklyn; and WHEREAS, the order of the fire commissioner, dated January 12, 1926, reads:

"Order No. 88718-F—  
"1. Install a standpipe system with risers 4 inches in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure."

WHEREAS, the building is non-fireproof, two stories (26 ft. in height, 120 ft. 5 in. by 140 ft. 8 in. (approximately 16,000 sq. ft.) in area, subdivided into two 8,000 sq. ft. sections by fore and aft 16 in. brick wall, the opening on the 1st story being protected by a wooden door and the opening on the 2nd story being unprotected; and WHEREAS, the building is used as a distributing warehouse for the storage of "magnesite," a non-inflammable magnesium cement; 7 in. in the entire premises; and

WHEREAS, appellant contends that the building is equipped with an approved sprinkler system; that the building is surrounded on three sides; that the building is patrolled by a night watchman's service and that in the immediate vicinity there are fire hydrants and also six hose houses, each equipped with 10 ft. of 2½ in. hose.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, *on condition* that the building shall be not increased

in height, area or dimension; that the horizontal openings shall be equipped with fire doors; that the existing sprinkler system shall be maintained in good working order; and *granted* so long as conditions otherwise shall remain substantially unchanged.

1300-25-A.  
APPELLANT—Croker National Fire Prevention Engineering Co., for Orsenigo Co., Inc., owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—Southeast corner of Rawson street and Skillman avenue, Long Island City, Borough of Queens.

APPEARANCES—  
For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:  
(1300-25-A)  
WHEREAS, Croker National Fire Prevention Engineering Co., for Orsenigo Co., Inc., owner, filed, December 16, 1925, an appeal with the board of standards and appeals from an order of the fire commissioner, affecting premises southeast corner of Skillman avenue and Rawson street, Long Island City, Borough of Queens; and WHEREAS, the order of the fire commissioner, dated November 12, 1925, reads:  
"Order No. 85980-F—  
"1. Install standpipe system with risers 4 in. in diameter, tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure."

and  
WHEREAS, the building is fireproof, six stories (83 ft.) in height, having a frontage of 117 ft. 10 in. on Moore street, 200 ft. on Foster avenue, 31 ft. 10 in. on Rawson street and 217 ft. 8 in. on Skillman street, a total inside area of approximately 13,500 sq. ft.; OCCUPIED for the storage and manufacture of furniture; 167 persons above the 1st story; and

WHEREAS, appellant contends that the building is amply provided with exits; that it is equipped with a sprinkler system, fed from a 30,000 gallon gravity tank, and also from a 6 in. connection to the city main; there being provided also a steam pump and siamese connections on three street fronts; that a fire alarm signal system is installed and that over 50 per cent of the area of the front walls of the building are glass, making it feasible to reach all parts of the premises with a fire stream.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the installation of tank and pump, *on condition* that 4 in. standpipe shall be installed carried from basement to top floor, with 4 in. connection to city main; that the premises shall be equipped with sprinkler system and fire alarm system; and that the occupancy shall remain substantially unchanged.

30-26-A.  
APPELLANT—Ballard Oil Equipment Co., for S. Winterbottom, owner.  
SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—3150 Kingsbridge terrace, The Bronx.

# MINUTES

## APPEARANCES—

For Appellant: David Kaufman.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(30-26-A)

WHEREAS, Ballard Oil Equipment Company, by David Kaufman, for S. Winterbottom, owner, filed, January 11, 1926, an appeal from a decision of the fire commissioner, affecting premises 3150 Kingsbridge terrace, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered December 21, 1925, reads (Alt. Applic. No. 2445-24):

"19. Pumps must be of a type approved by the Board of Standards and Appeals.

"24. Burners must be of a type approved by the Board of Standards and Appeals."

and

WHEREAS, the building is of frame construction, 2½ stories in height, 26 ft. by 65 ft. in area; OCCUPIED, private residence; the appellant having installed a fuel oil burning system using grade "A" oil, a Ballard Super Domestic Burner and a Cook Automatic Electric Pump; and

WHEREAS, the appellant contends that the pump and burner installed are now before the board under Calendar No. 603-25-SA and Calendar No. 939-24-SA, respectively, and requests a temporary permit pending the decision; and

WHEREAS, appellant withdrew his appeal as to Item No. 24, the Ballard Super Domestic Oil Burner having been approved by the board.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, as to Item 19, on condition that the fuel oil equipment shall comply with the fuel oil rules in all other respects.

59-26-A.

APPELLANT—Wm. H. Gompert, for Board of Education, City of New York, owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—South side of Maspeth avenue, 191.99 ft. west of Clermont avenue, Maspeth, Borough of Queens.

## APPEARANCES—

For Appellant: Charles Tilgner and Wm. H. Gompert.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(59-26-A)

WHEREAS, William H. Gompert, for City of New York, owner, filed, January 22, 1926, an appeal from an order of the fire commissioner, affecting premises situate on the southerly side of Maspeth avenue, 191.99 ft. westerly of the corner formed by intersection of the southerly side of Maspeth and the westerly side of Clermont avenues, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 30, 1925, reads (Order No. 37289):

"1. Install a standpipe system, with risers 4 in. in diameter, etc.";

and

WHEREAS, the building is non-fireproof, three stories basement and four stories in height, approximately 300 by 78 ft. in area, divided into two sections, the floor of the section appealed being approximately 10,900 sq. ft. OCCUPIED as a public school; and

WHEREAS, appellant contends that the 1st and 2nd stories of the premises are subdivided into two units less than 1,000 sq. ft. by a steel and wire glass partition constructed across the corridor, and contends, further, that the building is now provided with two 2 in. standpipes with outlet on each story.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the structure shall be not increased in height, area or dimension; and granted so long as present exit conditions shall remain substantially unchanged.

1173-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Columbia Wax Products Co., owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—Southeast corner of 94th avenue and 100th street, Woodhaven, Borough of Queens.

## APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1173-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Columbia Wax Products Co., owner, filed, November 12, 1925, an appeal from an order of the fire commissioner, affecting premises southeast corner of 94th avenue and 100th street, Woodhaven, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated March 8, 1925, reads (Order No. 80414-F):

"1. Install a standpipe system with risers 4 in. in diameter tested to withstand a pressure of 100 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation fire department outlets on each story (including basements and roofs) placed within main stairway and accessible from outside. Each outlet to be provided with sufficient length of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is fireproof, three stories (4 in.) in height, 150 ft. by an irregular depth, about 11,000 sq. ft. in area at 1st story and 11,900 sq. ft. in area at 2nd story; OCCUPIED for the manufacture of wax products; 1st story, 40 persons; 2nd story, 20 persons; 3rd story, 20 persons; and

WHEREAS, the appellant contends the building is provided with a sprinkler system fed from a 40,000 gallon tank; that there is a hydrant in yard, one on 100th avenue and one on 95th avenue in front of these premises; the building is provided with adequate exits and has an area.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be not increased in height; that an approved two-source sprinkler system shall be maintained; and that all legal exits required be provided and maintained.

# MINUTES

483-25-A.

APPELLANT—Mallery Fuelgas Corporation, for New York University, owner.

SUBJECT—Application for reopening—extension of permit (re: appeal from decision of fire commissioner).

PREMISES AFFECTED—West side of University avenue, corner of East 181st street, The Bronx.

APPEARANCES—None.

ACTION OF BOARD—Appeal reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(483-25-A)

WHEREAS, Mallery Fuelgas Corporation, for New York University, owner, filed, May 7, 1925, an appeal from a decision of the fire commissioner, affecting premises on the west side of University avenue, corner of East 181st street, Borough of The Bronx; and

WHEREAS, the decision of the fire commissioner, rendered April 30, 1925, reads:

"1. Auxiliary fuel oil tanks under pressure contrary to Rule No. 17.";

and

WHEREAS, the building is fireproof, one story in height, 38 ft. by 56 ft. in area; OCCUPIED as a boiler room connected with New York University building, 5 persons employed; EQUIPPED with a fuel oil burning system, using the Mallery Automatic Gas Producer, there being two auxiliary tanks on the control, each tank of 10 gallons capacity; one for regular use and one held in reserve for emergency; and

WHEREAS, it appears that the Mallery Fuelgas Corporation has a petition for the approval of their device (filed as Champion Gas Producer under Cal. No. 1491-23-SA—on for reopening), which has not yet been acted upon by the board, and appellant contends that the installation is made for experimental purposes in conjunction with the School of Engineering; and

WHEREAS, this appeal was granted by the board at its meeting October 9, 1925, and January 26, 1926, for a temporary period, and appellant requests an extension of time.

Resolved, that the decision of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, for a temporary period of ninety (90) days for experimental purposes, on condition that the installation shall comply substantially with the fuel oil rules now in force in all respects.

## CASE DISMISSED.

### *Appeal from Administrative Order.*

The chairman called attention to the following case where notice of intention to appeal was offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(1075-25-A)

Filed October 20, 1925—Premises 1323 University avenue, Bronx. Order of the fire commissioner. Appellant, Ethel M. Thomas. Dismissed for lack of prosecution.

THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle and Holland ..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

WHEREAS, the foregoing appellant has filed with the board standards and appeals an appeal from order affecting the premises in question; and

WHEREAS, the appellant has failed to complete his papers, though duly notified to do so.

Resolved, that the foregoing appeal be and it hereby is dismissed for lack of prosecution.

## BUILDING ZONE CASES.

APPLICANT—John J. Dunnigan, for Sumog Realty Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7b, 7c and 7e of the building zone resolution, to permit in a "B" district, also partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, and also the omission of a rear yard as required under section 17 of the zone resolution.

PREMISES AFFECTED—1071 Ogden avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan, Joseph M. Callaghan, William J. Lyons and Arthur J. Brown.

For Opposition: David M. Jones, Peter J. Braschers, William Deuchar, Patrick J. O'Brien, A. G. McLean and Mrs. Margaret Keenan.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative: Chief Kenlon ..... 1

Absent ..... 0

THE RESOLUTION:

(68-26-BZ)

WHEREAS, John J. Dunnigan, for Sumog Realty Corporation, owner, filed, January 26, 1926, an application, under the building zone resolution, to permit in a "B" area district, also partly in a business district and partly in a residence district, the erection and maintenance of a garage for the storage of more than five motor vehicles, and also the omission of a rear yard as required under section 17 of the zone resolution; premises 1071 Ogden avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 11, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Ogden avenue and West 165th street are in business districts, and that Summit avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered January 26, 1926, reads:

"1. Erection of proposed garage for storage of more than five motor vehicles in business district extending into a residence district is contrary to provisions Building Zone Resolution.

"2. Rear yard must be provided to comply with requirements of Building Zone Resolution."

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 10 ft. and a depth of 120 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, it would appear that there was no contradiction as to the existence of a public garage on the same street, which formed the basis of this application.

# MINUTES

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall be restricted to and confined within the business use district; that it shall not exceed a depth of 100 ft. from the westerly building line of Ogden avenue; that it shall not exceed a height of two stories above grade; that the building shall be erected fireproof; that a rear yard shall be provided at the 2nd story floor level not less than 10 ft. in depth for the entire width of the premises; that the rear wall of 1st story and gable walls throughout shall be unpierced for their entire height and length; that the front elevation shall be finished with face brick with architectural terra cotta or stone trimmings; that there shall be provided on the rear offset at the 2nd story level fixedouvre ventilators, the skylight at this level if installed to be glazed with wire glass; that all permits required shall be obtained within nine months and the work completed within eighteen months from the date of this action.

32-26-BZ.

APPLICANT—Philip J. Sinnott, for August W. Schmidt, Jr., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

PREMISES AFFECTED—4919-4935 Kings Highway, northwest corner of Utica avenue, Brooklyn.

APPEARANCES—

For Applicant: Philip J. Sinnott.

For Opposition: None.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(32-26-BZ)

WHEREAS, Philip J. Sinnott, for August W. Schmidt, Jr., owner, filed, January 12, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station; premises 4919-4935 Kings highway, northwest corner of Utica avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 11, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Kings highway and Utica avenue are in both business districts and residence districts, and East 49th street is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 6, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 4-a, 46.

"The erection of a gasoline service station in a business district."

WHEREAS, the premises consists of a plot of ground on which it is proposed to install a gasoline service station with necessary tanks, pumps and buildings; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21, due to the surrounding abutting conditions.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that

all permits required shall be obtained within six (6) months and that the work incurred thereby shall be completed within one (1) year; that the pumps and tanks shall be installed wholly within the property lines and that there shall be no extension beyond the building lines of the fuel oil equipment.

81-26-BZ.

APPLICANT—John J. Dunnigan, for Thomas E. Monti, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under sections 7c and 21 of the building zone resolution, to permit the extension from an unrestricted district into a residence district of a proposed garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—1620 Bronxdale avenue, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: Charles Stoerzer.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(81-26-BZ)

WHEREAS, John J. Dunnigan, for Thomas E. Monti, owner, filed, January 28, 1926, an application, under the building zone resolution, to permit the extension from an unrestricted district into a residence district of a garage for the storage of more than five motor vehicles; premises 1620 Bronxdale avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 11, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bronxdale avenue is in an unrestricted district, and that Fowler avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 6, 1926, reads:

"1. Proposed extension of garage for more than five motor vehicles from unrestricted into residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the building is of non-fireproof construction, one story in height, with a frontage of 85 ft. 23/4 in. and a depth of 126 ft. 65/8 in.; to be occupied as a garage for the storage of more than five motor vehicles; a portion of the building, 26 ft. 65/8 in. in depth at rear extending into residence district; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 21, due to the fact that the street front was in an unrestricted use district and the erection of the building was pursued in good faith, not knowing there was an invasion into the residence district at the rear; a permit having been issued by bureau of buildings and later revoked.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed a height of one story above grade; that the rear and gable walls shall be unpierced throughout their entire height and length; any gasoline storage equipment shall be confined to the Bronxdale avenue front, solely within the unrestricted use area of the plot; all permits required to be obtained within nine (9) months and all the work to be completed within one (1) year from the date of this action.

1055-23-BZ.

APPLICANT—Michael Lyndsey, owner.

SUBJECT—Application for reopening—extension of permit (re: order of fire commissioner) to permit in a residence district the maintenance of a garage for the storage of three (3) motor vehicles, three spaces rented to persons not residing on the premises.

PREMISES AFFECTED—2218 Aqueduct avenue, The Bronx.

APPEARANCES—

For Applicant: F. W. Rinn.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....	4
Negative .....	0
Absent: Chief Kenlon .....	1

THE RESOLUTION:

(1055-23-BZ)

WHEREAS, F. W. Rinn, for Michael Lyndsey, owner, filed, September 4, 1923, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of three (3) pleasure motor vehicles; three spaces rented to persons not residing on the premises; premises 2218 Aqueduct avenue, Borough of Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting February 5, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Aqueduct avenue and Buchanan place are residence districts; and

WHEREAS, the order of the fire commissioner, dated August 16, 1923, Order No. 19377-C, reads:

"1. Discontinue the maintenance of a garage which is not maintained strictly as an accessory to dwelling on same lot on these premises."

and

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 31 ft. and a depth of 20½ ft.; occupied as a garage for three motor vehicles, three spaces rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 84 per cent of the property frontage deemed by the board to be affected; and

WHEREAS, this application was granted by the board at its meeting February 5, 1924, for a temporary period and applicant requests an extension of this period.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the capacity of the garage be restricted to three automobiles of the pleasure car type, space for two of which may be rented to persons not residing on the premises, and that this permission, granted February 5, 1924, be extended for a temporary period of two years from the date of this action.

AREA FIXED.

(159-26-BZ)

The chairman presented and read a communication from John J. Dunnigan, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises southwest corner of Cromwell avenue and West 169th street, The Bronx.

The following area was approved by the board:

Both sides of Cromwell avenue from a point 100 ft. north of West 169th street to a point opposite the in-

tersection of the easterly side of Cromwell avenue with Jerome avenue; both sides of West 169th street from Boscobel avenue to Jerome avenue; the westerly side of Boscobel avenue from West 169th street to a point 200 ft. southerly therefrom and also the easterly side of Boscobel avenue from West 169th street to a point 170 ft. southerly therefrom.

CASES DISMISSED.

*Under the Building Zone Resolution.*

The chairman called attention to the following cases, where notices of intention to appeal were offered for filing; but where, despite notices from this office, papers have not been completed, thus tying the hands of the administrative official in the performance of his duty:

(502-25-BZ)

Filed May 13, 1925—Premises 145-147 Astoria avenue, Flushing, Queens. Decision of the superintendent of buildings. Applicant, Emil Guterman. Dismissed for lack of prosecution.

THE RESOLUTION:

(988-25-S)

WHEREAS, William F. Doyle, for 385 Madison Avenue, Inc., owner, filed, September 25, 1925, a petition for va

# MINUTES

on from the requirements of the labor law, as cited in the orders of the fire commissioner and in the decision of the superintendent of buildings, affecting premises No. 385 Madison Avenue, Borough of Manhattan; and WHEREAS, the orders of the fire commissioner, dated July 3, 1925, read:

(Order No. 83017-LF)

"An inspection of premises 385 Madison Avenue, Borough of Manhattan, shows that the following must be done to comply with Section 279 of the Labor Law:

"No. 1. Install an adequate interior electric fire alarm system in accordance with the rules of the Board of Standards and Appeals and the enclosed approved layout."

(Order No. 83018-LF)

"An inspection of the premises 385 Madison Avenue, Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Sec. 279 of the Labor Law. The labor law specifically charges the Fire Commissioner with the duty of enforcing the provisions of the law, as to fire drills."

WHEREAS, the decision of the superintendent of buildings, rendered March 29, 1926, in acting on request for certificate of occupancy, reads:

"1. All windows in exterior walls must be fireproof and self-closing and must not exceed 720 sq. in. per light.

"2. Doors along interior and fire tower stairway must be entirely fireproof. Glass not permitted.

"3. All partitions throughout the building must be built of incombustible material.

"4. Remove gate which obstructs egress from main stairway at first floor into main hall.

"5. All partitions enclosing stair halls must be of 6 in. terra cotta or 8 in. brick.

"6. All steel beams must have two inches of fireproofing."

WHEREAS, the building is fireproof, 12 stories and pent house in height, 215 ft. by 100 ft. 4 in. in area. OCCUPIED: 1st story, stores; upper stories, offices and showrooms (mostly millinery) with a 25 per cent factory occupancy on the 4th, 6th and 8th stories, approximately 830 persons above the 1st story; pent house occupied for offices; EQUIPPED with a two source automatic sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof; enclosed in fireproof partitions with metal-covered wooden doors at openings; and

WHEREAS, petitioner contends that there is installed in the west stairway of the premises an interior fire alarm system, extending from the sub-basement to roof, with stations on each story; the fire alarm system connects directly to a central station, which in turn transmits alarm to fire quarters; and contends further that the two source automatic sprinkler system covers all of the premises excepting a portion of the pent house.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, in so far as it affects an area of 3,000 sq. ft. on the 7th story of building for occupancy use of light industrial work incidental to the conduct of millinery model sales agency, and that the certificate of occupancy of the superintendent of buildings now in force shall be complied with in all other respects; as to orders of the fire commissioner Nos. 83017 and 83018, the petition be and it hereby is granted, on condition that the stipulations of the certificate of occupancy now in force shall be maintained.

i-S.

PETITIONER—C. E. Hicks, for New York Dock Company, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—Foot of Van Dyke street (Warehouse Nos. 326 and 327), Brooklyn.

APPEARANCES—

For Petitioner: G. A. Eweler.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle, Holland and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(54-26-S)

WHEREAS, C. E. Hicks, chief engineer of the New York Dock Company, owner, filed, January 21, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises warehouse, foot of Van Dyke street (Warehouses 326-327), Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 22, 1925, reads (Order No. 88717-LD):

"1. Provide an interior stairway from the 1st to 2nd story at east side of building as per Rule 3, Board of Standards and Appeals adopted July 29th, 1924.

"2. Provide a secondary means of exit from every floor of building at west end of south side of building as per Rule 3, Board of Standards and Appeals adopted July 29th, 1924."

and

WHEREAS, the building is non-fireproof, two stories in height, 120 ft. 5 in. by 140 ft. 8 in. in area. OCCUPIED as a distributing warehouse for the storage of magnesite cement; 1st story, 5 persons; 2nd story, 8 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two exterior wooden stairways, extending from the 1st story to 2nd story; interior wood stair to scuttle in roof; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends that the material stored is non-inflammable and that in view of the light occupancy the existing means of exit are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item 1; as to Item 2, on condition that exterior party-wall fire escape shall be provided at the southerly end of building with not less than 60 degree stationary stairs to grade level; and that existing horizontal openings shall be equipped with fire doors.

## THE RESOLUTION:

(1102-24-S)

WHEREAS, Arthur Greenbaum, for Abram I. Kaplan, lessee, filed, September 6, 1924, a petition with the board of standards and appeals for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 251 Fifth avenue and 1 East 28th street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated March 8, 1920, reads:

"Order No. 3113-LD—

"1. Arrange the exterior enclosed fireproof stairway at the northeast corner of building \* \* \*.

"NOTE: Among the defects noted on this stairway are the following:

"All doors except on the 4th story open inwardly. No safe passageway to street. No door to stairway on the 1st story.

"2. Provide an outside iron balcony fire escape on the west end of the 5th Ave. building \* \* \*.

"NOTE: In addition to this—order requiring the installation of an approved \* \* \* interior alarm system will be issued as soon as a layout showing the required equipment can be prepared by the Electrical Division of this Bureau.";

and

WHEREAS, the building is non-fireproof, seven stories in height, "L"-shaped in area, with a frontage of 25 ft. on Fifth avenue and a frontage of 125 ft. on East 28th street with a depth of 100 ft.; OCCUPIED as a tenant factory, with a total of 26 persons above the 1st story in the Fifth avenue portion and 37 persons above the 1st story in the East 28th street portion; the means of egress consisting of an interior stairway in the Fifth avenue section extending from the 1st story to the roof; a spiral stairway at the rear of the 28th street section of the building, extending from the 1st story to the top story opening into store in the 1st story, with proposed passageway in the basement from the spiral stairway to the interior stairway, enclosed in 6 in. terra cotta partitions; a doorway in the 1st story connecting the Fifth avenue section to the main building adjoining to the north on Fifth avenue; and

WHEREAS, petitioner contends that it is proposed to install an approved sprinkler system and that the standpipe system has been installed in the building.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 3113-LD, on condition that the existing spiral stairway shall be removed and substituted by an exterior fire escape at window sill level with 60 degree connecting stairs on the north wall of the easterly extension, with egress from lowest balcony at 2nd story level to roof of premises to the east or west complying with rules in other respects; granted, as to Item No. 2, on condition that horizontal exits shall be provided between premises No. 251 and 253 Fifth avenue, and that the present occupancy and use shall remain unchanged.

1220-25-S.

PETITIONER—Croker National Fire Prevention Engineering Co., substituted for John B. Nugent for Warner Estate, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—42 West 28th street, Manhattan.

APPEARANCES—

For Petitioner: Herman E. Horwood and John B. Nugent.

For Administration: Inspector Maher of fire department.

## THE RESOLUTION:

(1220-25-S)

WHEREAS, the Croker National Fire Prevention Engineering Company, substituted for John B. Nugent, for Warner Estate, owner, filed, November 24, 1925, a petition for variation from the requirements of the labor law, as cited in an order of fire commissioner, affecting premises No. 42 West 28th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 5, 1925, reads (Order No. 86248-LD):

"1. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building, by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street. \* \* \*";

and

WHEREAS, the building is non-fireproof, four stories and basement in height, 26 ft. by 66 ft. in area. OCCUPIED Basement, store, 5 persons; 1st floor, tailor, 2 persons; upper stories, tenant factory, 25 persons above 1st story. EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in wood stud and plaster partitions with wood doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from roof to the yard; with EGRESS from the termination of the fire escape to street by means of store in building in question and also by means of openings to door in building at rear; ROOFS of adjoining buildings to east same level; and

WHEREAS, petitioner contends that the existing means of egress from the termination of the fire escape are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted only so far as it affects the egress from the termination of the fire escape on the rear, on condition that the fence between these premises and the property to the rear on 28th street shall be removed; that egress from adjoining premises on the rear shall be maintained through plain glass openings and an exterior screened stairway and that access shall be maintained on the top story to the rear fire escape by free and unobstructed aisles or passageways, and that the requirements of the labor law shall be complied with in all other respects.

960-25-S.

PETITIONER—Ald Realty Company, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

to the street, adequately lighted at all times during working hours or by means of providing access to an open area having communication with the street as per Section 273 of the Labor Law.”;

WHEREAS, the building is non-fireproof, four stories in height, 20 ft. 10 in. by 84 ft. in area at 1st and 2nd story and 20 ft. 10 in. by 75 ft. in area above. OCCUPIED: 1st story, restaurant; upper stories, tenant factory; 2nd story, 6 persons; 3rd story, 10 persons; 4th story, 6 persons; 5th story, 7 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire-resisting partitions with fire-resisting doors at openings; a fire escape on the rear of the building, having fireproof openings along the course of the escape, extending from the roof to the yard; with EGRESS at the termination of the fire escape by means of door leading to yard to the east; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner contends, in view of the light occupancy of the premises, that the existing means of egress are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, so far as it affects the egress from the termination of the fire escape, on condition that an open, unobstructed way shall be provided through fence of adjoining property to the east, and that an opening shall be provided in the fence to the property to the rear with iron steps not less than 3 ft. wide to the yard level of adjoining premises to the south, with egress through premises on 27th street direct to street; granted only so long as conditions of use and occupancy remain unchanged.

PETITIONER—Thomas S. Hall, for Adele Hall Graham and Thos. H. Hall, owners.

SUBJECT—Variation of the labor law as cited in orders of the fire commissioner.

PREMISES AFFECTED—209-211 East 37th street, Manhattan.

APPEARANCES—

For Petitioner: Edward Willmann.

For Administration: Inspector Maher of fire department.

THE RESOLUTION:

(37-26-S)

WHEREAS, Thos. H. Hall, for Adele Hall Graham and Thos. H. Hall, owners, filed, January 14, 1926, a petition for variation of the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 209-211 East 37th street, Borough of Manhattan; and

WHEREAS, Order No. 83008-LD, dated July 18, 1925,

“1. Extend the interior stairway at the east and west side of building to the roof, per Section 271 of the Labor Law.”;

Order No. 83009-LD, dated July 18, 1925, reads:

“1. Remove the substandard fire escape on the front of the building, or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, amended May 9th, 1924. NOTE: Among the defects noted on this fire escape are the following:

“Windows on course not fireproof nor self-closing.

“No 60 degree stairways connecting balconies.

“No counterbalanced stairway or drop ladder in guides from lowest balcony to ground.

“Must be maintained structurally safe and properly painted; no sign of any character shall be placed at openings to same.”;

and

WHEREAS, the building is non-fireproof, five stories in height, 50 ft. by 80 ft. in area. OCCUPIED as a carpet cleaning establishment; 1st story, 4 persons; 2nd story, 2 persons; 3rd story, 7 persons; 4th story, no occupancy; 5th story, 7 persons; EQUIPPED with a fire alarm signal system. EXITS: Two interior wooden stairways, extending from the 1st story to top story, enclosed in wooden partitions, with wooden doors at openings, with stairs to scuttle in roof; a sub-standard fire escape on the front of the building, having non-fireproof openings along the course thereof, extending from the top story balcony to the 2nd story balcony; and also a sub-standard fire escape on the rear of the building; ROOFS of adjoining buildings to east 20 ft. higher, to west same level; and

WHEREAS, petitioner contends that no explosives or chemicals are used in the building, and proposes to remove the rear fire escape, and in re: the fire escape on the front of the building proposes to provide a counterbalanced drop ladder from the 2nd story balcony to the ground, and proposes to glaze with wire glass the existing wooden frames in the openings along the course thereof.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Order No. 83008-LD, Item No. 1, only so far as it affects the stairs on the easterly side of the top story, on condition that a double rung ladder shall be provided at the head of stairs to scuttle 2 ft. by 3 ft.; denied, as to Order No. 83009, Item No. 1.

THE RESOLUTION:

(1195-25-S)

WHEREAS, Henry J. von der Lieth, for John D. Thees, owner, filed, November 18, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises 72-74 West 125th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner read:

Order No. 82085-LD, dated July 9, 1925—

“1. Extend the interior stairway at the east side of building to the roof, as per Section 271 of the Labor Law.

“2. Provide a second means of exit on the 2nd story by constructing horizontal exit having opening not less than 44 in. wide in the division wall between buildings, said opening to be protected by fire doors as per Section 267 of the Labor Law. \* \* \*

“3. Remove the substandard fire escape on the rear of the building or reconstruct same as per Section 274 of the Labor Law and Rule 3 of the Board of Stand-

# MINUTES

ards and Appeals. Amended May 9th, 1924. Among the defects noted on this fire escape are the following:

"Windows on course not fireproof nor self-closing. Does not extend from ground to roof. No safe passageway to street from termination. No sign of any character shall be placed at openings to same. Must be maintained structurally safe and properly painted."

Order No. 82225-LD, dated July 10, 1925—

"1. Extend the interior stairway at the west side of building to the roof, as per Section 271 of the Labor Law.

"2. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building, by constructing a fireproof passageway with an unobstructed width of at least 3 ft. throughout, leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Section 273 of the Labor Law."

and

WHEREAS, the premises consist of two non-fireproof three-story buildings—No. 72 and No. 74 West 125th street; No. 72 being 25 ft. by 95 ft. in area at 1st story and 25 ft. by 55 ft. in area above; No. 74 being 25 ft. by 75 ft. in area at 1st story and 25 ft. by 55 ft. in area above. OCCUPIED: No. 72, 1st story, furrier, 1 person; 2nd story, office, 1 person; 3rd story, manufacture of millinery, 10 persons; No. 74, 1st story, store, 2 persons; 2nd story, office, 2 persons; 3rd story, manufacture of millinery, 8 persons. EXITS: A wooden stairway in each building, extending from the 1st to top story; each enclosed in wood lath and plaster partitions with glass paneled wood doors at openings; a horizontal exit on the 3rd story; a fire escape on the rear of No. 72 extending from the 3rd story balcony to the roof of the one-story extension and an iron bridge and stairway from the 2nd story of No. 74 to the yard of same; ROOFS of adjoining buildings are at same level; and

WHEREAS, petitioner proposes to extend the interior stairway (in No. 72) to the roof; contending this exit will be adequate in view of the horizontal exit on this story; also, to provide a fire escape balcony on the rear of the 2nd story of No. 72, connecting to the 2nd story balcony at rear of No. 74; to remove the fire escape balcony and stair at the rear of No. 72, and requests the acceptance of doors (in each building) leading from yard to street as a means of egress from the termination of the fire escape.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, as to Order No. 82085-LD, Item No. 2, *on condition* that a party wall fire escape shall be provided on the rear of the building on the 3rd story, with 60 degree connecting stairs to roof of extension; all skylights in extension roofs to be glazed with wire glass; and *denied*, as to Items No. 1 and 3; *granted*, as to Order No. 82225-LD, Item No. 2, *on condition* that a doorway with plain glass opening shall be provided from the rear yard in both No. 72 and 74 West 125th street; and *denied*, as to Item No. 1.

1228-25-S.

## THE RESOLUTION:

(1228-25-S)

WHEREAS, Ruth A. Wallace, owner, filed, November 1925, a petition for variation from the requirements of labor law, as cited in an order of the fire commissioner affecting premises 27-37 West 60th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated 17, 1925 (Order No. 82927-LD), reads:

"1. Discontinue manufacturing on these premises except on the 11th floor rear as stipulated in Certificate of Occupancy 8601, 1924; which permitted factory occupancy on 11th floor rear as per variation of the Labor Law, granted by the Board of Standards and Appeals, calendar No. 362-24-S.

"For the reason that manufacturing is being conducted also on the 3rd, 5th, 6th, 9th and 10th stories and second required means of exit on the rear of the building does not conform with the requirements of Section 270 of the Labor Law and no interior electric fire alarm system is installed throughout the building as required by Section 279 of the Labor Law, and all doors throughout building do not open outwardly as required by Section 270 of the Labor Law and fire drills are not conducted at least once a month as required by Subdivision 2 of Section 279 of the Labor Law and exit signs at least 8 in. in height, illuminated by lights having globes in time of darkness are not provided as required by means of egress as required by Section 272 of the Labor Law, and no unobstructed passageway is provided leading to both required means of exit on each story. At present it is necessary to pass through partitions enclosing offices and factories at rear of building, thence through lofts to reach 2nd means of exit at rear of building."

and

WHEREAS, the building is fireproof, 11 stories in area, 109 ft. by 100 ft. 5 in. in area. OCCUPIED: 1st and 2nd stories, showrooms, 64 persons; 3rd, 5th, 6th, 9th and 10th stories, stockrooms, assembling goods and light manufacturing, such as piston rings, automobile accessories, and hat stretchers, about 26 persons on each story; 4th story, offices, 70 persons; 7th and 8th stories, offices and rooms, 20 persons on each story; 11th story, manufacture of jewelry, 80 persons; EQUIPPED with a sprinkler system and two standpipe lines. EXITS: One interior fireproof stairway, extending from 1st story to roof, enclosed in fireproof partitions, with fire doors at the openings; an exterior iron stairway on rear of building, extending from roof to the yard, having fireproof openings at each course thereof, with egress through 1st story means of passage to interior stairway, thence to street; ROOF of adjoining building 118 ft. lower at east, 70 ft. lower at west; and

WHEREAS, the petitioner claims that exit signs and lights have been provided at all exits; that all doors to rear exits, to interior stairs and to fireproof exits open outward; that fire drills are unnecessary as the building is 100 per cent sprinklered; the petitioner further claims that the occupancy is small and the manufacturing is of a light nature.

*Resolved*, that the board of standards and appeals hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, *on condition* that an approved exterior screened iron door shall be provided and maintained on the rear of the building, with open, unobstructed egress on each story to be maintained from the lowest termination of mezzanine floor level, with fireproof passageway to building leading direct to and connected with the entrance hall at front of building, and that an interior alarm system shall be installed; *denied* in all other

## RESOLUTION:

(734-25-S)

WHEREAS, Buchman & Kahn, for Siden Building Company, Inc., owner, filed, July 13, 1925, a petition for variation from the requirements of the labor law, as cited in the order of the fire commissioner, affecting premises 87-9 Nassau street and 130 Fulton street, Borough of Manhattan;

AND WHEREAS, the orders of the fire commissioner read:

Order No. 78526-LD, dated May 27, 1925—  
1. Remove the substandard fire escape at the west side of building or reconstruct same \* \* \*.

\* \* \* No 60 degree stairway connecting balconies. Stairway from top balcony to roof. Fire escape must not extend to ground with a safe passageway to the street from the termination. No steps from floor to sills of openings on course of fire escape. Windows on course not fireproof nor self-closing. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.

2. Remove the substandard fire escape on the south side of building or reconstruct same \* \* \*.

\* \* \* No stairway from top balcony to roof. Must be maintained structurally safe and properly painted. No sign of any character shall be placed at openings to same.

3. Provide an exterior screened iron stairway on the southwest side of building, \* \* \*.

4. Enclose the interior stairway serving as a regular means of exit, and the landings, platforms and passageways connecting therewith on all sides with partitions of fire resisting material, \* \* \*.

5. Provide an additional means of exit from the cellar and subcellar, \* \* \*.

Order No. 78527-LD, dated May 27, 1925—

1. Provide exit signs, letters to be at least 8 in. in height, at all means of egress with a red light over all exits for use in time of darkness, as per Section 264 of the Labor Law."

Order No. 78528-LD, dated May 27, 1925—

1. Arrange the entrance doors at street so as to open outwardly, as per Section 271 of the Labor Law."

WHEREAS, the building is fireproof, 10 stories, cellar and roof in height, 57 ft. 10 in. by 113 ft. 9 in. in area. OCCUPIED: Sub-cellar, engine room and storage; cellar, storage and storage; 1st story, stores; 2nd to 10th story, offices, 50 persons on each story. EXITS: An exterior iron stairway, extending from the 1st story to the roof; a sub-standard fire escape on the west side of building, having fireproof openings along the course of escape extending from top story to the basement; with a safe passageway to the street; ROOFS of adjoining building 8 stories lower at south, 5 stories lower at west;

WHEREAS, the petitioner claims that the building was altered to comply with Exit Order No. 134 of 1919, issued by the bureau of buildings; a certificate of occupancy, No. 4261 of 1922, was duly issued for an office building, such occupancy has not been changed; he further contends that the labor law does not apply in this case.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Items 2 and 3, Order No. 78526, on condition that the windows on course of fire escapes shall be fireproof and self-closing throughout; and that iron steps shall be provided from the floor to the sills of the windows in each case; that doors to fire escape in public corridors shall be maintained unfastened during the occupancy of the building at any and all times; that a red light and exit sign shall be provided on the corridor side of the doors leading to the fire escape; that the upper panels of the doors leading to fire escapes shall be plain or ground glass; that a 45-degree stairs shall be maintained from the lowest balcony of the existing fire escape, the full width of the rear court, to the termination at basement level, with self-closing fireproof door opening in the course of travel to the public corridor of the basement, leading directly to the street; granted, as to Item 5, on condition that not less than two means of egress shall be provided from the boiler room in sub-cellar; Item 4 is granted; denied as to Item 1 of Order 78526; denied as to Item 1 of Order 78527; as to Item 1 of Order No. 78528, granted only so far as the extreme outside door is concerned; the variation is granted only so long as the industrial occupation throughout the building shall be limited to 85 persons, restricted to the conduct of jewelry and watch repair and diamond setting; and granted so long as conditions as to occupancy and use otherwise remain unchanged.

16-26-S.

PETITIONER—Charles B. Meyers, for Bermey Realty Co., Inc., owner.

SUBJECT—Variation of the labor law as cited in decision of the superintendent of buildings.

PREMISES AFFECTED—561-565 Seventh avenue and 149 West 40th street, Manhattan.

APPEARANCES—

For Petitioner: Charles B. Meyers.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Guilfoyle, Holland and Chief Kenlon ..... 5

Negative ..... 0

Absent ..... 0

## THE RESOLUTION:

(16-26-S)

WHEREAS, Charles D. Meyers, for Bermey Realty Co., Inc., owner, filed, January 6, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 561-63-65 Seventh avenue and 149 West 40th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 21, 1925, reads (N. B. Applic. No. 398/25):

"10. All windows must be fireproof self-closing or stationary windows with panes not more than 720 square inches in area to conform with the requirements of Section 264 of Labor Law and Rule 503 of the Industrial Code."

and

WHEREAS, the building is fireproof, 21 stories in height, having a frontage of 60 ft. on West 40th street and a frontage of 59 ft. 5 in. on Seventh avenue. OCCUPIED for offices, showrooms and factory, 40 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways ex-

# MINUTES

tending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings on the 1st, 2nd and 3rd stories, on both street fronts, in the street walls of the building, glazed with  $\frac{1}{4}$  in. plate glass, the maximum area of the glass on the 1st story being 8 ft. 6 in. by 8 ft. 6 in. and on the 2nd and 3rd stories being 6 ft. by 8 ft. 6 in.; and

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would detract from the architectural appearance of the building and would also destroy the intended use of the lowest three stories.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the windows on the street front of the three (3) lower stories, on condition that all windows shall be equipped with approved metal frames and sash, glazed with polished plate glass,  $\frac{1}{4}$  in. in thickness, and that the requirements of the labor law shall be complied with in all other respects.

Absent .....

## THE RESOLUTION:

WHEREAS, the foregoing petitioners have filed with the board of standards and appeals petitions for variation of the labor law, affecting the premises in question; and

WHEREAS, the petitioners have failed to complete the papers, though duly notified to do so.

Resolved, that the foregoing petitions be and they are dismissed for lack of prosecution.

Adjourned 4.40 p. m.

WILLIAM J. O'GORMAN, Secretary

# MINUTES

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, April 27, 1926, as they appeared in Bulletin No. 18, Vol. XI, are hereby corrected to read as follows:

868-25-S.

PETITIONER—Oscar Abel, by Stein & Salant, for Gilman Corporation, owner.

SUBJECT—Variation of labor law, as cited in order of the fire commissioner.

PREMISES AFFECTED—501 Seventh avenue, Manhattan.

APPEARANCES—None.

\*Correction—Letter on calendar number of resolution changed from "A" to "S".

ACTION OF BOARD—Petition dismissed.

## THE VOTE TO DISMISS—

Affirmative: Chairman Walsh, Commissioners Connell, Holland Guilfoyle.....

Negative .....

Absent: Chief Kenlon.....

## THE RESOLUTION:

(868-25-S)

WHEREAS, Oscar Abel filed, August 26, 1925, a petition for variation of the requirements of the labor law in order of the fire commissioner, affecting premises 501 Seventh avenue, Manhattan; and

WHEREAS, petitioner failed to complete his papers, though duly notified to do so.

Resolved, that the petition be and it hereby is dismissed for lack of prosecution.

# NOTICE

## BUILDING CODE ON SALE.

Copies of the Building Code are now on sale at the Distributing Division of the City Record Office, 125 Worth street. Price, \$1.25; by mail, \$1.35.

## ELECTRICAL CODE ON SALE.

Copies of the Electrical Code are now on sale at the Distributing Division of the City Record Office, 125 Worth street. Price, 20c; by mail, 35c.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO FUEL OIL RULES.

(217-21-SR)  
(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Friday, May 21, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Fuel Oil Rules.

*Matter in italics is new. Matter in [ ] is old matter to be removed.*

### Rule 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

#### a) Grade A Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

#### b) Grade B Fuel Oil Shall Include:

All oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

#### d) [Rule 33.] Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as per Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately ventilated direct to the outer air.

(e) [(a)] No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

### [GRADE A FUEL OIL.]

#### Rule 2. Manner of Storage for [Grade A] Fuel Oil.

Fuel oil, to be used for [commercial] heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

#### Rule 3. General Location of Tanks for [Grade A] Fuel Oil.

(a) In all *except fireproof* buildings fuel oil storage tanks shall be buried below the floor of the lowest story

in the manner required for tanks outside of the building or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

#### Rule 4A. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

##### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

##### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

[(b) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.]

[(c) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.]

##### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# PUBLIC HEARING

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 4B [19.] Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, *unless an approved anti syphon valve is used*, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Material and Construction of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free

from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{4}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. steel and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{3}{8}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks, and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plate or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will safely carry the load with a factor of safety of five (5), or by using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from center to center of the rivet lines on these members must not be in excess of twenty-four inches, and the rivet spacing must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of six (6) inches center to center on these members.

(f) When structural reinforcing members are tied together with braces, in order to reduce the effective length, the braces shall not be stressed higher than nine thousand (9,000) pounds per square inch taken on the minimum net section.

(g) If structural members are omitted and the sides of the tank are braced entirely by means of rods or bars, these members should not be spaced greater than twenty-four (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that it will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of plates  $\frac{1}{8}$  inch.

# PUBLIC HEARING

the thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

t equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plates shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

In all cases, steel tanks for the storage of fuel oil must be built metal to metal. No filler of any kind shall be permitted.

[Rule 20 (a)] Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this section except that tanks of a capacity of over 60 gallons and more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

[Rule 20 (b)] Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

Where welding is to be used for a part or for the entire tank, the tank shall be fabricated as required under Section 5.

All welded seams of plates shall be lapped or butt jointed.

When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of full penetration fillet.

Where a butt joint is used, it shall be of the 90 degree V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

All heads shall be flanged, the straight part of the flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For 1/4 inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For 3/8 inch heads, 2 1/4 inch flange.

For heads over 120 inches diameter the flange shall be lapped in length by one-half inch for each increase in diameter of 2 feet.

Where heads are set into the shell, they shall be a close fit and the shell shall fit the head closely all around.

If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

Where the heads are butt welded to the shell, the head flange for tanks of 1,100 gallon capacity or less and not over 3 inches in diameter, shall be of the 90 degree single V type welded entirely through and reinforced not more than one-quarter of the shell thickness. For tanks of over 1,100 gallon capacity the head welds shall be of the double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

Where tanks are made up of two or more rings joined by longitudinal joints of adjacent sections shall be butt jointed. At no point of a butt girth joint shall the joint on one side be offset with the sheet on the other side by an excess of one-half of the thickness of the plate. All girth joints shall be welded inside and out and

reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half (1 1/2) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth (1/4) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half (1 1/2) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanketing gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half (1/2) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks,

# PUBLIC HEARING

shall withstand after being set in place, a hydrostatic *or oil* test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic *or oil* pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic *or oil* test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

## Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic *or oil* test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

## Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

## Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for [Grade A] Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted. *Except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.*

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plan. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic *or oil* pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of a pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into a suction line provided there are no shut off valves in connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in., the spring type with working parts of non-corrosive construction and shall be set to discharge at not more than fifty (50) per cent above the maximum working pressure.

(b) *Where pressure systems are used an automatic by-pass valve of size equivalent to that of the discharge shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.*

### Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a standard rate fill pipe. Fill pipes when installed near any building opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or sump carried within four (4) inches of the lowest point in tank.

(d) Fill pipe shall be made up with screw threaded flanged fittings and shall be oil tight and securely in place.

### Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without a trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend below the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be connected into a main header. Connections to the header shall not be less than one foot above the level of the highest reservoir from which the tanks may be filled. The main vent pipe from the header shall be screwed. The main vent pipe and header shall be of an area not less than the aggregate area of vent pipes connected thereto.

(c) Vent openings shall be screened by 40 mesh galvanized wire screen, and shall be of sufficient area to adequately vent the tank during the filling operation.

# PUBLIC HEARING

nts shall be not less than two (2) inches in diameter  
tanks over 1,100 gallons capacity, and in no case less  
in one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weather  
hoods and terminate outside the building above the  
street surface, not less than six (6) feet nor more than  
twelve (12) feet above the fill pipe. Such vent outlet  
shall not be located within three (3) feet in any direc-  
tion of a window or other opening, or an exterior stair-  
way, or fire escape, nor shall vent pipes be placed in  
hvacuator or dumb-waiter shafts, or in an enclosed court.  
(e) If compelled, because of structural conditions,  
to carry the vent outlet higher than twelve (12) feet  
above the fill box, and if the fill lines are connected to  
oil trucks by tight connections and filled by pressure,  
one (1) inch line shall be connected to tank and  
shall parallel the fill line and terminate in the fill box  
with an unthreaded end. A check valve shall be installed in  
the line so as to permit excess oil in the tank to flow  
into the fill box and shall be so set as to prevent the pas-  
sage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be  
not less than the diameter of the supply line to the  
burner. Return lines shall be run as direct as possible,  
and shall be connected into the suction line near the  
pump or into the storage tank. No oil shall be re-  
turned to the storage tank at a temperature higher than  
one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils  
in storage tanks in any building shall be only by means  
of hot water coils thermostatically controlled and the  
oil shall not be heated above one hundred and forty  
(140) degrees Fahrenheit.

## Section 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a sub-  
stantial type, provided with a stuffing box of liberal size  
containing a removable cupped gland designed to com-  
press the packing against the valve stem and so ar-  
ranged as to facilitate removal. Valves shall be de-  
signed to close against the supply and to prevent with-  
drawal of the stems by continued operation of the  
hand-wheel. The use of packing which may be affected  
by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge  
suction lines near each pump; in discharge line  
at each tank as near the tank as practicable, and in  
each line near each burner.

## Section 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so  
designed as to prevent the escape of oil or vapor within  
the building at any time. The top of the well when lo-  
cated outside of a building shall be sealed and kept  
closed when not in use.

## Section 11A. Pumps for Grade A Fuel Oil.

(a) Pumps shall be of a recognized standard me-  
chanical construction approved by the Board of Stand-  
ards and Appeals.

(b) Pumps shall be installed in duplicate where fire  
protection equipment is dependent on the use of fuel  
oil for heating or steam.

(c) Pumps located in the same room where burners  
are installed shall be provided with a remote control.

(d) Pumps used in connection with outside above  
ground storage tanks shall be located outside embank-  
ments, walls, and at such a point that they will be ac-  
cessible at all times, even if the oil in the tank or res-  
ervoir should be on fire.

(e) Pumps may be located below the top of the oil  
storage tank or tanks where heavy oil is used having a  
viscosity of not more than eighteen (18) degrees Baume

and where the top of the tank or tanks is not more than  
ten (10) feet above the pump or pumps.

## Rule 11B. [Rule 24.] Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners  
shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in  
Rule 11A (a).

## Rule 12. Burners for [Grade A] Fuel Oil.

The burner mechanism shall be of a recognized type  
approved by the Board of Standards and Appeals. *In do-  
mestic installations the burner shall be equipped with an  
overflow attachment or an automatic control to prevent  
flooding.*

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and es-  
cape of oil shall be prohibited.

(b) Thermometers with large clear reading scales,  
placed in thermometer walls with screwed top connec-  
tions, shall be installed at convenient and prominent po-  
sitions in the oil supply pipe lines between the service  
tank and the pumps, and also between the pumps and  
the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and  
operation of the fuel oil system shall be permanently  
fixed near the apparatus and maintained in readable  
condition.

## Rule 15. Operation of Plant Other Than Domes- tic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in  
charge of a person holding a certificate of qualification  
from the Police Commissioner. A certificate of qualifi-  
cation will be required of each person who is directly in  
charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in  
the system until after a permit has been issued by the  
Fire Commissioner. Plans for each fuel oil system  
shall be submitted to the Fire Commissioner, together  
with a Certificate of the Superintendent of Buildings  
indicating that the proposed construction of the enclos-  
ure and the location of the tanks is in accordance with  
the requirements of the Building Code and these Rules.

## [Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are pro-  
hibited.]

## [GRADE B FUEL OIL.]

## [Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes  
where stored, shall be at all times contained in closed  
metal tanks.]

## [Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either  
outside of a building or below the lowest floor level.  
When located inside of a building and on the lowest  
floor level, the aggregate capacity of such storage tanks  
shall not exceed 200 gallons. Such inside storage tank  
shall be enclosed in 4 inches of terra cotta or 8 inches  
of approved masonry.

(b) Tanks shall be buried with top of tanks not less  
than 2 feet below the surface of the ground and below  
the level of any piping to which the tanks may be con-  
nected, except that, in lieu of the 2-foot earth cover,  
tanks may be buried under 12 inches of earth and a  
cover of reinforced concrete at least 6 inches in thick-  
ness extending at least one foot beyond the horizontal

# PUBLIC HEARING

outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

## 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.]

### [Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.]

### [Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.]

### Rule 17. [22.] Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

### [Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

### [Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).]

### [Rule 25. Piping for Grade B Fuel Oil.

#### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

#### Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

#### Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

#### Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

#### Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.]

### Rule 18. [26.] Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided near each burner and in the discharge line from each storage tank.

[(b) See Rule 9 (a) for construction of valves.]

(b) [(c)] A remote or thermostatic control for shutting off the supply of oil to the burners shall be provided.

(c) [(d)] An automatic by-pass valve of a size equivalent to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-corrosive materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valve shall be set at not more than fifty (50) per cent above the maximum working pressure.

### [Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.]

### Rule 19. [28.] Pilot Light.

Automatic systems unless electrically ignited shall be designed that the flame cannot be extinguished by operation of the automatic control valve and a [A] pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not be easily extinguished.

### Rule 20. [29.] Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other devices originally designed for use of fuel other than oil, shall not be used in connection with oil burners unless specially designed in which vapors might collect are adequately vented, and if used shall be of such construction as to withstand the maximum temperature of which the oil burning device to be installed is capable.

(b) No damper for closing of more than eighty per cent of the effective area of the flue shall be permitted in a smoke pipe or flue.

### Rule 21. [30.] Fire Protection in Domestic Installations.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster or other approved incombustible material. Above the furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths (3/4) of an inch of Portland cement plaster on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be provided a hand fire extinguisher of an approved type suitable for use on oil fires.

### [Rule 31. Instruction Cards.]

See Rule 14.

### [Rule 32. Installation.]

See Rule 16.

# PUBLIC HEARING

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately vented direct to the outer air.]

## Rule 22. [34.] Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner and the pressure type are prohibited. Systems, fed by

gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 23. [35.] Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### ARTICLE 1. PERMIT.

**Prohibition.** No person shall smoke, or carry a lit cigar or cigarette in any factory as defined in Article 1, Section 2, of the State Labor Law, nor in any portion of a factory, within the City of New York, except in such protected portions or special classes of occupancies as are specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and the lessee or lessees of the building containing such factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall require, a notice of such prohibition, and the penalty for its violation.

**Application.** Application for such permit shall be made only by the owner of the building on suitable forms to be furnished by the fire commissioner.

**Time Limit.** Such permit shall be for a definite period, not exceeding one year, and shall not be renewed after expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

**Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and this permit shall be framed and kept posted in a conspicuous place in the factory.

**Revocation.** Violation of any of the conditions specified in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the same premises until at least one year has elapsed.

## RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;  
Boiler making;  
Brick, terra cotta or artificial stone works;  
Forge shops;  
Foundries;  
Iron, steel, brass or copper works;  
Machine shops;  
Smelting;  
Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed; waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

# RULES

## ENCLOSURE OF FACTORY STAIRWAYS

(410-24-SR)

Supplementary to Labor Law, § 271; originally adopted by the Industrial Commission August 28, 1913, and effective October 1, 1913, amended November 18, 1915; revised and readopted February 10, 1916, effective March 1, 1916; revised and adopted by the Board of Standards and Appeals July 29, 1924.

**Rule 1.**—Except as herein provided, in all factory buildings five stories or less in height, erected prior to October 1, 1913, in which there are more than twenty-five persons employed above the second story, all interior stairways, serving as required means of exit, and the landings, platforms and passageways connected therewith, shall be enclosed on all sides by partitions of fire-resisting material extending continuously from the lowest point of the stairway in accordance with the following schedule:

Number of stories	Contents combustible, no sprinkler	Contents non-combustible, no sprinkler	Contents combustible, and sprinkler	Contents non-combustible, and sprinkler
Three	Stairways Enclosed			
Four	Stairways Enclosed	Stairways Enclosed		
Five	Stairways Enclosed	Stairway Enclosed	Stairways Enclosed	

The term "contents" as used above means articles, goods, wares and merchandise, packed, stored, manufactured or in the process of manufacture.

The term "combustible" as used above means articles, goods, wares or merchandise which will burn or support combustion.

The term "sprinkler" as used above means an adequate automatic sprinkler equipment installed and maintained in good working order on each floor.

The term "story" as used above means that part of a building between any floor and the floor or roof next above;—the first story is that part of a building which is more than 50 per cent above the floor below and the floor next above the curb or average grade level.

Where the stairway extends to the top floor of the building, such partitions shall extend to the under side of the roof boarding. That portion of the under side of the roof beams within the stair enclosure shall be covered with fire resisting material, except in buildings with roofs of non-combustible material, in which case the partitions may stop at the under side of the roof.

Where the stairway is required to extend to the roof, the enclosure shall be so built as to form a bulkhead. The enclosure shall be ventilated by a skylight in the roof with louvres or ventilators, or exterior windows with ventilating sections at the top floor.

All openings in such partitions shall be provided with approved self-closing fire doors, except where such openings are in the exterior wall of the building.

The bottom of the enclosure shall be of fireproof material at least four inches thick unless the partition extends to the cellar bottom.

A horizontal exit, as defined in section 267 of the Labor Law, will be accepted as a compliance with this rule when both sides of the fire wall or walls are occupied on any factory floor by the same occupant.

**Rule 2.**—Where there are occupancies on any story or part of a story involving the storage or use below the top story of the following materials and exceeding the amount specified, and there are more than 5 persons employed at manufacturing above such occupancy.

The interior stairway serving as required means of exit shall be enclosed on that story with fire resisting material from floor to under side of floor above, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors.

Nitrocellulose in any shape or form, 10 lbs.

Volatile inflammable oils, 1 gal.

Volatile inflammable mixtures, 5 gals.

Combustible mixtures, 10 gals.

Paints, varnishes and lacquers, 10 gals.

Upholstering or mattresses, manufacturing or repairing.

Cotton, rag and paper sorting, 1 ton.

Paper box manufacturing.

Restaurants and lunch rooms with cooking (not including tea, coffee or similar beverages).

The Board shall rule upon new occupancies as they arise and pass upon points under dispute.

When more than two stories are to be segregated above, the entire stairway shall be enclosed in fire-resisting material where there are more than 5 persons employed at manufacturing above the first story.

**Rule 3.**—Required Exits and Enclosures of Stairways in Two-story Factory Buildings.

1. Required Exits.—In every two-story factory building erected prior to October 1, 1913, in which more than five persons are employed at manufacturing, there shall be provided from each story at least two means of exit, one of which shall be from each story at least two means of exit, one of which shall be from every floor above or below grade shall lead to an open on an interior stairway which shall be enclosed hereinafter provided, or on an exterior enclosed stairway. The other may lead to such a stairway, or to a horizontal or grade exit, or to an exterior screened stairway, or a fire escape conforming to section 273, Labor Law. Except that exit door shall be a fire door, with substantial steps to the sills properly secured when more than 8 inches above the floor level; and there is no safe egress from the roof, a gooseneck ladder shall be provided from top balcony to the roof.

Unobstructed egress from the foot of the fire escape or exterior screened stairway shall be as required by section 273, Labor Law, or to open adjoining yard or street. No point on any floor of such building shall be more than one hundred and fifty (150) feet distant from such an exit.

**Rule 4.**—Enclosure of Stairways.—In two-story building where there are occupancies on any story or part of a story involving the storage or use below the top story of any of the materials exceeding the amounts specified in Rule 2 and there are more than 5 persons employed at manufacturing above such occupancy, all interior stairways serving as required means of exit shall be enclosed from the lowest point of such stairway to the top of the first floor by partitions of fire-resisting material, unless the building is provided with a wet sprinkler system, in which case such enclosure of stairways shall be required. Such enclosures shall lead directly to an opening outwardly to a street or road, or an open area, forming unobstructed passage to a street or road. All openings in such enclosure shall be provided with fire doors equipped with self-closing devices.

All reference herein to "Enclosure of Stairways" shall be considered as applying only to required stairways.

**Rule 5.**—Storage of Combustible Material Above Stairways.

In all factory buildings no articles or wares of any nature shall be kept or stored inside the limits of the stairway enclosure or unenclosed stairway, or on the landings, platforms or passageways connected therewith.

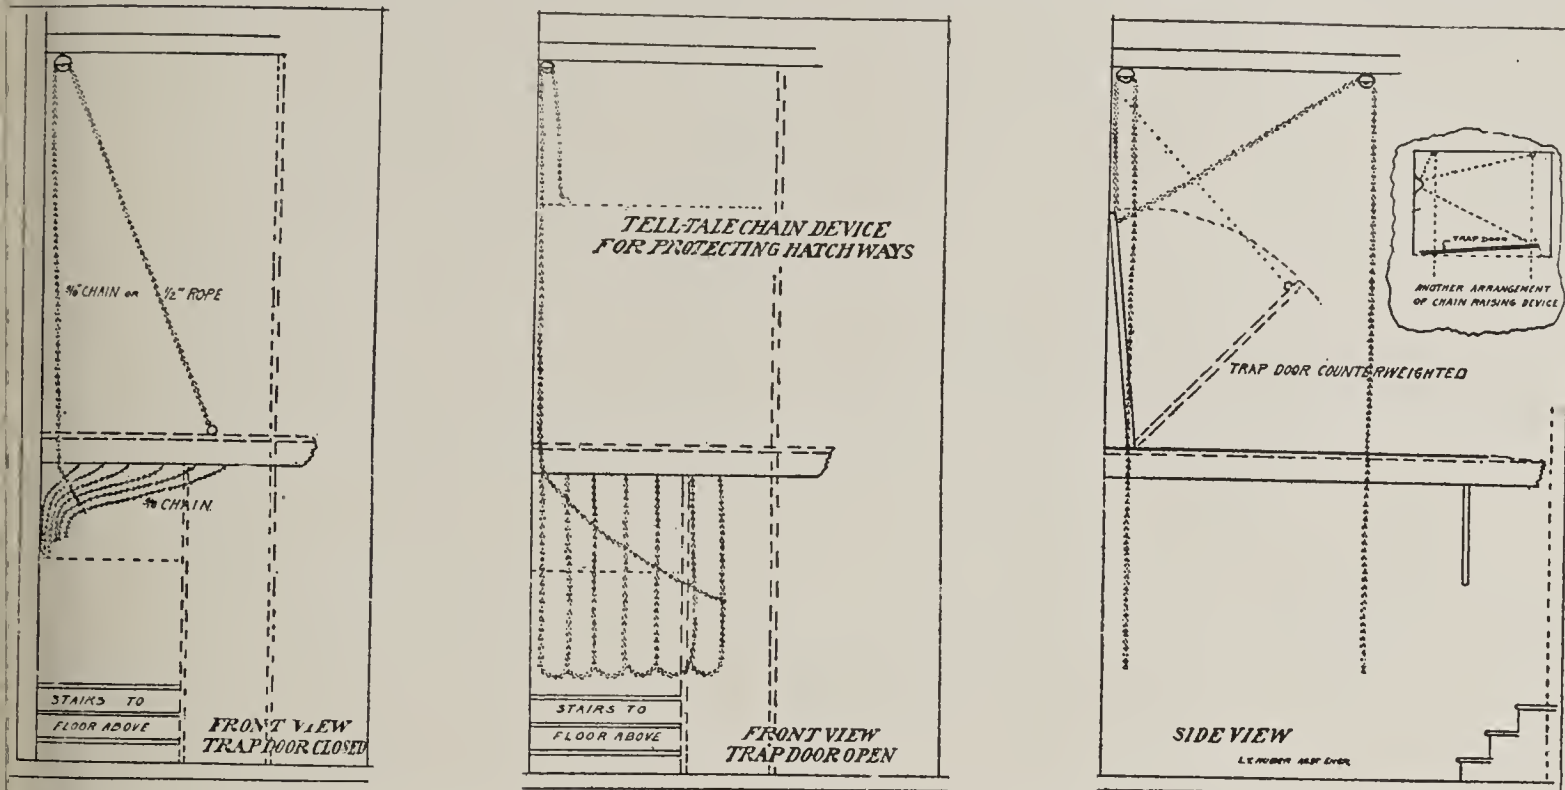

# RULES

## HATCHWAY PROTECTION.

The board of appeals, in acting on Cal. 1690-18-A, adopted resolution in relation to the protection of hoistways over entrance to stairways. This resolution permitted tell-tale chains to be provided instead of the customary bulkhead platform. The accompanying diagram shows the method of operating the tell-tale chains. These chains have links

$\frac{5}{8}$  in. in width and a bar diameter of  $\frac{1}{8}$  in. The normal position of the chains when the trap door is closed is pulled up against the ceiling and side wall. When the trap door is opened, the loop ropes sustaining the chain drop down and the chains form a curtain across the entrance doorway and across the foot of the stairs.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

Adopted Resolution Adopted by the Board of Appeals, March 16, 1920, Under Cal. No. 549-17-BZ.

WHEREAS, the board of appeals, at its regular meeting December 16, 1919, unanimously rescinded an opinion tentatively expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of any definition therein to the contrary.

Resolved, that this shall not be construed to include within the prohibited uses specified under Section 4 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside cylinders not more than 30 in. in diameter by 30 in. in length over all nor more than two 20 in. extractors, the 20 in. measurement being the diameter of the inside basket, which machines and extractors shall be operated solely by electric power and do not require the installation of steam boiler or plant.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

Hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights being the amount of lime which may be incorporated in each ninety-five pound bag of Portland cement.

1-1½-3 Mix, 4 pounds of hydrated lime per bag of cement.

1-2-4 Mix, 5 pounds of hydrated lime per bag of cement.

1-2½-5 Mix, 6 pounds of hydrated lime per bag of cement.

For hand mixed concrete, the hydrated lime and Portland cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete which is to be deposited under water.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

Office—Municipal Building, Rooms 1001 to 1015.

Phone—Worth 0184.

Office Hours—9 a. m. to 5 p. m. Saturdays, 9 a. m. to 2 noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

This issue of the Bulletin contains, in the order given—

ocket.

Call of Clerk's Calendar.

The Trial Calendar.

Notices in Building Zone Cases.

Minutes of Regular Meeting, May 18, 1926, at 10 a. m.

Minutes of Regular Meeting, May 18, 1926, at 2 p. m.

Corrections.

Rules.

Notice of Public Hearing.

Progress Report.

#### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

#### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

#### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, May 25, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 1, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

#### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

TUESDAY MORNING, MAY 18, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.

The minutes of the regular meeting of the board, held Tuesday morning, May 11, 1926, and the minutes of the regular meeting of the board, held Tuesday afternoon, May 11, 1926, were approved as printed in the Bulletin, No. 20, Vol. XI.

### APPEALS FROM ADMINISTRATIVE ORDERS.

96-26-A.

APPELLANT—Samuel Rosenblum, for Lind Lef Realty Corp., owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—109-111 Montgomery street, Brooklyn.

#### APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Laid over to June 1, 1926, at 2 p. m., to produce authorization from building department.

1320-25-A.

APPELLANT—Vulcan Rail & Construction Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—South side of Grand street, 460 ft. west of Garrison avenue (rear building), Maspeth, Borough of Queens.

#### APPEARANCES—

For Appellant: None.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Laid over to June 1, 1926, at 2 p. m., pending inspection by fire department.

224-26-A.

APPELLANT—Warren & Wetmore, for Gould Realty Co., owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—689-691 Fifth avenue and 1 East 54th street, Manhattan.

#### APPEARANCES—

For Appellant: Julian Holland.

ACTION OF BOARD—Laid over to June 1, 1926, at 2 p. m., for amendment.

100-26-A.

APPELLANT—Erna Stein, lessee.

SUBJECT—Appeal from order of superintendent of buildings.

PREMISES AFFECTED—161 West 34th street, Manhattan.

#### APPEARANCES—

For Appellant: Stewart Brown.

For Opposition: W. B. Gibb.

ACTION OF BOARD—Laid over to May 25, 1926, at 10 a. m., on request.

115-23-A.

APPELLANT—George M. Curtis, Jr., for B. & M. Realty Co., owners.

SUBJECT—Application for reopening—modification of resolution—appeal from orders of fire commissioner.

PREMISES AFFECTED—103-111 Humboldt street, Brooklyn.

#### APPEARANCES—

For Appellant: William Blumberg.

ACTION OF BOARD—Laid over to June 1, 1926, at 2 p. m., on request of appellant's representative.

1450-21-A.

APPELLANT—Preferred Utilities Company, for Utility Oil Corporation, owner.

SUBJECT—Application for reopening—amendment appeal from decision of fire commissioner.

PREMISES AFFECTED—Southeast corner of Third and Creek streets, Long Island City, Borough of Queens.

#### APPEARANCES—None.

ACTION OF BOARD—Request to reopen denied.

THE VOTE TO DENY REQUEST TO REOPEN—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

124-26-A.

APPELLANT—Samuel Rosenblum, for Julius Sachs, owner.

SUBJECT—Appeal from orders of fire commissioner.

PREMISES AFFECTED—116 Central Park South, Manhattan.

#### APPEARANCES—None.

ACTION OF BOARD—Appeal withdrawn.

## THE RESOLUTION:

(75-26A)

WHEREAS, Frank S. Parker, for Hygrade Corrugated Products Co., Inc., owner, filed, January 27, 1926, appeal from a decision of the fire commissioner, affecting premises 30-02 to 30-20 48th avenue, 48-02 to 48-26 place, Long Island City, Borough of Queens; and WHEREAS, the decision of the fire commissioner (Applic. 1925), dated December 8, 1925, reads:

"1. A storage garage may not be permitted in the same building where corrugated paper products are manufactured. See Section 151, Chapter 10, Code of Ordinances."

WHEREAS, the building, facing on four streets, is fireproof, three stories in height, 239 ft. 6 in. by 200 ft. in area; OCCUPIED for the manufacture of corrugated paper products; 280 persons above the 1st story; a section of the building (about 36 ft. in area) of the southeasterly part of the building occupied as a garage for five motor trucks; and

WHEREAS, appellant contends that the garage is separated from the rest of the premises by 8 in. brick walls with two openings therein protected by self-closing fire doors, and contends further, that the motor trucks are the property of the appellant of the premises.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the garage use shall be located at the southeasterly corner of building, not exceeding a floor area of 36 ft. by 79 ft., the use of same to be restricted to storage of the automobiles used in conjunction with the operation of the business on the premises, and shall not exceed more than five (5) cars; that the garage area shall be separated from the remainder of the structure by 8 in. of approved masonry, with not more than two openings in the westerly wall thereof, the openings to be protected on both sides with automatic fire doors; that the garage area shall be sprinklered and the entire premises to be protected with a two-source sprinkler system and standpipe; that the gasoline storage installed shall be limited to a single tank of 550 gallon capacity, to be located at the extreme southeasterly corner of garage at the street front of the entire street front of garage portion to be protected with approved fireproof sliding doors, maintained during working hours; that the garage area shall not exceed more than one vertical opening, protected with automatic fireproof trap door. All permits required to be obtained within six months and work completed within one

A.  
APPELLANT—A. Dworzak, for Charlota M. Dressler, owner.

SUBJECT—Appeal from order of fire commissioner. PREMISES AFFECTED—450 West 22nd street, Manhattan.

## APPEARANCES—

For Appellant: A. Dworzak.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition. CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon..... 1

## THE RESOLUTION:

(88-26-A)

WHEREAS, A. Dworzak, for Charlota M. Dressler, owner, January 29, 1926, an appeal from an order of the fire commissioner, affecting premises No. 450 West 22nd street, City of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 10, 1925, reads (Order No. 31940-LC):

"Item No. 2. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 30 pounds per square inch, for all welded tanks, as per Rule 7, Section 1-b of the Fuel Oil Rules.

"Item No. 3. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B Fuel Oil carrying piping, as per Rule 25, Section 2 of the Fuel Oil Rules.

"Item No. 9. Discontinue the use of the Williams Oil-o-matic Burner and pump as separate units.";

and

WHEREAS, the building is non-fireproof, two stories in height, 20 ft. by 40 ft. in area; OCCUPIED as a dwelling; and

WHEREAS, there has been installed an oil burning installation consisting of a 550 gallon storage tank, an approved Viking Oil Pump, a Williams Oil-o-matic Burner and the necessary valves and piping to make a complete installation; and

WHEREAS, appellant contends that the tanks and piping were carefully tested by reputable manufacturers, for which certificates were issued, and appellant contends, further, having personally made other similar tests.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 2 (welded tanks), *on condition* that certificate of factory test shall be filed with the fire commissioner; as to Item 3 (piping), *on condition* that standard wrought iron piping shall be used throughout fuel oil burning equipment; as to Item 9 (burner and pump), *on condition* that the fuel oil installation shall be equipped and operated with an approved burner and an approved pump; and *granted further on condition* that the entire installation otherwise shall comply with the fuel oil rules of the board of standards and appeals.

102-26-A.

APPELLANT—M. Shapiro & Son, for 292 Flatbush Avenue Corp., lessee.

SUBJECT—Appeal from decision of fire commissioner. PREMISES AFFECTED—288-292 Flatbush avenue, Brooklyn.

## APPEARANCES—

For Appellant: Jacob Shapiro.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition. CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(102-26-A)

WHEREAS, M. Shapiro & Sons by Jacob Shapiro, for 292 Flatbush Avenue Corporation, lessee, filed, February 3, 1926, an appeal from a decision of the fire commissioner, affecting premises 288-292 Flatbush avenue, Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered January 21, 1926, N. B. Application No. 1462-1925, reads:

"13. Provide an approved electric fire pump having a capacity of at least 250 gallon per minute, etc., supplied by 25 H. P. electric motor, etc., suctioning from a 5,000 gallon gravity tank, etc., all according to Rule No. 38.";

and

WHEREAS, the building is fireproof, one story in height, 125 ft. by 100 ft. (irregular) in area; OCCUPIED as stores and also as a motion picture theatre, having an auditorium seating 1,446 persons and a roof garden seating 1,100 persons; both in operation at one time; and

# MINUTES

WHEREAS, appellant contends that the building is equipped with a 4 in. standpipe system fed from a 3,500 gallon gravity tank (so elevated that the bottom thereof is 20 ft. above the roof) and also a street main connection; and contends, further, that the city main has a hydrostatic pressure of 45 pounds per square inch and is fed two ways.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the installation of the suction tank and a fire pump, *on condition* that the standpipe equipment shall be installed in accordance with the rules of the board of standards and appeals in all other respects; and that the use and occupancy of the premises shall be restricted to the conduct of moving picture display only.

117-26-A.

APPELLANT—Russell Grant Howe, for Ruth Leslie Howe, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—9523 Shore road, Brooklyn.

APPEARANCES—

For Appellant: Russell Grant Howe.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative	0
Absent	0

THE RESOLUTION:

(117-26-A)

WHEREAS, Russell Grant Howe, for Mrs. Ruth Leslie Howe, owner, filed, February 11, 1926, an appeal from an order of the fire commissioner, affecting premises 9523 Shore road, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 12, 1925, Order No. 99215-LC, reads:

"1. Remove the auxiliary supply tanks or storage tank that is located within ten feet of any fire or flame, as per Rule 22-B of the Fuel Oil Rules.

"2. Properly support auxiliary tank on metal frame or cradle and secure tank by two inches by one and one-eighth inches metal straps, riveted or bolted to frame and securely fastened to the wall of the building by metal braces, as per Rule 22-C of the Fuel Oil Rules.

"3. Remove receiver terminal of fill pipe to fuel oil storage tank as remote as practicable from building openings, as per Rule 8, Section 5-A of the Fuel Oil Rules.

"4. Provide a tight metal box with means for locking at delivery terminal of fuel oil fill pipe, as per Rule 8, Section 5-B of the Fuel Oil Rules.

"5. Provide a hydrostatic test of not less than one pound per square inch for all Grade B fuel oil carrying piping, as per Rule 25, Section 2 of the Fuel Oil Rules.

"10. Make door on boiler self-closing, as per resolution of the Board of Standards and Appeals (Cal. 161-25-A).

"11. Disconnect overflow pipe from auxiliary tank vent pipe and provide a separate vent for auxiliary tank as per approved plan 1000-21.

"12. Provide a factory test of oil storage tank. Report of factory test must state that hydrostatic test as per requirements of Rule 21 of the Board of Standards and Appeals has been made."

and

WHEREAS, the building is of frame construction, 2½ stories in height, 23 ft. by 40 ft. in area; OCCUPIED as a private residence, the owner having installed a fuel oil burning

system, known as the Nokol system, prior to 1922, Grade "B" oil; and

WHEREAS, the appellant contends, with regard to Items 5, 11 and 12, that, at the time of installation, these conditions were in accordance with the rules in force; re: Item 1, this is not a boiler but a hot water heater; re: Item 4, that the filling pipe is for temporary use until the walk is permanently established; re: Item 2, this was complied with.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 1, *on condition* that the ceiling boiler shall be fire retarded in accordance with the oil rules now in force; as to Item 2, *on condition* that the auxiliary tank shall be supported on a metal frame, secured to the floor; as to Item 3, *on condition* that the fill pipe shall be permanently fixed when the public grade and pavement is permanently established; as to Item 4, *on condition* that the metal box for locking terminal shall be installed on completion and finish of the highway; as to Item 5, *on condition* that the fuel oil installation shall be equipped throughout with standard wrought iron pipe; as to Item 10, *on condition* that the ceiling immediately above the boiler shall be fire retarded in accordance with the rules of the board of standards and appeals; as to Item 12, *on condition* that a certificate of factory test shall be filed with the fire commissioner; *denied*, Item 11; and the appeal is *further granted on condition* that the installation shall otherwise comply with the rules of the board of standards and appeals.

121-26-A.

APPELLANT—Henry A. Koelble, for 52nd Street Realty Corporation, owner.

SUBJECT—Appeal from decision of fire commissioner.

PREMISES AFFECTED—322-332 West 52nd Street, Manhattan.

APPEARANCES—

For Appellant: Louis Frisse.

For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative	0
Absent	0

THE RESOLUTION:

(121-26-A)

WHEREAS, Henry A. Koelble, for 52nd Street Realty Corporation, owner, filed, February 11, 1926, an appeal from a decision of the fire commissioner, affecting premises No. 322-332 West 52nd street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated February 6, 1926, reads (N. B. Applic. No. 215-26):

"No. 2. Provide a tank of at least 3500 gallon reserve 20 ft. above the roof, etc., all according to Rule No. 12."

and

WHEREAS, the building is fireproof, three stories in height, 133 ft. 8 in. by 100 ft. 5 in. (approximately 13,380 sq. ft.) in area; OCCUPIED as post office, 230 ft. above the 1st story; and

WHEREAS, appellant contends that the height of the building is but 7 ft. above the limiting height required for a gravity tank; that the occupancy of the premises is of a hazardous nature and proposes to supply the standpipe system by means of a 4 in. connection to the city main, contending that the city main is fed two ways and the average hydrostatic pressure in same is 37 pounds;

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the installation of

# MINUTES

, on condition that a static pressure of not less than 25  
ds shall be maintained at the outlet on top story; and  
ted so long as present occupancy and use shall remain  
anged and that the building shall be not increased in  
ht or area.

26-A.  
PELLANT—James Kearney, for Brusstar Construc-  
tion Co., owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—Northeast corner of Spof-  
ford avenue and Edgewater road, The Bronx.

APPEARANCES—

For Appellant: James Kearney.

For Administration: Inspector Carroll of fire  
department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Absent ..... 0

THE RESOLUTION:

(287-26-A)

WHEREAS, James Kearney, for Brusstar Const. Co., owner,  
April 5, 1926, an appeal from decision of the fire  
commissioner, affecting premises northeast corner of Spof-  
ford avenue and Edgewater road, The Bronx; and

WHEREAS, the decision of the fire commissioner, dated  
h 22, 1926, reads:

"App. 1403-1925—

"The proposed method of installing a standpipe sys-  
tem at the above premises is not in accordance with  
Rule 37 of the Standpipe Rules.";

WHEREAS, the premises consist of a large plot of ground,  
ing 451 ft. along the Bronx River bulkhead line by  
t. in depth; containing a boiler, drying and melting  
two asphalt tanks, each 60,000 gallons capacity; a fuel  
tank of 40,000 gallons capacity; OCCUPIED and used  
in connection with road construction and maintenance busi-  
ness and

WHEREAS, the appellant proposes to erect two hydrants  
t. apart on the premises, and he contends that there  
are two existing hydrants on the street; also that while  
the land is 210,000 sq. ft. in area, only 25,000 sq. ft. is used  
for other purposes, the rest is vacant and for sale.

Resolved, that the decision of the fire commissioner be  
hereby is *modified*, and the appeal be and it hereby  
is *granted* on condition that the asphalt plant shall be re-  
located to an area not exceeding 164 ft. in width and 250  
ft. in depth; and that these premises shall be equipped with  
not less than two fire hydrants, with direct 4 in. connection  
with main.

5-A.  
PELLANT—Croker National Fire Prevention Engi-  
neering Co., for Iron Clad Real Estate Cor-  
poration, owner.

## THE RESOLUTION:

(1129-25-A)

WHEREAS, Croker National Fire Prevention Engineering  
Co., for Iron Clad Real Estate Corp., owner, filed, Novem-  
ber 4, 1925, an appeal from orders of the fire commissioner,  
affecting premises No. 178-80 Cook street and 929-31 Flush-  
ing avenue, Borough of Brooklyn; and

WHEREAS, the orders of the fire commissioner, dated July  
15, 1925, read (Order No. 81388-F and Order No. 81386-  
F):

"1. Provide iron shutters at all openings in the ex-  
terior wall above 1st story which are distant in a di-  
rect line less than 30 ft. from any opening in any other  
building and not in the same plane with said openings  
and which are not more than 50 ft. above a neigh-  
boring roof at east and west sides of the building,  
\* \* \*";

and

WHEREAS, the building is non-fireproof, five stories in  
height, 216 ft. by 50 ft. (irregular) in area; OCCUPIED  
as a tenant factory, 275 persons above the 1st story; and

WHEREAS, there are 25 openings on each story above the  
1st story, in the westerly wall of the building within 30  
ft. of openings in or within 50 ft. of the roofs of neigh-  
boring buildings to the west and 11 openings on each story  
above the 1st story in the easterly wall of the building  
within 50 ft. of the roof of a neighboring building to the  
east on Flushing avenue, and also four windows on each  
story above the 1st story, within 30 ft. of openings in a four-  
story neighboring building to the east on Cook street; and

WHEREAS, appellant contends that the windows in the  
two-story building forming the exposure to the west are  
protected by metal frames and wire glass; that the win-  
dows above the roof of the one-story building to the east  
are protected with iron shutters and that all windows along  
the fire escape have fireproof windows and doors; that  
the windows in the four-story building to the east, on Cook  
street, are protected with metal frames and wire glass, and  
applicant proposes to provide iron shutters on the windows  
along the course of the elevator and stairway at the south-  
east corner of the building.

Resolved, that the orders of the fire commissioner be and  
they hereby are *modified*, and the appeal be and it hereby is  
*granted*, only so far as it affects windows not on course  
of fire escapes, stairhalls or open shafts, on condition that  
adjoining exposures as now protected shall remain sub-  
stantially unchanged; and that the present occupancy and  
use of these premises shall remain substantially unchanged.

71-26-A.

APPELLANT—Cornell Utilities Co., Inc., for Charles  
Hall, Inc., owner.

SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—3 East 40th street, Man-  
hattan.

APPEARANCES—

For Appellant: William Porter.

For Administration: Inspector Carroll of fire  
department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commission-  
ers Connell, Holland and Guilfoyle and  
Chief Kenlon .....

Negative ..... 5

Absent ..... 0

## THE RESOLUTION:

(71-26-A)

WHEREAS, William Porter, for Charles Hall, Inc., owner,  
filed, January 26, 1926, an appeal from a decision of the fire  
commissioner, affecting premises No. 3 East 40th street, Bor-  
ough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated  
January 6, 1926, reads (Alt. Applic. No. 1954-25):

# MINUTES

"5. The use of Grade B Fuel Oil is not permitted in commercial plants and residences of more than two families unless the room in which equipment is used is cut off from the rest of the building by fireproof partitions, ceilings and floors. Such rooms must also have direct entrance from street only and be adequately vented to the outer air.";

and

WHEREAS, the building is non-fireproof, five stories in height, 27.6 ft. by 90 ft. in area; OCCUPIED for the storage of glassware, 7 persons in entire building; and

WHEREAS, a fuel oil burning system has been installed, consisting of a 1,065 gallon tank for the storage of grade "B" fuel oil, a 55 gallon auxiliary tank, and approved No-Kol Automatic Burner and the necessary pipes and valves to make a complete installation; and

WHEREAS, appellant contends that the boiler room—situated at the rear of the basement—is separated from the rest of the basement by fireproof walls, having therein one opening protected by a self-closing fireproof door, and that the ceiling of the boiler room is fire retarded by  $\frac{3}{4}$  in. Portland cement plaster on metal lath; the remainder of the casement—containing the auxiliary tank, pump and piping—being unprotected; appellant contending that it would be a hardship if compelled to fireproof this portion of the premises.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects the ventilation of boiler room, on condition that same shall be vented to outer air by galvanized iron duct of not less than 12 in. by 18 in. in area; and that the fuel oil equipment shall comply with the fuel oil rules in all other respects.

110-26-A.

APPELLANT—Standard Oil Company of New York, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—14-28 Tenth street, Long Island City, Borough of Queens.

APPEARANCES—

For Appellant: Percy J. King and Chas. E. Wissig.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(110-26-A)

WHEREAS, Standard Oil Company of New York, owner, filed, February 8, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 14-28 10th street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated January 7, 1926, reads (Order No. 1105-LC):

"You are hereby notified that an inspection of the above premises used for the storage of paints shows that the following must be done before the permit requested by you can be issued:

FORTHWITH

"1. Provide an approved buried storage system for storing and handling all volatile inflammable liquids (alcohol). Sec. 10, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, three stories in height, 134 ft. 8 in. by 101 ft. in area; OCCUPIED as a paint works; 1st story, 12 persons; 2nd story, 12 persons; 3rd story, 5 persons; and

WHEREAS, at the northeast corner of the basement story there is a fireproof vault having one opening therein, pro-

tected with a metal clad sliding door, used for the storage of alcohol; and

WHEREAS, appellant contends that the alcohol—250 gallons—is stored in 14 gauge steel drums kept in the vault that only one drum is removed at one time and the entire contents used in the material manufactured; that alcohol is not used in small quantities, and contends, further, that there is less hazard in this method of handling the alcohol than by pumping it through a system of lines.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that not more than five (5) barrels of 50 gallons capacity each shall be maintained on the premises, stored in a fireproof vault in basement, with not more than one opening thereto, protected with metal-clad, self-closing fireproof sliding door.

## THE RESOLUTION:

(94-26-BZ)

WHEREAS, William F. Doyle, for Benj. Sobol, owner, February 1, 1926, an application, under the building resolution, to permit in a business district the extension and enlargement of an existing gasoline service station premises southwest corner of East 149th street and Prospect Avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application before the board of standards and appeals, at its regular meeting, May 18, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 149th street, Prospect Avenue and Southern boulevard are all in business districts;

WHEREAS, the decision of the fire commissioner, rendered May 27, 1926, reads:

"1. The extension of a gasoline service system beyond that previously permitted as such may not be permitted in a business district. Appeal may be taken to the Board of Appeals. \* \* \*";

WHEREAS, the premises consists of a plot of ground with a frontage of 80.44 ft. and a depth of 91 ft., upon which is proposed to install six gasoline tanks and pumps and a one-story building for a gasoline service station, located in conjunction with the existing station on the corner of Southern boulevard and East 149th street; and

WHEREAS, the board deemed that applicant was entitled to relief under section 7-a of the building zone resolution and also under section 21 on the ground of practical difficulties and unnecessary hardship.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it permits the extension on Southern boulevard, 80.44 ft. at street front and 50 ft. at the rear and a depth of 91 ft. on condition that no additional gasoline storage tanks be installed and that the premises shall be used in conjunction with the existing and abutting gasoline selling

station on the corner formed by the intersection of Southern boulevard and East 149th street; that all permits required shall be obtained within six months and any work entailed thereby shall be completed within one year from the date of this action.

## THE RESOLUTION:

(82-26-BZ)

WHEREAS, John J. Dunnigan, for Edmund Francis Realty Company, owner, filed, January 28, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a proposed extension to a garage for the storage of more than five motor vehicles; premises 1568 Southern boulevard, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 18, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Southern boulevard is in business district, and that Hoe avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered January 8, 1926, reads:

"1. Proposed extension of public garage in business district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the existing one-story non-fireproof garage 50 ft. by 100 ft. in area; it is proposed to erect to the north a one-story non-fireproof extension, 42.65 ft. by 100 ft. (regular) in area; to remove the north wall of the existing garage and use the entire premises as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7c and 7e of the building zone resolution, and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals do hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building be restricted in height to a one-story structure above grade; that the northerly gable and rear walls shall be unpierced throughout their entire height and length; that the front elevation of the proposed extension shall be finished, as to material and design, the same as the existing abutting structure; that all permits necessary for the production of the work shall be obtained within six months and all work required thereunder completed within one year from the date of this action.

## THE RESOLUTION:

(107-26-BZ)

WHEREAS, William F. Doyle, for Harry Pivnick Construction Company, owner, filed, February 6, 1926, an application, under the building zone resolution, to permit in business district the change of occupancy of a portion of a building from a conforming use to a public garage use; premises 1009-15 Liberty avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 18, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Liberty avenue is in a business district, and that Hill street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings rendered June 24, 1925, reads:

# MINUTES

"You will please take notice that there exists a violation of the Building Code at the premises hereinafter described, in that

"Plans and permit as approved by this Bureau not complied with. Partition of wood studs, plaster boards and plaster both sides at northeast end of building to form storage of auto accessories and to divide building between unrestricted and business zone as shown on approved plan, has been removed and does not now exist. In violation of Art. I, Sec. 4, of the Building Code.

"You are required to replace partition as shown on original plans or show cause why application should not be made for revocation of certificate of occupancy and building vacated according to law."

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 97 ft. 1½ and a depth of 100 ft.; to be occupied as a garage for storage of more than five motor vehicles; and

WHEREAS, this application affects only a triangular gore at the rear of the structure, 25 ft. by 40 ft.; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7c of the building zone resolution, and also that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict provisions of the zoning resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district provisions of the building zone resolution, and that the decision be and it hereby is granted on condition that the side and gable walls of the portion of this property under consideration shall be unpierced throughout their entire height and that this portion shall be used, maintained and conducted in conjunction with the remainder of the structure under the permit and certificate of occupancy of which is now in force; that any permits otherwise required shall be obtained within ninety days from the date of this resolution.

THE RESOLUTION:

(185-26-BZ)

WHEREAS, Stoddard and Mark, for Society for the Propagation of the Faith, owner, filed, March 4, 1926, an appli-

cation, under the building zone resolution, to permit in a residence district the alteration and change of occupancy in part from residence to business use; premises 109 East 38th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 18, 1926, after due notice by publication in Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 38th street, East 39th street and Park avenue are all in residence districts;

WHEREAS, the decision of the superintendent of buildings rendered February 1, 1926, reads:

"Proposed use of building for business purposes in a residence district is contrary to Art. 2, Building Zone Resolution."

and

WHEREAS, the existing building is of non-fireproof construction, four stories and basement in height, with a frontage of 25 ft. and a depth of 95 ft.; to be occupied as offices and living quarters; and

WHEREAS, article II, section 3 of the building zone resolution, provides that a building in a residence district may be used for one or more of the uses specified therein;

WHEREAS, subdivision 1 of said section 3 provides for dwelling use in a residence district, and subdivision 5 of said section 3 provides for use of a building in a residence district for "philanthropic or eleemosynary uses or institutions, other than correctional institutions"; and

WHEREAS, this board deems that applicant is entitled to the use requested under the specific provisions of article II, section 3 of the building zone resolution, and that there is no cause for action by this board except that it is required to decide all appeals from the decisions of administrative officials, and the superintendent of buildings, having original jurisdiction in this case, has raised the question of use.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *reversed*, and that the application be and it hereby is *granted*, permitting the occupancy of entire premises, restricted to dwelling and the private office of the executive administrators of this society, the office to be confined to the basement story, on condition that no sign of any nature or description shall be displayed on the premises, other than a flat metal sign, not exceeding 6 in. by 14 in., affixed to the rail of the main entrance door.

## THE RESOLUTION:

(3-26-A)

WHEREAS, Isidore Henigstein and Pearl Reis, owners, filed, January 2, 1926, an appeal from an order of the fire commissioner, affecting premises No. 1512 Plimpton avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated December 10, 1925, reads (Order No. 31945-LC):

"Referring to your application for permit to maintain a garage in the tenement house at 1512 Plimpton Avenue, Bronx, you are hereby notified that such permit cannot be granted for the reason that Section 154, Chapter 10, Code of Ordinances, forbids the maintenance of a garage in a tenement house.

"You are therefore hereby ordered to:

"1. Remove from the tenement house all motor vehicles, the fuel tanks of which are not empty.";

and

WHEREAS, the building is non-fireproof, having a frontage of 20 ft., a depth of 81 ft. 4 in. and 25 ft. wide at the rear; OCCUPIED as a dwelling for four tenants and the rear portion of the cellar as a garage for three automobiles, the property of tenants of the premises; and

WHEREAS, appellant contends that a certificate of occupancy for the above stated use was issued by the bureau of buildings; that the property was purchased with the understanding that the premises could be used in this manner, and contends further that the garage portion of the premises is separated from the rest of the building by 8 in. brick walls and a 4 in. concrete ceiling.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

764-25-A.

APPELLANT—George Keister, for Earl Carroll Realty Corp., owner.

SUBJECT—Appeal from order of superintendent of buildings and order of fire commissioner.

PREMISES AFFECTED—158-166 West 50th street and 753-759 Seventh avenue, Manhattan.

## APPEARANCES—

For Appellant: John J. Munro.  
For Administration: Inspector Carroll of fire department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Absent ..... 0

## THE RESOLUTION:

(764-25-A)

WHEREAS, Geo. Keister, for Earl Carroll Realty Corp., owner, filed appeals July 22 and July 28, 1925, with the

# MINUTES

board of appeals, from orders of the superintendent of buildings and fire commissioner, affecting premises 158-166 West 50th street and 753-9 Seventh avenue, Manhattan; and

WHEREAS, the order of the superintendent of buildings, dated June 29, 1925, reads:

"The walls and ceiling of auditorium are covered with draperies. You are hereby ordered to remove all such draperies forthwith.";

and the order of the fire commissioner, dated July 10, 1925, reads:

"Remove portable chairs and tables and equipment from front of orchestra, as same is a violation of Certificate of Occupancy No. 4934, issued June 28th, 1922, by the Bureau of Buildings.";

and the orders of the fire commissioner, dated July 27, 1925, read:

"You are hereby ordered and required forthwith from date of the service of this order to guard and protect the occupants of the theatre during performances from fire or panic by

"1. Removing all flimsy draperies and hangings in the auditorium of the theatre.

"2. Removing tables and individual chairs from orchestra floor of auditorium.

"3. Removing and discontinuing the use of two large gates which, during each performance, are swung out in the auditorium from the stage, thereby obstructing the path of the asbestos curtain.

"4. Discontinuing the practice of obstructing the orchestra aisles by permitting chorus girls to carry therein a cord or rope arranged so as to present an endless chain of flowers.

"5. Discontinuing the distribution, during each performance, of bottles to occupants of the auditorium, as the empty bottles placed on the floor of aisles and passageways constitute obstructions.

"The existence of the conditions enumerated above render it impossible for the members of the Uniformed Force, detailed to the theatre, to properly protect the occupants against fire or panic during performances, as required by Section 8, Article 1, Chapter 3, Code of Ordinances.";

and

WHEREAS, the building is fireproof, consisting of three sections, six, two and four stories in height, 100 ft. 5 in. by 160 ft. in area. OCCUPIED in the six-story portion: 1st story, stores, Seventh avenue entrance and lobby to theatre, offices above; the two-story portion, 1st story, theatre, 656 seats; 2nd story (balcony), 378 seats; the four-story portion, stores and rooms accessory use to the theatre; and

WHEREAS, the appellant claims, in re: Order 2957-1925 of superintendent of buildings, and Item 1, Order 45-A of fire commissioner, that the draperies are fireproofed and files a letter of certification; re: Order 43-A, and Item 2 of Order 45-A of fire commissioner, appellant claims the tables and chairs are now properly secured to the floor and files a copy of letter from superintendent of buildings accepting this condition; re: Order 45-A of fire commissioner, Item 3, appellant claims that the gates can be swung clear of the path of asbestos curtain within four seconds; that, re: Item 4, the cord is light material, is not an endless chain and would not hinder exit; as to Item 5, that have complied with that part of the order; and further contends there is no jeopardy involved in the alleged violations, and requests a hearing.

Resolved, that the orders of the fire commissioner and superintendent of buildings be and they hereby are affirmed, and the appeal be and it hereby is denied.

1204-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for S. Danziger, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—87-93 Columbia street, Brooklyn.

## APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Maher of department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

## THE RESOLUTION:

(1204-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for S. Danziger, owner, filed, November 20, 1925, appeal from an order of the fire commissioner, affecting premises Nos. 87-93 Columbia street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 5, 1925, reads (Order No. 84064-F):

"1. Install a standpipe system with risers 4 in. diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire Department outlets on each story (including basement cellars and roofs), placed within main stairway enclosure.

"Such standpipe shall be kept constantly filled with water by means of an approved tank or pump supply and be ready for use at all times.";

and

WHEREAS, the building is non-fireproof, one story height, having a frontage of 316 ft. on Baltic street and frontage of 100 ft. on Columbia street; OCCUPIED as a public garage, 2 persons; and

WHEREAS, appellant contends that the premises are equipped with a 2½ in. standpipe system, with five 2½ in. outlets, each equipped with 50 ft. of 2½ in. hose; that the system is directly connected by a 2½ in. pipe to the city main in Baltic street; that said city main has a 45 pounds per sq. in. hydrostatic pressure, and that it is fed two ways; and appellant proposes to add an additional 50 ft. of 2½ in. hose at each outlet.

Resolved, that the order of the fire commissioner, No. 84064-F, be and it hereby is modified, and the appeal be and it hereby is granted on condition that a standpipe system with a 4 in. connection to the city main, shall be installed and that the outlets shall be equipped with not less than 100 ft. of hose; all outlets and risers to be installed as indicated on plans filed with this appeal.

841-25-A.

APPELLANT—Samuel Rosenblum, for Frederick Hussey Realty Co., owner.

SUBJECT—Appeal from decision of fire commissioner. PREMISES AFFECTED—449-459 7th avenue, 163-165 West 34th street and 160-166 West 35th street, Manhattan.

## APPEARANCES—

For Appellant: Samuel Rosenblum and H. Mitler.

For Administration: Inspector Maher of department.

ACTION OF BOARD—Appeal denied.

## THE VOTE TO GRANT—

Affirmative: Chairman Walsh, Commissioners Connell and Holland .....

Negative: Commissioner Guilfoyle and Chief Kenlon .....

Absent .....

## THE RESOLUTION:

(841-25-A)

WHEREAS, George and Edward Blum, for Frederick Hussey Realty Company, owner, filed, August 18, 1925,

# MINUTES

appeal from a decision of the fire commissioner, affecting premises 449-459 Seventh avenue, 163-167 West 34th street and 160-166 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, rendered June 12, 1925, reads:

"2. A building fronting on more than one street shall have at least one riser for each street front, as per Rule No. 24, of the Rules of the Board of Standards and Appeals, adopted June 27th, 1922, amended July 20th, 1923, and Chapter 581, Article 28, Paragraph 3, of the Code of Ordinances."

WHEREAS, the building is fireproof, 16 stories in height, fronting 100 ft. 5 in. on Seventh avenue, 66 ft. on West 34th street and 72 ft. on West 35th street; about 19,279 sq. ft. in area. OCCUPIED: Offices; 25 per cent for manufacturing purposes; about 160 persons on each story;

WHEREAS, this appeal was denied by the board at its meeting December 1, 1925, and appellants, through their representative, Samuel Rosenblum, requested a reopening of the case, which request was granted by vote of the board; and

WHEREAS, it is now contended that the building is equipped with two standpipes, one in the stairway enclosure and one in the corridor near the elevators, and appellant contends that there would be hardship in making the owner move this standpipe as its present location was due to the stairs being formerly designed for this location and changed on objection by building department, and contends, further, that the area of the building is less than 20,000 sq. ft.

Resolved, that the order of the fire commissioner be and it hereby is affirmed, and the appeal be and it hereby is denied.

1569-22-A.

APPELLANT—Richard Croker, Jr., owner.

SUBJECT—Application for reopening—extension of time—appeal from order of fire commissioner. PREMISES AFFECTED—535-545 East 79th street, Manhattan.

APPEARANCES—

For Appellant: Richard Croker, Jr.

ACTION OF BOARD—Appeal reopened and time extended.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(1569-22-A)

WHEREAS, Richard Croker, Jr., owner, filed, December 2, 1922, an appeal, with the board of appeals, from an order of the fire commissioner, affecting premises 535-45 East 79th street, Manhattan; and

WHEREAS, the order of the fire commissioner reads:

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances, adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

WHEREAS, the building is fireproof, eight stories (95 ft.) in height, 148 ft. by 102 ft. 2 in. in area; OCCUPIED as a tenement factory, with a total of 223 persons at present in the building, the 4th story being vacant; and

WHEREAS, appellant contends that the building is equipped with a standpipe, for which a new tank has recently been installed; that there is a fire alarm signal system and watchman service; that the building is isolated and has an ap-

proved safe occupancy of 92 persons per story, and that there has been no new fire hazard introduced into premises in the last four (4) years; and

WHEREAS, this appeal was granted by the board at its meeting March 9, 1923, and May 5, 1925, on certain conditions, and appellant requested a modification of the time limit.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted, holding the order in abeyance, in so far as it relates to the 3rd floor, until December 31, 1923, and in so far as it relates to the other floors with woodworking occupancy, until December 31, 1926, on condition that the present standpipe, fire equipment, and fire alarm system with watchman patrol service, as well as the fire drill regulations, be maintained; and on further condition that the open gas jet on 3rd floor be enclosed with a metal screen not less than 5 ft. in height and 3 ft. in diameter.

339-25-A.

APPELLANT—Thomas W. White, for Sinclair Refining Company, owners.

SUBJECT—Application for reopening—modification—appeal from decision of fire commissioner.

PREMISES AFFECTED—West side of Kemble avenue, 1,352 ft. 3½ in. south of Mill Basin, Brooklyn.

APPEARANCES—

For Appellant: Thomas W. White.

ACTION OF BOARD—Appeal reopened and resolution modified.

THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Not Voting: Chief Kenlon..... 1  
Absent ..... 0

THE RESOLUTION:

(339-25-A)

WHEREAS, Joseph L. Burke, for Atlantic Gulf & Pacific Company, owner, filed, March 28, 1925, an appeal with the board of appeals from a decision of the fire commissioner, affecting premises west side of Kemble avenue, 1,352 ft. 3½ in. south of Mill Basin, Brooklyn; and

WHEREAS, the decision of the fire commissioner, rendered March 25, 1925, in acting on N. B. Application No. 527-25, reads:

"1. All tanks must be buried 2 ft. 0 in. below grade and encased in 12 in. of stone concrete."

WHEREAS, the premises consist of a plot of ground having a frontage of 200 ft. on Mill Basin, a frontage of 95 ft. on Kemble avenue and a depth of 520 ft., upon which is located the plant of the Sinclair Refining Co., consisting of three 50,000 gallon and four 25,000 gallon tanks of gasoline; one 25,000 gallon tank for heating oil, one 25,000 gallon tank for kerosene and six 15,000 gallon tanks for miscellaneous storage; the tanks are built on piles; the bottom of the tanks being located at grade; and also three 4,200 gallon gravity filling tanks, and pump and motor room and other buildings necessary for the handling of the oils; and

WHEREAS, appellant contends that it will be impossible to bury the tanks for the reason that the ground is at tidewater level and that the cost of the pumping incidental to the extensive excavation would make the project commercially prohibitive, and proposes to construct a dike, of sufficient capacity, around all storage tanks.

Cal. No. 339-25-A.

June 1st, 1925.

PREMISES: W. S. Kemble Ave., 1352 ft. 3½ in. So. of Mill Basin, Brooklyn.

REPORT OF COMMITTEE:

On June 1st, a Committee of the Board, consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Hol-

# MINUTES

land and Connell, visited the premises under appeal, from an order of the Fire Commissioner, as to the burial of the proposed oil tanks.

The property designated in the appeal, running from Kemble Avenue to Mill Basin, immediately abuts the premises of the Gulf Refining Company, which was reviewed and granted by the Board under Cal. No. 16-20-A; the entire plot is cinder filled and the grade level is approximately 4 or 5 ft. above high water; the adjoining property to the west is a ship yard, neither very extensive nor particularly active at this time; the next nearest structure is the National Lead Works plant, which is located 1300 or 1400 ft. in a northerly direction, being reinforced concrete structures.

The Committee recommends the favorable consideration of this oil storage plant *on condition* that all tanks of 50,000 gallon capacity, maintained for gasoline storage, shall be separately enclosed in reinforced concrete walls, with a reservoir of sufficient capacity to contain at least one and one-half times the contents of the tank and in no instance shall the storage of any tank or battery of tanks for the storage of gasoline exceed 50,000 gallons unless enclosed separately; that all tanks shall be separately equipped and provided with recognized liquid fire extinguishing mediums, and that each tank shall be equipped at the top with perforated metal aprons or scuppers and revolving distributing nozzle; the valve and pump house and fire extinguishing agencies to be located at the front of the property directly on the public highway and that necessary and efficient frost proof hydrants shall be connected to the City water mains, running from the string piece or bulkhead to the public highway on Kemble Avenue. A return of the proposed mechanical and structural layout shall be submitted to this board for consideration and approval in accordance with the foregoing recommendations.

(Signed) WILLIAM E. WALSH,  
JAMES P. HOLLAND,  
JOHN KENLON (not voting),  
HENRY L. CONNELL.

In my opinion this report provides all necessary safeguards.

JOHN KENLON.

and

WHEREAS, this appeal was granted by the board at its meeting June 9, 1925, on certain conditions, and under date of July 28, 1925, the board approved plans submitted in accordance with the terms of the resolution, and appellant now requests a modification of the resolution and of the plans to permit a relocation of certain buildings, and the acceptance of a liquid fire extinguishing system as proposed.

*Resolved*, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the proposed plant shall be equipped and the oil storage tanks installed in accordance with the conditions imposed in the report of the committee of inspection and in drawing of plant and specification of liquid fire extinguishing equipment submitted May 18, 1926.

512-24-A.

APPELLANT—John S. Landes, for Allwell Development Co., Inc., owner.

SUBJECT—Application for reopening—modification—appeal from decision of superintendent of buildings.

APPEARANCES—

For Appellant: John S. Landes.

ACTION OF BOARD—Appeal reopened and resolution modified.

## THE VOTE TO REOPEN AND MODIFY—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

## THE RESOLUTION:

(512-24-A)

WHEREAS, Joseph J. Reiher, for Allwell Development Co., Inc., owner, filed, April 10, 1924, an appeal, with the board of appeals, from a decision of the superintendent of buildings, affecting premises 525-551 Surf avenue, Borough of Brooklyn; and

WHEREAS, the decision of the superintendent of buildings, rendered April 3, 1924, in acting on Application No. 13162-23, reads:

"1. Application denied—non-fireproof public building (Dance Hall) with floor areas in excess of 5000 sq. ft. contrary to sect. 72, subdivision 6.";

and

WHEREAS, the building is non-fireproof, two stories in height, 142 ft. by an average depth of 82 ft. in area. Proposed Occupancy: 1st story, stores and restaurant; 2nd story, banquet hall and dance hall; and

WHEREAS, appellant contends that the dance hall is 5,400 sq. ft. in area and only 8 per cent in excess of the provisions of section 72 of the building code; and

WHEREAS, this appeal was granted by the board at its meeting June 27, 1924, on certain conditions, and appellant requested a modification of these conditions, which was granted July 29, 1924, and now requests a further modification.

*Resolved*, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the ceiling of the 1st story shall be covered with 26 gauge metal; that the 2nd floor be subdivided by a brick wall from front to rear; any opening therein to be equipped with self-closing fireproof doors; that not less than three exits leading directly to ground level shall be provided from the easterly area on the 2nd story; that the main stairway shall be located and maintained at brick wall dividing building and enclosed in partitions fire retarded throughout in accordance with the rules of the board of standards and appeals; that no doorway to this stairway shall be direct opposite any other doorway; that the door openings in main stairs shall be equipped with self-closing fireproof doors; that the opening in the brick wall on western side of main stairs, 2nd story, shall be equipped on both side with approved fire doors; that all other municipal requirements be complied with; and that required permit be obtained within thirty days.

## BUILDING ZONE CASES.

THE RESOLUTION:

(1316-25-BZ)

WHEREAS, Eugene DeRosa, for Flatbush Associates, Inc., owner, filed, December 18, 1925, an application, under the building zone resolution, to permit the extension, from a business district into a residence district, of a proposed theatre building; premises 2101-2121 Church avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 18, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Church avenue is in a business district; that Kenmore place is in a residence district, and that Flatbush avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered December 14, 1925, reads:

"1. Theatre extends into residential district. Proposition contrary to Building Zone Resolution. Art. II, Sec. 3. Therefore denied."

WHEREAS, the proposed building is of fireproof construction, one story (68 ft.) in height, with a frontage of 143 ft. 1 1/4 in. on Kenmore place and 183 ft. on Church avenue; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7c and section 21 of the building zone resolution.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the area of the structure invading the residence use district on the Kenmore place front shall be confined to a depth

not exceeding 33 ft. 1 1/4 in. beyond the business use district area, and that there shall be no exit or entrance, or any opening within the residence use area of the Kenmore place front; that the show window return on the Kenmore place front of the Church avenue corner store shall not exceed 12 ft.; that the exits and entrance to the stores throughout shall be restricted to the business use district on the Church avenue front; that the elevation on the Kenmore place front shall be of light-colored face brick with architectural terra cotta or natural stone trimmings; that the rear gable wall facing the court within the residence use area district shall be faced and finished with light-colored face brick throughout; that a return drawing shall be made to this board for its approval before submission to the superintendent of buildings, same to be substantially in accordance with the water color design submitted to this board at the public hearing; all permits required shall be obtained within nine (9) months and the building completed within eighteen (18) months from the date of this action.

18-26-BZ.

APPLICANT—Edward P. Doyle, for Carollo Brothers, owners.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—Southwest corner of Chestnut street and Astoria avenue, Long Island City, Borough of Queens.

APPEARANCES—

For Applicant: Edward P. Doyle.

For Opposition: F. W. Ritter.

ACTION OF BOARD—Application denied.

Negative: Chairman Walsh, Commissioners Connell and Holland and Chief Kenlon..	4
Absent .....	0

THE RESOLUTION:

(18-26-BZ)

WHEREAS, Edward P. Doyle, for Carollo Brothers, owner, filed, January 6, 1926, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises southwest corner of Chestnut street and Astoria avenue, Long Island City, Borough of Queens; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 18, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Chestnut street is in a residence district, and that Astoria avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 30, 1925, reads:

"1. Garage for more than 5 cars in a business district is contrary to the Zone Law."

WHEREAS, the existing building is of non-fireproof construction, two stories and basement in height, with a frontage of 47.92 ft. on Astoria avenue and 152.83 ft. on Chestnut street, and formerly occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant did not substantiate the basis of his appeal—hardship—under section 21; and

WHEREAS, the alterations proposed would be in excess of 50 per cent of the value of the existing structure.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and the application be and it hereby is denied.

THE RESOLUTION:

(1297-25-BZ)

WHEREAS, John J. Friend, for Schlatter Embroidery Company, owner, filed, December 15, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of an additional building upon a lot occupied for manufacturing purposes since 1913; premises 911 Longfellow avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, March 16, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Longfellow avenue is in a residence district; that Bryant avenue is in a residence district; that Seneca avenue is in a business district, and that Garrison avenue is in an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 27, 1925, reads:

"1. Proposed extension of factory building in residence district is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, two stories in height, with a frontage of 48 ft. and a depth of 100 ft.; to be occupied as an embroidery factory; and

WHEREAS, the board deemed that the applicant was entitled to relief under section 7a of the building zone resolution, due to the fact that the property and business conducted thereon has been under one ownership since 1913; and

WHEREAS, this application was granted by the board at its meeting March 16, 1926, on certain conditions, and applicant requested a modification of these conditions.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed structure shall be limited in height to a two-story building; that the rear and gable walls shall be unpierced throughout their entire height and length; that the exterior of the front elevation shall be finished, as to texture, material and design as the existing building in the same ownership; that the use and occupancy shall be restricted to an extension of the present use and business of the premises under appeal; all permits necessary for the prosecution of the work shall be obtained within ninety (90) days and the building completed within six (6) months from the date of this action.

354-25-BZ.

APPLICANT—Geller, Rolston & Blanc, for Herbert M. Metzger and Mrs. Amy M. Lindau, owners.

SUBJECT—Application for reopening—extension of permit (re: decision of superintendent of buildings), to permit in a residence district the alteration and extension of an existing dwelling to be used for business purposes.

PREMISES AFFECTED—55 East 60th street, Manhattan.

APPEARANCES—

For Applicant: Thomas K. Egan and H. M. Metzger.

For Opposition: None.

ACTION OF BOARD—Application reopened and permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(354-25-BZ)

WHEREAS, A. M. Davis, for Herbert M. Metzger, et al. owners, filed, April 1, 1925, an application, under the building zone resolution, to permit in a residence district the alteration of an existing dwelling to be used in part for business purposes; premises 55 East 60th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, July 21, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 60th street is a business district, Park avenue and East 61st street are residence districts; and

WHEREAS, the decision of the superintendent of buildings rendered March 12, 1925, in acting on Alt. App. No. 423 25, reads:

"1. In a residence district the alteration and use of a residence building for business is unlawful. Building Zone Resolution, Section 6-2.";

and

WHEREAS, the existing building is of non-fireproof construction, four stories and basement in height, with a frontage of 20 ft. and a depth of 69 ft. 1 in.; it is proposed to remove brick piers dividing windows and construct large show windows at basement and 1st story front, also to change the occupancy from a one-family dwelling to store in basement and 1st story and two families on each of the 2nd, 3rd and 4th stories; and

WHEREAS, an 11-story apartment house immediately adjoining extends beyond the premises under appeal and built out to the building line, and the owner immediately adjoining to the west, the only remaining building intervening between the residence use influence of Park avenue and business use of 60th street, favored the granting of this appeal, and the board deemed, in view of all the circumstances that denial of the application would be a hardship; and

WHEREAS, this application was granted by the board at its meeting July 21, 1925, on certain conditions, and applicant requested a modification of the time limit imposed.

*Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the front elevation of the existing street wall shall remain unchanged; that it shall not be extended forward to the lot line; that the business use shall be restricted to the first two stories and shall be limited to the conduct and operation of retail mercantile stores or shops, such as book store, millinery and other light industry of inoffensive and inconspicuous character.

# MINUTES

er, and the remainder of the building restricted to dwelling use and occupancy; that there shall be no advertising signs displayed on the front of the building, other than flat wall signs; and that there shall be no manufacturing conducted on the premises; that all permits necessary for the prosecution of the work shall be obtained within nine months and the work of alteration completed within one year from the date of this action, May 18, 1926.

8-24-BZ.

APPLICANT—William F. Doyle, for Herman H. Lucke, owner.

SUBJECT—Application for reopening—modification (re: decision of superintendent of buildings) to permit in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—902-922 60th street, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

ACTION OF BOARD—Application reopened and resolution amended.

THE VOTE TO REOPEN AND AMEND RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(153-24-BZ)

WHEREAS, Wm. F. Doyle, for Herman H. Lucke, owner, filed, January 30, 1924, an application, under the building zone resolution, to permit the extension from an unrestricted district into a business district of a proposed garage for the storage of more than five motor vehicles; premises 902-22 60th street, Brooklyn; and

WHEREAS, a public hearing was held on this application before the board of appeals, at its regular meeting, April 22, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 60th street, starting 100 ft. west of Ninth avenue, is unrestricted, remainder in business district; and Ninth avenue is a business and unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered January 19, 1924, in acting on N. B. App. 1179-1180, reads:

"Proposed one story brick public garage for more than five motor vehicles, partly in a business district and partly in an unrestricted district, is contrary to Art. II, par. 4 (a) of the Zone Resolution.";

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 180 ft. and a depth of 100 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, under the provisions of section 7, subdivision 1, the board is empowered to act and, owing to the character of the surrounding property, there would be hardship in preventing applicant from making the proposed improvement; and

WHEREAS, this application was granted by the board at its meeting April 22, 1924, on certain conditions, and applicant requested a modification of these conditions as to encroachments.

Resolved, that the board of appeals does hereby make a modification in the application of the use district regulations of the building zone resolution, and that the application is hereby granted on condition that the structure shall not exceed one story in height; that the rear and side gable walls shall be unpierced throughout their

entire height and length; that the front elevations on Ninth avenue and 60th street shall be faced with front brick and architectural terra cotta or stone trimmings; that the roof shall be of flat design and construction and comply with the building code in all respects; that there shall be but one vehicular entrance on 60th street, not less than 50 ft. easterly from the corner formed by the intersection of Ninth avenue and 60th street; that there shall be no doorway other than an emergency exit not exceeding 3 ft. 8 in. in width permitted on Ninth avenue front, in any windows incorporated on Ninth avenue elevation the sills shall be at least 6 ft. above grade; that any skylights installed shall be glazed with plain glass, protected above and below with wire guards;

Resolved, further, that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

812-24-BZ.

APPLICANT—John J. Dunnigan, for Sadie Corn, owner.

SUBJECT—Application for reopening—extension of time (re: decision of superintendent of buildings), to permit in a residence district the alteration and extension of a business building which was erected under a previous resolution of the board.

PREMISES AFFECTED—University ave., west side, 360.16 ft. south of 190th street, The Bronx.

APPEARANCES—

For Applicant: John J. Dunnigan.

For Opposition: None.

THE RESOLUTION:

(812-24-BZ)

WHEREAS, John J. Dunnigan, for Sadie Corn, owner, filed, June 17, 1924, an application, under the building zone resolution, to permit in a residence district the alteration and extension of a business building which was erected under a previous resolution of the board; premises west side of University avenue, 360.16 ft. south of 190th street, Borough of Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its special meeting, April 17, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that University avenue, West 188th street and Parkview place are residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 9, 1924, in acting on Alt. Application No. 307-24, reads:

"1. Proposed alteration and extension of building in residence district for business purposes is contrary to provisions of Building Zone Resolution.";

and

WHEREAS, the proposed extension is to be of non-fireproof construction, one story in height, with a width at rear of 50 ft. and a depth of 95 ft. 9¾ in. and 74 ft., irregular in area; to be occupied as stores in conjunction with those on the front of the lot; and

WHEREAS, there was no opposition to the granting of the application on the part of owners of adjacent property, and

# MINUTES

the extension of stores to the rear of the lot line as proposed, owing to the difference in grade of street frontages involved, would not in any way affect property to the rear of the proposed site; and

WHEREAS, this application was granted by the board at its meeting April 17, 1925, on certain conditions, and applicant requested a modification of the time limit imposed for completion of work.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the proposed extension shall not exceed one story in height; that the rear and gable walls shall be unpierced throughout their entire height and length; that any skylights installed shall be glazed with plain glass, protected above and below with wire guards; that the use and occupancy shall be restricted to retail merchandising, but the merchandising and storage of food products shall be prohibited;

Resolved, further, that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within twelve months from the date of this action, May 18, 1926.

92-17-BZ.

APPLICANT—Charles S. Clark, for 54th Street Holding Corp., owner.

SUBJECT—Application for reopening—extension of time (re: decision of superintendent of buildings), to permit the conversion of an existing stable to a garage in a business district.

PREMISES AFFECTED—103-105 West 53rd street and 104-106 West 54th street, Manhattan.

APPEARANCES—

For Applicant: Max Lasberg.

ACTION OF BOARD—Application reopened and time extended to procure permits and to complete construction.

THE VOTE TO REOPEN AND EXTEND TIME—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon..... 1

THE RESOLUTION:

(92-17-BZ)

WHEREAS, William F. Doyle, for 54th Street Holding Corp., owner, filed, January 23, 1917, an application, under the building zone resolution, to permit in a business dis-

trict the conversion of a stable for more than five (5) horses into a garage for more than five (5) motor vehicles; premises 103-5 West 53rd street and 104-6 West 54th street, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, October 14, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 53rd street and 54th street are business districts; and

WHEREAS, it is proposed to alter an existing four-story non-fireproof building, 50 ft. by 200.10 ft. in area, now occupied for stable and wagon storage, into a garage for more than five motor vehicles; and

WHEREAS, this application was granted by the board of appeals, February 20, 1917, but owner failed to commence work owing to conditions in the material and labor market; and

WHEREAS, the board deemed there would be hardship in preventing applicant from making the proposed change owing to the character of surrounding buildings and former action of the board; and

WHEREAS, this application was reopened and granted by the board at its meeting October 24, 1924, on certain conditions, and applicant requested an extension of time to complete the work.

Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be fire retarded throughout in accordance with the rules of the board of standards and appeals, and that the building shall comply with the building code in all respects; that the 54th street front shall be restricted to one emergency vehicular exit; that there shall be no ramp entering front or exiting to the 54th street front; that any ramp construction on the 53rd street front shall be set back not less than 15 ft. from the front of the building; that there shall not be more than one projecting illuminated sign permitted on the 54th street front; that any gasoline storage equipment plant shall be installed on the 53rd street front of the building; that all permits necessary for prosecution of the work shall be obtained within one month and the building completed within one month from the date of this action.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, October 13, 1925, as they appeared in Bulletin No. 40, Vol. 10, are hereby corrected to read as follows:

(620-25-A)

WHEREAS, Smith, Townley and Chambers, for DeVinne Press, lessee, filed, June 15, 1925, an appeal, with the board of standards and appeals, from an order of the fire commissioner, affecting premises 393-9 Lafayette street and 21-3 East 4th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 25, 1925, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars, and roofs), placed within main stairway enclosure.

\*Correction—Words "in addition to the interior fire alarm system" added in line 43 and words "that an interior fire alarm system" omitted in line 42.

sure. Each outlet to be provided with sufficient length of 2½ inch standard hose attached thereto.";

and

WHEREAS, the premises consist of two non-fireproof buildings (connected by horizontal exits on the 1st, 3rd, 6th and 7th stories, protected by fireproof doors), sections having a frontage of 100 ft. on Lafayette street and 117 ft. 8 in. on East 4th street; OCCUPIED as a tenant factory, mostly printing—136 persons above the 1st story in the Lafayette street section and 69 persons above the 1st story in the East 4th street section; and

WHEREAS, a similar appeal was granted by the board under Cal. No. 1913-17-A, in view of the fact that the building is equipped with a 100 per cent sprinkler system, an interior fire alarm signal system and the occupancy is limited to 100 persons above the 1st story in either section at any one time; and

WHEREAS, appellant contends that the exit capacities are far in excess of the actual number of persons employed and requests permission of the board to permit the increased and existing occupancy of 136 persons in the Lafayette street section.

# MINUTES

*Resolved*, that the order of the fire commissioner be and hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be equipped with an approved sprinkler system in accordance with the rules of the board of standards and appeals for existing

sprinkler systems, with central office connection to be maintained in addition to the interior fire alarm system; that the use shall remain substantially unchanged; and that the occupancy of structure shall not exceed fifty (50) persons on any one floor.

## \*CORRECTION.

The minutes of the meeting of the board of standards and appeals held Tuesday, May 4, 1926, as they appeared in Bulletin No. 19, Vol. XI, are hereby corrected to read as follows:

THE RESOLUTION:  
(1267-25-BZ)

WHEREAS, Thomas I. Sheridan, for Louis Kramer, owner, filed, December 9, 1925, an application, under the building zone resolution, to permit in a business district the alteration and change of occupancy of a building, formerly used as a stable, to a garage for the storage of more than five motor vehicles; premises 266-272 St. Nicholas avenue and West 124th street, Borough of Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 4, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that St. Nicholas avenue, West 124th street and Eighth avenue are all in business districts;

Correction—Number “50” changed to “35” in line 43.

WHEREAS, the decision of the superintendent of buildings, rendered September 14, 1925, reads:

“This amendment is disapproved with the following objection repeated:

“1. Proposed garage is contrary to Article II of the Zone Resolution.”; and

WHEREAS, the existing building is of non-fireproof construction, two stories in height, with a frontage of 118 ft. 6 in. on St. Nicholas avenue and 50 ft. on West 124th street; to be altered and occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that the applicant had substantiated his basis of appeal under section 7e as an uninterrupted non-conforming use before and since the adoption of the building zone resolution; and, due to the surrounding and abutting conditions, the proposed alteration to the existing building would be an improvement over the present conditions.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the proposed alteration to the building shall not exceed

MINUTES

a two-story structure above grade; that the building as altered shall be constructed fireproof throughout; that the frontage on St. Nicholas avenue for a depth of approximately 35 ft. throughout the 1st story shall be restricted to retail store use, and shall be separated from the garage area of the structure by a wall of approved masonry unpierced throughout; any gasoline storage equipment installed shall be located on the 124th street front of the structure; that there shall be no roof signs erected or advertising signs permitted on the structure other than one projecting electric sign indicating name or title of garage on the 124th street front; that there shall be no signs or advertising display of any nature or description on the St. Nicholas avenue front,

other than fixed letters confined to the plate glass show windows; that the St. Nicholas avenue street front on the 2d story shall be finished in triple mullioned window openings other than the two end openings, which shall be double mullion openings; all openings to be equipped with approved metal frames and stationary sash, with not less than one ventilator to each opening, upper and lower sash, and the openings on the street front of the 2nd story shall be glazed with translucent wire glass; all permits necessary for the prosecution of the work shall be obtained within ninety (9) months and the construction work required thereby shall be completed within eighteen (18) months from the date of this action.

RULES

FIRE DRILL RULES, ADOPTED OCTOBER 5, 1923.

The following rules, governing Fire Drills, were adopted by the Board of Standards and Appeals at the special meeting held on Friday, October 5, 1923:

DEFINITION OF "FIRE DRILL."

The method and practice of the systematic and orderly vacating of a building by its occupants in case of emergency, panic or fire in the least possible time—by the nearest safe means of exit—and the use of fire appliances which shall be provided for the extinguishing or retarding of fire and the safeguarding of human life.

Rule 1.

In all buildings as defined in Article 1, Section 10 of the Labor Law in which fire drills are required pursuant to Section 279 and in any other building in which the Fire Commissioner may be directed pursuant to the power conferred in section 775-B of the Greater New York Charter, it shall be the duty of the owners, lessees or tenants to conduct fire drills monthly and at such other times as the Fire Commissioner may direct.

For the purpose of conducting such fire drills the owner or tenant shall appoint from among their employees such responsible and dependable persons, male or female, who shall efficiently perform the duties of the various positions of the fire drill organization, as specified on the accompanying chart.

It shall be the duty of the owner or tenant to enter in the blank spaces provided for that purpose in said chart the names of persons so selected and post said chart and copies of the rules in a conspicuous place.

FIRE DRILL ORGANIZATION.

Rule 2. Duties of Foreman.

The Foreman or Person in Charge shall direct, enforce and have full charge of the "Fire Drill" in every factory on each floor. Each day before work is begun he shall see that extinguishers, fire hose, fire buckets, etc., are in readiness for use, exit doors are unlocked, aisles are free from obstruction, that stairways, halls, etc., are properly lighted, and shall remedy any dangerous condition found to exist. Immediately after work is commenced he shall check up the Fire Drill Organization list and note if the regularly assigned persons are present; if any are found to be absent, he shall assign other employees (if practicable) to perform their duties.

He shall immediately notify new employees of the existence of the Fire Drill Organization and give them the necessary instructions as to the duties they are to perform, etc.

He shall be familiar with the operation and location of the interior alarm signal box on his floor.

He shall listen for the test signal each morning at the appointed hour and in the event of the test signal not being heard he shall communicate with the superintendent or other person in charge of the building and advise him of the fact. The (Floor Captains) Foreman's orders are final as to the carrying out of the fire drill on his particular floor.

Rule 3. Duties of Watchmen.

The WATCHMEN shall see that all doors and windows are closed so as to prevent the spread of fire. They

# RULES

WATCHMEN shall be the only persons permitted to remain on the floor during the progress of a fire drill and so at their own risk. For ordinary purposes only one watchman and a substitute shall be designated. In special cases, however, extra watchmen may be assigned by consent in writing from Fire Commissioner.

## Rule 4. Duties of Searchers.

The MALE and FEMALE SEARCHERS shall search toilets, dressing rooms and emergency rooms used and frequented by their sex and all other portions of the floor and order all persons, except those authorized to remain, to leave the premises. They are to take care of and assist persons who may faint or be disabled.

SEARCHERS shall leave the floor immediately after the last squad leaves.

## Rule 5. Duties of Street Alarm Box Runner.

The STREET ALARM BOX RUNNER shall be familiar with the location of the nearest city fire alarm box and know how it is operated.

In ordinary practice fire drills the STREET-ALARM-BOX-RUNNER shall report to the Foreman for orders and if his services are not required he shall promptly file out of the premises with the other occupants.

Only when a fire actually occurs on his floor, or when ordered to do so by the Foreman, shall the STREET-ALARM-BOX-RUNNER proceed to the street alarm box and send in the fire alarm.

## Rule 6. Duties of Fire Brigade.

The fire brigade shall have full charge of the operation of all auxiliary fire fighting apparatus and shall endeavor to extinguish, or at least hold in check until the arrival of the fire department, any fire that may occur. When it is necessary for the fire brigade to respond to different floors in the building they shall not use the stairways or the escapes while the occupants are escaping from the premises.

## Rule 7. Duties of Exit Guards.

The EXIT GUARDS shall station themselves at all exit doors leading to fire escapes, stairways and other means of escape immediately upon the sounding of the alarm. There shall be two guards for each exit, if practicable; one to stand in the hallway holding back the door and the other directly inside on the floor. They are to keep the exit doors open and direct the movements of the persons using these exits and prevent congestion.

EXIT GUARDS shall remain at their stations until all the occupants of the building have passed their stations. Then close their doors and pass out of the building. Upon signal for the occupants to return, EXIT GUARDS shall take their designated stations and remain there until all persons have returned to their respective floors.

## Rule 8. Duties of Squad Monitors.

The SQUAD MONITORS, as soon as the alarm is sounded, shall see that the employees under their charge quickly form into line, two abreast, and numbering not more than thirty to each squad. They shall see that all aisles and passageways are cleared of obstructions.

Note: Chairs, stools, baskets, etc., should be pushed under or placed on top of work benches.

MONITORS shall proceed at the head of their respective squads to the exit assigned, and then march up or down the stairs or to other exits as directed by the EXIT GUARDS.

On reaching the sidewalk MONITORS shall keep their squads in order and lead them a reasonable distance from

the building, so as not to cause congestion and interference with fire apparatus. When the proper signal is given they shall return to their respective floors at head of their squads.

MONITORS will at all times see that those under their charge conduct themselves in a respectable and orderly manner.

## Rule 9. Holding of Drills.

FIRE DRILLS shall be held at least once each month at varied hours of the day, and all of the occupants shall participate therein simultaneously. Such drills shall conduct all occupants to a place of safety.

Where dual operation interior fire alarm systems are installed as permitted under Rule 11 of the interior fire alarm rules of the Board of Standards and Appeals, the fire drill conducted each month shall include all of the persons on the premises engaged at work for a factory, and drills shall be conducted at least twice each year in which all of the persons on the premises shall participate simultaneously.

## Rule 10. Duties of Owner.

It shall be the duty of the OWNER, LESSEE OR TENANT OF THE BUILDING or his authorized agent or their representatives to personally observe that the "Fire Drill" is held simultaneously on every floor of the building and the participation therein of every occupant of such building. Any FIRE DRILL in which all of the occupants do not participate shall not be considered as complying with the LAW, except as otherwise provided in these rules.

The person or persons representing the OWNER, LESSEE OR TENANT who supervises the FIRE DRILL at the building shall submit to an examination by the Bureau of Fire Prevention as to their experience and general fitness for such duties, and shall be so certified in writing by the FIRE COMMISSIONER.

## Rule 11. Duties of Engineer.

It shall be the duty of the ENGINEER, SUPERINTENDENT or other PERSON IN CHARGE of a building having an interior fire alarm system to test such system daily immediately after the beginning of business, and to see that all apparatus operated by springs requiring winding are rewound after each alarm and kept in normal condition for operation.

Whenever it is necessary to test the fire alarm system at any other time of the day, owing to repairs, etc., being made, the PERSON IN CHARGE OF BUILDING will first notify all Foremen of the several floors of the intended test and likewise notify them when the repairs, etc., are completed. This precaution is taken to prevent confusion and excitement, also misunderstanding of the alarm signals.

It shall also be the duty of the PERSON IN CHARGE OF BUILDING to sound the interior alarm system at irregular intervals, but not less than once each calendar month, for the purpose of holding practice fire drills. He shall keep on the premises a record of such drills showing the date when held and the required time for all occupants to reach the street or a point of safety outside the building.

The PERSON IN CHARGE OF BUILDING must immediately acquaint new tenants of the existence of the "Fire Drill" Organization and its purport.

## Rule 12. Registration.

The name and address of every person, corporation or co-partnership, that will, under professional service, carry on the trade, business or calling of establishing, maintaining or supervising the "Fire Drill" shall be registered in the Fire Department, which Department shall, upon evidence of fitness, grant a certificate to that effect.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO RULES GOVERNING FIRE EXTINGUISHING APPLIANCES— SPRINKLER SYSTEMS.

[77-25-SR]

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Standards and Appeals on Tuesday, May 25, 1926, at 10 a. m., Room 1013, Municipal Building, on proposed amendments to Rules for Fire Extinguishing Appliances, Sprinkler Rules.

*General Requirements.* The rules contained herein cover the general details of a sprinkler equipment only. Before an equipment is installed or before a present equipment is remodeled, complete working plans should be submitted for approval to Fire Department.

These plans shall be drawn to an indicated scale; give correct address and points of compass; show sectional elevations of the building; and the essential features of the construction, viz., size, location and direction of joists, timbers or other structural members. They shall also indicate the location and size of water supplies, connecting pipes, feed mains and risers, gate, check, alarm and dry-pipe valves, as well as the location, spacing, number and type of sprinklers.

Upon approval of preliminary plans such number of sets of clean, corrected plans on cloth as the Fire Commissioner may require, not exceeding three (3), shall be filed for final approval of the Fire Commissioner. A certified copy of the approved plans shall be forwarded to the Bureau of Buildings by the Bureau of Fire Prevention. Such application and specification forms as may be prescribed by the Fire Commissioner shall accompany preliminary plans. If a standpipe (fire line) equipment is provided throughout the building, the plans shall include a note to that effect.

When entirely completed in accordance with the approved plans and as per test herein provided for, application shall be made to the Bureau of Fire Prevention for inspection of the completed installation. When the sprinkler equipment is approved the applicant will be so advised in writing by the Bureau of Fire Prevention.

All sprinkler equipments shall be installed in a thoroughly workmanlike manner.

**Rule 1. Definition of Automatic Extinguisher Systems.** Automatic extinguisher systems shall consist of a system of piping connected to one or more acceptable sources of water supply, or other extinguishing medium, provided with distributing devices so arranged and located as to discharge and diffuse automatically under the action of heat an effective stream or spray over every part of the interior of the building area in which a fire may start or to which it may be communicated.

**Rule 2. Classification of Sprinkler Systems.** For the purpose of these rules, sprinkler systems shall be classified as:

(a) Automatic Wet Pipe Systems, in which all pipes and sprinkler heads are at all times filled with water;

(b) Automatic Dry Pipe Systems, in which the pipes and sprinkler heads are filled with air, either compressed or at atmospheric pressure, and the water supply is operated by a Dry Pipe Valve as defined in Rule 27 of these Rules.

(c) Non-Automatic Systems, in which all pipes and sprinkler heads are maintained dry with a fire department connection for water supply.

Thermostatic fire alarm with direct connection to Central Office or Fire Department Headquarters shall be provided in connection with all non-automatic sprinkler systems.

**Rule 3. Approved Devices.** Automatic Sprinklers and accessory appliances shall include all devices approved as such by the Bureau of Standards, Washington, D. C.; by the Underwriters' Laboratories, Inc., of Chicago; by the Associated Factory Mutual Laboratories of Boston; and all devices which meet the tests prescribed by the Board of Standards and Appeals.

**Rule 4. Water Supply.** Approved sources of water supply shall be classified as Automatic and Auxiliary.

(a) Automatic Sources shall include the Gravity Tank, the Pressure Tank, [and] the Public Water System, and the Automatic Electric Fire Pump, installed as required under the provisions of Rule 8, hereinafter provided for.

b) Auxiliary Sources shall include the non-automatic Fire Pump and the Fire Department Connection.

**Rule 5. Gravity Tank.** Gravity tanks shall contain an available quantity of water sufficient to supply twenty-five per cent (25%) of the number of sprinkler heads in the average protected fire area for twenty (20) minutes, but not less than 5,000 gallons; and the bottom of the tank shall have an elevation of not less than twenty (20) feet above the highest line of sprinklers below the main roof. When the area of a pent house exceeds 2,500 sq. ft. the bottom of the tank shall be required to be not less than 20 feet above the highest line of sprinklers below the pent house roof, but where a pent house contains only pressure tanks this rule will not apply.

Where a tank capacity in excess of [25,000] 30,000 gallons is required by this rule, the amount of water to be provided in excess of [25,000] 30,000 gallons shall be specified by the Board of Standards and Appeals, except when tanks of unlimited capacities are supported on structures altogether independent of buildings.

The tank shall be filled through a fixed pipe, independent of the sprinkler piping, not less than two (2) inches in size, discharging into the top of the tank, or through a by-pass not less than two (2) inches in size around the check valve in the discharge pipe, provided the supply is of sufficient pressure to fill the tank. The water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute.

The filling pipe shall be carried up inside a frost-proof casing and may extend through tank bottom to discharge at top of tank above full water level. The portion of pipe inside tank must be of brass or copper or other non-corrosive material.

Tanks shall not be fed through sprinkler lines.

The sprinkler and standpipe tanks may be fed from a common source of supply, either a pump or a direct service main connection, provided that there are separate feed mains from the basement or lowest story and a control valve in each feed line in a pump or engine room.

The overflow pipe shall be not less than two (2) inches in diameter for tanks up to 30,000 gallons capacity and not less than three (3) inches in diameter for larger tanks. The top of the overflow pipe shall be three (3) inches below the top of the staves in wooden tanks and one (1) inch from the top in steel tanks. The pipe may extend through the bottom of tank provided the portion inside tank is of brass or copper or other non-corrosive metal and without joints or it may extend through side of tank. For tanks over roofs overflow pipes shall terminate not more than twenty-four (24) inches above roof and shall be fitted with a 90 degree elbow.

The discharge, heating or filling pipes where exposed to the weather shall be protected from freezing by a frost-proof covering which may be of three layers of one-inch (1") hair felt interspersed with building paper well wrapped and secured and covered with canvas well painted or by frost-proof boxing as specified by the National Board of Fire Underwriters.

Easy access to top of each tank shall be provided by means of a steel gooseneck ladder substantially constructed and rigidly braced, the top of which shall not tip outward from the vertical at any point.

Tanks above roofs shall be constructed according to the requirements of the Building Code and supporting struc-

# PUBLIC HEARING

shall be approved by the Superintendent of Buildings. Tanks not enclosed and exposed to the weather shall be covered with a double roof of acceptable construction consisting of a tight flat cover of matched boards and above a conical roof which shall be covered with an approved roofing.

Where a gravity tank may supply both sprinklers and hydrants it shall not be of less than 30,000 gallons capacity and located on a structure altogether independent of buildings and the bottom shall not be less than 75 feet above ground level, and not less than 20 feet above the highest line of sprinklers below the main roof of the highest building in a group of buildings.

Rule 6. Pressure Tank. Pressure tanks shall contain sufficient water to supply twelve and one-half per cent (12½%) of the number of sprinklers in the average protected fire area for twenty (20) minutes, but not less than 5,000 gallons of water for a wet pipe system or supplemented by an auxiliary water supply, and not less than 5,000 gallons of water for a dry-pipe system. No tank shall have a capacity greater than 9,000 gallons. A tank shall be kept two-thirds (2/3) full of water at a pressure of seventy-five (75) pounds per square inch and shall be so proportioned and located that a pressure of not less than fifteen (15) pounds per square inch be available on the highest line of sprinklers below main roof when all the water has been discharged from tank.

The tank shall be placed either on the roof or in the lowest sprinklered story.]

Pressure tank or tanks shall not be located below the lowest line of sprinklers supplied by tank or tanks.

Where [a tank] the total capacity of the pressure tank is in excess of [25,000] 30,000 gallons as required by rule, the amount of water to be provided in excess of [10,000] 30,000 gallons shall be specified by the Board of Standards and Appeals.

The water shall be supplied through a fixed pipe, independent of the sprinkler piping, not less than [two] one-half (1½) inches in size [with a one and one-quarter (1¼) inch connection to the tank], or through a pipe not less than [two (2)] one and one-half (1½) inches in size around the check valve in the discharge pipe. The supply is of sufficient pressure to fill the tank. Water supply and connections shall be capable of supplying the tank at a rate of not less than sixty-five (65) gallons per minute without reducing the pressure in the tank. The tank shall have a fixed metallic horizontal line at the end opposite the glass gauge, or other acceptable device, to indicate the level of the water when the tank is three-fourths full.

The air compressor shall be of sufficient capacity to raise the air pressure at the average rate of one pound in two minutes in each pressure tank.

Rule 7. Public Water System. Direct connection to the city water supply shall be capable of furnishing water at not less than fifteen (15) pounds per square inch static pressure at the highest line of sprinklers below the main roof.

Subject to the requirements of the Department of Water Supply, Gas and Electricity, the size of each connection shall be as large as that of the main riser and not less than four (4) inches, and shall have a convenient accessible control valve fixed to it at, or near, the tank, or, when possible, still further away from the tank. The control valve shall be fitted with a frost-proof waterproof box, not less than four (4) feet nor more than six (6) feet below the curb, with a fixed stem leading to a compartment at the level of the sidewalk.

The cover shall be bolted to the casing and shall be so marked as to be quickly located and to indicate the purpose of the valve. The valve shall be marked with a distinctive pattern, operated by a special socket approved by the department of water supply, gas and electricity.

Where it is impractical to install a control valve box at the curb because of a vault under the sidewalk and within 18" thereof, the control valve may be located in the water supply connection at a point not more than two (2) feet from the point of entry into a vault.

Where a water meter is required in the water supply connection to an automatic sprinkler equipment, it shall be of a type which allows free flow of water and approved by the Department of Water Supply, Gas and Electricity, or a type of fire line meter which has been specifically approved by the Fire Commissioner for use in connection with fire extinguishing equipment.

Evidence establishing the fact that water supply conditions and pressures are as may be required shall be submitted to the Fire Department.

Rule 8. Fire Pump. An automatic electric fire pump as an automatic source of water supply is one approved for such use and controlled by an approved automatic controlling device, which shall be adjusted to maintain not less than 15 pounds water pressure at the highest sprinkler below main roof and in pent houses over 2,500 sq. ft., as provided in Rule 5. And shall receive water supply only from a direct connection to the city water main.

As auxiliary sources of water supply steam or electric standard fire pumps shall receive water supply from a suction tank, a direct connection to the city water main or other approved sources capable of supplying the pump at its rated capacity for sixty (60) minutes. The rated capacity of the pump shall be not less than five hundred (500) gallons per minute, and shall be sufficient to supply twenty-five per cent (25%) of the number of sprinklers in the average protected fire area.

The pump shall be located in a room of fireproof construction, properly ventilated, lighted and drained, enclosed in eight (8) inch brick or concrete walls with approved fire doors at openings and with fireproof floor and ceiling construction. If located in the lowest story of the building, the pump shall be placed on a foundation not less than one (1) foot in height. The pump room shall be readily accessible with safe egress for the attendant.

A reliable source of energy for driving the pump shall be provided. For steam pumps, provision shall be made for sufficient steam power to operate the pumps at full rated capacity, and a steam pressure of not less than fifty (50) pounds shall be maintained at the pump at all times. Where there is more than one boiler, the pipes and valves shall be so arranged to permit the cutting out of any one boiler without interrupting the steam supply to the pump from the other boilers. The boiler room shall be cut off from the remainder of the building by fireproof floor and wall construction with approved fire doors at all openings.

Electrical energy from a public service plant shall be acceptable as a source of energy for driving electric fire pumps. When local power plants supply the energy for operating electric pumps, two motor generator units shall be provided, or one generator unit supplemented by a public service break-down switch. Local electric power plants shall be located in rooms of fireproof construction with approved fire doors at openings.

Rule 9. Sprinkler Discharge. For the purpose of computing the capacity of water supplies, standard one-half (½) inch sprinkler heads shall be assumed to have an average discharge of twenty (20) gallons per minute, and the discharge of larger heads shall be computed proportionately in the ratio of the areas of their respective orifices.

Rule 10. Fire Area. A fire area is any floor space enclosed on all sides by exterior walls or fire walls or a combination of both. The number of sprinklers in the average protected fire area shall be determined by the number of sprinklered stories in such section. In

# PUBLIC HEARING

determining the required capacity of water supplies, the number of sprinklers in the average protected fire area need not include those located in low positions, such as under benches, low shelves, closets and platforms and between cars in car barns.

**Rule 11. Fire Department Connection.** All automatic sprinkler systems shall be provided with at least one two-way Siamese connection on each street front of the building for connection to the fire department hose. Buildings fronting on only one street shall be provided with at least two Siamese connections when the street frontage of building exceeds [one hundred and fifty (150)] two hundred (200) feet [in width].

*Where buildings have frontages on more than one street there shall be a fire department connection on each street front where frontage is not continuous but in all cases where more than one fire department connection is required they shall be located as the Fire Commissioner may direct and shall not be grouped.*

All Siamese hose connections hereafter installed, except those on piers or warehouses intended for fire boat use, shall be three (3) inches in size. Fire boat connections shall be three and one-half (3½) inches in size. All hose connections shall be female, with standard fire department threads.

The inlets shall be placed at least eighteen (18) inches and not more than two (2) feet above the sidewalk, in a horizontal position accessible to the fire department, and shall be provided with a four (4) inch discharge connecting with a four (4) inch pipe to the sprinkler system for three (3) inch fire department connection and with a six (6) inch discharge outlet and six (6) inch pipe for three and one-half (3½) inch fire boat connection. Each inlet shall be provided with a clapper valve machined to a true face.

Each Siamese connection shall be designated by raised letters at least one (1) inch in size, cast in the fitting in a clear and prominent manner and reading for the service designated, viz.: "Base. Spkr.," etc., as the case may be. If the entire building is sprinklered, the fitting shall be marked "Auto. Spkr."

*Siamese hose connections may project through a street wall not more than twelve (12) inches beyond the building line except that where there is an angle formed by the street wall and a check piece or the base of a column, pilaster or ornamental projection, they may be so located that no part extends more than fifteen (15) inches from either side of such angle in accordance with the provisions of the Building Code.*

*In each fire department connection there shall be an approved straightway check valve installed in a horizontal position, unless suitably designed for vertical position, and the piping shall be arranged to drain between the check valve and the outside siamese coupling by either a ball drip having a one-half (½) inch pipe connection and one-half (½) inch orifice and a bronze ball of proper size, or by a three-quarter (¾) inch drip connection, with plugged valve attached, and when necessary arranged to drain to a sewer. A drain connection may be tapped into the body of check valve only when located in a horizontal position.*

**Rule 12. Automatic Sprinkler Systems.** Automatic sprinkler systems shall be classified as:

(a) One Source Systems, supplied with water from any one of the automatic sources; and

(b) Two Source Systems, supplied with water from a combination of any two of the automatic sources; two pressure tanks with a total water capacity twice that required for a one source supply; direct connection to the city water supply on two different streets, so located that the closing of the controlling valve on one main will not eliminate the main on the other street; or a direct connection to the city water supply and one of the auxiliary sources provided the water supply main is at least six (6) inches in size, the main is fed both

ways and a two (2) inch test pipe at the top of sprinkler riser shows a flowing pressure of fifteen pounds per square inch between the hours of six a. m. to six p. m.

*A gravity tank and pressure tank, or a gravity tank and one of the automatic sources or pressure tanks having a total water capacity for a source supply may be considered as a two-source supply where the occupancy of the building does not conflict with Rules 38, 39 and 40 hereinafter provided for.*

**Rule 13. Sprinkler Spacing.** Sprinkler heads and lines shall be spaced as herein provided:

**Mill Construction.** Under mill ceiling (smooth plank and timber construction, 5 to 12 foot bays) line of sprinklers shall be placed in the center of each bay and the distance between the heads on each line shall not exceed the following:

- (a) For Standard one-half (½) inch heads—
  - 8 feet in 12 foot bays;
  - 9 feet in 11 foot bays;
  - 10 feet in 10 foot bays;
  - 11 feet in 9 foot bays;
  - 12 feet in 5 to 8 foot bays;
- (b) For Conran\* one (1) inch heads—
  - 20 feet in 5 to 12 foot bays.
- (c) For Conran\* one and one-quarter (1¼) inch heads—
  - 25 feet in 5 to 12 foot bays.
- (d) Vaults used for the storage of nitro-cellulose products and vaults used for the storage of flammable motion picture films shall have standard one-half (½) inch head for each cubic foot of available storage space, or one inch Conran\* head for each 250 cubic feet of available storage space.

Measurements shall be taken from center to center of timbers.

Ceilings of modified mill construction having less than three (3) feet wide shall be treated as joist construction and sprinkler heads and lines spaced accordingly.

Bay timbers spaced three (3) feet or more on centers, but less than five (5) feet on centers, will require special ruling by the administrative official having jurisdiction.

**Joisted Construction.** Under open finish joisted construction ceilings, floor, decks and roofs, the sprinkler lines shall be run at right angles to the joists and heads "Staggered spaced" so that heads on one line be opposite a point half way between heads on adjacent lines.

(a) For Standard one-half (½) inch heads the distance between lines of sprinklers shall not exceed ten (10) feet and the distance between heads on each line shall not exceed eight (8) feet, the end heads on alternate lines being spaced not more than two (2) feet from wall or partition. Permission may be given by the administrative official having jurisdiction to install but one line of sprinklers, in each bay where girders project below the under side of joists and divide ceiling into bays ten (10) to eleven and one-half (11½) feet wide from center to center of girders, and the heads shall then be spaced on each line so that the area covered by a single head does not exceed eighty (80) square feet. In all cases where such bays are over eleven and one-half (11½) feet wide, two or more lines of sprinklers shall be installed in each bay as required by the rules for standard construction.

\*Wherever the term "Conran head" is used in these Rules, it is to be taken as meaning either a Conran head of the type tested and approved by the Fire Department, or one that has passed similar tests by the Fire Department.

# PUBLIC HEARING

re girders and joists are flush at the bottom, heads be spaced according to the general rule.

For Conran\* one (1) inch heads the distance between lines shall not exceed twenty (20) feet and the distance between the heads on each line shall not exceed six (6) feet, the end heads on alternate lines being spaced not more than four (4) feet from wall or partition. Where girders project below the under side of joists and divide ceiling into bays not exceeding twenty (20) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty (20) feet in width at least two (2) lines shall be installed in each bay and in no case shall the distance between adjacent lines exceed twenty (20) feet.

For Conran\* one and one-quarter (1¼) inch heads the distance between adjacent lines shall not exceed twenty-five (25) feet and the distance between the head on each line shall not exceed twenty (20) feet, the end head on alternate lines being spaced not more than five (5) feet from wall or partition. Where girders project below the under side of joists and divide the ceiling into bays not exceeding twenty-five (25) feet in width, measured from center to center of girders, one line shall be placed in the center of each bay. In bays exceeding twenty-five (25) feet in width at least two (2) lines shall be installed in each bay, and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

Both Finish, Sheathed or Plastered Ceilings. Under a finish, sheathed or plastered ceilings, in bays six (6) feet wide and over (measurements to be taken from center to center of timber, girder or other projection or support of the bay), sprinkler heads and lines shall be spaced as follows:

## For standard one-half (½) inch heads—

Line of sprinklers shall be placed in the center of each bay for bays not exceeding twelve (12) feet in width and the distance between the heads on each line shall not exceed the following:

- 8 feet in 12 foot bays;
- 9 feet in 11 foot bays;
- 10 feet in 8 to 10 foot bays.

In bays in excess of twelve (12) feet in width and less than twenty-three (23) feet in width, shall contain at least two (2) lines of sprinklers; bays twenty-three (23) feet wide or over shall have the lines therein not over ten (10) feet apart. In bays in excess of twelve (12) feet in width, not more than one hundred (100) square feet of ceiling area shall be allotted to any single head.

## For Conran\* one (1) inch heads—

Line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty (20) feet in width and the distance between the heads on each line shall not exceed twenty (20) feet. Bays in excess of twenty (20) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty (20) feet.

## For Conran\* one and one-quarter (1¼) inch heads—

Line of sprinklers shall be placed in the center of each bay for bays not exceeding twenty-five (25) feet in width and the distance between the heads on each line shall not exceed twenty-five (25) feet. Bays in excess of twenty-five (25) feet in width shall contain at least two (2) lines and in no case shall the distance between adjacent lines exceed twenty-five (25) feet.

Roof Construction. The rules of slow-burning construction shall apply as far as practicable. They may be modified, however, the intent being to arrange spacing of heads to protect the contents rather than the ceilings; but in no case shall the distance between a head on one line and a head on an adjacent line exceed the following:

- (a) For standard one-half (½) inch heads, 12 feet.
- (b) For Conran one (1) inch heads, 20 feet.
- (c) For Conran one and one-quarter (1¼) inch heads, 25 feet.

Distance From Walls. The distance from wall or partition to the first head on a sprinkler line shall not exceed one-half the allowable distance between the heads on such line. Additional heads may be required in the narrow pockets formed by bay timbers or beams and wall. Where beams, girders, columns, walls, partitions or other obstructions prevent the effective discharge of water, additional heads shall be installed to effectively sprinkle the area.

Vertical Shafts. In vertical shafts having inflammable sides, heads shall be provided within the shaft in addition to the head or heads at the tops of shafts, as follows:

- (a) One standard one-half (½) inch head for each 200 square feet of inflammable surface.
- (b) One Conran\* one (1) inch head for each 400 square feet of inflammable surface.
- (c) One Conran\* one and one-quarter (1¼) inch head for each 500 square feet of inflammable surface.

Such head or heads shall be installed at each floor when practicable, and always when shaft is trapped. Where practicable, heads shall be "staggered" at the alternate floor levels, particularly when only one head is installed at each floor level.

Pitched Roofs. Under a pitched roof sloping more steeply than one (1) foot in three (3) feet, heads shall be located in peak of roof, and those on either side of the peak shall be spaced according to the foregoing requirements. The distance between heads shall be measured on a line parallel with the roof. Where the roof meets the side wall or the floor line, the heads shall be placed not more than the following distance from such intersection:

- (a) For standard one-half (½) inch heads, 3½ feet.
- (b) For Conran\* one (1) inch heads, 7 feet.
- (c) For Conran\* one and one-quarter (1¼) inch heads, 8½ feet.

Heads spaced not to exceed the following distance each way from the peak of roof, measured on a line parallel with the roof, may be used in lieu of heads located in peak of roof:

- (a) For standard one-half (½) inch heads, 2½ feet.
- (b) For Conran\* one (1) inch heads, 5 feet.
- (c) For Conran\* one and one-quarter (1¼) inch heads, 6¼ feet.

In sawtooth roof construction, the end heads on the branch line shall be spaced not to exceed the following distance from the peak of the sawtooth:

- (a) For standard one-half (½) inch heads, 2½ feet.
- (b) For Conran\* one (1) inch heads, 5 feet.
- (c) For Conran\* one and one-quarter (1¼) inch heads, 6¼ feet.

Special Locations and Variations. In special locations, such as over electric generating, power and transforming apparatus, over their controlling devices and switchboards, where water from the fire extinguishing equipment would be detrimental, the sprinkler lines and heads may be omitted at the discretion of the administrative official having jurisdiction, and when in his judgment a slight variation of this rule of spacing is desirable to effect a more efficient distribution of water for fire extinguishing purposes, the sprinkler lines and heads shall be spaced as he may direct.

Rule 14. Sprinkler Position. All sprinkler heads shall be located, wherever possible, in an upright position on top of the pipes, except that sprinkler heads on automatic wet pipe systems may be pendant on concealed piping and when construction or occupancy of a room or enclosure makes it preferable.

- (a) Where standard one-half (½) inch heads are installed sprinkler deflectors shall be parallel to ceilings, roofs or the

# PUBLIC HEARING

incline of stairs, but when installed in the peak of a pitched roof they shall be horizontal. Distance of deflectors from ceilings of mill or other smooth construction, or bottom of joists of open joist construction, shall be not less than three (3) inches nor more than ten (10) inches.

In fireproof buildings, the distance between deflectors and panel ceilings shall not exceed fifteen (15) inches.

Not less than eighteen (18) inches effective clear space shall be left below the sprinkler heads, so that they may discharge an unbroken spray blanket from sprinkler to sprinkler and sides of room when in operation. Any stock piles, racks or other obstructions interfering with such action shall not be permitted. *Sprinkler system piping shall not be used for the support of stock, clothing, etc.*

(b) Where Conran\* heads are installed, the top of head shall be located the same distance below joists or ceiling as specified for deflectors in paragraph (a) of this rule; except that when heads are located under pitched roofs of piers or similar structures, they shall in general be installed in the upright position (not normal to slope of roof) and three (3) feet vertically below the underside of roof. When the administrative official having jurisdiction deems a variation of this rule advisable to obtain a more efficient distribution of water, the heads shall be located with respect to joists or ceiling, as he may direct.

Rule 15. Pipe Sizes. The number of heads on a given size pipe in one fire area in any story shall not exceed the following:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
$\frac{3}{4}$ inch	1 head
1 "	2 heads
$1\frac{1}{4}$ "	3 "
$1\frac{1}{2}$ "	5 "
2 "	10 "
$2\frac{1}{2}$ "	20 "
3 "	36 "
$3\frac{1}{2}$ "	55 "
4 "	80 "
5 "	140 "
6 "	200 "
7 "	300 "
8 "	420 "

(b) For Conran\* one (1) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
1 inch	1 head
$1\frac{1}{4}$ "	2 heads
$1\frac{1}{2}$ "	3 "
2 "	4 "
$2\frac{1}{2}$ "	6 "
3 "	9 "
4 "	18 "
5 "	34 "
6 "	51 "
7 "	75 "
8 "	105 "

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads—

Size of Pipe	Maximum No. of Heads Allowed
$1\frac{1}{4}$ inch	1 head
$1\frac{1}{2}$ "	2 heads
2 "	3 "
$2\frac{1}{2}$ "	4 "
3 "	6 "
4 "	12 "
5 "	21 "
6 "	40 "
7 "	60 "
8 "	84 "

When it is desired to use pipe of larger size than (8) inches in diameter, special ruling will be required of the administrative official having jurisdiction as to the advisability of its use and the number of heads that can be fed thereby.

Where practicable, it is desirable to arrange the piping so that the number of heads on a branch line will not exceed eight.

When the piping is arranged on the "gridiron" plan, the permissible number of heads may be doubled, provided the feed main is of the size indicated in the schedule for the total number of heads.

Where feed mains supply branch lines of only two each, the conditions approach those of long single lines. Such feed mains shall usually be centrally supplied. Where there are over eight (8) or ten (10) branch lines, lines up to fourteen (14) in number may be fed from a single main provided a two and one-half ( $2\frac{1}{2}$ ) inch pipe does not supply more than sixteen (16) standard one-half ( $\frac{1}{2}$ ) inch heads in lieu of twenty (20).

Buildings having slatted floors, or large unprotected openings without approved stops, shall be treated as one story with reference to the pipe sizes, and the feed main shall be of sufficient size to accommodate the number of heads to be fed. Larger pipe sizes than are allowed in the schedule may be required wherever the structure or conditions introduce unusually long runs of mains or many angles. Buildings with blind attics with unprotected openings to floor below, may be piped for a system on the ceiling of floor below, provided pipe size schedule is not overloaded on sizes three (3) inches or under.

Rule 16. Feed Mains. The size of feed mains shall be less than the size of riser and shall be arranged to be as direct as possible from source of water supply to riser.

Feed mains for stair or other towers without approved stops between floors, when piped on independent risers, shall be of sufficient size to accommodate the total number of sprinklers in such tower.

Rule 17. Risers. There shall be one or more risers in each building and in each section of the building divided by fire walls. Risers shall be arranged to be "Center Central" or "Side Central" supply to feed the risers. Each riser shall be of sufficient size to supply all the heads on said riser in one story, according to the schedule of pipe sizes in Rule 15.

In buildings of fireproof construction, and for the purposes of this rule, a blank wall, or one in which the openings are protected by standard fire doors, may be considered as a fire wall, if of equivalent construction.

If the conditions warrant, special permission may be granted allowing the heads in a fire section of small area to be fed from the risers in another section, provided the total number of heads in such area does not exceed the following number per floor:

(a) For standard one-half ( $\frac{1}{2}$ ) inch heads, 48.

(b) For Conran\* one (1) inch heads, 12.

(c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads, 12.

Risers shall not be located close to windows, protected from mechanical injury and freezing and properly supported on foundations and by floor plates, couplings or hangers.

No connections, such as for sill cocks, house service hose outlets, shall be made with a sprinkler system or any part thereof.

Where gravity and pressure tanks feed through a discharge pipe or "dead riser" to the foot of a riser, an air lock is likely to develop the discharge pipe of the tank shall connect with the discharge pipe, or "dead riser" forty (40) feet below the bottom of the pressure tank.

# PUBLIC HEARING

18. Pipes and Fittings. All pipe shall be full-weight wrought iron or steel threaded pipe, well reamed and screwed up tight into fittings without reducing the way. Fittings shall be standard cast iron fittings, and be long turn pattern on feed mains and risers.

Fittings shall be designed and guaranteed for a working pressure of 150 pounds per square inch and must be of withstanding a hydrostatic test pressure of 750 pounds per square inch without failure.

Pipe shall be secured to the ceiling, walls and other parts of the building with standard steel, wrought or malleable iron hangers.

Heavy fittings shall be employed where the normal pressure in the pipe system exceeds one hundred and fifty pounds per square inch, and shall be designed for a working pressure of 250 pounds per square inch and be of withstanding a hydrostatic test pressure of 1,250 pounds per square inch without failure.

Underground pipe shall comply with the specifications for cast iron pipe of the American Water Works Association.

19. Protection of Pipes and Sprinklers. When exposed to moisture, sprinkler pipes and hangers shall be protected against corrosion whenever found necessary by thoroughly cleaning the pipe of all scale and grease and painting with a coat of red lead and linseed oil paint or other suitable moisture resistive paint. When exposed to chemicals, the pipe and fittings shall be coated with graphite or approved chemical resistive paint. Care shall be taken not to paint the sprinkler heads.

Pipes of risers in low basements or low spaces below ground floors exposed to frost, shall be properly protected by a masonry or wood enclosure, properly heated, or with mineral wool, sawdust or tar mixed with granular material, extending below bottom of pipe and through the opening of ground floor, or the pipe shall be protected with three alternate layers of one-inch hair felt and build-up or by other approved method. When of wood, enclosure shall be constructed double with a layer of insulation between the two thicknesses of wood.

Risers, drains, heating pipes, etc., pass through concrete floors or partitions, they shall be protected with a metal sleeve or be grouted with cement mortar.

Where sprinklers are exposed to corrosion, the heads shall be protected with an approved hermetically sealed cover, or an approved wax coating.

20. Drainage. All sprinkler pipe and fittings shall be installed that they can be thoroughly drained, and in practicable, all piping shall be arranged to drain at the lowest point.

Pipes or drip pipes shall be so arranged as not to expose any part of the sprinkler system to frost, and shall be connected, either by check valves or other means, so they will not [overthrow] overflow domestic service or other connections to the same sewer or house drain, or if through the wall and exposed to the weather, they shall be fitted with hoods or down-turned elbows.

Pipes, pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet, shall be installed:

- At the base of the main riser;
- At each alarm valve;
- At each dry-pipe valve;
- At each gravity tank;
- At each pressure tank;
- At each fire department connection;
- At each floor, if independent floor control valves are used;

At each supply main, when the water in the same can be removed through any of the above drains. Such connections shall be installed with controlling valves so that flow may be made to determine if the water supplies connections from yard mains to the inside of the build-

ing are in order without causing water damage or overflowing service connections to the same house drain. Any such drain shall be not less than two (2) inches in size except that drains at independent floor valves [may be one and one-quarter ( $1\frac{1}{4}$ ) inches in size] shall be not less than 1 inch in size where floor valves are not over  $2\frac{1}{2}$  inches in size and  $1\frac{1}{4}$  inches where floor valves are larger, and connected to a main drain riser of not less than  $1\frac{1}{2}$  inches in size. The drain at the main riser shall discharge into a cone or sight drain, or if carried through the wall and exposed to the weather, it shall be fitted with a hood or down-turned elbow.

*At an alarm valve at the top of a riser in a down-fed system a drain shall not be required.*

*At each gravity or pressure tank erected above roof of a building there shall be a 4-inch valved drain connection so arranged as to discharge on roof of building. And where a tank is on a separate structure altogether independent of buildings drain connection to be arranged to discharge at ground level.*

On automatic wet pipe systems, the horizontal branch pipes shall be pitched not less than one-quarter ( $\frac{1}{4}$ ) inch in ten (10) feet to drain towards the sources of supply with drip valves at the low points.

On automatic dry-pipe systems, branch pipes shall be pitched at least one-half ( $\frac{1}{2}$ ) inch in ten (10) feet.

Rule 21. Test Pipe. [On] In all wet-pipe automatic sprinkler systems a test pipe of not less than  $\frac{3}{4}$  inch in diameter shall be connected directly with each [riser] system but shall be connected to a pipe of not less than  $1\frac{3}{4}$  inches in diameter in upper story and arranged to discharge, through a  $\frac{1}{2}$ -inch brass outlet, preferably to a point where it can readily be seen. With long runs or many angles, size of test pipe [shall] should be increased to one (1) inch or larger. Controlling valve should be located at a sufficient distance from where the test pipe passes through the wall of the building so as to reduce to a minimum the chance of freezing of water in test pipe.

*In all dry-pipe automatic sprinkler systems a  $\frac{3}{4}$ -inch inspector's test pipe shall be installed at the end of the most distant branch line and fitted with a  $\frac{3}{4}$ -inch shut-off valve stopped with a brass plug.*

Rule 22. Pressure Gauges. A four and one-half ( $4\frac{1}{2}$ ) inch double-spring Bourdon pressure gauge shall be provided in all automatic sprinkler systems as follows:

- Above dry-pipe valves;
- Below dry-pipe valves;
- At the pressure tank;
- At the air compressor;
- Above the alarm valve;
- Below the alarm valve; and

In the connections from city water supply.

Provision may be made for taking the pressure both above and below the alarm valve and the dry-pipe valve with only one gauge at each valve.

*A gauge shall not be required at an alarm valve located at the top of a riser in a down-fed system.*

Gauge connections shall be taken from the supply main or riser and not from the two-inch drain or test pipe.

Gauges shall be installed in a suitable place protected from freezing and be controlled by a valve with arrangements for draining. A plugged outlet, not less than one-quarter ( $\frac{1}{4}$ ) inch in size, shall be located between each valve and gauge for purpose of installing the inspector's gauge.

Rule 23. Valves. All valves two (2) inches in diameter and under shall be of brass or bronze, or other approved [non-corrodible] non-corrosive material. Valves over two (2) inches in diameter shall be of brass, or bronze or iron body, brass mounted, or of other approved [non-corrodible] non-corrosive material.

All sidewalk Siamese inlet valves, caps and chains shall be of galvanized cast iron or other approved [non-corrodible] non-corrosive material.

# PUBLIC HEARING

All gate valves shall be solid or double wedge disc, sufficing box pattern with hand wheel, outside screw and yoke, or other approved indicator pattern.

All check valves shall be approved straight way regrinding pattern, so built that the clappers may be readily removed for repairs.

Rule 24. Water Supply Gate Valves. The piping connecting each source of water supply with the sprinkler system shall be provided with a gate valve of the outside screw and yoke type, sealed open and tagged to designate its purpose, so located as to control each source of water supply except that from fire department hose connections. All such gate valves shall be located within the building where easily visible and readily accessible and as close as possible to the supply inlet.

Rule 25. Water Supply Check Valves. The piping connecting each source of water supply with the sprinkler system, including fire department connections, shall be provided with a check valve.

On two-source systems, check valves shall have a gate valve on each side to permit repair of check without shutting off both supplies, except that where the two sources of supply consist of tanks located above the highest line of sprinklers, a gate valve need only be provided on the downstream side of each check valve.

Rule 26. Control Valves. All automatic sprinkler systems shall be provided with a main control or shutoff valve arranged to be readily accessible and sealed in the open position; except that when the sprinkler system is fed from water supplies on the roof of the building, independent and readily accessible floor control valves, sealed in the open position, may be installed.

When not more than ten (10) standard one-half ( $\frac{1}{2}$ ) inch sprinkler heads or three (3) Conran\* heads in any automatic wet pipe system are exposed to cold and subject to freezing, shutoff valves may be provided to discontinue the water supply to such heads between November 1 and April 1. A greater number of heads than specified above, located in places which cannot be properly heated, shall be controlled by an automatic dry-pipe valve.

Rule 27. Dry-Pipe Valves. A dry-pipe valve shall be taken to mean a valve automatically controlling the water supply of the sprinkler system in such a manner that under normal conditions its piping system beyond the valve is maintained dry, but in the event of fire, the valve automatically releases the water into the sprinkler system, for fire extinguishing purposes.

Dry-pipe valves shall, for the purpose of these rules, be classified as follows:

Type A, in which the valve is actuated by the release of compressed air in the sprinkler piping system, due to the opening of a sprinkler head; and

Type B, in which the valve is actuated by an approved trip under electric control of an approved automatic thermostatic fire alarm system.

Dry-pipe valves shall be located as near as practicable to the sprinkler system in an enclosed and accessible place protected from mechanical injury and freezing.

*When anti-columning pipes are used, they shall be either lead lined or of brass.*

Automatic wet-pipe sprinkler systems in which only twenty-five (25) per cent of the heads are required to be maintained dry for protection from freezing, shall have only such heads under dry-pipe valve control.

(a) When "Type A" valve is installed, the air pressure in sprinkler systems under such dry-pipe valve control shall not exceed forty (40) pounds per square inch, nor be permitted to fall below twenty-five (25) pounds per square inch, nor shall it be less than one-sixth ( $\frac{1}{6}$ ) of the water pressure in any case.

The air compressor shall have a capacity of not less than eleven (11) cubic feet per minute and the air supply to the pump shall be taken, if possible, from a room containing dry air, or it shall be passed through a drying chamber containing calcium chloride, in order to avoid the introduction of moisture into the system.

The air pressure on such dry-pipe systems shall be maintained throughout the year.

Not more than the following number of heads shall be controlled by one "Type A" dry-pipe valve:

- (a) For standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

*Where equipped with an approved quick-opening device, the following number of heads may be controlled by one "Type A" dry-pipe valve:*

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

(b) When "Type B" valve is installed the actuating system shall be designed to operate at a temperature higher than that required to open the sprinkler heads, and all connections between the alarm system and the dry-pipe system shall be adequately protected against injury of any kind.

When required by the administrative official having jurisdiction, the dead end of every feed main in such dry-pipe system shall be provided with an air relief valve or so constructed as to be normally open in order to permit the free escape of air from the system, but to close automatically against the escape of water.

Not more than the following number of heads shall be controlled by one "Type B" dry-pipe valve:

- (a) For Standard one-half ( $\frac{1}{2}$ ) inch heads .....
- (b) For Conran\* one (1) inch heads .....
- (c) For Conran\* one and one-quarter ( $1\frac{1}{4}$ ) inch heads .....

Rule 28. Alarm Valve. All automatic wet pipe sprinkler systems shall be equipped with an alarm valve so constructed that a flow of water through a one-half ( $\frac{1}{2}$ ) inch or larger will operate an electric or mechanical gong.

Dry pipe valves shall be equipped with a reliable device to give either an electrical or mechanical alarm.

Rule 29. High and Low Water and Pressure Alarm. Gravity tanks shall be equipped with a device to indicate when the water falls below or rises above the normal level of the tank, with an indicator or alarm located in the engine room near the pump.

All pressure tanks shall be equipped with a device to indicate when the pressure in the tank falls below seventy (70) or rises above eighty (80) pounds per square inch with an indicator or alarm located in the engineer's [near the compressor].

Rule 30. Heating of Tanks. The water in all sprinkler tanks subject to freezing shall be protected by insulating the water or enclosing the tank in a frost-proof house properly heated and lighted.

Rule 31. Concealed Pipe Systems. All pipe in concealed pipe systems shall be of standard full-weight wrought iron or steel, painted with two coats of protective paint before and one after installation. Such pipe shall be installed in ducts or be encased in cement mortar and shall be inspected prior to concealment. When installed in concealed space between floor arches and ceiling, such pipe shall be supported by hangers and all pipe, fittings and hangers be protected with two coats of paint.

Rule 32. Preparation of Building. Floor or wall openings and other structural defects which prevent the buildup of heated air and retard the automatic action of sprinkler heads shall be provided with the necessary curtains, boards and draft stops to permit specific control of the building by the local sprinklers.

Curtain boards shall project at least three (3) inches above the lowest sprinkler.

# PUBLIC HEARING

33. *Approval of Sprinkler System [Tests].* Before all automatic sprinkler systems, excluding the water supply tanks, shall be subjected after installation to a static pressure of a test of at least fifty (50) pounds per square inch in excess of that which will be normally maintained and observed in the sprinkler system, such test pressure, however, never to be less than one hundred and fifty (150) pounds per square inch in any part of the system.

pressure tanks shall be tested after erection to a test pressure of one and one-half (1½) times the working pressure. To prevent the possibility of serious water damage in case of a break, the pressure shall be maintained by a pump, the main controlling gate being meanwhile closed. Brine or other corrosive chemicals shall not be used for testing systems.

Automatic dry-pipe systems with "Type A" valve containing air pressure of forty (40) pounds per square inch shall be pumped up, be held for twenty-four (24) hours, and if no leaks stopped which allow a loss of pressure of over twenty (20) pounds per square inch for the twenty-four (24) hours.

In the case of automatic dry-pipe systems with different "Type A" valve, the valve shall be held off its seat during the test to prevent injuring the valve.

Automatic systems shall be tested after installation to a pressure less than fifty (50) pounds per square inch in excess of the pressure necessary to reach the highest line of sprinkler.

Tests of installed systems shall be made by the contractor in the presence of the Fire Commissioner, or his authorized representative.

Piping, devices nor any portion of a newly constructed sprinkler system shall be covered up or permanently concealed until tested by the Bureau of Fire Prevention and Control, and the results of the test shall be set forth in writing, except piping passing through floors, partitions or beams for distances equal to the thickness of such floors, walls, partitions or beams.

34. *Non-fireproof Business Buildings.* Automatic sprinklers required in non-fireproof business buildings under the provisions of Chapter 5, Article 4, Section 72, Code of Ordinances, unless otherwise specifically provided in these rules, shall consist of at least a One Source System.

35. *Dangerous or Hazardous Buildings.* Automatic sprinklers required in buildings having occupancies considered to be dangerous or hazardous by the Fire Commissioner shall consist of at least a one-source system unless otherwise specifically provided for in these rules.

36. *Factories and other Buildings.* Automatic sprinklers required in buildings under the provisions of the Code of Ordinances and the Labor Law shall consist of at least a one source system.

[35] 37. *Theatre Buildings.* Automatic sprinklers required in theatre buildings under the provisions of Chapter 25, Section 524, Code of Ordinances, shall consist of at least a One Source System.

[36] 38. *Firework Storage.* Automatic sprinklers required in buildings in which fireworks are stored or sold under the provisions of Chapter 10, Article 6, Section 92, Code of Ordinances, shall consist of a Two Source System.

Rule [37] 39. *Nitro-Cellulose Products.* Automatic sprinklers as required in buildings in which nitro-cellulose products are stored under the provisions of Chapter 10, Article 19, Section 232, Code of Ordinances, shall consist of a system supplied from both approved gravity tank supply and an approved pressure tank supply, except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems, in conformity with the provisions of this rule as in force up to December 1, 1921.

*In buildings wherein are stored or handled only limited quantities of nitro-cellulose products, not exceeding 500 pounds, the automatic sprinklers may consist of a two source system as provided for in Rule 12.*

Rule [38] 40. *Inflammable Motion-Picture Films.* Automatic sprinklers, required in buildings in which inflammable motion-picture films are stored under the provisions of Chapter 10, Article 20, Section 241, Code of Ordinances, shall consist of a system supplied from both an approved gravity tank supply and an approved pressure tank supply except that no change shall be required in supplies to automatic sprinkler equipments previously approved by the Fire Commissioner as two source systems in conformity with the provisions of this rule as in force up to December 1st, 1921.

Rule [39] 41. *Existing Installations and Approvals.* Automatic extinguisher systems and devices heretofore approved and accepted by the authorities having jurisdiction shall not be required to conform to the provisions of these rules; and all such systems heretofore installed shall not be required to be altered to conform to these rules so long as the fire hazard due to construction and occupancy of the building is not increased or where substantial additions or extensions in height or area is made to the building when these rules shall apply if deemed advisable or necessary by the Fire Commissioner and the system after inspection is found to be in good working order.

Rule 42. *Communicating Openings.* When a building fully equipped with sprinklers communicates with another not so equipped the openings must be protected by approved fire doors on both sides of the wall, one of which must be automatic.

Rule 43. *Maintenance Inspections.* Automatic sprinkler systems shall be inspected at least once a month by the person in charge of the building, or by other competent person employed by the owner, to see that all parts of the system are in perfect working order, and the fire department connection or connections, if any, ready for immediate use by the Fire Department. A detailed record of each inspection shall be kept for examination by a representative of the Fire Department.

There shall be kept available at all times in the premises a supply of extra sprinklers, never less than six (6), to replace promptly any fused or damaged sprinklers. And there shall be one or more employees instructed in the maintenance of sprinkler system.

Rule 44. *Open Sprinklers.* When open sprinklers are required for exposure protection by the Fire Department as specified in the Building Code they shall be installed in accordance with the rules of the National Board of Fire Underwriters. Plans for such installation to be filed with the Fire Department for approval.

## FORMS FOR NOTICES TO PROPERTY OWNERS

Applicants, under the building zone resolution, desire of Form 13A, for notices to property owners, such forms are not to be supplied by this office. Each applicant is entitled only to one copy of Form 13A, and must fill out.

If he desires additional copies for his own convenience, in notifying property owners, he can obtain such copies from The O'Connell Press, 176 Park Row, Manhattan, at three cents each, postage to be added if the forms are to be supplied by mail.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board in offices of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice of date for the hearing in his case, and that the plea of failure to receive such notice is no excuse for neglect to appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of failure of the appellant or petitioner to file necessary data, or by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

—Municipal Building, Rooms 1001 to 1015.

PHONE—Worth 0184.

HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to noon.

Communications should be addressed to the chairman of the board.

### CONTENTS

Issue of the Bulletin contains, in the order given—

cket.

l of Clerk's Calendar.

e Trial Calendar.

tices in Building Zone Cases.

utes of Special Meeting, May 21, 1926, at 10 a. m.

utes of Regular Meeting, May 25, 1926, at 10 a. m.

utes of Regular Meeting, May 25, 1926, at 2 p. m.

es.

gress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m. THE LIBRARY OF THE  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building, Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the engineers, pertaining to the work of the board, will be seen only between the hours of ten in the morning and one in the afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the Building Zone Resolution, and its object is to give interested property owners opportunity to file objections, if any, and will be called in Room 1013, Tuesday, June 1, 1926, at 2 o'clock. At this call each case is set for hearing on a definite day.

The next subsequent Call of the Calendar will be on Tuesday, June 8, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the calendar of cases that have been definitely set for hearing on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in connection with which court proceedings are pending or in progress, nor accepted that are not filed within twenty days from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, application or petition shall be regarded as a mere notice of intention to seek relief until it is filed on the form required by the rules of this board.

Upon receipt of any such communication the writer will be supplied with the official forms for presenting his appeal, application or petition, and if he fails to supply the data required thereon, within twenty days, his case may be dismissed for lack of prosecution.

At the time of filing an application, the appellant or petitioner shall forward a signed notice of appeal addressed to the administrative official (either superintendent of buildings or fire commissioner) and file with this board a duplicate of said notice.

Petitioners are advised that their plans must indicate the points of the compass so as to establish the true location and position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

### THE RESOLUTION:

(1046-25-A)

WHEREAS, A. W. Brockway, for Muirson Label & Co., owner, filed, October 14, 1925, an appeal from a decision of the fire commissioner, affecting premises situated at the northwest corner of Decatur street and Irving avenue, Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 14, 1925, reads (Order No. 83504-F):

"1. Install a standpipe system with risers 4 in. in diameter in the one-story building on Decatur street, tested to withstand a pressure of 300 lbs. per sq. inch, extending from cellar to roof, with no check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure.";

and

WHEREAS, the building is non-fireproof, two stories in height, 255 ft. 5 in. by 100 ft. (approximately 25,550 sq. ft.) in area; subdivided by 12 in. brick wall openings therein protected with fire doors) into five approximately equal subdivisions of, respectively, about 5,110 sq. ft. in area; OCCUPIED for the manufacture of shipping containers, 83 persons in entire building;

WHEREAS, appellant contends that the building is accessible from four sides; that it is protected by an automatic sprinkler system and also a 2 in. standpipe system; that there are three fire hydrants located within 50 ft. of the building.

Resolved, that the order of the fire commissioner be it hereby is modified, and the appeal be and it be granted on condition that the building as now subdivided in area by walls of approved masonry, with all openings therein protected with fireproof doors, shall be maintained that the premises shall be equipped with an approved sprinkler system; that the building shall not be in

# MINUTES

light, area or dimension; and *granted* so long as conditions as to use and occupancy otherwise shall remain unchanged.

APPELLANT—Irwin M. Berliner, for Estate of G. Gennert, owner; H. Gennert, executor.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—24-26 East 13th street, Manhattan.  
APPEARANCES—

For Appellant: None.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(8-26-A)

WHEREAS, Irwin M. Berliner, for Estate of G. Gennert, executor, owner, filed, January 4, 1926, an appeal from an order of the fire commissioner, affecting premises 24-26 East 13th street, Borough of Manhattan;

WHEREAS, the order of the fire commissioner, dated October 16, 1925, No. 81073-F, reads:

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at east, west and south sides of building, or other approved protection, as per Section 375, Article 18, Chapter 5, of the Code of Ordinances."

WHEREAS, the building is non-fireproof, six stories in height, 49 ft. 2 3/4 in. by 103 ft. 2 in., irregular, in area at ground level, and 49 ft. 2 3/4 in. by 93 ft. 3 in. in area above. OCCUPIED: Basement, store; 1st story, part of 2nd story and 3rd story, photographic supplies, 24 persons; the remainder of the building occupied for the manufacture of glass windows, by bookbinders, engravers, etc., a total of 64 persons in entire building; there are windows on the easterly wall, in the westerly wall and in the south wall of the court which are within 30 ft. of openings adjoining premises and within 50 ft. of neighboring

and *Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, only so far as it affects openings not on course of escapes or interior stairs or elevator shaft.

APPELLANT—Thomas P. Lancaster, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—25-27 Bergen street, Brooklyn.  
APPEARANCES—

For Appellant: W. R. Redmond.  
For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0 and

## THE RESOLUTION:

(133-26-A)

WHEREAS, Thomas P. Lancaster, owner, filed, February 16, 1926, an appeal from an order of the fire commissioner, affecting premises 25-27 Bergen street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated October 16, 1925, Order No. 98746-LC, reads:

"6. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 30 lbs. per square inch, for all welded tanks, as per Rule 7, Section 1, of the Fuel Oil Rules.

"8. Provide a hydrostatic test of not less than 150 pounds per square inch for all fuel oil carrying piping of a normal working pressure of less than 100 pounds, as per Rule 8, Section 3 of the Fuel Oil Rules."

and

WHEREAS, the building is non-fireproof, three stories and cellar in height, 40 ft. 1 in. by 94 ft. in area; OCCUPIED as a tenant factory; 1st story, parquet floors, 3 persons; 2nd story, perfumes, 4 persons; 3rd story, ice cream, 3 persons; a fuel oil burning system has been installed in the cellar, using grade "A" oil, with the Williams Oil-O-Matic Burner (approved by the board under Cal. No. 918-22-SA), properly connected by piping to an underground storage tank of 1500 gallons capacity; and

WHEREAS, the appellant contends that the fuel oil burning system was installed October, 1923; that the installation of the storage tank and piping complied with the fuel oil rules in force at that time.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 6, on condition that certificate of factory test shall be filed with fire commissioner; and, as to Item 8, on condition that all piping throughout the fuel oil burning equipment shall be of standard wrought iron pipe, and that the installation shall comply with the fuel oil rules in all other respects.

143-26-A.

APPELLANT—James R. Sparrows Estate, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—50-54 Greenpoint avenue and 47-55 Milton street, Brooklyn.

APPEARANCES—

For Appellant: Edwin A. Sparrow.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(143-26-A)

WHEREAS, James R. Sparrows Est., owner, filed, February 18, 1926, an appeal from an order of the fire commissioner, affecting premises 50-54 Greenpoint avenue and 47-55 Milton street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated November 13, 1925, Order No. 86153-F, reads:

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2 1/2 inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2 1/2 inch standard hose attached thereto."

# MINUTES

WHEREAS, the premises, facing on three street fronts, consist of one frame building, 75 ft. by 105 ft. (8,550 sq. ft.) in area; abutting and part of the same plant with a non-fireproof building 85 ft. by 100 ft. (8,500 sq. ft.) in area; they are two stories in height, connected by three doorways on 1st story and two doorways on 2nd story, all of which are provided with approved fire doors. OCCUPIED: 1st story, manufacture of chairs and barrels, 7 persons; 2nd story, manufacture of soda water, 7 persons; and

WHEREAS, the appellant contends that the fire hazard and occupancy are small; that each floor area is less than 10,000 sq. ft.; furthermore, this building is located on the corner where firemen have access from three street fronts.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased in height, area or dimension; that the building shall remain as now subdivided, all openings in brick wall equipped with approved fire doors at both sides of each opening; that the premises shall be equipped throughout with four (4) 40-gallon casks on each floor, each cask equipped with six (6) water buckets, casks and buckets to be painted red and marked "FIRE".

169-26-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Servel Corp., lessee.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—607-611 West 47th street, Manhattan.

APPEARANCES—

For Appellant: Herman E. Horwood.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal denied.

THE VOTE TO GRANT—

Affirmative .....	0
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5

THE RESOLUTION:

(169-26-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Servel Corporation, lessee, filed, February 27, 1926, an appeal from an order of the fire commissioner, affecting premises 607-11 West 47th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 23, 1925 (Order No. 32312-LC), reads:

"8. Remove all containers of methyl chloride from premises. Section 151, Chapter 10, Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, two stories in height, 75 ft. by 100 ft. 5 in. in area; OCCUPIED as a warehouse for the storage of electric refrigerators and also as a garage for the storage of ten commercial automobile vehicles (property of lessee of premises); there being also 1,000 pounds of methyl chloride (the refrigerating medium), in liquid form, stored in a fireproof room, equipped with a fireproof door, said room being located under the ramp leading to the 2nd story, 18 persons in entire premises; and

WHEREAS, appellant contends that the methyl chloride is not explosive; that it gives off no fumes and that all refilling from the large containers into the smaller units used in the refrigerators is done within the fireproof room.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

176-26-A.

APPELLANT—John J. Gilmartin, for M. Steenmarter, owner.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—119-125 West 25th street, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on conditions.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(176-26-A)

WHEREAS, John J. Gilmartin, for M. Steenmarter, filed, March 1, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 119-125 West 25th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 1, 1925, reads (Order No. 81131-F):

"1. Provide iron shutters at all openings in the rear wall above 1st story which are distant in a line less than 30 ft. from any opening in any building and not in the same plane with said openings and which are not more than 50 ft. above a boring roof at rear and east side of building, on approved protection, as per Section 376, Article Chapter 5, of the Code of Ordinances.";

and

WHEREAS, the building is fireproof, 11 stories in height, 100 ft. by 93 ft. in area; OCCUPIED as a tenant building, 75 persons per story; EQUIPPED with a sprinkler system; and

WHEREAS, there are 19 openings in the rear wall, 1st story above the 1st story, within 30 ft. of opening in neighboring building to the rear and also eight openings in the easterly wall, on the 3rd to the 8th stories inclusive, within 50 ft. of the ROOFS of neighboring two and four-story buildings to the east; and

WHEREAS, appellant contends that the buildings to the rear are fireproof, sprinklered, and that the windows therein are fireproof and that the rear wall of the building in question are glazed with wire mesh; and

WHEREAS, appellant contends that the openings in building in question are fireproof on the 2nd to 6th stories inclusive; that the buildings forming the exposure to the rear are fireproof, sprinklered, and the windows are fireproof, and proposes to extend the existing sprinkler system by providing sprinkler heads within 18 in. of unprotected windows, and in rear to the exposures to the east proposes to provide fireproof windows at all openings within 50 ft. of the neighboring roofs to the east.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the existing triple-mullioned windows shall be equipped with not less than two heads each, and all single sash openings shall be equipped with one head; and *granted* so long as conditions of occupancy and use, also adjoining exposures, remain substantially unchanged.

179-26-A.

APPELLANT—Samuel Rosenblum, for S. M. Rosenblum, owner.

SUBJECT—Appeal from order of fire commissioner.

# MINUTES

PREMISES—Northeast corner of Grand & Rust streets (High street) and southeast corner of Bielby and Rust streets (High street), Maspeth, Borough of Queens.

## APPEARANCES—

For Appellant: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(179-26-A)

WHEREAS, Samuel Rosenblum, for S. Mayer & Sons, Inc., filed, March 1, 1926, an appeal from an order of the fire commissioner, affecting premises northeast corner of Grand and Rust streets, Maspeth, Borough of Queens; and WHEREAS, the order of the fire commissioner, dated July 30, 1925, reads (Order No. 83118-F):

"Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

WHEREAS, the building, facing on three street fronts, is fireproof, one story in height, 198 ft. by 61 ft. (approximately 12,000 sq. ft.), irregular in area; and having three-story extensions to the east; OCCUPIED for the manufacture of hats, 225 persons in entire premises; and

WHEREAS, appellant contends that the entire premises is protected by an automatic sprinkler system, connected by 6 in. connections to city main, with a siamese connection on Grand street, and also one on High street, and contends, further, that the building is under constant supervision by a watchman and clock service.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall be equipped with an approved two-source wet sprinkler system; that a watchman system or service shall be maintained throughout the full 24 hours; that the premises shall not be increased in height, area or dimension; and granted so long as conditions as to occupancy and use shall remain unchanged.

## THE RESOLUTION:

(183-26-A)

WHEREAS, Croker National Fire Prevention Engineering

Company, for Globe Supply Company, owner, filed, March 2, 1926, an appeal from an order of the fire commissioner, affecting premises 1986-92 Broadway, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated December 26, 1924, Order No. 52092-F, reads:

"1. Install a yard hydrant as per Rule 37 adopted by the Board of Standards and Appeals July 20, 1923, Sec. 776, Greater New York Charter."

and

WHEREAS, the premises include almost the entire block, about 50,000 sq. ft. in area, with several frame sheds and a two-story concrete office building; OCCUPIED as a lumber yard, 10 persons; and

WHEREAS, the appellant contends that the premises open on four street fronts by means of seven large gateways leading to five driveways, 20 ft. in width on the premises; that there are twelve (40-gallon) tanks with 6 pails to each tank on the premises, and 7 fire hydrants on the street adjacent to the premises; that there are two fire alarm boxes within 500 ft. of the premises.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the layout as to aisles and passageways with a width of not less than 20 ft. shall be maintained; that the lumber stacks shall not exceed a height of 15 ft.; and that the plant shall be equipped in addition to existing fire protection with not less than ten (10) 40-gallon water casks, each cask equipped with six (6) water buckets, casks and buckets to be painted red and marked "FIRE".

APPELLANT—Knute Olsen, for Alice Kambourian, owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—265 Lexington avenue, Manhattan.

## APPEARANCES—

For Appellant: Knute Olsen.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....	5
Negative .....	0
Absent .....	0

## THE RESOLUTION:

(184-26-A)

WHEREAS, Knute Olsen, for Alice Kambourian, owner, filed, March 2, 1926, an appeal from an order of the fire commissioner, affecting premises 265 Lexington avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 9, 1926, No. 33007-LC, reads:

"1. Provide a hydrostatic test of not less than one hundred pounds per square inch for all grade B Fuel Oil carrying piping as per Rule 25, Sec. 2 of the Fuel Oil Rules.

"2. Provide a hydrostatic test of fuel oil storage tank or tanks of at least 30 pounds per square inch for all welded tanks, as per Rule 7, Sec. 1-b of the Fuel Oil Rules.

OR

"Provide a hydrostatic test of fuel oil storage tank or tanks of at least 25 lbs. per square inch, for all riveted tanks as per Rule 7, Sec. 1-b of the Fuel Oil Rules.

"3. Provide a pilot light for each automatic fuel oil burning system of an adequate intensity, in each com-

# MINUTES

bustion chamber, so arranged as not to be easily extinguished, as per Rule 28, of the Fuel Oil Rules.”;

and

WHEREAS, the building is non-fireproof, four stories in height, 16 ft. by 52 ft. in area; OCCUPIED as a residence, the owner having installed a fuel oil burning system, using grade “B” oil with a Powerlight Oilheat burner connected by piping to a 200-gallon storage tank located in the yard and enclosed with 4 in. terra cotta blocks; and

WHEREAS, the appellant contends, in regard to Items 1 and 2, that the piping throughout is known as standard, the 200-gallon storage tank complies with the fuel oil rules of January 18, 1924, and also had a shop test of 40 lbs. per sq. ft.; in regard to Item 3, that the burner used is non-automatic and does not require a pilot light.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, as to Item 1, *on condition* that the equipment shall be provided with standard wrought iron pipe throughout; as to Item 2, *on condition* that certificate of factory test shall be filed with fire commissioner; and as to Item 3, *on condition* that the fuel oil installation shall comply with the fuel oil rules in all other respects.

APPELLANT—John J. Gilmartin, for Lally Column Company, Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—211-249 Lombardy street, Brooklyn.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative

Absent

THE RESOLUTION:

(188-26-A)

WHEREAS, John J. Gilmartin, for Lally Column Company, Inc., owner, filed, March 4, 1926, an appeal from an order of the fire commissioner, affecting premises 211-249 Lombardy street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 25, 1925, No. 82573-F, reads:

“1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.”;

and

WHEREAS, the building is non-fireproof, one story and pent house (23 ft.) in height, 200 ft. by 212 ft. (about 40,000 sq. ft.) in area. OCCUPIED: 1st story, for the manufacture of Lally Columns, 35 persons; pent house, office, 10 persons; and

WHEREAS, the appellant contends that there are a great many doors and windows in the street walls facing Lombardy street, Gardner avenue and Anthony street, rendering easy access to the building; that the only materials used in the building are steel pipes, mixture of sand and cement, eliminating all possible fire hazard; the appellant further proposes to provide fire extinguishers, tanks and fire buckets.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall not be increased

in height, area or dimension; and *granted* so long as the use, occupancy and operation of the premises shall remain unchanged.

100-26-A.

APPELLANT—Erna Stein, lessee.

SUBJECT—Appeal from order of superintendent of buildings.

THE RESOLUTION:

(100-26-A)

WHEREAS, Erna Stein, for Ormand Realty Co., owner, filed, February 2, 1926, an appeal from an order of the superintendent of buildings, affecting premises No. 161 West 34th street, Borough of Manhattan; and

WHEREAS, the order of the superintendent of buildings dated January 12, 1926, reads (Violation Order No. 532 1925):

“You are hereby notified that the building known as Number 161 West 34th Street, New York, does not conform to Section 215, Article 16, Chapter 23, of the section Code of Ordinances in the respects noted below:

“In that of placing and maintaining an electric sign on the front of building at 2nd story; building on street restricted as to electric signs.

“YOU ARE HEREBY DIRECTED TO REMOVE SAID SIGN.”;

and

WHEREAS, the building is non-fireproof, four stories in height, 25 ft. by 100 ft. in area. OCCUPIED: 1st story, shoe store; mezzanine, beauty parlor, with an electric sign on the show window; upper stories, offices; and

WHEREAS, appellant contends that the sign is maintained within the building line and that the order does not apply to this type of sign; and

WHEREAS, no evidence was submitted to the board that permit had been obtained for erection of electric sign, and no contradiction by appellant's representative to statement made by opponent that no permit was ever procured from building department.

Resolved, that the order of the superintendent of buildings be and it hereby is *affirmed*, and the appeal be and it hereby is *denied*.

THE RESOLUTION:

(431-25-A)

WHEREAS, O'Connor & Bain, for Lotos Oil & Distributing

# MINUTES

Corp., owner, filed, April 21, 1925, an appeal with the board of appeals, from an order of the fire commissioner, directing premises 218th to 220th street and Harlem River, Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 1925, reads.

"5. All storage tanks comprising or forming a part of an oil storage plant shall be buried so that the tops thereof shall be at least two feet below the grade level."

WHEREAS, the premises consist of a plot of ground, lying between Ninth avenue and Harlem river, 320 ft. by 110 ft. in area, upon which is located the oil storage and distributing plant of the Lotos Oil Distributing Corp., consisting of an office, a pump house and also twelve (12) 500 gallon storage tanks, each 11 ft. in diameter and 11 ft. long, used for the storage of gasoline; the tanks are located in a concrete enclosure of sufficient area and height to accommodate the liquid capacity of said tanks; the tops of tanks are located approximately 6 ft. above ground level; and

WHEREAS, appellant contends that, due to the nature of the soil and the height of the water table, it would be a hardship to comply with the order of the fire commissioner.

Cal. No. 421-25-A.

June 8th, 1925.

PREMISES. 218th to 220th Street & Harlem River, Manhattan.

## REPORT OF COMMITTEE:

A committee of the Board consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Holland and Connell visited the above premises on June 8th, 1925.

The appeal is before the Board on an order of the Fire Commissioner requiring the burial of oil storage tanks. The appellant seeks relief from the entire burial of the tanks for the reasons that the ground is on the banks of the Harlem River and if compelled to bury same they would be below tide level. The property is now occupied with temporary wooden shacks and one story frame structures set on discarded scows.

The entire west side of 9th Avenue (north of the 3rd Avenue car barns on 217th Street) is vacant, so there is no improvement that would be in any way impaired or adversely affected by any means of hazard.

The plans before us on this appeal, propose the installation of twelve steel tanks, installed horizontally; the natural grade is approximately six feet above tide water.

The committee recommends that the proposed installation be separated into batteries of not more than three tanks to each battery and that the tanks be set approximately half-way (diameter) below grade and that the enclosure walls shall be built of reinforced concrete, carried to the top of the tanks, and all enclosures and tanks to be filled and covered over with earth; the fill to extend not less than three feet above the top of the tanks, and that a reinforced concrete wall shall be erected outside the tank installation enclosure; these outside enclosure walls to be not less than 10 ft. high, the earth fill to be sloped from the top to the inside of the exterior enclosure walls at bottom; the tanks so installed to be equipped in accordance with the rules of the Fire Department and the ordinances in all other respects; a yard hydrant with anti-freezing valves and siamese connection to be provided at the end of the dock, connected to and supplied from approved pumps hooked up to the city water mains, and that a revolving water line nozzle shall be provided, one to each battery enclosure of three (3) tanks, and that an approved liquid fire-fighting medium shall be provided and maintained operative from an independent pump house, the pump house to be isolated from the tank

enclosure and to be constructed fireproof. It is further recommended that the sub-dividing wall between each battery of tanks shall be carried up at least 6 ft. above the top of the earth fill of the tanks, the ends of these walls to be returned on a rack of 45 degrees at opposite ends, and that a return of the drawings shall be made to this Board for approval, in compliance with the foregoing report.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
HENRY L. CONNELL,  
JAMES P. HOLLAND.

and

WHEREAS, this appeal was granted by the board at its meetings June 9, 1925, November 24, 1925, and January 26, 1926, on certain conditions, and appellant requested a modification of these conditions; and

WHEREAS, plans were filed and approved by the board July 28, 1925, and appellant now requests a further modification of the resolution and of the plans.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the equipment shall be installed in accordance with the recommendations of the report of the committee of inspection, except that the siamese connection at end of dock and the revolving water line nozzle to the battery enclosure can be omitted and the entire premises be enclosed in a wall of reinforced concrete or approved masonry, the exterior of front wall facing the street to be finished with face brick; the plans to be approved permitting a bypass on the suction and discharge lines of tanks Nos. 1 and 12; and permitting the concrete walls separating the batteries of tanks to be not less than 6 ft. in height above the top of tanks, and that the earth fill above the top of the tank shall be not less than 4 ft. in depth at any point. The necessary permits required by law to be obtained and work executed to completion without suspension or unnecessary delay.

## BUILDING ZONE CASES.

95-26-BZ.

APPLICANT—William F. Doyle, for Benj. Sobol, owner.

SUBJECT—Application (re: decision of fire commissioner), under sections 21 and 7a of the building zone resolution, to permit in a business district the extension and enlargement of an existing gasoline service station.

THE RESOLUTION:

(84-26-BZ)

WHEREAS, John J. Dunnigan, for Louis Manzi, owner filed, January 28, 1926, an application, under the building zone resolution, to permit in a residence district the maintenance of a bakery; premises 747 East 215th street, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 25, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that White Plains avenue is in a business district, and that East 215th street and East 216th street are both in residence districts; and

WHEREAS, the order of the superintendent of buildings rendered October 1, 1925, reads:

"You will please take notice that there exists a violation of Section 4 of the Building Code at the premises hereinafter described in that of building contrary to approved plan, to wit: building a stone extension at rear for use as baker's oven, same also being contrary to the Building Zone Resolution.";

and

WHEREAS, the premises consist of a two-story brick dwelling, 21 ft. 6 in. by 55 ft. in area, at the corner of which there is a stone oven 16 ft. by 16 ft. in area and 6 ft. in height; it is proposed to maintain this baker's oven; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted, only so far as it affects a one-story addition at the rear of the premises for business use, restricted to a one-story structure not exceeding 6 ft. in height and an area not in excess of 1 ft. sq., approximately, on condition that an open, unencumbered runway or side court, for the entire depth of the lot shall be maintained; that the entire structure otherwise of the street front shall be maintained and conducted as a conforming dwelling use; that there shall be no signs of any nature or description erected or maintained on the premises; and that all permits required for the conduct of the business on the premises shall be obtained within ninety days.

## THE RESOLUTION:

(358-26-BZ)

WHEREAS, New York Telephone Co., for Albert Schwarzler, owner, filed, April 23, 1926, an application, under the building zone resolution, to permit the extension from a business district into a residence district of a proposed telephone exchange building; premises south side of East 175th street, between Grand concourse and Walton avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 25, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 175th street is in a business district; that Grand concourse is in a residence district, below the concourse level at crossings, business; that Walton avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 15, 1926, reads:

"1. Erection of proposed business building (telephone exchange) in a business district extending into a residence district is contrary to provisions of Building Zone Resolution.";  
and

WHEREAS, the proposed building is of fireproof construction, seven stories in height, with a frontage of 264 ft. 11 in. and a depth of 100 ft.; to be occupied as a telephone exchange building; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7c and 7d of the building zone resolution, and that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, only so far as affects the structure above the level of the concourse, *on condition* that the building shall not exceed in height 11 stories above the concourse grade; that the entire structure shall be restricted to the use, conduct and operation of a telephone exchange, with such administration offices there as are incidental to and required in the conduct of a telephone exchange; that the front elevation on the concourse 167th street and Walton avenue shall be finished in brick, with architectural terra cotta or natural stone trimmings; that there shall not be more than one entrance to the concourse front of the structure; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.

275-25-BZ.

APPLICANT—John J. Beatty, on behalf of Leo Sheridan, owner.

SUBJECT—Application (re: decision of superintendent of buildings), to permit in a business district the erection and maintenance of a garage for storage of more than five (5) motor vehicles (for reconsideration and modification of structural requirements of resolution originally adopted).

PREMISES AFFECTED—88-110 Crown street, Brooklyn.

THE RESOLUTION:

(275-25-BZ)

WHEREAS, Leo Sheridan, owner, filed, March 11, 1925, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 88-110 Crown street, Borough of Brooklyn; and WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, May 25, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and WHEREAS, the use district maps accompanying the building zone resolution show that Crown street, Montgomery street and Bedford avenue are all in business districts; and WHEREAS, the decision of the superintendent of buildings, rendered March 10, 1925, reads:

"The erection of a public garage for more than five motor vehicles in a business district.";

and WHEREAS, the proposed building is of non-fireproof construction, two stories in height, with a frontage of 240 ft. and a depth of 131 ft.; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed it would be a hardship and practical difficulties in the way of carrying out the strict letter of the building zone resolution; and

WHEREAS, the premises is to be used as an automobile manufacturer's sales agency and distributing station, for automobiles in live storage, which are the property of the tenant or operator of the premises.

*Resolved*, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall be restricted to a one-story structure in height above grade, subdivided into three areas by walls of approved masonry, running above the roof, with not more than two openings in each partition, equipped with self-closing fireproof doors; that the two sections of the basement wall shall not exceed 66 ft. on the street fronts, the structure, at the centre of the premises, to be maintained without any cellar; that the rear and gable walls shall be unpierced throughout their entire height and length; that the entire premises shall be equipped with an approved one-inch water sprinkler system with not less than 4 in. connection to the city main; that the garage shall be erected fireproof, other than the roof construction, which shall be of flat design and fire retarded on the under side in accordance with the rules of the board of standards and appeals; that a 2½ in. fire line connected to the city main shall be provided on the interior, at the front of the building, at each opening, equipped with not less than 100 ft. of 2½ in. hose; that any gasoline storage shall be limited to one tank of not exceeding 550 gallons, located at approximately the centre of the structure; that all required permits shall be obtained within ninety days and the work completed within six months from the date of this action.

3-23-BZ.

APPLICANT—Gray & Tomlin, for Kings County Buick, Inc., lessee.

SUBJECT—Application for reopening—amendment (re: decision of superintendent of buildings) to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles, also to be used as a motor vehicle repair shop.

PREMISES AFFECTED—62-100 Empire boulevard, Brooklyn.

APPEARANCES—

For Applicant: Andrew S. Derby.  
For Opposition: None.

ACTION OF BOARD—Application reopened and resolution modified.

THE RESOLUTION:

(558-23-BZ)

WHEREAS, Jenks & Rogers, for Realty Associates, owner, filed, May 7, 1923, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles and as a motor vehicle repair shop; premises 62-100 Empire boulevard, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, March 18, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Empire boulevard, Franklin avenue and Bedford road are business districts and Sterling street is a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 16, 1923, in acting on Application No. 6748-23, reads:

"Denied—Proposition contrary to the Zone Resolution, Art. II, Sec. 4. A public garage and repair shop in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 340 ft. and a depth of 100 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, the applicant has filed the duly acknowledged consents of the owners of 83 per cent of the property frontage deemed to be affected; and

WHEREAS, the board of appeals, under date of March 18, 1924, adopted the following resolution:

*Resolved*, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the structure be limited to a one-story building above grade, divided substantially into three (3) parts as indicated on plans on file in this appeal; that the rear and gable walls shall be of brick construction and shall be unpierced throughout their entire height and length; that any openings in the subdividing walls of the structure shall be protected with self-closing fire doors; that the front of the building shall be finished substantially in accordance with the design of the facade filed in this application, any exposed masonry work of front elevation to be of face brick and ornamental trimmings of architectural terra cotta or stone;

*Resolved, further*, that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.";

and

WHEREAS, the present lessee now requests a modification of this resolution to permit openings in the division wall between these premises and No. 1039-1057 Franklin avenue.

*Resolved*, that the board of standards and appeals does hereby modify the resolution adopted March 18, 1924, to permit operation of both premises by one lessee during the continuance of the lease, as a sales and distributing sta-

# MINUTES

tion for automobile manufacturers, *on condition* that not more than one opening be permitted between the adjoining buildings, not exceeding 80 sq. ft., protected with self-closing fireproof doors, only during the continuance of the existing lease, and to be built up with approved masonry at the termination of the lease.

WHEREAS, John De Hart, for Edith P. Ruckert, owner, filed, April 18, 1923, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 1039-1057 Franklin avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, June 19, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Franklin avenue, Washington avenue and Empire boulevard are business districts; and

WHEREAS, the decision of the superintendent of buildings reads:

"Denied—Proposition contrary to zone resolution. Art. 2, sec. 4, a storage garage for more than five motor vehicles in a business district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 169 ft. and a depth of 188 ft.; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, there existed on this street between the intersecting streets on July 25, 1916, a stable for more than five horses; and

WHEREAS, the board of appeals, under date of June 19, 1923, adopted the following resolution:

"Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that all permits necessary for the prosecution of the work shall be obtained within nine months and the structure completed within eighteen months from the date of this action; that the rear and gable walls shall be unpierced throughout their entire height and length; that the building shall be restricted to one story in height, of flat-roof design and construction; that any skylights in the roof of the garage shall be glazed with plain glass, protected above and below with wire guards; and that the front of the building shall be built, as to

material and architectural treatment and design, substantially in accordance with the drawings and elevations on file in this appeal.";

and

WHEREAS, the present lessee now requests a modification of this resolution to permit openings in the division wall between these premises and No. 62-100 Empire boulevard.

Resolved, that the board of standards and appeals do hereby modify the resolution adopted June 19, 1923, to permit operation of both premises by one lessee during the continuance of the lease, as a sales and distributing station for automobile manufacturers, *on condition* that not more than one opening be permitted between the adjoining buildings, not exceeding 80 sq. ft., protected with self-closing fireproof doors, only during the continuance of the existing lease, and to be built up with approved masonry at the termination of the lease.

## THE RESOLUTION: (1191-25-S)

WHEREAS, William F. Regan, for Samuel Glass, owner,  
 filed, November 17, 1925, a petition for variation from the  
 requirements of the labor law, as cited in an order of the  
 fire commissioner, affecting premises 299 Wallabout street,  
 Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated De-  
 cember 2, 1924 (Order No. 69078-LD), reads:

"1. Arrange the fire escape on the south side west  
 wing of rear building and the opening leading thereto  
 and the windows opening on the course thereof so  
 that same are in compliance with the provisions of Sec-  
 tions 273 and 274 of the Labor Law. \* \* \* Among  
 the defects noted on this fire escape are the follow-  
 ing: \* \* \*. 3. No fireproof passageway from termina-  
 tion to street.

"2. Remove the substandard fire escape on the  
 side west wing or reconstruct same as per Sec  
 of the Labor Law and Rule 3, as amended by the  
 of Standards and Appeals, May 9th, 1924. Among  
 defects noted are the following: 1. No stairs cor-  
 ing balconies. \* \* \*. 3. No egress from termin-

"3. Arrange the fire escape on the front of east  
 of building and the openings leading thereto and  
 windows opening on the course thereof so that sam  
 in compliance with the provisions of Sections 273  
 274 of the Labor Law. \* \* \*. Among the de  
 noted on this fire escape are the following: \* \* \*  
 No fireproof passageway from termination to stre

"4. Remove the substandard fire escape on the  
 of building or reconstruct same as per Sec. 274 o  
 Labor Law. \* \* \*. Among the defects noted ar  
 following: \* \* \*. 1. Windows on course not firep  
 self-closing. 2. No drop ladder in guides from l  
 balcony to street.

"5. Enclose the interior stairway at east sid  
 building serving as a required means of exit, and  
 landings, platforms, passageways, connecting ther  
 on all sides, with partitions of fire resisting mat  
 extending continuously from 1st to the undersid  
 the roof boards constructed as per Sec. 271 of  
 Labor Law \* \* \*.

"6. Provide a second means of exit from 4th  
 east wing, as per Section 271 of the Labor Law."

and

WHEREAS, the premises consist of a "T"-shaped non-  
 proof building; the central portion being four stories  
 east wing four stories and the west wing three stori  
 height, having a frontage of 25 ft., 125 ft. wide at the  
 and the wings being, respectively, 25 ft. and 27 ft. 6 i  
 depth. OCCUPIED: 1st story, assembling lighting fixt  
 4 persons; upper stories, clothing manufacture, 55 pe  
 on each story; EQUIPPED with a fire alarm signal  
 tem. EXITS: One interior wooden stairway, exten  
 from the 1st to top story, enclosed in wood partitions,  
 covered on both sides, with fireproof doors at openings  
 iron bridge connecting the fourth stories of the central  
 tion and the east wing; four fire escapes; one on the s  
 side of the west wing, extending from the top story  
 cony to yard; with egress from yard by means of  
 sageways, through buildings on front of lot, leading  
 street; one passage being a fire-retarded covered drive  
 9 ft. wide and the other being the 3 ft. hallway of a d  
 ing on the front of the lot and in same ownership as p  
 ises in question; a fire escape on the east side of the  
 wing, extending from 3rd story balcony to yard, with  
 egress from termination as the fire escape on south  
 of west wing; a fire escape in the front of the east  
 extending from the top story balcony to yard, with e  
 from yard to street by means of hallways of two dwell  
 on the front of lot and under same ownership as pre  
 in question; and a fire escape on the front of the buil  
 having fireproof windows on the 3rd and 4th stories  
 extending from the top story balcony to the 2nd story  
 cony, with a PROPOSED counterbalanced stair to st  
 and

WHEREAS, petitioner requests the acceptance of the  
 isting means of egress from the termination of the  
 escapes; and, in regard to the fireproofing of the win  
 along the course of the fire escape on the front of the b  
 ing, contends that the windows on the 1st and 2nd st  
 were built for display purposes and that they are gl  
 with plate glass, and requests the acceptance of the e  
 ing interior stairway.

Resolved, that the board of standards and appeals  
 hereby make a variation from the requirements of the  
 law, and that the petition be and it hereby is granted,  
 Order No. 69078-LD, Items 1, 2, 3 and 4, on condition  
 the existing fire escapes shall be made structurally s

# MINUTES

that all openings on the course of same shall be provided self-closing fireproof windows; that the fire escape on Vallabout street front shall be provided with counter-  
ce stairs to street, with egress from the termination  
e fire escape on the rear of building, through the hall-  
of the tenement house on the front of the lot in the  
ownership; *granted*, as to Item No. 5, *on condition*  
Items Nos. 1, 2, 3 and 4, as modified, shall be com-  
with and that the present enclosure of pressed metal  
self-closing fireproof doors at the openings shall be  
ained; *granted*, as to Item No. 6, *on condition* that  
necting iron balcony shall be provided from the rear of  
th story of the building to the four-story building on  
Vallabout street front; *granted* only so long as condi-  
as to use and occupancy remain unchanged and that  
ntire properties shall remain in a single ownership and  
tion.

IE RESOLUTION:

(45-26-S)

HEREAS, Samuel Rosenblum, for Dobbs & Company, les-  
filed, January 19, 1926, a petition for variation from  
requirements of the labor law, as cited in orders of the  
commissioner, affecting premises 618-20 Fifth avenue  
2 West 50th street, Borough of Manhattan; and

HEREAS, the orders of the fire commissioner, dated  
h 23, 1925, read:

No. 74328-LD—

"1. Extend the interior stairway at the south side  
of building No. 620 Fifth Avenue to the roof, as per  
Section 271 of the Labor Law, said extension and the  
landings and passageways connecting therewith to be en-  
closed on all sides with partitions of fire resisting mate-  
rial extending at least 3 ft. above the roof, as per Sec-  
tions 271 and 272 of the Labor Law \* \* \*.

"2. Extend the interior stairway at the west side of  
No. 2 West 50th Street to the roof, as per Section  
271 of the Labor Law, said extension and the landings  
and passageways connecting therewith to be enclosed  
on all sides with partitions of fire resisting material  
extending at least 3 ft. above the roof, as per Sections  
271 and 272 of the Labor Law \* \* \*.

"3. Enclose the interior stairway at the west side  
of No. 2 West 50th Street serving as a required means  
of exit and the landings, platforms and passageways  
connecting therewith on all sides with partitions of fire  
resisting material extending continuously from the cel-  
ar to 3 feet above the roof, constructed as per Section  
271 of the Labor Law \* \* \*."

Order No. 74329-LD—

"1. Provide approved self-closing fire doors at open-  
ings leading to stairway in 620 Fifth Avenue portion  
of building on all stories, opening outwardly so as not

to obstruct the stairway as per Section 271 of the  
Labor Law and Rule 507 of the Industrial Code

OR

"Reduce the area of wire glass in doors leading to  
interior stairway at the south side of No. 620 Fifth  
Avenue on all stories so that no single pane of glass  
exceeds 360 square inches of area and not more than  
720 square inches on any one story as per Section 271  
of the Labor Law and Rule 505 of the Industrial Code  
as amended by the Board of Standards and Appeals,  
April 3, 1923.";

and

WHEREAS, the premises consist of a group of three in-  
terconnected non-fireproof buildings, No. 618 and No. 620  
Fifth avenue being, each, six stories (No. 618 having a  
pent house story) in height, 25 ft. in width and 100 ft. in  
depth; No. 2 West 50th street being five stories in height,  
25 ft. by 60 ft. in depth at 1st story and 25 ft. by 40  
ft. in area above. OCCUPIED: 618 Fifth avenue—1st fl.,  
store, 6 persons; 2nd fl., show room, 7 persons; 3rd fl., of-  
fices, 20 persons; 4th fl., work room, 30 persons; 5th fl.,  
show room, 5 persons; 6th fl., offices, 6 persons; pent house,  
stock, 2 persons. 620 Fifth avenue—1st fl., store, 5 per-  
sons; 2nd fl., show room, 4 persons; 3rd fl., show room, 4  
persons; 4th fl., show room, 3 persons; 5th fl., work and  
show room, 15 persons; 6th fl., studios, 6 persons. 2 West  
50th street—1st fl., store, 5 persons; 2nd fl., show room, 2  
persons; 3rd fl., show and rest room, 1 person; 4th fl., work  
and show room, 8 persons; 5th fl., work room, 8 persons;  
EQUIPPED with a fire alarm signal system. EXITS:  
Fifth avenue section—One interior fireproof stairway, ex-  
tending from 1st story to roof of No. 620 Fifth avenue;  
an iron ladder leading to scuttle in roof and also a sepa-  
rate stairway leading to the roof of the pent house. West  
50th street section—A wooden stairway extending from the  
1st story to top story, with iron ladder to scuttle in roof;  
a regulation exterior stairway on the rear of No. 618 Fifth  
avenue, with party wall balconies connecting No. 618 and  
No. 620, extending from the roof of the pent house to the  
yard of Nos. 4-6 West 50th street, also connecting to roof  
of extension to south; and

WHEREAS, petitioner contends, in regard to extending the  
stairs in No. 620 Fifth avenue to the roof, that they do  
run to the roof and that there are two means of reaching  
the pent house roof on No. 618; and contends, further, in  
view of the light occupancy, and the horizontal openings,  
that the existing means of exit are adequate.

*Resolved*, that the board of standards and appeals does  
hereby *make a variation* from the requirements of the labor  
law, and that the petition be and it hereby is *granted*, as  
to Order No. 74328-LD, *on condition* that a fixed 45 degree  
iron stairs shall be provided from roof of the main building  
No. 620 to the roof of the pent house of No. 618 Fifth  
avenue; *denied*, as to Items No. 2 and 3; *granted*, as to  
Order No. 74329-LD, Item No. 1, only so far as it affects  
metal covered doors, with eight glass panels in each door,  
not to exceed 9 in. by 10 in., the panels to be subdivided  
with metal muntins; *granted* only so long as conditions as  
to use and occupancy remain substantially unchanged.

## THE RESOLUTION:

(67-26-S)

WHEREAS, Gresham Realty Company, Inc., for Orinoco Realty Company, owner, filed, January 26, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 127-133 West 26th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 18, 1925, No. 88447-LD, reads:

"1. Remove the candy stand from passageway of exterior screened stairway on east side of building on 1st story, Rule 6, Board of Standards and Appeals, adopted July 29th, 1924.";

and

WHEREAS, the building is fireproof, 12 stories in height, 88 ft. by 86 ft. in area; OCCUPIED as a tenant factory, 50 persons on each story; EQUIPPED with a sprinkler system. EXITS: An interior fireproof stairway, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings, two outside standard fireproof stairways; and

WHEREAS, the petitioner contends that the candy stand is situated in an out of the way corner; furthermore, the hall is kept clear of obstructions at all times.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

## THE RESOLUTION:

(1306-25-S)

WHEREAS, Erwin Rebafka, for Estate of J. W. T. Nichols, owner, filed, December 16, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 108 Grand street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated November 14, 1925, No. 87132-LD, reads:

"1. Extend the interior stairway at the west side of the building to the roof as per Section 271 of the Labor Law. Said extension shall be enclosed in partitions of fire resisting material. Extending to bulkhead on the roof, as per Section 271 of the Labor Law and Rule 1 of the Board of Standards and Appeals.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 90 ft. in area at 1st story and 25 ft. by 80 ft. in area above; OCCUPIED as a tenant factory; 1st story, cigars, 25 persons; 2nd story, multigraphing, 20 persons; 3rd story, knit goods, 10 persons; 4th story, waistbands, 13 persons; EQUIPPED with a fire alarm system.

EXITS: An interior wooden stairway, extending from 1st story to top story, enclosed in wooden partitions with wooden doors at openings, a ladder to roof scuttle, a standard fire escape on the front of the building, also a party wall fire escape on the rear of the building, having fireproof openings along the course thereof, extending from 2nd story to the top story, and a gooseneck ladder to roof; and EGRESS from the termination of the rear fire escape by means of the party wall balcony leading to No. 110 Grand street; ROOFS of adjoining buildings, 8 ft. higher at west same height at east; and

WHEREAS, the petitioner contends that, since Cal. No. 274-16-S was denied for the same subject matter, approved horizontal exits have been constructed in the west side wall at the 2nd, 3rd, 4th and 5th stories, leading to No. 110 Grand street; that the occupancy is small and the exits are now adequate.

*Resolved*, that the order of the fire commissioner be and it hereby is *affirmed*, and the petition be and it hereby is *denied*.

## THE RESOLUTION:

(50-26-S)

WHEREAS, Albert J. Courtney, for B. Tomby, Inc., lessee, filed, January 21, 1926, a petition for variation from requirements of the labor law, as cited in an order of fire commissioner, affecting premises 9 East 47th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 12, 1925 (No. 76955-LD), reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sections 273 and 274 of the Labor Law and the rules of the Board of Standards and Appeals, or carry out a proper alternative method of complying with the requirements of Section 271 of the Labor Law.

"Among the defects noted are the following:

"No 45 degree permanent or counterbalanced stairway from lowest balcony. No fireproof passage from termination to street. Openings on course of fire escape are not fireproof, self-closing.";

and

WHEREAS, the building is non-fireproof, five stories in height, 25 ft. by 65 ft. in area. OCCUPIED: 1st story, manufacture of lamp shades, 9 persons; 2nd story, manufacture of dresses, 8 persons; 3rd story, stock of men's clothing, 6 persons; 4th story, stock of linen and millinery and manufacture of corsets, 6 persons; 5th story, architect and an interior decorator, 5 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story (with ladder to bulkhead in roof), enclosed in wooden and plaster partitions with wooden doors at openings; a fire escape on the rear of the building, having unprotected

gs along the course thereof, extending from the top story balcony to the yard; with EGRESS from the termination of the fire escape by means of a door in fence leading to yard of building to the east, thence by means of fireproof passageway to street; ROOFS of adjoining buildings, 1 story above to the east and to west; and

WHEREAS, petitioner proposes to comply with the order accepting as to the egress from termination of fire escape street, and requests the acceptance of the proposed means of egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the fire escape, on condition that iron stairs shall be provided between this yard and the adjoining premises to the east, with egress through the adjoining yard at the east by means of iron stairs to existing balcony fire escape at the 1st story, with fireproof passage leading directly therefrom to the street; that the building shall be equipped with an interior fire alarm system and that the occupancy shall not be greater than 25 persons above the 2nd story.

3-26-S.  
PETITIONER—A. E. Nast, for Henry Phipps Estate, owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—6-8 West 22nd street, Manhattan.

APPEARANCES—

For Petitioner: Frederick L. Wagner.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

THE RESOLUTION:

(58-26-S)

WHEREAS, A. E. Nast, for Henry Phipps Estate, owner, filed, January 22, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 6-8 West 22nd street, borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 5, 1926 (No. 89256-LD), reads:

"2. Provide safe and unobstructed egress from the lower termination of the fire escape at rear of building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout leading to the street, adequately lighted at all times during working hours, or by means of providing access to an open area having communication with the street, as per Sec. 273 of the Labor Law."

and  
WHEREAS, the building is non-fireproof, five stories in height, 56 ft. by 90 ft. in area at 1st story and 56 ft. by 5 ft. in area above, separated into two sections by a fore and aft brick wall. OCCUPIED: 1st story, store; upper stories, manufacture of dresses; 2nd story, 30 persons; 3rd story, 30 persons; 4th story, 30 persons; 5th story, 40 persons; EQUIPPED with a fire alarm signal system. EX-TS: An interior wooden stairway, extending from the 1st story to roof, enclosed in fire-resisting partitions with fireproof doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the roof to the yard; with EGRESS from the termination of the fire escape by means of an iron bridge connecting the 2nd story balcony with fire escapes on the adjoining building to west and also leading to the yard

of No. 11 West 21st street, all of these buildings being under the same ownership; ROOFS of adjoining buildings, to east 7 stories higher, to west same height; and

WHEREAS, petitioner contends that this fire escape was erected and approved some time ago in accordance with the requirements at that time and contends, further, that the existing means of egress from the termination of the fire escape are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the egress from the termination of the fire escape, on condition that the balcony of the premises shall be connected with rear balcony of premises No. 10, 12 and 14, with egress through premises No. 14 West 22nd street and to yard of premises No. 11 West 21st street, and thence through plain glass door to street front, all premises being in one ownership.

Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(74-26-S)

WHEREAS, Samuel Rosenblum, for Ocean Beach Realty Corporation, lessee, filed, January 27, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 35-37 West 3rd street, Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 17, 1926, No. 91178-LD, reads:

"1. Arrange the fire escape on the rear of building and the openings leading thereto and the windows opening on the course thereof so that same are in compliance with the provisions of Sec. 273 and 274 of the Labor Law \* \* \*.

"Among the defects noted are the following: No counterbalanced stairway from lowest balcony to ground. No fireproof passageway from termination to the street.

"2. Remove the substandard fire escapes on front of building or reconstruct same as per Sec. 274 of the Labor Law and Rule 3, Board of Standards and Appeals adopted May 9th, 1924.

"Among the defects noted are the following: Windows on course not fireproof, self-closing. No 60 degree connecting stairs."

and

WHEREAS, the premises consist of two non-fireproof seven-story buildings; No. 35 being 45 ft. by 95 ft. in area and No. 37 being 45 ft. by 145 ft. 5 in. in area; being connected on each story by horizontal openings (protected by double rolling shutter doors) in the division wall. OCCUPIED as a tenant factory; No. 35 West 3rd street—1st story, store; 2nd story, 10 persons; 3rd story, 7 persons; 4th story, 10 persons; 5th story, 10 persons; 6th story, 30 persons; 7th story, 20 persons. No. 37 West 3rd street—1st story, store; 2nd story, 5 persons; 3rd story, 10 persons; 4th story, 15

persons; 5th story, 7 persons; 6th story, 8 persons; 7th story, 2 persons; a total occupancy of 87 persons above the 1st story in No. 35 and 47 persons above the 1st story in No. 37; EQUIPPED with a sprinkler system having a gravity tank and pressure tank supply and also a telegraphic communication to fire headquarters. EXITS: An interior wooden stairway in each building, enclosed in fire-resisting partitions with fire doors at openings; a substandard fire escape on the front of each building, extending from the top story to the 2nd story balcony with counterbalanced stair to street; a party wall balcony on the rear wall of the buildings, with fireproof openings along the course thereof, with double rung connecting ladders, extending from the top story to the 1st story balcony; and

WHEREAS, petitioner contends that formerly orders of a similar general nature on the exits were the subject of an appeal—Cal. No. 687-18-S; that a variation was granted on condition, permitting a certain occupancy; that the conditions have been complied with, and, although the type of occupancy is different than the occupancy at the previous variation, the number of persons is not in excess of the former occupancy.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 1, on condition that stairs at an angle of not more than 60 degrees shall be provided throughout the run of the fire escape, and that a balcony platform shall be provided as a termination for the rear fire escape to yard of premises to the rear on Greene street, with egress through plain glass openings to Greene street, with knobs on the outside of existing doors to fire escapes; granted, as to Item No. 2, on condition that the existing fire escapes on the front of the building shall be made and maintained structurally safe, with connecting stairs at an angle of not more than 60 degrees, and that all windows on the course of the fire escape shall be made fireproof, or the openings protected by interior sprinkler heads, not more than 3 ft. distant therefrom; and granted only so long as conditions as to occupancy and use remain unchanged.

87-26-S.

PETITIONER—Shampan & Shampan, for Schuyler Development Co., Inc., lessee.

SUBJECT—Variation of labor law as cited in decisions of superintendent of buildings.

THE RESOLUTION:

(87-26-S)

WHEREAS, Shampan & Shampan, for Kap Realty Co., Inc., owner, filed, January 28, 1926, a petition for variation from the requirements of the labor law, as cited in decisions of the superintendent of buildings, affecting premises Nos. 553-555 Eighth avenue and No. 304 West 38th street, Borough of Manhattan; and

WHEREAS, the decisions of the superintendent of buildings, dated January 12, 1926, and January 22, 1926, respectively, read:

(N. B. Application No. 362-1925)

"12. All windows throughout must be fireproof, self-closing with panes not over 720 square inches each as per Labor Law, Sections 264-7. Panes larger than 720 square inches are not permitted."

(N. B. Application No. 362-1925)

"15. All windows throughout must be fireproof, self-closing as per Section 264-7 of Labor Law."

and

WHEREAS, the building, facing on Eighth avenue and also on West 38th street, is fireproof, 23 stories in height, irregular in area, having a frontage of 49 ft. 4 in. on Eighth avenue and 25 ft. on West 38th street. OCCUPIED: 1st story stores; upper stories, tenant factory, approximately 110 persons per story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions, with fireproof doors at openings; and

WHEREAS, there are openings in the street walls on the Eighth avenue and also the West 38th street fronts of the building, on the 1st, 2nd and 3rd stories, glazed with  $\frac{1}{4}$  in. plate glass; the maximum area of the glass on the 1st story being 16 ft. 8 in. by 10 ft. and on the 2nd and 3rd stories being 9 ft. by 6 ft. 8 in., and petitioner proposes to omit the self-closing devices on all windows in both street walls of the building, below the 13th story.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Item No. 12 as to the windows on the three (3) lower stories on the street front only, on condition that all openings shall be equipped with metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass; granted, as to Item No. 15, only so far as it affects the self-closing devices on the windows of the Eighth avenue frontage below the 13th story on the street fronts, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(90-26-S)

WHEREAS, Arthur Paul Hess, for David Perlman, owner, filed, January 29, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 345-351 West 35th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated January 22, 1926, reads (N. B. Application No. 40-1925):

"4. Proposed construction of windows is contrary to the requirements of Section 264, Subd. 7c of Labor Law and Rule 503 of Industrial Code."

and

WHEREAS, the building is fireproof, 14 stories in height, 83 ft. 4 in. by 98 ft. 9 in. in area. OCCUPIED: 1st story stores; upper stories, offices, show rooms and 25 per cent manufacturing; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, there are openings in the street wall of the building on the 1st and 2nd stories, glazed with plate glass; the maximum area of the glass on the 1st story being 16 ft. 1 1/2 in. by 7 ft. 4 in. and on the 2nd story being 3 ft. 9 in. by 7 ft.; and

# MINUTES

WHEREAS, petitioner contends that a strict compliance with the labor law as to the area of the glass would destroy the intended use of the lower two stories and, also, would affect the architectural appearance of the building.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, so far as it affects the windows on the street front of the two (2) lower stories, *on condition* that all openings shall be equipped with approved metal frames and sash, glazed with  $\frac{1}{4}$  in. polished plate glass, and that the requirements of the labor law shall be complied with in all other respects.

THE RESOLUTION:

(106-26-S)

WHEREAS, Samuel Rosenblum, for Simon J. Harding, petitioner, filed, February 5, 1926, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises 29 Mangin street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered January 16, 1926, reads (Alt. Applic. No. 2001-1925):  
"10. Stair enclosure must be fire retarded in accordance with Rule 504 of the Industrial Code.";

WHEREAS, the building is non-fireproof, seven stories in height, 25 ft. by 100 ft. 2 in. in area at 1st story and 25 ft. by 95 ft. 2 in. in area above. OCCUPIED: 1st floor, office; 2nd floor, front, apartment, 2 persons; rear, vacant at present; 3rd floor, manufacturing coats, 25 persons; 4th floor, manufacturing suits, 30 persons; 5th floor, vacant at present; 6th floor, rear, manufacturing coats, 18 persons; 7th floor, vacant at present; vacant when occupied will not exceed capacity of interior (28 persons per story); EQUIPPED with a fire alarm system. EXITS: An interior wooden stairway, existing from the 1st story to top story; enclosed in wood sash, covered with wood sheathing,  $\frac{1}{2}$  in. plaster boards stamped metal on both sides, with fireproof doors at openings; a 60 degree fire escape on the rear of the building having fireproof self-closing windows along the course of roof, extending from the roof to the yard; with EGRESS in the termination of the fire escape by means of door opening leading to yard of premises to north; ROOFS adjoining buildings, to north 6 stories lower, to south 6 stories lower; and

WHEREAS, petitioner contends that the occupancy is not hazardous and proposes to cover the existing partitions with stamped metal.

*Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted on*

*condition* that the existing enclosure, to wit,  $\frac{7}{8}$  in. tongue and groove boarding on both sides of the stair and hall enclosure, shall be covered with  $\frac{1}{2}$  in. plaster board with 20 gauge stamped metal, lapped seams, and fire stopped between the floor beams throughout, all openings to be equipped with self-closing fireproof doors opening out, and *granted* only so long as conditions as to occupancy and use shall remain unchanged.

(126-26-S)

WHEREAS, Croker National Fire Prevention Engineering Company, for Clemens Realty Company, owner, filed, February 15, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 352 Seventh avenue, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated January 30, 1926, No. 90381-LD, reads:

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law."

and

WHEREAS, the building is fireproof, 17 stories in height, 38 ft. by 121 ft. ("L"-shape) in area; OCCUPIED as a tenant factory, approximately 530 persons above the 1st story; petitioner occupying the 3rd story as a manufacturing furrier, 23 persons; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, petitioner contends that the partitions enclosing the entrance hall, office and show rooms are ornamental hardwood partitions, and are so arranged as not to interfere with the operation of the sprinkler system.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that exit door not less than 36 in. wide shall be provided in said partition, leading direct from workroom and opening out to exit hall; that an exit sign at least 8 in. in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partitions subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

132-26-S.

PETITIONER—Samuel Rosenblum, for Pechman Showcase & Store Fixture Co., Inc., owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—76-86 9th street, Brooklyn.

APPEARANCES—

For Petitioner: Samuel Rosenblum.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin ..... 5

Negative ..... 0

Absent ..... 0

## THE RESOLUTION:

(132-26-S)

WHEREAS, Samuel Rosenblum, for Pechman Showcase Store Fixture Co., Inc., owner, filed, February 16, 1926, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises Nos. 76-86 9th street, Borough of Brooklyn;

WHEREAS, the orders of the fire commissioner, dated January 12, 1926, and January 14, 1926, respectively, (Order No. 89645-LD):

"1. Arrange bars on windows on 1st and 2nd story north side and 1st story south side so as to be removable or removable from both sides in such a manner as to afford the free and unobstructed use of windows for purposes of egress, as per Section of the Labor Law."

(Order No. 89722-LD)

"1. Remove the substandard fire escape on the north side of the building near centre or reconstruct same to conform with Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals amended 9th, 1924.

"Among the defects noted on this fire escape are the following:

"Windows on course not fireproof nor self-closing."

"2. Remove the substandard fire escape on the west side of the building near westerly end or reconstruct same to conform with Section 274 of the Labor Law and Rule 3 of the Board of Standards and Appeals, amended 5/9/24. Among the defects noted on this fire escape are the following:

"No balconies at each story connected with stairways placed at an angle of not more than sixty degrees. Windows on course not fireproof nor self-closing. Balconies be maintained structurally safe and properly partitioned. No sign of any character shall be placed at openings leading to same."

and

WHEREAS, the building is non-fireproof, four stories in height, 125 ft. by 45 ft. in area; OCCUPIED for manufacture of show cases and display counters; 1st story, 12 persons; 2nd story, 2 persons; 3rd story, 4 persons; 4th story, 2 persons. EXITS: Two interior wooden stairways, each extending from the 1st story to top story, each enclosed in wood board partitions; a 60 degree fire escape on the front, centre, of the building, having protected openings along the course thereof, extending from the top story balcony to the 2nd story balcony, with ladder to street; a substandard fire escape, on the front of the building, extending from the 2nd story to street; and

WHEREAS, there are two windows in the 2nd story wall and twelve windows in the 1st story street wall of the building, protected by iron bars; and

WHEREAS, petitioner contends that the building is provided with legal exits (the interior stairs) and that the fire escape on the front centre will be painted and maintained structurally safe; that the fire escape at the front west side of the building is but an accommodation stairway leading from street to the office of the firm, and contends, further, that the barred windows are a necessary precaution against fire; that the building is only 45 ft. deep and that other exits are available.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, on condition that the building is only 45 ft. deep and that other exits are available. Order No. 89645-LD, Item No. 1, on condition that required legal interior stairs shall be maintained, with

# MINUTES

gress from the termination to the street and that not less than one exit shall be provided on the rear of the building to the yard of the premises adjoining in the same use and occupation; *granted*, as to Order No. 89722-LD, Item No. 1, *on condition* that connecting stairs shall be provided at an angle of not more than 60 degrees, with gooseneck ladder from top story balcony to roof and counterbalanced drop ladder in guides from lowest balcony to ground; *denied*, as to Item No. 2, and *granted* only so long as conditions to use and occupancy and all legal exits are maintained.

78-26-S.  
PETITIONER—Morris Cukor, for B. D. G., Inc., owner.

SUBJECT—Variation of labor law as cited in order of fire commissioner.

PREMISES AFFECTED—24 Union square east, Manhattan.

APPEARANCES—

For Petitioner: Morris Cukor.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Deputy Chief Martin .....	5
Negative .....	0
Absent .....	0

THE RESOLUTION:

(78-26-S)

WHEREAS, Morris Cukor, for B. D. G., Inc., owner, filed, January 21, 1926, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises No. 24 Union square east, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated December 24, 1925, reads (Order No. 88819-LD):

"1. Provide safe and unobstructed egress from the lower termination of the rear fire escape by constructing a fireproof passageway with an unobstructed width of at least three feet throughout, leading to the street, \* \* \*";

WHEREAS, the building is non-fireproof, four stories and basement in height, 26 ft. by 125 ft. in area at 1st story and 26 ft. by 85 ft. in area above. OCCUPIED: Basement, press room; 1st story, linotyping; 2nd story, office, 10 persons; 3rd story, office, 18 persons; 4th story, linotyping, 10 persons. EXITS: An interior wooden stairway, extending from the 1st story to roof; enclosed in wire lath and cement partitions with wooden doors at openings; a fire escape on the rear of the building, having fireproof openings along the course thereof, extending from the main roof to the roof of the 1st story extension; with EGRESS from the termination of the fire escape by means of a 22 in. stairway leading from the roof of the extension to a window opening into the basement and leading, also, to the cellar through a door leading to a brick passageway to stairs leading to street; ROOFS of adjoining buildings, to north 25 ft. higher, to south same level; and

WHEREAS, petitioner contends that the existing means of egress from the termination of the fire escape are adequate. *Resolved*, that the board of standards and appeals does hereby *make a variation* from the requirements of the labor law, and that the petition be and it hereby is *granted*, only so far as it affects the egress from the termination of the fire escape on rear of building, *on condition* that the ceiling of the press room extension shall be fire retarded throughout, skylights in roof of same to be glazed with fire glass and two (2) portable hooked iron ladders chained

to the parapet walls to be provided on the rear of the 1st story extension of sufficient length to reach the yard to the rear on 15th street; *granted* only so long as conditions as to use and occupancy remain substantially unchanged.

## APPLIANCES SUBMITTED FOR APPROVAL.

815-25-SA.

PETITIONER—New Way Hydrogen Gas Generator Company.

SUBJECT—Approval of New Way Gas Generator Burner.

APPEARANCES—None.

ACTION OF BOARD—Laid over to June 22, 1926, at 2 p. m.

1151-25-SA.

PETITIONER—Florence Stove Company.

SUBJECT—Approval of Florence Garage Heater.

APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve calendar pending report of committee of inspection.

111-26-SA.

PETITIONER—Warren Brothers Company.

SUBJECT—Approval of Gem Fuel Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve calendar pending report of committee of inspection.

113-26-SA.

PETITIONER—Orr Engineering Corporation.

SUBJECT—Approval of Orr Fuel Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve calendar pending report of committee of inspection.

2-26-SA.

PETITIONER—American Fire Prevention Bureau, Inc.

SUBJECT—Approval of Derby Closed Circuit Alternating Current Sprinkler and Standpipe Supervisory Alarm Panel.

APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve calendar pending test and report of fire department.

91-26-SA.

PETITIONER—Signal Engineering & Manufacturing Company.

SUBJECT—Approval of Signal Standpipe Alarm Panel.

APPEARANCES—None.

ACTION OF BOARD—Petition placed on reserve calendar pending test and report of fire department.

62-24-SA.

PETITIONER—William F. Doyle.

SUBJECT—Application for reopening—amendment—approval of Kleen Heat Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Laid over to June 8, 1926, at 2 p. m.; not reached before the board adjourned.

1295-24-S.

PETITIONER—Automatic Burner Corporation.

SUBJECT—Application for reopening—modification of resolution—re: approval of A. B. C. Oil Burner.

APPEARANCES—None.

ACTION OF BOARD—Laid over to June 8, 1926, at 2 p. m.; not reached before the board adjourned.

Adjourned 5.35 p. m.

WILLIAM J. O'GORMAN, Secretary.

# RULES

## ELEVATOR RULES

RULES FOR THE CONSTRUCTION, MAINTENANCE AND OPERATION OF ELEVATORS  
ADOPTED JULY 30, 1918, BY THE BOARD OF STANDARDS AND APPEALS, EFFECTIVE  
AUGUST 26, 1918; REVISED MAY 13, 1919.

**Rule 1. Application of Elevator Rules.** Every elevator, escalator, freight conveyor or amusement device, within the City of New York, in addition to conforming to all provisions of the labor law, building code or other laws or ordinances, as are applicable thereto, shall comply with the requirements of these rules.

Existing and future installations shall at all times be maintained by the owner in a safe condition and in conformity with the requirements of these rules.

**Rule 2. Definitions Relating to Elevators.**

(a) The terms "elevator," "passenger elevator," "freight elevator" and "amusement device" shall have the meanings indicated in §560 of the building code.

(b) The term "dumbwaiter" shall apply to such special form of freight elevator, whether power driven or manually operated, the dimensions of which do not exceed nine square feet in horizontal section nor four feet in height.

(c) The term "hand power elevator" shall apply to such forms of passenger or freight elevators which are manually operated and the dimensions of which exceed nine square feet in horizontal section.

(d) The term "sidewalk type elevator" shall apply to such special form of freight elevator, either power driven or manually operated, the platform of which does not exceed fifty (50) square feet in area and is suspended or supported at one or more points on the underside.

(e) The term "escalator" shall apply to a moving continuous inclined stairway or runway designed for elevating or lowering passengers.

(f) The term "freight conveyor" shall apply to a device used for elevating or lowering freight in a vertical or inclined direction on a continuous moving carrier without the services of an operator thereon.

(g) The term "future installations" shall apply to any elevator, machinery or equipment used in connection therewith, installed after these rules become effective.

(h) The term "existing installations" shall apply to any elevator, machinery or equipment used in connection therewith, either already installed, in process of installation, or for which plans are on file with the superintendent of buildings prior to August 26, 1918.

(i) The term "alteration" shall include any essential change to the elevator car, counterweights, rails, machinery, safeties or other equipment or direct motive power; except that any repair work made necessary by the ordinary operation of the elevator shall not be deemed an alteration.

(j) The term "power driven elevator" shall apply to any form of elevator except those operated by hand power, gravity in both directions, or through friction grip on the pull rope.

**Rule 3. Permits.** The application required by §562, building code, for the installation or alteration of elevators, amusement devices, etc., shall be in triplicate on blanks furnished by the superintendent of buildings, stating the size, manner of construction, speed, capacity, other essentials, and mode of operation of the same, and accompanied by necessary drawings; except that applications for the installation of dumbwaiters, and conveyors or hoists may consist of a notice to the superintendent of buildings that such installation is to be made.

**Rule 4. Alterations.** In making alterations to existing installations, the parts changed or altered must conform in every respect to the rules governing future installations, and where parts of the elevator are damaged from any cause, the damaged parts must be completely re-

newed, at the discretion of the superintendent of buildings. Where hand power elevators are changed to power driven elevators, they shall conform to every rule governing power-driven elevators, except, that when the rise is not more than thirty-five feet and the capacity is not increased, existing wood guide rails may remain in use. Such conversions the use of a power-driven friction grip device is prohibited when the capacity exceeds 8 pounds.

**Rule 5. Change of Classification.** In future, no freight elevator shall be used for passenger service, unless such elevator conforms to the rules governing future installations of passenger elevators in so far as they relate to safety equipment, hoist ropes, carrying capacity, enclosure, including gates and emergency exit, shaft openings and doors, and motive power.

In existing installations where such change of classification is made and the hatchway is unenclosed, a substantial enclosure of lawful partitions extending from floor to ceiling and flush with the hatchway shall be constructed, with all openings protected by proper shaft doors.

**Rule 6. Tests of New Elevators.** In future installations all elevators shall be tested as follows:

The cars of all power-driven elevators shall be loaded to their maximum carrying capacity and operated up and down the shaft several times to test the lifting capacity of the machinery and the operation of the up and lower automatic limit devices. The car shall be stopped at various levels in the shaft to test the operation of the machine brake.

The cars of all power-driven elevators having speed exceeding one hundred (100) feet per minute, and hand-power elevators with a rise of more than fifteen (15) feet, shall be loaded to their maximum carrying capacity, run to the top landing and made to travel downward beyond normal speed, so as to automatically operate the speed retarder or speed governor and safety device and the slack rope device when required and (except for hand-power elevators) to stop the machine. This rule shall not be construed, however, to require safe lift elevators to be tested with safe lift load.

The cars of power-driven elevators having speed one hundred (100) feet per minute or less shall be loaded to their maximum carrying capacity, run to the top landing and started down at normal speed. At normal speed the governor shall be manually operated to test the action of the safety equipment.

**Rule 7. Carrying Capacity.** In existing installations the owner, lessee or other person having charge and control of any elevator, except a dumbwaiter, and in future installations the manufacturer of any such elevator, shall cause to be fastened in a conspicuous place in the car of said elevator a metal plate, having legible letters and figures on same, which shall designate the number of pounds weight which said elevator is safely carry.

Future installations shall be designed to sustain all their parts a load per square foot of platform inside the car of not less than the following:

- (a) 75 pounds for power-driven passenger elevators
- (b) 50 pounds for power-driven freight elevators having platform areas not exceeding 100 square feet
- (c) 50 pounds for hand-power passenger elevators

**Rule 8. Rules to be Posted.** In the car of a passenger elevator the superintendent of buildings shall cause to be posted and maintained, in a conspicuous place, for the guidance and information of operators and passengers, such of the rules relating to the

# RULES

n of elevators as he may deem necessary to insure public safety, including the number of passengers that a car may carry at one time.

**Rule 9. Full Automatic Push Button Elevators.** In new installations full automatic push button elevators shall be so designed and equipped that the car, at its rated speed and load, will automatically stop when the floor is level with or not more than three inches from the designated landing floor.

The car gate and shaft doors shall be equipped with approved devices that will prevent the operation of the car until the car gate is closed and the shaft door is locked and latched. The shaft door shall not be capable of being opened unless the floor of the car is within three inches of the landing. A push button to operate an alarm bell shall be provided in the car, for the purpose of notifying the person in charge of the premises in case the car becomes stopped in the shaft from any cause. The shaft doors shall be so arranged that they cannot be opened after the car leaves the landing, except in emergency cases, and then only by a special key which must be provided and kept in the possession of the person having charge of the building.

**Rule 10. Belt or Chain Drives.** In future installations no hoisting machine driven by a chain or belt connected from a motor or countershaft shall be used in connection with any passenger elevator.

**Rule 11. Shaft Openings.** In shafts hereafter constructed for passenger elevators, no more than one opening shall be allowed in each story, and all openings in several stories shall be located one above the other, except that doors may be located on opposite or adjacent sides in the several stories when the distance from the car operating device to the door lock does not exceed forty-eight inches and can at all times be fully controlled by the elevator operator without leaving the operating device. Door openings may be located on opposite or on adjacent sides of the shaft in the first main entrance story and in the top story, provided the openings in the remaining stories are all on the same side of the shaft, that a satisfactory device is provided preventing the operation of the car while the car gate is distant from the operator is open, that an attendant is always present to control the shaft doors located in the first or top stories, and that there are no offsets or recesses on the inside of the shaft walls. No alteration not in compliance with the above provisions shall be made to any existing passenger elevator.

**Rule 12. Hoistway Enclosure.** In the existing and new installations where no enclosure of solid partition is required around the hoistway by the provisions of the building code, labor law or these rules, there shall be provided a substantial vertical enclosure extending from the floor for a distance of not less than six feet on the side or sides where there are no openings in the car for loading purposes. On all other sides, gates or doors must be provided. Such enclosure shall be constructed of mesh work, grille work or slatted work, provided that when mesh work is used it shall be of not less than No. 10 U. S. gauge wire or No. 13 U. S. gauge expanded metal, with mesh not exceeding one and one-half ( $1\frac{1}{2}$ ) inches; when grille work is used there shall be not more than one and one-half ( $1\frac{1}{2}$ ) inches space between any two members, except that where plain straight bars, not filled in with mesh, are used, there shall be not more than one (1) inch space between members; when wood slats are used they shall be not less than three-eighths ( $\frac{3}{8}$ ) of an inch thick, spaced not more than one (1) inch between slats.

In all cases where existing grille work permitted by any regulation as a shaft enclosure is altered, such

alteration shall be of substantial material and construction, properly braced and carried the full height of the openings, with not more than one and one-half inch space between any two members; except that where straight bars, not filled in with scroll work, are used, there shall be not more than one inch between members. Where deemed necessary, existing grille work with spaces exceeding those specified in this rule shall be made safe by suitable screen or wire mesh, or wire glass construction.

**Rule 13. Shaft Doors.** In existing and future installations all gates or doors leading to any shaft in which power-driven passenger elevators are operated (except full automatic push button elevators) shall be locked, bolted or securely fastened on the shaft side. Such shaft doors or gates shall be closed by the operator before the car is put in motion.

In future installations of passenger elevators, keys for opening the shaft doors or gates from the outside of the shaft, in case of emergency, shall be provided and shall be restricted in use to persons in responsible charge of the building.

In existing and future installations in factory buildings only, the openings in every passenger or freight elevator shaft or hoistway enclosure shall be protected in one of the following manners:

- (a) by properly constructed sliding doors;
- (b) by combination slide and swing doors;
- (c) by hinged or swinging doors equipped with approved devices to insure the shaft doors being closed and locked before the car can start from the landing;
- (d) by hinged or swinging doors, either manually operated or self-closing, with auxiliary gates not less than five (5) feet six (6) inches in height, substantially constructed of wood or metal, with not more than two (2) inches space between any two parallel members, and the bottom of the gate not more than ten (10) inches from the floor, except at the top and bottom landings when the distance from the floor to the bottom of the gate may be increased to give the required head room, and shall close automatically upon the car leaving the landing in either direction; except further that for hand power elevators having the pull rope located in front of the shaft entrance, gates may be two (2) feet six (6) inches in height.

When shaft doors are equipped with electric contacts or other locking devices, an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 14. Car Gates.** In existing and future installations, all entrances to the cars of power-driven passenger elevators shall be provided with substantial folding or sliding gates or doors, and where floor tracks are used the same must be kept level with the finished floor surface of the car. All folding gates over three feet wide at the entrance to shaft or car shall have top and bottom braces, spaced not more than eighteen inches on centers when the gates are fully expanded. All car gates shall be closed by the operator before the car is put in motion.

In future installations passenger elevator car gates shall be equipped with an approved device or devices that will prevent the operation of the car while the car gates are open, and an approved emergency release shall be provided on the car within easy reach of the operator.

**Rule 15. Counterweights.** In future installations all counterweights shall have their sections securely bolted together with one or more rods, as determined by the superintendent of buildings. Such rods must pass through all the sub-weights and at least one portion of the frame work. No continuous forged straps shall be permitted.

In existing and future installations where counterweights run in the same shaft as the car, they shall, when at the

# RULES

uppermost position, be protected on all exposed sides the full length of the counterweight with substantial and properly secured shields of iron or steel not less than No. 16 U. S. gauge; except that for plunger or fixed stroke piston hydraulic or traction type elevators no top shield shall be required. Where no compensating chains or ropes are attached to the counterweight, similar shields shall be provided eighteen inches above the bottom of the counterweight runway and extending upwards at least five feet. In existing installations, where the clearance between car and counterweight is not more than one and one-half inches, neither top nor bottom shields shall be required, but in lieu thereof tell-tale metal chains not less than five feet long, spaced not more than six (6) inches on centres from rail to rail, shall be suspended from the bottom of the counterweight.

**Rule 16. Speed Governors.** All power-driven elevators with a rise of more than fifteen feet not already equipped with a speed governor and safety (except sidewalk type elevators and existing freight elevators in buildings not exceeding five stories in height and direct plunger elevators) shall have at the top of the elevator shaft a governor properly connected to a safety device attached to the underside of the car platform, in such manner that the car will be brought to rest with an easy and gradual stop, or in a distance not greater than nine feet at a speed of seven hundred feet per minute, provided that on elevators having a speed of one hundred feet per minute or less, safeties of the instantaneous type may be used. Every governor operating a car safety shall be set to trip the safety at a speed not exceeding forty per cent above the rated speed given in the application, but in no case exceeding eight hundred and fifty feet per minute; but this shall not require any governor to trip the safety at a speed less than one hundred and fifty feet per minute. When a speed governor has been set for the rated speed it shall be sealed. When safeties of the instantaneous type are used, a proper flexible means of application must be interposed between the safety and the governor.

**Rule 17. Limit Devices.** In future installations all power-driven elevators shall have approved limit devices as follows:

- (a) for Drum Type Electric Elevators, except sidewalk type elevators with speeds not exceeding seventy-five (75) feet per minute, limit switches on the machine and in the shaft or on the car;
- (b) for Traction Type Electric Elevators, limit switches in the shaft or on the car;
- (c) for Electric Drum Sidewalk Type Elevators, with speeds not exceeding seventy-five (75) feet per minute, machine automatics will be required but stopping devices on the operating rope will be accepted in lieu of limit switches in the shaft or on the car;
- (d) for Hydraulic Elevators, with speeds not exceeding one hundred and fifty (150) feet per minute, stopping devices on the operating rope;
- (e) for Hydraulic Elevators, with speeds exceeding one hundred and fifty (150) feet per minute, limit devices on the machine;
- (f) for Lever or Crank-Operated Hydraulic Elevators, limit devices on the machine.

**Rule 18. Elevator Brake.** In future installations every electric elevator shall be equipped with an electric or electro-mechanical brake that will bring the car to rest when the car operating device is brought to the stop position or when any of the electric safety devices operate.

When the elevator is driven by a belt from an electric motor, the brake must be arranged to operate should the motor belt break or leave the pulleys.

**Rule 19. Operating Device.** In future installations every elevator driven by electric power and operated by hand rope, lever, wheel or other non-self-centering device, shall be provided with an approved device preventing the

operation of the car, after the interruption of the current, until the operating device has been first returned to the inoperative position, and electric car operating switch shall be self-centering and self-locking in the inoperative position.

**Rule 20. Reverse Phase Relays.** In future installations every elevator motor operated by polyphase alternating electric current shall be equipped with a reverse phase relay.

**Rule 21. Slack Rope Device.** In future installations all power-driven elevators, including power-driven sidewalk elevators, operated by drum hoisting machines, shall be equipped with approved automatic slack rope devices that will stop the machine if, from any cause, any car hoisting rope or cable attached to the drum becomes slack.

**Rule 22. Car Locking Device.** No elevator shall be used for the carrying of safes or other material of a greater weight than the normal lifting power of such elevator unless the machine is provided with special equipment. The car is equipped with an approved locking device which will hold it at any landing, independent of the hoisting ropes while such safe or other material is being loaded or unloaded.

**Rule 23. Hand-Power Elevator Safety Devices.** In future installations every hand-power elevator (except sidewalk type elevators) with a rise of more than fifteen feet, shall be equipped with an approved safety device that will immediately stop and hold the car with a load if the rope breaks, and with an approved automatic speed retarder and a hand-operated brake operating in both directions.

Grip hoists and elevators operated by gravity in both directions shall comply with the requirements for hand power elevators.

**Rule 24. Escalators.** In future, every escalator stalled shall be equipped with an approved safety device to prevent any accidental downward reversal and with an approved stopping device.

**Rule 25. Car Construction.** In future installations the car and car frame of every power-driven elevator and of every hand-power elevator with a rise of more than thirty-five (35) feet shall be of incombustible materials: except that the platform may be of wood covered on the underside with incombustible material. The car enclosure and flooring may be of hard wood. The car, car frame and enclosure of every hand-power elevator with a rise of thirty-five (35) feet or less shall be constructed of wood.

**Rule 26. Passenger Car Enclosures.** In existing installations every passenger elevator car shall be fully enclosed on all sides not used for loading or unloading, and on the top, with substantial construction.

In future installations where grille work is used for car enclosure, including the top, it shall be constructed of not more than one and one-half inch space between two members; except that where straight bars not fitted with scroll work are used there shall be not more than one-half inch space between members. When the clearance between car and counterweight is less than two (2) inches, the top of the car enclosure opposite the counterweight runway shall be of solid construction or screened with not more than one-half (1/2) inch mesh of not lighter than No. 16 U. S. wire, to a height of not less than six (6) feet six inches.

In existing installations in factory buildings only, the spaces exceed those specified for future installations it shall be deemed satisfactory if the grille work is protected by suitable screen or wire mesh fastened to the enclosure.

**Rule 27. Emergency Exit.** In future installations every power-driven passenger elevator car shall have

# RULES

in the top, of such a size as to afford easy egress for engers, but not less than sixteen inches in least dimen- nor less than four hundred square inches in area. When e is more than one elevator in a shaft and the vertieal nce between any two consecutive shaft door openings eds thirty (30) feet, there shall be provided in addition e trap door an emergency side exit to the adjacent car. e existing installations not already provided with an gency exit, a trap door as specified for future instal- ns shall be provided; except that when the cross head ar top construction renders it impracticable to provide a trap door, this requirement may be waived by the su- tendent of buildings, if egress, in ease of emergency, ssible through shaft openings, or to an adjacent ear.

**Rule 28. Freight Car Enclosure.** In existing and e installations in factory buildings only, every freight or car shall be enclosed on all sides not used for ng or unloading, with substantial construction, to a t of five (5) feet six (6) inches, or to the cross head, t this is less than five (5) feet six (6) inches above ar platform.

In future installations, where an enclosure of open truction is used, the space between any two parallel bers shall not exceed one inch.

**Rule 29. Freight Elevator Cover.** In existing and e installations in factory buildings only, every ht elevator car shall be provided with a substantial r or grating constructed of not less than No. 8 U. gauge wire or its equivalent in strength, and of a n that will reject a one and one-half (1½) inch eter ball. Sections of the cover or grating may be gged to swing upward for handling long material, such cover or grating shall be closed at all other s. In covers hereafter installed (except where car are provided) that part of the cover facing the unces to the hoistway, extending the full width of ar, shall be hinged on a line not less than eight (8) es nor more than twelve (12) inches back from edge of the landing, and the hinged section shall be closing.

**Rule 30. Space Between Saddles and Car.** In future llations there shall be not more than one and one- ter inch, nor less than three-quarters of an inch e between the floor of the ear and the floor saddles, where the saddles project into the shaft the same e be properly bevelled on the underside at an angle t less than sixty degrees to the horizontal.

**Rule 31. Lights.** In existing and future installations ars of all elevators shall be properly lighted at all s when in service.

**Rule 32. Guide Rails.** In future installations, guide for both car and counterweights of all elevators pt dumbwaiters, and hand-power elevators with a of thirty-five feet or less) shall be of iron or steel. r shall be fastened to the sides of the shaft with ht or east iron brackets of such strength and n and so spaced that the guide rails and their nings shall be able to safely withstand the applica- of the safety when stopping a fully loaded ear r test. For elevators requiring safeties, the guiding ces of the car guides shall be finished smooth and s shall be tongued and grooved or dowelled, and s shall extend to the level of or above the overhead s and shall be bottomed on a suitable support. e weights of steel or iron guide rails shall be not than given in the following table:

## WEIGHT OF GUIDE RAILS PER LINEAL FOOT.

Total Weight of Car and Live Load, or Weight Counterweight	Weight of Car Guide Rails—		Weight of Counter- weight Guide Rails—	
	With Guide Rail Safeties.	Without Guide Rail Safeties.	With Guide Rail Safeties.	Without Guide Rail Safeties.
4000 lbs. ....	7½	7½	7½	6½
15000 " ....	14	14	14	7½
40000 " ....	30	30	30	7½

**Rule 33. Ropes.** In future installations, all elevators (except dumbwaiters) shall have not less than two ropes independently connected to the car and to each set of counterweights. In drum type machines, the lifting and counterweight ropes shall have at least one full turn of the rope on the drum when they have reached the limit of travel. Every rope hereafter used shall have a factor of safety of not less than six for freight elevators, and not less than eight for passenger elevators. The diameter of any hoist or counterweight rope hereafter installed (except for hand-power elevators and sidewalk type elevators) shall be not more than one-fortieth (1/40) of the diameter of any sheave or drum over which it passes. All ropes used in the operation of elevators shall be of steel, iron or marlin covered steel. Ropes of other material than metal may be used as hand ropes and brake ropes in hand power elevators or as centering ropes in power driven elevators with hand rope control. Where overhead machines are used, equalizer arms will be permitted on the car and counterweights. Nothing in this rule shall prohibit the use of chains on sidewalk elevators instead of ropes.

**Rule 34. Auxiliary Freight Compartments.** In fu- ture installations no elevator shall be permitted to have attached above, below or on the side of the car a freight compartment or similar device.

In existing installations, entrances to freight compart- ments shall be protected by folding gates, as required for passenger elevators, and so arranged that the elevator can- not be operated until the gate is closed.

**Rule 35. Overhead Gratings.** In every elevator shaft (except existing elevator shafts, dumbwaiter shafts or the shafts of sidewalk elevators outside the building line) imme- diately under the sheaves at the top of the shaft, or when the machine is located at the top of the shaft, at the level of the top of the machine beams, there shall be provided and placed a substantial grating of iron or steel capable of sus- taining not less than seventy-five pounds per square foot. No two members of such grating shall be spaced more than one and one-half inches apart. When such grating does not extend over the entire area of the shaft, the open edges shall be protected by substantial screened railings not less than three feet high. Every such grating shall extend at least two and one-half feet beyond the general contour of the sheaves or machinery. Deflecting sheaves extending be- low the machine level, or hoist and counterweight sheaves located at the sides of the shaft, shall be protected by grat- ings or eradles of a construction similar to that required for the gratings. Fireproof floor construction shall be ac- cepted as the equivalent of the grating.

Nothing in this rule shall prevent the placing of a trap door in such a grating where other suitable access cannot be had.

Any grating hereafter placed in an existing elevator shaft shall conform to the requirements of this rule.

**Rule 36. Elevator Pit.** In every elevator shaft here- after constructed (except shafts for dumbwaiters, for sidewalk elevators and for hand-power elevators with a rise of less than thirty-five feet), the distance from the floor saddle of the lowest landing to the bottom of the pit shall not be less than four feet when the speed does not ex- ceed two hundred and fifty feet per minute, not less than five feet when the speed exceeds two hundred and fifty but does not exceed four hundred feet per minute, and not less than six feet when the speed exceeds four hundred feet per minute, and in no case shall there be less than two feet in the clear between the bottom of the pit and the lowest point of the underside of the ear floor framing when the ear is at the lowest possible position. In the case of power-driven side- walk type elevators, the clear space between the bottom of the pit and underside of the car floor structure shall be not less than six inches. The pits herein required at the bottom

## RULES

(Continued from page 647)

of elevator shafts shall not be used for piping, machinery, or for any purpose not required for the elevator equipment; but this shall not prevent the encroachment upon such pits, in the case of new elevators installed in existing buildings, of the foundations of bearing walls and columns to an extent not exceeding twenty-five per cent of the area of the pit.

**Rule 37. Overhead Clearance for Cars.** For all elevator shafts hereafter installed (except shafts for sidewalk type elevators) there shall be provided a sufficient clear space, when the car is at the top landing, to allow a run-by of not less than two feet for elevators having a speed not exceeding one hundred feet per minute, not less than three feet for elevators having a speed exceeding one hundred feet per minute and not exceeding three hundred and fifty feet per minute, and not less than five feet for elevators having a speed exceeding three hundred and fifty feet per minute.

**Rule 38. Overhead Clearance for Counterweights.** In future installations there shall be provided in all elevator shafts a sufficient clear space when the car has completely compressed the pit buffers to allow of a run-by of the counterweight of not less than two (2) feet for traction and hydraulic type elevators, and not less than three (3) feet for drum type elevators.

**Rule 39. Machinery Room.** All parts of the elevator machinery for power-driven elevators shall be properly enclosed, and suitable light provided. In buildings hereafter erected free and safe access must be provided to all parts of the elevator machinery, and there shall be not less than twelve (12) inches clearance at limit stop devices on machine and outboard bearings of motor. In future installa-

tions in existing buildings, such clearance shall be provided deemed necessary by the superintendent of buildings, but not exceed that specified for buildings hereafter erected. When the machine is located at the bottom of the shaft it shall be protected with a substantial pit pan.

**Rule 40. Speed.** The speed of all power-driven elevators shall not exceed seven hundred feet per minute.

**Rule 41. Buffers.** In future installations for power-driven elevators (except sidewalk type elevators) there shall be provided substantial spring buffers, pneumatic buffers, or oil buffers for the car and counterweights, provided that for the cars and counterweights of all elevators having speeds of more than three hundred and fifty feet per minute, substantial oil buffers shall be installed.

**Rule 42. Supporting Beams.** Supporting beams hereafter installed for elevator sheaves or machinery (except in dumbwaiter shafts) shall be of iron or steel.

**Rule 43. Determination of Questions.** When an existing installation for either passenger or freight elevator is deemed by the Superintendent of Buildings to be in an unsafe or dangerous condition it shall be made safe in such manner as he shall prescribe, and all defective parts necessary of replacement shall conform in so far as possible, with the rules governing future installations.

Where there are practical difficulties in the way of carrying out the strict letter of the foregoing rules, the Superintendent of Buildings shall have power to vary their provisions so that the spirit of the law shall be observed and public safety secured and substantial justice done, provided that whenever such variation is granted by a superintendent of buildings it shall be indorsed in writing upon the permit over the signature of such superintendent.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building,  
Manhattan.

JUN 10 1926

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the en-  
gineers, pertaining to the work of the board, will be seen  
only between the hours of ten in the morning and one in the  
afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The *Clerk's Calendar* consists of applications under the  
Building Zone Resolution, and its object is to give inter-  
ested property owners opportunity to file objections, if any,  
and will be called in Room 1013, Tuesday, June 8, 1926,  
at 2 o'clock. At this call each case is set for hearing on  
a definite day.

The next subsequent Call of the Calendar will be on  
Tuesday, June 15, 1926, at 2 o'clock.

The *Clerk's Calendar* is not to be confused with the  
calendar of cases that have been definitely set for hearing  
on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in  
connection with which court proceedings are pending or in  
progress, nor accepted that are not filed within twenty days  
from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, applica-  
tion or petition shall be regarded as a mere notice of in-  
tention to seek relief until it is filed on the form required  
by the rules of this board.

Upon receipt of any such communication the writer will  
be supplied with the official forms for presenting his ap-  
peal, application or petition, and if he fails to supply the  
data required thereon, within twenty days, his case may be  
dismissed for lack of prosecution.

At the time of filing an application, the appellant or peti-  
tioner shall forward a signed notice of appeal addressed  
to the administrative official (either superintendent of build-  
ings or fire commissioner) and file with this board a dupli-  
cate of said notice.

Petitioners are advised that their plans must indicate the  
points of the compass so as to establish the true location and  
position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and  
expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR

**TUESDAY, JUNE 8, 1926, AT 2 P. M.**

*Building Zone Cases.*

- 1083-25-BZ.  
APPLICANT—Joseph Zicarelli, owner.  
PREMISES—51 West 11th street, Manhattan.  
APPLICATION, under section 21 of the building resolution,  
TO PERMIT in a residence district and "B" area of the erection and maintenance of a rear extension in excess of more than 40 per cent of the area of the yard required by the zone resolution.
- 1322-25-BZ.  
APPLICANT—Nathan D. Shapiro, for Sarah Rose owner.  
PREMISES—394 South 2nd street, Brooklyn.  
APPLICATION, under section 21 of the building resolution,  
TO PERMIT in a business district the alteration and maintenance of a fur dyeing and dressing factory.
- 198-26-BZ.  
APPLICANT—Hugh Mulligan, for 353 Lexington Avenue Corp., owner.  
PREMISES—349-353 Lexington avenue, Manhattan.  
APPLICATION, under section 21 of the building resolution,  
TO PERMIT in a residence district the alteration and change of occupancy in part from residence to business use.
- 240-26-BZ.  
APPLICANT—A. J. Simberg, for Anna Shulman, owner.  
PREMISES—1661 St. Nicholas avenue, Manhattan.  
APPLICATION, under sections 7c and 21 of the building zone resolution,  
TO PERMIT in a residence district extending from a business district the erection and maintenance of a building for store purposes.
- 1335-25-BZ.  
APPLICANT—Victor Mayper, for 915 Westchester Realty Corp., owner.  
PREMISES—915 Westchester avenue, The Bronx.  
APPLICATION, under section 21 of the building resolution,  
TO PERMIT in a residence district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

**JUNE 8, 1926, 10 A. M.**

*Appeals from Administrative Orders.*

- 1254-25-A—Certificate of approval for combustible (Flit).  
139-26-A—348 Fulton street, Brooklyn.  
144-26-A—1-5 Franklin avenue, Brooklyn.  
149-26-A—1381-97 Sedgwick avenue, Bronx.  
215-26-A—150 William street, Manhattan.  
1141-25-A—217-223 East 43rd street and 218-226 East 43rd street, Manhattan.

# CALENDAR

- 25-A—11-13 Emerson place, Brooklyn.  
25-A—396-400 South 2nd street, Brooklyn.  
25-A—56 Myrtle avenue, Brooklyn.

## *Building Zone Applications.*

NOTICE IS HEREBY GIVEN by the board of standards and appeals of a public hearing under the provisions of the building zone resolution, *Tuesday morning*, June 8, at 10 o'clock, in Room 1013, Municipal Building, on the following matters:

no. 1304-25-BZ—Application, December 16, 1925, under section 21 of the building zone resolution, of William F. Doyle, applicant, on behalf of Samuel Berman, owner, to permit the conversion of occupancy from a warehouse and garage for five (5) motor vehicles to a garage for the storage of more than five (5) motor vehicles; premises 2447-2449 Coney Island avenue, Brooklyn.

no. 120-26-BZ—Application, February 11, 1926, under section 21 of the building zone resolution, of Israel Spielberg, applicant, on behalf of May Firetag, owner, to permit in a business district the erection and maintenance of a gasoline service station; premises 109-25 Farmers avenue, Hollis, Borough of Queens.

no. 134-26-BZ—Application, February 16, 1926, under section 21 of the building zone resolution, of John DeHart, applicant, on behalf of Rachael Kantrowitz and Louis Kantrowitz, owners, to permit in a residence district the conversion of occupancy of first floor from residence to a business use; premises 871 East 175th street, The Bronx.

no. 1135-25-BZ—Application, November 5, 1925, under section 21 of the building zone resolution, of William H. Kehoe, applicant, on behalf of Louis Edelstein, owner, to permit in a residence district the maintenance of a milk depot and also a garage for the storage of one (1) commercial motor vehicle; premises 541 Snediker avenue, Brooklyn.

no. 200-26-BZ—Application, March 9, 1925, under section 7e of the building zone resolution, of Edward P. Doyle, applicant, on behalf of W. & L. Auto Garage Co., Inc., owner, to permit in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles; premises 298-306 Lexington avenue, Brooklyn.

no. 285-26-BZ—Application, April 5, 1926, under section 21 of the building zone resolution, of Abraham H. Schwartz, applicant, on behalf of Homack Construction Corp., owner, to permit in a residence district the erection and maintenance of a building for store and theatre purposes; premises 12 to 24 East Roosevelt avenue, Corona, Borough of Queens.

no. 669-23-BZ—Application, May 11, 1926, under section 21 of the building zone resolution, of Leslie & Martin, applicants, on behalf of Jamaica Water Supply Company, owner, to permit in a residence

district the erection and maintenance of a water pumping station (previously granted by the board); premises 118-50 128th street, Richmond Hill, Borough of Queens.

WILLIAM E. WALSH, *Chairman.*

JUNE 8, 1926, 2 P. M.

## *Petitions for Variations.*

- 880-25-S—254-258 35th street, Manhattan.  
739-25-S—319-321 East 53rd street, Manhattan.  
1214-25-S—228-238 East 44th street, Manhattan.  
1234-25-S—2082 Third avenue, Manhattan.  
1190-25-S—449 Union street, Brooklyn.  
1314-25-S—Northwest corner of Sunswick street and Paynter avenue, Long Island City, Borough of Queens.  
1307-25-S—222-224 West 37th street, Manhattan.  
86-26-S—47 East Houston street, Manhattan.  
918-25-S—30-32 East 21st street, Manhattan.  
1287-25-S—74 St. Edwards street, Brooklyn.  
1712-21-S—80 West Houston street, Manhattan.  
1351-17-S—113-121 Prince street, Manhattan.  
899-25-S—121-123 Greene street, Manhattan.  
962-25-S—117-119 West 26th street, Manhattan.  
1140-25-S—217-223 East 43rd street and 218-226 East 44th street, Manhattan.  
1274-25-S—2-8 West 141st street, Manhattan.  
112-26-S—199-201 Greene street, Manhattan.  
138-26-S—348 Fulton street, Brooklyn.  
1023-25-S—199-209 Steuben street, Brooklyn.  
7-26-S—24-26 East 13th street, Manhattan.  
119-26-S—234-240 West 39th street, Manhattan.  
122-26-S—550 Broadway, Manhattan.  
178-26-S—20-22 East 57th street, Manhattan.  
189-26-S—315 Seventh avenue, Manhattan.  
194-26-S—100 Review avenue, Long Island City, Borough of Queens.

## *Appliances Submitted for Approval.*

- 161-26-SA—Petrol Domestic Burner, approval of.  
1263-25-SA—Phister Carbon Tetrachloride Fire Extinguisher, approval of.  
1310-25-SA—Westinghouse Electric Manufacturing Voltmeters and Milliammeters, Type BA and CA, approval of.  
123-26-SA—Aqua Non-Pressure Hydraulic Gasoline Dispensing System, approval of.

FRIDAY, JUNE 11, 1926, 10 A. M.

## SPECIAL MEETING.

### *Rules.*

- 598-19-SR—Fuel Oil Rules.  
217-21-SR—Fuel Oil Rules.

## CALL OF CLERK'S CALENDAR.

TUESDAY, JUNE 15, 1926, AT 2 P. M.

### *Building Zone Cases.*

- 28-26-BZ.  
APPLICANT—Harry Hurwit, for Mano Realty Corp., owner.

# CALENDAR

PREMISES—1311 Amsterdam avenue, Manhattan.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT the alteration and change of occupancy of a stable for more than five (5) horses to a garage for the storage of more than five (5) motor vehicles.

108-26-BZ.

APPLICANT—Eugene De Rosa, for Emerdyke Realty Corp., owner.  
PREMISES—4915-4923 Broadway, Manhattan.  
APPLICATION, under sections 7b and 21 of the building zone resolution,  
TO PERMIT the extension from a business district into a residence district of a proposed theatre building.

175-26-BZ.

APPLICANT—Joseph Leone, for Edward H. Litchfield, owner.  
PREMISES—299-307 5th street, Brooklyn.  
APPLICATION, under sections 7e and 21 of the building zone resolution,  
TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

234-26-BZ.

APPLICANT—John J. Gilmartin, for Brian G. Hughes, Jr., owner.  
PREMISES—East side of Cedar avenue, 93 ft. 11 in. south of West 179th street, The Bronx.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

290-26-BZ.

APPLICANT—James W. Byrnes, for Max Kirsch, lessee.  
PREMISES—109 Blake avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
TO PERMIT in a business district the installation and maintenance of a gasoline service station.

595-25-BZ.

APPLICANT—John J. Dunnigan, for Marie Carberry, owner.  
PREMISES—West side Third avenue, 80.74 ft. south of East 182nd street, The Bronx.  
APPLICATION, under sections 7c and 21 of the building zone resolution,  
TO PERMIT in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously before the board).

303-26-BZ.

APPLICANT—James W. Byrnes, for Mary G. Conboy, owner.  
PREMISES—405-413-423 44th street, Brooklyn.  
APPLICATION, under sections 7a and 21 of the building zone resolution,  
TO PERMIT partly in a residence district and partly in a business district the alteration, extension and change of occupancy of a stable for more than five (5) horses to a garage for the storage of more than five (5) motor vehicles.

### THE RESOLUTION:

(1054-25-A)

WHEREAS, Philip Strobel & Sons, Inc., lessee, filed, October 16, 1925, an appeal from two orders of the fire commissioner, affecting premises 40-42 Elizabeth street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated May 14, 1925, read:

Order No. 76681-F—

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a diagonal line less than 30 ft. from any opening in any other building and not in the same plane with said opening and which are not more than 50 ft. above a neighboring roof at east and south sides of building or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances."

Order No. 76682-F—

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals January 24, 1917, as amended May 2nd, 1918, and January 1919, effective February 17, 1919."

and

WHEREAS, the building is non-fireproof, five stories (ft.) in height, 50 ft. by 90 ft. (4,500 sq. ft.) in area, OCCUPIED as a factory; cellar, dry kiln and joining, 3 persons; 1st story, mill work, 9 persons; 2nd story, woodwork, 13 persons; 3rd story, finishing, 6 persons; 4th story, assembling, 3 persons; 5th story, storage; and

WHEREAS, the appellant has filed drawings showing 8 protected window openings in easterly wall and 16 openings in the southerly wall which he claims are affected

# MINUTES

the fire department Order No. 76671-F; the appellant contends that all these windows are glazed with wire glass; Order No. 76682-F, the appellant contends that they installed an approved sawdust and shaving collection system, with the sawdust vault outside the building; he proposes to provide on the 2nd—also the 4th floor—a 60 gallon fire extinguishing tank on wheels. *Resolved*, that the orders of the fire commissioner be and hereby are *modified*, and the appeal be and it hereby is *denied*, as to Order No. 76681, Item 1, only so far as it requires any windows not on elevator shafts or stairs not provided with iron shutters which are glazed with wire glass; and *granted*, as to Order No. 76682, Item 1, on condition that a thermostatic fire alarm with central connection shall be installed throughout the premises; that all paints, turpentines and varnishes shall be stored in a brick-enclosed vault in the southerly rear wall, vented to the outer air, with not more than one opening therein, protected with self-closing fireproof door; and ample and sufficient exits as required by the labor laws as modified by this board shall be maintained.

**APPELLANT**—Knut Olsen, for Janet Boyle, owner.  
**SUBJECT**—Appeal from order of fire commissioner.  
**PREMISES AFFECTED**—370 Ninth avenue, Manhattan.

**APPEARANCES**—  
For Appellant: None.

Negative ..... 0  
Absent ..... 0

**RESOLUTION:**  
(141-26-A)

**WHEREAS**, Knute Olsen, for Janet Boyle, owner, filed, February 18, 1926, an appeal from an order of the fire commissioner, affecting premises No. 370 Ninth avenue, Borough of Manhattan; and

**WHEREAS**, the order of the fire commissioner, dated January 19, 1926, reads (Order No. 32871-LC):

2. Provide a hydrostatic test of Fuel Oil Storage tanks or tanks of at least 30 lbs. per square inch, for welded tanks, as per Rule 7, Sec. 1-b of the Fuel Oil Rules.

3. Provide a hydrostatic test of not less than one hundred pounds per square inch for all Grade B Fuel carrying piping as per Rule 25, Sec. 2 of the Fuel Oil Rules.

4. Have plans 2560-24 approved by this Department.

5. Provide a pilot light for each automatic fuel oil burning system of an adequate intensity, in each combustion chamber, so arranged as not to be easily extinguished, as per Rule 28 of the Fuel Oil Rules.”;

**WHEREAS**, the building is non-fireproof, four stories in height, 4 ft. 9½ in. by 60 ft. in area. **OCCUPIED**: 1st story; one family on each floor above; and **WHEREAS**, a fuel oil burning system has been installed under “B” oil, a Powerlight oilheat burner connected to a 60 gallon auxiliary tank, fed from a 200 gallon tank, enclosed in 4 in. terra cotta blocks located in cellar floor; and

**WHEREAS**, the appellant contends, in re: Item 2, that the tank has had a factory test of 40 pounds per square inch; and in re: to Item 3, that the piping is known to the

trade as standard; in re: to Items 6 and 7, that the burner used is non-automatic and does not require a pilot light.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal as to Item 2 be and it hereby is *granted on condition* that certificate of factory test shall be filed with the fire commissioner as to tanks; *granted*, as to Item 3, *on condition* that standard wrought iron piping shall be used throughout the installation of the fuel oil burning system; *granted*, as to Item 7, *on condition* that the oil burning system shall comply with the fuel oil rules in all other respects; and that the appeal as to Item 6 be and it hereby is *denied*.

142-26-A.

**APPELLANT**—Geo. Keister, for Edward Margolies, lessee.

**SUBJECT**—Appeal from decisions of fire commissioner.  
**PREMISES AFFECTED**—156 West 44th street, Manhattan.

**APPEARANCES**—

For Appellant: Geo. Keister.

For Administration: Inspector Carroll of fire department.

**ACTION OF BOARD**—Appeal denied.

**THE VOTE TO GRANT**—

Affirmative ..... 0  
Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Absent ..... 0

**THE RESOLUTION:**

(142-26-A)

**WHEREAS**, George Keister, for Edward Margolies, lessee, filed, February 18, 1926, an appeal from decisions of the fire commissioner, affecting premises 156 West 44th street, Borough of Manhattan; and

**WHEREAS**, the decisions of the fire commissioner read:  
Decision, dated February 13, 1926—

“1. Dressing rooms in the basement are entirely below the street level and at a point directly under the auditorium.

“2. Although the plan of the seating arrangement shows an occupancy of 282 persons, a single exit leading to the street is the only means of escape provided. Under the authority vested in the Fire Commissioner by Section 490, Article 23, Chapter 5, Code of Ordinances, this Department requires at least two means of egress remote from each other.

“Article 8, Chapter 5, Code of Ordinances, relating to exit facilities, is specific, also, in this requirement.

“3. The location of the boiler room under the lobby of theatre is contrary to the spirit of Article 25, Chapter 5, Code of Ordinances, relating to theatres.”

Decision dated March 1, 1926, in acting on N. B. Application No. 2684-1925—

“1. Provide a 5000 gallon gravity tank on roof over the stage, elevated so that the bottom thereof is not less than 20 ft. above the highest line of sprinkler heads.”;

and

**WHEREAS**, the building is fireproof, 12 stories and pent house in height, 24 ft. by 100 ft. 5 in. in area up to the 4th story and 24 ft. by 70 ft. 5 in. in area above. **OCCUPIED**: Cellar, boiler room; 1st, 2nd, 3rd and 4th stories, office and theatre, 299 seats; 5th to 12th story, inclusive, 5 offices on each story; and

**WHEREAS**, the appellant proposes to use the cellar for dressing rooms; and contends that the building is fireproof and a sprinkler system provided in the cellar; that the seating capacity of the theatre is less than 300 and does not come within the requirements of article 25, chapter 5, code of ordinances; that the secondary means of egress is provided on 1st story by a horizontal exit to adjoining build-

# MINUTES

ing at east; in regard to the decision of March 1, 1926, Item 1, that the sprinkler system will be connected to the city main, which is fed two ways; and

WHEREAS, the board deemed that despite the seating capacity, and because of the location of dressing rooms in cellar, the existence of scenery, stage and the like, factors necessary in the conduct of this proposed theatre, which constitute elements of hazards in proportion to seating capacity, and the fact that there was not safe and sufficient protection in case of fire.

Resolved, that the decisions of the fire commissioner be and they hereby are affirmed, and the appeal be and it hereby is denied.

172-26-A.

APPELLANT—Bush Terminal Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—31-57 43rd street, Brooklyn.

APPEARANCES—

For Appellant: H. A. Vollmer.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE RESOLUTION:

(172-26-A)

WHEREAS, Bush Terminal Company, owner, filed, February 27, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 31-57 43rd street, Brooklyn; and

WHEREAS, the order of the fire commissioner, dated February 5, 1926, reads (Order No. 90047-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs), placed within main stairway enclosure."

and

WHEREAS, the building is non-fireproof, one story (25 ft.) in height, 193 ft. by 66 ft. 10 in. (approximately 12,500 sq. ft.); OCCUPIED as a chicle refinery, 14 persons; and

WHEREAS, appellant proposes to provide a 6 in. rising connection with a 2½ in. hose outlet to the 6 in. underground fire main now existing on the premises.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted only so far as it affects the premises before the board, namely, 31-57 43rd street, Brooklyn, on condition that the building shall be not increased in height (one story); that the building shall be equipped throughout with an approved sprinkler system; and granted only so long as conditions as to occupancy and use shall remain otherwise unchanged.

204-26-A.

APPELLANT—John J. Gilmartin, for Unexcelled Manufacturing Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—22 Park place, Manhattan.

APPEARANCES—

For Appellant: John J. Gilmartin.

For Administration: Inspector Lynch of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon .....

Negative .....

Absent .....

THE RESOLUTION:

(204-26-A)

WHEREAS, John J. Gilmartin, for Unexcelled Manufacturing Co., Inc., owner, filed, March 10, 1926, an appeal from an order of the fire commissioner, affecting premises 22 Park place, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated February 18, 1926, reads (Order No. 33088-LC):

"Your Permit No. 124232, expiring June 17, 1926, for the storage and sale of about fifteen hundred (\$1500) dollars of fireworks, firecrackers, ship signals and rockets at premises 22 Park place, Manhattan, is hereby revoked for the following reason:

"Premises are occupied as a factory or workshop in violation of Section 3-A-92, Article 6, Chapter 10, of Ordinances.

"You are, therefore, ordered to:

"1. Remove all fireworks from the premises."

and

WHEREAS, the building is non-fireproof, five stories in height, 28 ft. by 75 ft. in area at 1st story and 28 ft. by 70 ft. in area above. OCCUPIED: Cellar, storage of fireworks, 1 person; 1st floor, office and salesroom, 2 persons; 2nd floor, office, 7 persons; 3rd floor, salesroom, 3 persons; 4th floor, renting adding machines, 5 persons, 2 persons adjusting machines; 5th floor, salesroom, clothing, 4 salesmen and one tailor; and

WHEREAS, appellant contends having been in business at these premises for 18 years; that the quantities of stock on hand amounts to a value of \$250 (excepting at about 4th, when the quantity is increased to an amount value \$1,500); that the stock is stored in the cellar, which is sprinklered, and that the stairway leading from the cellar is fireproof and within a fireproof enclosure; and contends further, that there are very few persons in the building engaged at factory work; and

WHEREAS, it would seem that on June 28, 1917, the board of hazardous trades had made recommendations for the issuance of permits for this occupancy; and

WHEREAS, permits have been in force under those conditions since said date.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the stipulations of the recommendation of the board of hazardous trades of the fire department shall be complied with and maintained; and the fireworks stored and maintained in these premises shall be subject to the conditions of permit in force up to and including this year.

## THE RESOLUTION:

(212-26-A)

WHEREAS, Croker National Fire Prevention Engineering for Wm. Randall & Sons, owner, filed, March 12, 1926, an appeal from an order of the fire commissioner, affecting premises Nos. 104-118 Raymond street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 4, 1925, reads (Order No. 83119-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation Fire Department outlets on each story (including basements, cellars and roofs) placed within main stairway enclosure.";

WHEREAS, the building is non-fireproof, divided into sections A, B, C, D, E, F and G; 5,000, 5,000, 2,500, 5,000, 1,875, and 2,500 sq. ft. floor area, and 5, 3, 3, 2, 3, 3 and 1 in height, respectively; OCCUPIED by dyers and makers of straw and hemp braids, about 65 persons in the building; and

WHEREAS, the appellant contends that each section is separated from each other by fire walls with fire doors at all connecting openings, that no section exceeds 5,000 square feet in area; that the buildings are equipped with a fire alarm system; that building "A" is equipped with a sprinkler system; that there is no part of the structure which is over four stories in height, and that the order, No. 83119, may have been filed in error.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the floor area as now subdivided be not increased and that the structure shall be not increased in height or area; that the five-story section used for the storage and handling of dry material shall be equipped with an approved sprinkler system; that all horizontal openings throughout shall be equipped with automatic fire doors on each side of said openings; and that the use of the premises, other than the five-story section, shall be restricted to wet process bleachery.

Negative ..... 0

Absent: Chief Kenlon ..... 1

RESOLUTION:

(228-26-A)

WHEREAS, Edward P. Doyle, for Rug Renovating Co., owner, filed, March 18, 1926, an appeal from an order of the fire commissioner, affecting premises No. 90 Ridge street, Long Island City, Borough of Queens; and

WHEREAS, the order of the fire commissioner, dated August 8, 1926, reads (Order No. 89715-F):

"1. Install a standpipe system with risers 4 inches in diameter tested to withstand a pressure of 300 lbs. per square inch, extending from cellar to roof, with necessary check valves and 2½ inch regulation fire department outlets on each story (including basements,

cellars and roofs) placed within main stairway enclosure. Each outlet to be provided with sufficient feet of 2½ inch standard hose attached thereto.";

and

WHEREAS, the building is non-fireproof, divided into three sections, Nos. 1, 2 and 3, containing 7,500, 5,500 and 9,920 sq. ft. floor area, respectively; Nos. 1 and 2 sections are two stories in height, No. 3 section is one story in height; OCCUPIED for the purpose of renovating rugs; 1st story, dry room, wash room and shipping room, 45 persons; 2nd story, dyeing, 89 persons; and

WHEREAS, the appellant contends that the building is equipped with a thermostatic fire alarm system; that easy access may be had from four street fronts; that the building is only 28 ft. in height; furthermore, that the exits are adequate and fire hydrants are located near by.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the building shall not be increased in height, area or dimension; that the floor areas as now subdivided shall remain unchanged; that all horizontal openings shall be equipped with automatic fire doors on each side of opening; that the entire premises shall be equipped throughout with thermostatic fire alarm, with central office connection; and granted so long as premises remains in single tenancy and operation.

## THE RESOLUTION:

(1344-25-BZ)

WHEREAS, Thomas O'Rourke Gallagher, for Bay Lumber Company, owner, filed, December 28, 1925, an application, under the building zone resolution, to permit in a residence district extending from a business district the extension and enlargement of a lumber yard; premises west side of East 12th street, 100 ft. south of Avenue W, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 1, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 12th street is in a residence district; Avenue W is in a business district and that Lancaster avenue is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 20, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Section 3.

"The extension of a lumber yard into a residential district. Therefore application denied.";

and

WHEREAS, the existing lumber yard is approximately 97 ft. 8½ in. by 100 ft. in area, located within a residence dis-

trict; it is proposed to add an area 160 ft. by 97 ft. 1½ irregular, the new area being wholly within a residence trict; and

WHEREAS, the board deemed that applicant was not entitled to the extension requested under sections 7c and of the building zone resolution, nor under section 21 of zoning resolution on the ground of practical difficulties unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is affirmed, and that the application and it hereby is denied.

## THE RESOLUTION:

(195-26-BZ)

WHEREAS, George Kindermann, for Manderkin Building Company, owner, filed, March 8, 1926, an application, under the building zone resolution, to permit in a business district and also in a "B" area district the erection and maintenance of a building provided with a yard smaller than that required by the zone resolution; premises 1362-1366 Webster avenue, The Bronx; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 1, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Webster avenue, Brook avenue and Kinderman place are in a business district and also a "B" area district; and

WHEREAS, the decision of the superintendent of buildings, rendered February 4, 1926, reads:

"1. Rear yard must be provided above first story to comply with requirements of Building Zone Resolution in a business use district and B area district."

and

WHEREAS, the proposed building is of fireproof construction, eight stories in height, with a frontage of 46 ft. and a depth of 90 ft. at 1st story, 85 ft. above 1st story; to be occupied as furniture storage warehouse; it is proposed to provide a yard starting 12 ft. above curb level, to be 5 ft. deep and extending 33 ft. along the rear lot line, the remaining 13 ft. to be occupied by an elevator shaft (the zone resolution requires a yard in this case 9 ft. deep at its lowest level and increasing in depth to 16 ft. 8 in. at roof level; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that a yard of not less than 5 ft. in depth for the full width of the property, other than the 13 ft. required for the elevator shaft, shall be maintained, and that the requirements of the building zone resolution be complied with in all other respects; that the rear wall of the elevator shaft shall be unpierced throughout its entire height and length; that the permits required shall be obtained within nine months after the building completed within eighteen months from the date of this action.

## AREAS FIXED.

(208-26-BZ)

The chairman presented and read a communication from Belefried Garage Corp., requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 1040 Forest avenue, The Bronx.

The following area was approved by the board:

Both sides of Forest avenue from 166th street to a point 100 ft. south of 165th street; the northerly side of 165th street from Forest avenue to Tinton avenue and the westerly side of Tinton avenue from 166th street to a point 250 ft. northerly therefrom.

(323-26-BZ)

The chairman presented and read a communication from James W. Byrnes, requesting the board to fix the area deemed affected and within which to obtain consents for the erection and maintenance of a garage; premises 630 Pacific street, Brooklyn.

The following area was approved by the board:

Both sides of Pacific street from Fifth avenue to a point 400 ft. east of premises in question; the east side of Fifth avenue and Flatbush avenue from Pacific street to Dean street; also the north side of Dean street from Flatbush avenue to a point 170 ft. east of Flatbush avenue.

VOTE TO REOPEN—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1320-25-A)  
WHEREAS, Vulcan Rail & Construction Co., owner, filed, November 19, 1925, an appeal from an order of the fire commissioner, affecting premises south side Grand street, 460 ft. west of Garrison avenue, Maspeth, Borough of Queens;

WHEREAS, the order of the fire commissioner, dated June 1, 1925, reads (Order No. 78888-LF):  
"An inspection of premises S. S. Grand St., 460 ft. west of Garrison Ave., Maspeth (rear building), Borough of Queens, shows a fire hazard, to correct which the fire commissioner is hereby specially directed, within five days, to do the following:

1. Complete standpipe installation as per plan No. 524, Sec. 20, Ch. 12, Code of Ordinances."

WHEREAS, the building is fireproof, two stories (26 ft.) high, 105 ft. by 107 ft. (irregular), approximately 13,000 sq. ft. in area; OCCUPIED for the manufacture of print-cases; 1st story, 20 persons; 2nd story, 5 persons; and WHEREAS, appellant contends that the inks manufactured at the premises contain a percentage of inflammable oils and that there has been installed a complete Foamite system, consisting of two 3,000-gallon solution tanks, rotary pumps, and the necessary hose to cover the entire build-

ing; appellant contends, further, in view of the composition of the material manufactured, that in case of fire, the Foamite will be more effectual than water; and

WHEREAS, no one appeared when this case was called.  
Resolved, that the appeal be and it hereby is *dismissed* for lack of prosecution.

1182-25-A.

APPELLANT—John Schneider, owner.  
SUBJECT—Application for reopening—extension of temporary permit (re appeal from decision of fire commissioner).

PREMISES AFFECTED—147 12th avenue, Long Island City, Borough of Queens.

PEARANCES—  
For Appellant: John Schneider.  
ACTION OF BOARD—Application for reopening granted; permit extended.

THE VOTE TO REOPEN AND EXTEND PERMIT—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle ..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION—

(1182-25-A)  
WHEREAS, J. Schneider, Sr., owner, filed, November 13, 1925, an appeal from a decision of the fire commissioner, affecting premises 147 Twelfth avenue, Long Island City, Borough of Queens; and

WHEREAS, the decision of the fire commissioner, rendered November 5, 1925 (Alt. Applic. No. 2437-1925), reads:

"1. Burner must be of a type approved by Board of Standards and Appeals. Examination continued when additional information is received."

and  
WHEREAS, the building is of frame and glass sash construction, one story in height, 100 ft. by 100 ft. in area; OCCUPIED as a greenhouse; the appellant having installed an oil burning system, consisting of a 2,000-gallon storage tank, all necessary piping and valves in accordance with the fuel oil rules, except as to the burners; and

WHEREAS, the appellant has submitted plans to the fire department, which were disapproved; and

WHEREAS, the appellant claims that he is using four burners, known as the "Strong, Carlisle & Hammond Burner," which is now before the board for its consideration under Calendar No. 1046-23-S; the appellant requests a temporary permit to operate the fuel oil system, pending the approval of the burner; and

WHEREAS, this appeal was granted by the board at its meeting, March 9, 1926, for a temporary period, and appellant requests an extension of time.

Resolved, that the decision of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted*, for a temporary period of ninety days, subject to further examination and consideration of plans filed in the fire department.

## BUILDING ZONE CASES.

25-26-BZ.

APPLICANT—Magnuson & Kleinert, for Squillacci & Torre, owners

THE RESOLUTION—

(242-26-BZ)

WHEREAS, Magnuson & Kleinert, for 15th Street Amusement Company, owner, filed, March 27, 1926, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a building to be used for theatre and store purposes; premises 187-8-9 Prospect Park West, southwest corner of 14th street, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 1, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Prospect Park West is in a residence district; 14th street is in a residence district and 15th street is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered March 9, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3.

"The erection of stores and a theatre in a residential district.";

and

WHEREAS, the proposed building is to be of fireproof construction, two stories in height, with a frontage of 60  $\frac{1}{4}$  in. and a depth of 135 ft.; to be occupied for theatre and store purposes; and

WHEREAS, there existed on this plot prior to July 1916, a building occupied as theatre and stores, and under Cal. No. 795-21-BZ the board granted permission for the enlargement of the theatre but the variation granted was never availed of; and

WHEREAS, the board deemed that applicant was entitled to relief under sections 7a and 7c of the building zone resolution, and under section 21 in that there would be practical difficulties and unnecessary hardship in the way of carrying out the strict letter of the zoning resolution.

Resolved, that the board of standards and appeals do hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed a two-story structure in height above grade, more particularly described as an auditorium and one balcony, the use, operation and conduct of the building to be restricted exclusively to a motion picture theatre; that there shall be no exits or entrances on the 14th street side, other than required by the code of ordinances as emergency exits, under section 25 of the building code; that the exterior facing of the structure on 14th street and on Prospect Park West shall be of face brick and architectural terra cotta or stone trimmings; that there shall be no sign of any nature or description permitted on the 14th street elevation of the proposed building; that there shall be no roof sign erected on any portion of the structure; that the store front construction of the building on the Prospect Park West side shall not return on the 14th street side; a brick return of not less than 16 in. in width shall be constructed on Prospect Park West elevation at the corner of the building at the intersection of Prospect Park West and 14th street; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eight months from the date of this action.

729-23-BZ.

APPLICANT—Joseph J. Dalmases, for Conrad Christina, present owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 7g of the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of four (4) motor vehicles, three spaces rented to persons not residing on the premises (previously granted by the board for a temporary permit).

PREMISES AFFECTED—733-735 East 235th street, The Bronx.

APPEARANCES—

For Applicant: Joseph J. Dalmases.

For Opposition: None.

THE RESOLUTION—

(729-23-BZ)

WHEREAS, John De Hart, for Nicholas Di Gregorio, owner, filed, June 11, 1923, an application, under the building zone resolution, to permit in a residence district the maintenance of a garage for the storage of four (4) motor vehicles, three spaces rented to persons not residing on the premises; premises 733-35 East 235th street, Borough of The Bronx; and

# MINUTES

WHEREAS, a public hearing was held on this application before the board of appeals, at its regular meeting, December 18, 1923, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that East 235th, East 236th street and Byron avenue are residence districts; and

WHEREAS, the decision of the superintendent of buildings, rendered June 1, 1923, reads:

"Your request of May 29th for a certificate of occupancy for a garage of four motor vehicles, three of which are to be rented out to persons not residing on the premises 733-35 East 235th Street, Bronx, is hereby denied for the reason that the premises are located within a residence district as established by the Building Zone Resolution and the garage will not be used solely as an accessory to the dwelling upon the premises."

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 35 ft. and a depth of 20 ft.; occupied as a garage for the storage of motor vehicles, three spaces rented to persons not residing on premises; and

WHEREAS, the applicant has filed the duly acknowledged certificate of the owners of 82.3 per cent of the property interest deemed by the board to be affected; and

WHEREAS, this application was granted by a resolution of the board, December 18, 1923, for a period of two years, and April 20, 1926, for the purpose of renewing the same; and

WHEREAS, Conrad Di Christina, the present owner, through his attorney, Joseph J. Dalmases, has requested an extension of the original permit for a further period of two years; he has filed twenty-one (21) new consents, amounting to 81.1 per cent of the area affected; and

WHEREAS, applicant has filed in excess of 81 per cent of the area deemed affected and fixed by this resolution;

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted for a temporary period of two years from this date under the conditions of the original resolution, which reads that the use of the garage be limited to four automobiles of the pleasure car type, space for three of which may be rented to persons not residing on the premises; that there be no gasoline storage maintained on the premises except in the tanks of the cars; that there shall be no advertising or signs of any nature or description; that there be no line storage; and that all permits shall be obtained within thirty days.

## THE RESOLUTION—

(912-24-BZ)

WHEREAS, John DeHart, for Estate of Victoria Landt, et al., owner, filed, July 10, 1924, an application, under the building zone resolution, to permit in a business district the erection and maintenance of a garage for the storage of more than five motor vehicles; premises 1501-1509 Jerome avenue, Borough of The Bronx; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting November 5, 1924, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Jerome avenue and West 172nd street are business districts and Inwood avenue is an unrestricted district; and

WHEREAS, the decision of the superintendent of buildings, rendered July 1, 1924, in acting on N. B. Application No. 2061-24, reads:

"Proposed erection of garage for storage of more than five motor vehicles in business district is contrary to provisions of Building Zone Resolution.";

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 114 ft. 8¼ in. and a depth of 100 ft., irregular in area; to be occupied as a garage for more than five motor vehicles; and

WHEREAS, there existed on this street between the intersecting streets on July 25, 1916, a stable for more than five horses and the whole of Jerome avenue running north being now occupied by garages or permits for their erection having been issued, other than lots 64 and 65; and

WHEREAS, this application was granted by the board of appeals at its meeting November 5, 1924, by the following resolution:

"Resolved, that the board of appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building be limited to a one-story structure in height, of flat roof design and construction; that the rear and gable walls be unpierced throughout their entire height and length; that there be no vehicular entrance on the 172nd street front of this structure nor within 30 ft. of the corner of Jerome avenue; that the street front on 172nd street and Jerome avenue be finished in face brick with architectural terra cotta or stone trimmings, of attractive architectural design, return of proposed design to be made to this board for approval before submitting same to the superintendent of buildings; that any gasoline storage equipment installed shall be located at the extreme northerly end of the Jerome avenue front; that there shall be no signs or advertisement display maintained on the 172nd street front of the structure; and that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action.";

and

WHEREAS, the applicant requests an extension of time to complete the work.

Resolved, that the board of standards and appeals does hereby grant an extension of time in which to complete work of one year from date of this action, June 1, 1926, on condition that the balance of resolution shall be complied with in all other respects.

THE RESOLUTION—

(528-25-BZ)

WHEREAS, Alfred J. Boulton, for Harry Beldin, owner, filed, May 21, 1925, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a poultry slaughter house; premises east side of Bay 37th street, 285 ft. north of Cropsey avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, December 1, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Bay 37th street is in a residence district; that Bay 38th street is in a residence district, and that Cropsey avenue is in a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 1, 1925, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 3:

"A poultry slaughter house in a residential district.";

and

WHEREAS, the proposed building is to be of non-fireproof construction, one story in height, with a frontage of 25 ft. and a depth of 75 ft.; to be occupied as a poultry slaughter house; and

WHEREAS, the board deemed that the character of existing development and the sparsely settled condition of the section warranted the exercise of its discretion under sections 7f and 21 of the zoning resolution, to permit a temporary variation for non-conforming use; and

WHEREAS, this application was granted by the board at its meeting, December 1, 1925, on certain conditions, and applicant requested a modification as to time limit.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted*, for a temporary period of two years from the date of issuance of permit by the health department, *on condition* that the health department authorize the conduct and operation of a chicken slaughter house on these premises; the building shall be restricted in height to a one-story structure above grade; the rear and gable walls shall be unpierced throughout their entire height and length unless opening on property in the same ownership and within the same lot area; and that all permits required by law and ordinances shall be obtained within three months and the building completed within six months from June 1, 1926.

THE RESOLUTION—

(1479-24-BZ)

WHEREAS, Charles D. Cords, for Charles Dougherty, owner, filed, December 16, 1924, an application, under building zone resolution, to permit the extension, from unrestricted district into a business district, of a proposed garage for the storage of more than five motor vehicles premises 42-44 Schenectady avenue, Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of appeals, at its regular meeting, March 1, 1925, after due notice by publication in the Bulletin of Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Herkimer street is a business district and Atlantic avenue is an unrestricted district; Schenectady avenue is an unrestricted district to a point 100 ft. north of Atlantic avenue and northerly from this point is a business district; and

WHEREAS, the decision of the superintendent of buildings, rendered November 26, 1924, in acting on Application 23364-24, reads:

"Proposition contrary to the Zone Resolution, Art. II, Sec. 4.

"The erection of a public garage for more than five motor vehicles partly in a business district.";

and

WHEREAS, the proposed garage is to be of non-fireproof construction, one story in height above grade, irregular area, having a frontage of 50 ft. on Schenectady avenue and a width across the rear of 135 ft. 6 in. and a depth of 75 ft.; about 50 per cent of the proposed garage is in an unrestricted district and the remainder is in the business district; and

WHEREAS, under the provisions of section 7, subsection C, and section 21, the board is empowered to act; and

WHEREAS, this application was granted by the board of appeals at its meeting, March 17, 1925, by the following resolution:

*"Resolved*, that the board of appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted on condition* that the building shall not exceed one story in height above grade, and shall be fireproof throughout all walls of this structure, other than the street front on Schenectady avenue, shall be unpierced throughout their entire height and length, except such openings from the southerly gable wall to Atlantic avenue as may be required, located within the unrestricted use area of plot; that there shall be no skylights installed within 25 ft. of the northerly gable wall in the business area; that all skylights installed be glazed with plain glass, equipped with wire mesh above and below; that there shall be no roof of any nature or description erected or maintained that the exterior of the brick gable walls within business area shall be laid up with struck joints throughout; that any gasoline storage equipment installed be located at the Schenectady avenue front of the building; that the street front of the walls on Schenectady avenue shall be finished in face brick with archi-

terra cotta or stone trimmings; that all permits necessary for the prosecution of the work shall be obtained within nine months and the building completed within eighteen months from the date of this action."

WHEREAS, the applicant requests an extension of time to obtain permits and complete the work.

*Resolved*, that the board of standards and appeals does hereby *grant an extension* of time for six months to obtain permits and one year to complete work, under conditions of original resolution.

Adjourned 5 p. m.

WILLIAM J. O'GORMAN, *Secretary*.

## MINUTES

### \*CORRECTION.

The minutes of the meeting of the board of standards and appeals, held April 27, 1926, as they appeared in Bulletin No. 18, Vol. XI, are hereby corrected to read as follows:

### THE RESOLUTION:

(22-26-S)

WHEREAS, Samuel Schlau, for Sylvania Realty Corp., filed, January 8, 1926, a petition for variation from requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 529-531 West 46th street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated December 2 and 9, 1925, respectively, read (Order No. 87627-)

"1. Provide a safe and unobstructed egress from the building by constructing a fireproof passageway with an unobstructed width of at least 3 feet throughout, leading to the street, \* \* \*"

(Order No. 88009-LD)

"1. Arrange the bars on windows on north and east sides of building on 1st, 2nd and 3rd stories, so as to be readily movable or removable from both sides in such a manner as to afford the free and unobstructed

*Correction*—No. "329-31" West 46th street changed to "31" West 46th street in line 4.

use of such windows for purposes of egress, as per Sec. 272 of the Labor Law."

and

WHEREAS, the building is non-fireproof, three stories in height, "L" shape, having a frontage of 50 ft., a depth of 67 ft. and 25 ft. wide at the rear. OCCUPIED: 1st story, garage for two automobiles and the remainder of the premises as a dry cleaning establishment, 12 persons on the 1st story; 2nd story, 3 persons; 3rd story, 22 persons; EQUIPPED with a fire alarm signal system. EXITS: An interior wooden stairway extending from the 1st story to roof; enclosed in fire-retarding partitions on the 1st story and open above; a fire escape on the easterly wall of the building, extending from the roof to 2nd story balcony, with counter-balanced stair to yard; with EGRESS from the termination of the fire escape through the garage portion of the 1st story to street; and

WHEREAS, there are eight barred windows in the northerly walls and also eleven barred windows in the easterly wall of the premises; and

WHEREAS, petitioner proposes to fire-retard the ceiling and walls (where there are no brick walls) of the garage with plaster board and 26 gauge metal; and in re: the barred windows, contends that they are a necessary protection against theft, and that the building is adequately equipped with exits.

*Resolved*, that the orders of the fire commissioner be and they hereby are *affirmed*, and the petition be and it hereby is *denied*.

*Cases listed in the Reserve Calendar are cases in which action by the board has been deferred pending committee reports, of this board, court or departmental actions and will remain thereon until the aforesaid reports or departmental actions are consummated. Where a case or cases will be restored to the regular calendar due notice of the date set for hearing will be mailed to appellant, applicant or petitioner of record.*

# RULES

## FIRE RETARDING RULES

ated by the Board of Standards and Appeals August 1917; Amended November 1, 1917, and Feb. 3, 1922.

**Rule 1. Fire Retarding Materials for Garages, Motor Vehicle Repair Shops and Oil Selling Stations.** In garages, motor vehicle repair shops and oil selling stations the material or form of construction shall be deemed fire-retarding within the meaning of §73, subdivision 3, of the building code, that resists the action of flame when subjected to a continuous fire for one hour at an average temperature of seventeen hundred degrees Fahrenheit without the passage of flame, with a maximum temperature rise to four hundred degrees Fahrenheit on the side away from the fire. The point at which the temperature of transmitted flame is measured shall be protected from external air under weather conditions.

When the test specimen is in the form of partition construction, the area under test shall be not less than one hundred (100) square feet and least dimension shall be not less than nine (9) feet. When in the form of floor construction, the area under test shall be not less than two hundred (200) square feet and the least dimension shall be not less than fourteen (14) feet. During the fire, the floor construction shall support the live load for which it is designed, and after the fire shall safely sustain twice the designed live load with a maximum deflection of not more than one two-hundredth (1/200) part of the span.

**Rule 2. Wood Joisted Floor Construction.** Wood floor construction shall be accepted as fire-retarding construction in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations when the beams are protected on the upper and lower sides with the fire-retarding materials specified for floor and ceiling coverings.

**Rule 3. Floor Covering.** Any one of the following methods of construction shall be accepted as fire-retarding floor covering of the upper sides of wood floor beams in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) Seven-eighths ( $\frac{7}{8}$ ) inch wood underflooring protected with a membrane of two-ply waterproofing covered with not less than two and one-half ( $2\frac{1}{2}$ ) inches of 1:2½:5 concrete or better, reinforced with not less than one-fourth ( $\frac{1}{4}$ ) of one (1) per cent of steel mesh.

(b) Two and one-half ( $2\frac{1}{2}$ ) inches of 1:2:4 concrete applied directly to the top of the joists, with or without temporary support, reinforced with not less than one-fourth of one per cent steel rods, mesh or metal lath, and having the tops of the joists coated with approved waterproof paint or protected by tar paper on the top and on the sides for a distance of three inches from the top. (Amendment, Nov. 1, 1927.)

**Rule 4. Ceiling Covering.** Any one of the following methods of construction shall be accepted as fire-retarding ceiling covering of the undersides of wood floor beams in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations:

(a) One-half ( $\frac{1}{2}$ ) inch plaster boards, or three-eighths ( $\frac{3}{8}$ ) inch gypsum wall boards weighing not less than 16 pounds per square yard with pointed joints covered with No. 26 U. S. gauge sheet metal on one (1) inch lapped seams nailed to the wood floor beams when spaced not more than sixteen (16) inches on centers, or nailed to furring strips when spaced not more than sixteen (16) inches on centers;

(b) Two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos board laid with tight staggered joints and nailed to the beams, when spaced not more than sixteen (16) inches on centers, or nailed to furring

strips when the floor beams are more than sixteen (16) inches on centers.

(c) Metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) inch thick.

**Rule 5. Attachment to Ceiling.** Fire-retarding ceilings in non-fireproof buildings used as garages, motor vehicle repair shops or oil selling stations shall be attached to wood floor beams and girders in such manner as to maintain an air space between the wood beams, and all wood beams shall be seasoned before applying the protective coat.

**Rule 6. Openings in Fire-Retarding Floors.** Pipes or conduits which pass through floors shall be fitted with metal thimbles and made watertight for a height of three (3) inches above the floor.

**Rule 7. Columns.** All structural posts and columns in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials accepted in fireproof construction; except that an air space shall not be required around steel or cast iron columns.

Where necessary for protection against mechanical injury, the fire-retarding protection on columns shall be jacketed to a height of five (5) feet from the ground with No. 4 U. S. gauge metal.

**Rule 8. Girders.** All girders in non-fireproof buildings required to be fire-retarded shall be protected with the fire-retarding materials specified for ceiling coverings in these rules, or with any of the materials acceptable in fireproof construction; except that an air space need not be provided around steel girders.

**Rule 9. Shaft Enclosures.** Existing stairways and vertical shafts in non-fireproof business buildings hereafter converted to be used as garages, motor vehicle repair shops or oil selling stations shall be enclosed in fire-retarding partitions continued through the non-fireproof floor construction, and when unfilled wood stud partitions are used, the space between the floor beams shall be fire-stopped with incombustible materials. All openings in such partitions shall be protected with accepted metal-covered fire doors or windows. Wherever necessary for protection against mechanical injury, the partition shall be jacketed to a height of five (5) feet on the garage side with No. 4 U. S. gauge metal. Any one of the following forms of partitions shall be accepted for the enclosure:

(a) Two by four inch wood studs, spaced not more than sixteen (16) inches on centers, covered both sides with metal lath weighing not less than three pounds per square yard, attached to furring strips and plastered with Portland cement mortar at least three-quarters ( $\frac{3}{4}$ ) of an inch thick;

(b) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, one-half ( $\frac{1}{2}$ ) inch plaster boards with pointed joints and No. 26 U. S. gauge sheet metal with one-inch lapped seams;

(c) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, covered both sides with seven-eighths ( $\frac{7}{8}$ ) inch wood sheathing, two thicknesses of one-quarter ( $\frac{1}{4}$ ) inch asbestos boards laid with tight staggered joints and jacketed with No. 16 U. S. gauge metal on the garage side to a height of five (5) feet.

(d) Two by four inch wood studs spaced not more than sixteen (16) inches on centers, filled in solidly between the studs with four inches of approved fireproof materials and covered on both sides with No. 26 U. S. gauge metal;

(e) Existing wood stud, lath and plaster partitions covered on the garage side with No. 26 U. S. gauge sheet metal with one-inch lapped seams.

# RULES

## RULES FOR THE CONSTRUCTION AND INSTALLATION OF GAS SHUT-OFF VALVES, ADOPTED BY THE BOARD OF STANDARDS AND APPEALS, JANUARY 11, 1924.

### RULES FOR GAS SHUT-OFF VALVES TO COMPLY WITH ORDINANCE AMENDING ARTICLE 2 OF CHAPTER 12 OF THE CODE OF ORDINANCES, RELATING TO CONTROL OF GAS IN CERTAIN BUILDINGS IN CASE OF FIRE.

1. Gas shut-off valves and accessory appliances shall include valves approved as such by the Bureau of Standards, Washington, D. C., by the Underwriters' Laboratories, Inc., Chicago, Ill., by the Associated Factory Mutual Laboratories of Boston, or other recognized standard laboratory; and all valves shall be approved and meet the test prescribed by the Board of Standards and Appeals.

2. Gas shut-off valves shall be installed only by corporations, firms or individuals who shall furnish evidence of their qualifications under the Code of Ordinances, to the Fire Commissioner or the Tenement House Commissioner in their respective jurisdictions.

3. Such corporations, firms, or individuals shall maintain a Service Station which shall be in direct communication with the Fire Department by telephone or telegraph. Location of service station and means of communication shall be on file with the Fire Commissioner, in order that the Fire Department may insure immediate service when the gas is turned off by the members of the Fire Department or from any other cause.

The Fire Department shall have exclusive use of gas shut-off valves to be operated in the event of fire or other emergencies.

4. All gas shut-off valves to be installed must be made of the best quality of standard materials.

#### Protection of Valves:

5. The gas shut-off control shall be protected by a suitable, approved metal box, placed on the exterior of the building, which shall be connected, through a rigid metal conduit, by a cable, with the valve body placed on the gas intake where the gas pipe enters the building, and as near as practicable to the inside face of the wall, before reaching the meters. The lock for securing box on outside wall of building shall be operative only by a Fire Department inner box key by members of the Fire Department.

6. All valve bodies shall be made of brass or bronze. If a spring is used to actuate a valve in conjunction with the fusible link, it shall be of the best quality phosphor bronze.

7. The internal mechanism which acts to shut off the gas shall be securely connected with the external mechanism by a direct mechanical connection, made gas tight, where it passes through the valve body, by a stuffing box filled with soft, well-lubricated packing, in accordance with recognized standard practice.

#### Installation:

8. The valve shall be so installed as to be conspicuously displayed and readily inspected and reset by authorized persons.

Valves shall be located so that condensation will not accumulate in the valves; and shall be installed so that gas will flow through the valve in direction indicated on it.

9. Valves shall be secured in piping by threaded connections or companion flanges. Combustible packing or sheet lead shall not be used between flanges.

10. The gas main at both ends of the valve must be rigid and secure to withstand the pull from the control handle. Additional non-combustible brackets or hangers must be provided, if necessary, to secure and maintain rigid installation.

11. The valve shall be enclosed in a substantial, perforated metal case, conspicuously exposed, painted and protected by standard lock acceptable to the Fire Prevention Bureau, and shall indicate the name, telephone number and address of installer, to insure prompt service to property owner.

12. Casing of the valve on gas intake shall be locked to protect valve from interference and make accessible only to authorized persons. Perforation allow circulation of air around fusible link, shall be provided and so arranged as to prevent tampering with valve when casing is locked.

#### Control Box:

13. The control handle for the manual closing of valve shall be in a locked metal control box having an iron cover conspicuously labeled with raised letters painted red.

14. On the outside of the cover or the inside of control box, in raised or stamped letters, or on a separate fastened metal plate, shall be displayed concise operating directions, together with the name, initials or registered trademark of the manufacturer.

15. The control box must be placed as nearly as practicable above the point where the gas main enters premises as is practicable, when this does not involve excessive length of cable and extra turns, and at a height above the sidewalk or grade, of not less than two feet and not more than five (5) feet. Without special permission, the control box shall not be placed or recessed on basement window frames, or directly above basement windows or other openings, nor shall it be placed behind doors or other obstructions which would prevent the Fire Department from having easy access to it.

16. Control boxes must be securely and permanently fastened. Whenever possible, they shall be fastened to non-combustible wall, pillar or column. They shall be secured by not less than two 3/16 inch bolts or equivalent. Unless the building is so constructed, the control box must unavoidably be secured to a wall. The use of wood screws is not permitted for supporting countersunk control boxes; lag bolts shall be used. When the walls are of masonry or concrete, through bolts, expansion bolts or toggle bolts shall be used. All fastenings must be arranged so that they cannot be loosened except from inside opening of control box.

17. Control boxes may be set or recessed into the wall to a depth not greater than the depth of the box. The cover is flush with the face of the wall. Control boxes may be mounted directly on the surface of the wall.

18. The control box shall be located on the outside of the building wall, facing the street, whenever possible. When the control box is installed on an alley facing a building, or in a similar place where the control box is subject to injury from passing vehicles, etc., the control box must be thoroughly protected. This may be accomplished by having the control box recessed, marked by a white red paint ring and waterproof white paint ring on the wall, or, when such protection is not available, protected by heavy iron channels or angles secured to the wall through bolts, expansion bolts, or toggle bolts.

#### Control Handles:

19. Control handles shall be of standard construction arranged to fit the control boxes so that they can be locked without difficulty, and cable connections shall be securely made in an approved manner, according to design of the handle.

# RULES

le:

0. The connection between the valve and control handle shall be as direct as practicable, and shall consist of a single piece of stranded phosphor bronze cable not less than 3/32 inch in diameter. No splices in the cable shall be permitted.

1. It is essential that cable connections to valve and handle be securely made according to the design in each case. The cable may be slightly annealed for making joints, and, when cutting the cable, it should be taped and covered through the tape, or a small amount of solder applied where it is to be cut, so as to prevent frayed end.

duit:

2. The control cable for the shut-off valve shall be run in galvanized wrought iron or steel pipe or other standard approved conduit not less than 1/2 inch in diameter. The pipe or conduit line must be water-tight and continuous from the casing enclosing the operating mechanism of the valve to the control box on outside of building. The cable shall not be exposed at any point in its run.

3. All ends of pipe or conduit, not only at valve and control box terminals, but in the run of the piping, shall be carefully reamed so as to remove burrs and fins caused by cutting-off tools, which would interfere with the movement of the cable in the run, or cut, or wear the cable. Joints should not be employed in making joints.

4. Pipe or conduit must be rigidly and permanently secured in position. Pipe straps and hangers of standard type may be employed for this purpose. In every case supports must be provided at points sufficiently numerous to prevent sagging. Pipe straps (if used) must be of steel of sufficient thickness to insure a permanent fastening and must be thoroughly coated to prevent corrosion.

s and Offsets:

5. Bends of small radius or through much of an arc, which produce possibilities of binding of the cable or of an appreciable friction resisting the pull of the cable; therefore, approved roller fittings shall be required wherever pipe or conduit is bent to a radius of less than 4 feet, or wherever the bend is through an arc exceeding 90 degrees, except as outlined for offsets.

6. When connections to control boxes are made from outside, it is frequently necessary to make an offset in the conduit to avoid a water table or other part of a building.

7. One offset of not more than 2 inches will be permitted for each installation at such points. The bends in pipe forming the offsets must be carefully made to avoid cracking the enamel or galvanized coating, or the cracking of the pipe or conduit. The amount of offset shall not exceed 2 inches and the length of the offset shall not be less than five times the amount of the offset. For example, a 2-inch offset must be at least 10 inches long. Single offsets only shall be permitted. Multiple offsets are not acceptable.

Fittings:

8. For turns in the conduit greater than those mentioned in rule 5, approved roller fittings shall be used. No roller fittings turning more than 90 degrees from a straight line shall be used.

Automatic Control:

9. The fusible link which controls actuation of the valve in event of direct heat, shall melt at not less than 225 degrees F and shall be so arranged as to in no way interfere with the manual means of shutting off the gas which is controlled by the handle in box placed on the face of the valve. Only approved fusible links shall be used. Automatic control shall in no way depend upon electric current in operation.

## Production Tests at Factory:

29. Valves must be tight under the following tests:

(a) Valves shall be mounted in the position in which they are designed to operate. Normal city gas pressure or equivalent air pressure shall be applied to the inlet side and the valve shall completely shut off the gas or air when closed as in normal operation.

(b) To determine whether the valve shuts off tightly under this test, a tube shall be connected with the outlet side of the valve and the outer end of the tube shall be immersed in water to a depth not exceeding one (1) inch, indicating leakage by bubbles rising through the water from the end of this tube.

(c) Valves, after this test, shall be capable of shutting off ten (10) pounds air pressure applied to the inlet side: to determine whether the valve is tight, the test procedure shall be as indicated in the preceding test.

(d) Valve bodies shall be strong enough to withstand, without leakage, one hundred (100) pounds pressure applied from either end with the other end closed. In this test the entire valve, including the stuffing box, shall be completely immersed in water, so that leakage will be indicated by bubbles rising through the water.

(e) The fusible link connections of each valve shall be carefully tested to avoid prematurely operating the gas shut-off valve through vibration or concussion. The construction of the fusible link connections shall be so designed and made that the automatic feature will not operate through vibration or concussion.

(f) The entire process of manufacture of the valves shall be subject to inspection and review and each valve shall be tested at the factory by a recognized laboratory or agency with facilities for making the test prescribed by the Board of Standards and Appeals, and each valve must bear satisfactory evidence that it has been so tested.

(g) Manufacturers of gas shut-off valves must submit the name or names of said laboratories or agencies to the Fire Commissioner or the Tenement House Commissioner, in their respective jurisdictions, with satisfactory evidence of their ability and facilities to properly carry out said tests.

(h) Valves and operating mechanism shall be so designed and constructed that they will withstand deteriorating effects or corrosion, as evidenced by operating tests.

## Installation and Inspection Tests:

30. a. After shut-off valve is installed, it shall be set and operated to determine that proper closure is secured by operating the control handle. Particular care should be taken to observe that when operating the control handle, no part of the cable or of its attachment to the valve interferes in any way with the positive closure of the valve.

b. After the above test, all gas outlets in the building must be inspected to insure their being closed before the valve shall be set and the gas turned on. Valve and connections shall also be tested for leaks by applying a solution of soap and water to all parts, including connections to gas piping.

c. After the valve has been used to shut off gas, it shall be reset only by authorized corporations, firms or individuals, or by members of the Fire Department.

d. Operating and installation corporations, firms or individuals responsible for the installation of the gas shut-off valves shall permanently maintain properly equipped service stations in each of the boroughs where they install valves.

e. Gas shut-off valves and installations shall be inspected at least once a year by members of the Fire Department or the Tenement House Department, in their respective jurisdictions, or by corporations, firms or individuals authorized to install gas shut-off valves, as determined by the Fire Commissioner or the Tenement House Commissioner, in their respective jurisdictions.

# RULES

## HATCHWAY PROTECTION.

The board of appeals, in acting on Cal. 1690-18-A, adopted  $\frac{5}{8}$  in. in width and a bar diameter of  $\frac{1}{8}$  in. The normal resolution in relation to the protection of hoistways overposition of the chains when the trap door is closed is pulled the entrance to stairways. This resolution permitted tell-up against the ceiling and side wall. When the trap door is opened, the loop ropes sustaining the chain drop down the side of the hoistway. The accompanying diagram shows the method and the chains form a curtain across the entrance doorway or platform. The accompanying diagram shows the method of operating the tell-tale chains. These chains have links and across the foot of the stairs.

# RULES

## COMMUNITY LAUNDRIES IN BUSINESS DISTRICTS.

*Amended Resolution Adopted by the Board of Appeals,  
March 16, 1920, Under Cal. No. 549-17-BZ.*

WHEREAS, the board of appeals, at its regular meeting, December 16, 1919, unanimously rescinded an opinion incidentally expressed and incorporated in a resolution adopted by the board on May 28, 1917, in acting on Cal. No. 549-17-BZ. This opinion was that a laundry is not a prohibited use in a business district under the building zone resolution. The board unanimously rescinded this expression of opinion, inasmuch as a laundry is a factory within the meaning of the labor law and must be so construed

under the building zone resolution in the absence of definition therein to the contrary.

*Resolved*, that this shall not be construed to include within the prohibited uses specified under Section 1 of the building zone resolution a community or neighborhood laundry located in the basement or ground floor of a building within a business district and containing not more than eight (8) rotary washing machines with inside extractors not more than 30 in. in diameter by 30 in. in height over all nor more than two 20 in. extractors, the measurement being the diameter of the inside basket of the machines and extractors shall be operated solely by electric power and do not require the installation of a boiler or plant.

# CONCRETE RULES

## USE OF HYDRATED LIME IN CONCRETE.

Adopted by the Board of Standards and Appeals, April 19, 1920, under Cal. No. 153-20-S.

The use of hydrated lime in all classes of concrete construction shall not be prohibited when used in accordance with the conditions hereinafter set forth.

The hydrated lime shall conform with the standard specifications for this material which have been adopted by the American Society for Testing Materials.

The maximum amount of hydrated lime which may be used shall conform with the following table, all weights given being the amount of lime which may be incorporated for each ninety-five pound bag of Portland cement.

1-1 $\frac{1}{2}$ -3 Mix, 4 pounds of hydrated lime per cement.

1-2-4 Mix, 5 pounds of hydrated lime per cement.

1-2 $\frac{1}{2}$ -5 Mix, 6 pounds of hydrated lime per cement.

For hand mixed concrete, the hydrated lime and cement shall be well mixed while dry.

Hydrated lime shall not be used in concrete to be deposited under water.

# PUBLIC HEARING

## PROPOSED AMENDMENTS TO FUEL OIL RULES.

(217-21-SR)

(598-19-SR)

NOTICE IS HEREBY GIVEN that a public hearing will be held by the board of standards and appeals on Monday, June 11, 1926, at 10 a. m., Room 1913, Municipal Building, on proposed amendments to Fuel Oil Rules.

*Matter in italics is new. Matter in [ ] is old matter to be removed.*

### Article 1. Definition.

The term "fuel oil" under these rules includes any liquid or mobile mixture, substance or compound derived from or including petroleum, which does not emit an inflammable vapor below a temperature of one hundred and thirty-five (135) degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester; and such oil shall be classified as either Grade A Fuel Oil or Grade B Fuel Oil.

### Grade A Fuel Oil Shall Include:

Oil used for fuel purposes under these rules which shall show a minimum flashpoint of not less than one hundred and fifty (150) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

### Grade B Fuel Oil Shall Include:

Oil used for fuel purposes under these rules which shall show a minimum flash point of not less than one hundred and thirty-five (135) degrees Fahrenheit when tested in a Tagliabue or Pensky-Martens closed cup tester.

Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

### [Rule 33.] Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial plants, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow tile of terra-cotta, concrete or gypsum, and not less than four (4) inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have an entrance from the street only, and shall be adequately ventilated direct to the outer air.

[(a)] No person, firm, company or corporation shall use in the limits of the City of New York any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

### [GRADE A FUEL OIL.]

### 2. Manner of Storage for [Grade A] Fuel Oil.

Oil, to be used for [commercial] heating and power purposes, shall be at all times contained in metal tanks with all openings or connections through the tops of the tanks.

### 3. General Location of Tanks for [Grade A] Fuel Oil.

In all *except* fireproof buildings fuel oil storage tanks shall be buried below the floor of the lowest story

in the manner required for tanks outside of the building or, if in the judgment of the Superintendent of Buildings the burial of tanks is not practicable by reason of soil, foundation or structural conditions, the tanks may be placed in the lowest story, subject to the requirements hereinafter set forth.

(b) Along the line of subways no tank shall be placed within twenty (20) feet of wall separating building from subway and, if practical, tanks shall be placed in a lower position than the roadbed of subway.

### Rule 4A. Location and Capacity of Tanks for the Storage of Grade A Fuel Oil.

#### Section 1. Inside of Buildings Above Ground.

(a) Where tanks cannot be buried and are located in the lowest story of any building, they shall be placed in an enclosure, the walls, floor and roof of which shall be constructed of reinforced concrete not less than eight (8) inches in thickness, or of twelve (12) inches of masonry and of dimensions six (6) inches greater on all sides than the outside dimensions of the tank.

(b) The walls of the enclosure shall be carried up to a height not less than one (1) foot above the tank and roofed over with reinforced concrete or similar fireproof construction capable of sustaining a load of three hundred (300) pounds per square foot.

(c) The roof of every enclosure shall contain a manhole with fireproof cover properly weighted, but not fastened, placed immediately above the manhole in the top of the tank.

(d) A space of at least two (2) feet shall be maintained between the top of the roof of the enclosure and the ceiling immediately above.

(e) The space surrounding the tank formed by the enclosure walls and roof shall be completely filled with dry upland sand or earth well tamped.

(f) Not more than one tank shall be placed in an enclosure.

(g) In non-fireproof or frame buildings the total storage capacity of tanks shall not exceed five thousand (5,000) gallons, except as stated in subdivision "h."

(h) In any building, if tanks properly enclosed or covered as above required are located in a fireproof or detached room which is cut off from the rest of the building vertically and horizontally in an approved manner and if such room is adequately ventilated to the outside air, the total storage capacity shall not exceed fifty thousand (50,000) gallons, with an individual tank capacity of not exceeding twenty thousand (20,000) gallons.

#### Section 2. Inside Buildings Below Ground.

(a) When a tank is buried below a building its capacity may be increased one hundred (100) per cent above that allowed for an inside tank as established in connection with buildings of such construction as specified in Rule 4, Section 1 (g) and (h).

[(b)] Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.]

[(c)] Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.]

#### Section 3. Outside of Buildings Above Ground.

(a) Where vertical tanks of one hundred and fifty thousand (150,000) gallons capacity or less are located

# PUBLIC HEARING

outside of buildings and placed above ground, the tanks shall be not less than one and one-fourth ( $1\frac{1}{4}$ ) tank diameters, and in no case less than ten (10) feet, from the line of adjoining property, or the nearest building or adjacent tank.

(b) Where horizontal tanks are located outside of buildings and placed above grounds, the tanks shall be not less than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters measured from the end of the tanks and not less than two (2) tank diameters measured from the side of the tanks, and in no case less than ten (10) feet from the line of adjoining property, or the nearest building or adjacent tank.

(c) Where existing outside above ground storage tanks have been placed closer together than one and one-quarter ( $1\frac{1}{4}$ ) tank diameters, a fire wall shall be built to a height of at least two (2) feet above the height of the highest tank completely separating the tanks for their full diameters or lengths.

(d) Tanks placed above ground shall be set on firm foundations and, if elevated, their supports shall be constructed of fireproof materials. All tanks shall be electrically grounded.

## Section 4. Outside of Buildings Below Ground.

(a) Tanks shall be buried underground below the level of any piping to which they may be connected, with the tops of the tanks not less than two (2) feet below the surface of the ground; or, in lieu of the two (2) foot cover of earth, tanks may be buried under twelve (12) inches of earth, well tamped, covered by at least six (6) inches of concrete, which shall extend at least one foot beyond the horizontal outline of tanks in all directions. Where necessary to prevent floating, tanks shall be securely anchored.

(b) Tanks shall be set on concrete or metal cradles which shall be placed on a firm foundation and surrounded with soft earth or sand well tamped. Tanks shall be completely encased with six (6) inches of concrete where soil conditions require.

## Rule 4B [19.] Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, *unless an approved anti syphon valve is used*, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

### 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.

## Rule 5. Material and Construction of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Cylindrical Tanks (except vertical tanks located outside of Buildings above Ground).

(a) All tanks for the storage of fuel oil shall be built of steel plates made by the Open Hearth Process and known to the trade as "Tank Steel." Same shall be free

from physical imperfections, such as, laminations, cracks, etc. All steel must be new, in good condition and free from rust. The thickness of steel required and the size and spacing of rivets shall be as stated in the table given below.

(b) All tanks must be welded, riveted and caulked or riveted and welded. Flanges or other pipe connections may be welded. All caulking shall be done with round nose tools and without injury to the plates.

(c) Thickness of cylindrical tanks.

Tanks 36 in. in diameter and less— $\frac{1}{4}$  in. shell,  $\frac{1}{16}$  in. heads.

Tanks 37 to 72 in. in diameter— $\frac{1}{4}$  in. shell,  $\frac{5}{16}$  in. heads.

Tanks 73 to 120 in. in diameter— $\frac{5}{16}$  in. shell,  $\frac{3}{8}$  in. heads.

Tanks over 120 inches in diameter to be of  $\frac{3}{8}$  in. shell and to be stiffened by angle rings or equivalent members so as to retain their cylindrical form.

(d) All cylindrical tanks shall preferably be built with dished heads. Should the owner desire to use flat heads, these flat heads must be braced in the same manner as described for the bracing of flat sides of rectangular tanks.

(e) Diameter and Spacing of Rivets.

Riveting in single lap seams shall not exceed a pitch as follows:

In shell  $\frac{1}{4}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{4}$  in. pitch.

In shell  $\frac{5}{16}$  in. thick,  $\frac{5}{8}$  in. diameter rivets  $2\frac{1}{2}$  in. pitch.

In shell  $\frac{3}{8}$  in. thick,  $\frac{3}{4}$  in. diameter rivets  $2\frac{3}{4}$  in. pitch.

### Section 2. Rectangular Tanks.

(a) All rectangular tanks shall be built of steel plates of the quality before mentioned for cylindrical tanks and of a thickness of not less than  $\frac{5}{16}$  of an inch.

(b) Corners may be made up by bending the plates or by the use of angles at the builder's option.

(c) Rivets in seams shall be  $\frac{5}{8}$  of an inch in diameter and spaced not more than  $2\frac{1}{4}$  inches center to center.

(d) All flat surfaces of rectangular tanks are to be braced. Bracing shall be done either by using structural members, which will act as girders and which will carry the load with a factor of safety of five (5), using bars from side to side, end to end and top to bottom of the tank, as the case may be.

(e) When structural members are used, such as angles, channels or beams, etc., the distance from the center of the rivet lines on these members must be in excess of twenty-four inches, and the rivets must be such that it will develop the full strength of the member. In no case shall the rivets be in excess of 6 inches center to center on these members.

(f) When structural reinforcing members are used together with braces, in order to reduce the effective length, the braces shall not be stressed higher than 10,000 (9,000) pounds per square inch taken in the minimum net section.

(g) If structural members are omitted and the flat surfaces of the tank are braced entirely by means of rods or other members, these members should not be spaced greater than 24 (24) inches center to center in all directions. The unit stress permitted in these members shall not be in excess of nine thousand (9,000) pounds per square inch taken in the minimum net section.

(h) The fastening between these members and the sides of the tank must in all cases be such that the members will develop the full net sections of the bars; in other words, the bar will break before the connection will let go.

### Section 3. Vertical Storage Tanks Located Outside of Building Above Ground.

(a) Vertical tanks located outside of buildings and above ground shall be built of steel plates of the quality before mentioned for cylindrical tanks.

(b) The minimum thickness of shell or bottom plates shall be  $\frac{1}{4}$  inch and the minimum thickness of head plates  $\frac{1}{8}$  inch.

# PUBLIC HEARING

The thickness of shell plates shall be figured in accordance with the following formula:

$$t \text{ equals } \frac{P \times r \times F}{T \times E}$$

P equals head pressure at bottom of ring under consideration.

r equals radius of shell in inches.

F equals factor of safety (taken as 5).

T equals tensile strength of plate in pounds per square inch (55,000 pounds per square inch).

E equals efficiency of vertical joint in ring under consideration (calculations to be based on formulas as given in Bulletin No. 14 of the New York State Industrial Commission).

c) Roof plates shall have single riveted water tight seams and the roof shall be built to shed water. Bottom plates shall have single lap riveted seams. Shell plates shall be designed, with proper efficiency to meet requirements in above formula for shell plates.

d) In all cases, steel tanks for the storage of fuel must be built metal to metal. No filler of any kind be permitted.

e) [Rule 20 (a)] Tanks for storage of grade B oil shall be constructed in accordance with the requirements of this rule except that tanks of a capacity of over 60 gallons and more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

f) [Rule 20 (b)] Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.

## Section 4. Welding.

1) Where welding is to be used for a part or for the whole tank, the tank shall be fabricated as required under Section 5.

2) All welded seams of plates shall be lapped or butt welded.

3) When the joint is a lapped joint, the sheet shall be lapped not less than two inches and welded both inside and outside. The plates shall be pulled up tight metal to metal before welding and kept tight together during welding. Both inside and outside welds shall be of full penetration fillet.

4) Where a butt joint is used, it shall be of the 90 deg. V type welded both inside and outside and reinforced to a total thickness of at least one and one-half times the plate thickness.

5) All heads shall be flanged, the straight part of the flange being not less than as follows:

For 3/16 inch heads, 1 3/4 inch flange.

For 1/4 inch heads, 2 inch flange.

For 5/16 inch heads, 2 inch flange.

For 3/8 inch heads, 2 1/4 inch flange.

6) For heads over 120 inches diameter the flange shall be reinforced in length by one-half inch for each increase in diameter of 2 feet.

7) Where heads are set into the shell, they shall be a tight fit and the shell shall fit the head closely all around.

8) If of over 1,100 gallon capacity they shall be welded inside and outside with full fillet welds. If of 1,100 gallon capacity or less and not over 48 inches in diameter, welding on the outside only will be sufficient.

9) Where the heads are butt welded to the shell, the head shall be reinforced to a total thickness of at least one and one-half times the shell thickness. For tanks of 1,100 gallon capacity the head welds shall be of the double V type welded inside and out and reinforced to a total thickness of not less than one and one-half times the shell thickness.

10) Where tanks are made up of two or more rings welded longitudinal joints of adjacent sections shall be staggered. At no point of a butt girth joint shall the joint on one side be offset with the sheet on the other side by an excess of one-half of the thickness of the plate. All girth joints shall be welded inside and out and

reinforced to at least one and one-half times the plate thickness, except that for tanks of 1,100 gallon capacity or less and not over 48 inches diameter, in which they may be of the same construction as the head seams.

(e) Where braces are welded to the plates the welding shall be done in such a manner as to develop the full net sections of the braces; in other words, the brace will break before the connection will let go.

Braces made in more than one piece shall not be joined together by any method of welding.

## Section 5. Rust Proofing.

All tanks shall be thoroughly coated on the outside with tar asphaltum or other suitable rust resisting material. Where soil contains corrosive substances, special protection may be required. Tanks shall not be coated until after the necessary tests have been made.

## Section 6. Venting of Tanks.

All tanks shall be vented. (See Rule 8, Section 6, for installation of vent pipes.)

## Section 7. Manhole Covers.

Manhole covers shall be of cast iron, cast steel or of the same material as used in the construction of the tanks. On tanks placed inside buildings, the manhole shall be bolted or otherwise secured to the tank and made gas tight. All tanks over 1,100 gallons capacity shall be provided with a manhole of at least 11 in. by 16 in.

## Rule 6. Enclosure and Protection of Tanks for the Storage of Grade A Fuel Oil.

### Section 1. Embankments and Dikes.

(a) Above ground storage tanks shall be protected by an embankment or a dike. Such protection shall have a capacity of not less than one and one-half (1 1/2) times the capacity of the tank so surrounded, and shall be at least four (4) feet high, but in no case higher than one-fourth (1/4) the height of the tank when the height of the tank exceeds sixteen (16) feet. Embankments or dikes shall be made of earth-work with clay core; masonry or impervious reinforced concrete. Earthwork embankments shall be firmly and compactly built of good earth from which stones, vegetable matter, etc., have been removed, and shall have a flat section at top of not less than three (3) feet and a slope of at least one and one-half (1 1/2) to one (1) on both sides. Concrete or masonry dikes shall be so designed as to safely carry the entire volume of the oil in the tank so surrounded.

(b) Embankments or dikes shall be continuous and unpierced. Piping shall be carried either over or under embankments or dikes in such a manner as not to interfere with the efficiency of the enclosure.

### Section 2. Fire Extinguishing Equipment.

(a) Every tank with a capacity of over five thousand (5,000) gallons inside of buildings and ten thousand two hundred (10,200) gallons outside of buildings shall be equipped with a system of steam pipes, blanket gas or other approved system for use in case of fire, so arranged and installed as to adequately protect the buildings or surrounding property.

(b) When steam is used, the steam supply pipe shall not be less than one-half (1/2) inch in size. The boilers shall be conveniently located, and the steam to the extinguisher lines shall be controlled by easily accessible valves.

(c) Near each boiler of fuel oil burning unit, there shall be kept ready for use, a hand fire extinguisher of not less than two (2) quarts capacity suitable for extinguishing oil fires.

## Rule 7. Tests of Tanks for the Storage of [Grade A] Fuel Oil.

### Section 1. Inside of Buildings or Outside Below Ground.

(a) All tanks located inside of buildings, either on or below the lowest floor level, and outside buried tanks,

# PUBLIC HEARING

shall withstand after being set in place, a hydrostatic *or oil* test for at least thirty (30) minutes and shall show no leaks.

(b) The hydrostatic *or oil* pressure on a tank shall be determined by measuring in feet the height from the lowest point in the tank to the highest oil reservoir from which the tank may be filled. This distance divided by 2.3 will give the equivalent pressure in pounds per square inch at the bottom of the tank. The hydrostatic *or oil* test pressure shall be not less than thirty (30) pounds per square inch for welded tanks, nor less than twenty-five (25) pounds per square inch for riveted tanks.

## Section 2. Horizontal Tanks Outside Above Ground.

Horizontal tanks outside of buildings and above ground shall stand, without leaking, a hydrostatic *or oil* test of twenty-five (25) pounds per square inch for at least thirty (30) minutes and shall show no leaks.

## Section 3. Vertical Tanks Outside of Buildings Above Ground.

Vertical tanks designed for outside above ground storage, having a cover of lighter material than that of the sides of the tank, shall withstand without leaking a head of water equal to that of the depth of the tank.

## Section 4. Test for Tanks. How Conducted.

(a) Tests shall be conducted in the presence of a representative of the Fire Commissioner. The contractor shall furnish all the equipment necessary for conducting the tests. Access to the inside and outside of tanks shall be maintained until the necessary tests are completed.

(b) Welded tanks shall, while under the hydrostatic test as hereinbefore specified, be subjected to a thorough hammer or impact test. The test shall consist of striking the sheet on both sides of the welded seam a sharp, vibratory blow with a 2 to 6 lb. hammer, the blows to be struck 2 to 3 inches apart and within 2 to 3 inches of, and on each side of, the seam, the blows to be as rapid as a man can conveniently strike a sharp, swinging blow, and as hard as can be struck without indenting or distorting the metal of the sheet.

## Rule 8. Piping for [Grade A] Fuel Oil.

### Section 1. Installation of Piping.

(a) Piping shall be run as directly as possible, without sags, and, except as provided in Rule 11-e, shall be laid so that where practicable pipes shall pitch toward the supply tank without traps; provision shall be made for expansion, contraction, jarring and vibration.

(b) Cross connections permitting gravity flow from one tank to another shall be prohibited.

(c) Pipes conveying oil, if laid inside of a building, shall be either buried or exposed to view. Where piping is exposed, it shall be easily accessible for inspection at all times and protected against injury. Exposed piping shall be hung or supported on fireproof materials to prevent falling in case of fire.

(d) Pipes laid below ground or subject to corrosion shall be protected.

### Section 2. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel for working pressures less than one hundred (100) pounds; for working pressures in excess of one hundred (100) pounds, extra heavy seamless drawn tubing and drop forged fittings shall be used. No pipe less than one-half ( $\frac{1}{2}$ ) inch inside diameter shall be permitted. *Except that for Grade B oil  $\frac{1}{4}$ -inch diameter pipes may be used.*

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire resisting materials. Hose shall be no longer than necessary.

### Section 3a. Tests for Piping. Grade A.

Piping for systems with working pressures under one hundred (100) pounds, after installation, shall be tested and proven tight at a hydrostatic pressure of not less than one hundred and fifty (150) pounds per square inch; where working pressure exceeds one hundred (100) pounds, piping shall be tested and proven tight at a hydrostatic pressure of not less than one and one-half ( $1\frac{1}{2}$ ) times the maximum working pressure. The maximum working pressure shall be noted on the plans. Tests shall continue for thirty (30) minutes.

### Section 3b. Tests for Piping. Grade B.

All piping after installation shall be tested and proven tight at a hydrostatic *or oil* pressure of one hundred (100) pounds per square inch.

### Section 3c. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than the supply pipe.

### Section 4. Relief Valves.

(a) All piping or heaters which can be separated from the source of supply and in which a dangerous pressure can be generated either by the action of a pump or by steam, shall be protected by an automatic pressure relief valve. Such automatic pressure relief valve shall discharge into the storage tank, or into the suction line provided there are no shut off valves in the suction line between the pressure relief valve discharge connection and the storage tank. No valves shall be installed in the safety valve lines. Automatic pressure relief valves shall be not less than  $\frac{1}{2}$  in. by  $\frac{1}{2}$  in. in the spring type with working parts of non-corrosive construction and shall be set to discharge at not less than fifty (50) per cent above the maximum working pressure.

(b) Where pressure systems are used an automatic by-pass valve of size equivalent to that of the discharge valve shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the suction line near the pump, or into the storage tank as described in the preceding paragraph. The automatic by-pass valve shall be constructed as described in the preceding paragraph with the exception that the setting mechanism shall be so designed as to prevent the complete closing of the valve.

### Section 5. Fill Pipes.

(a) Each fuel oil tank shall be provided with a separate fill pipe. Fill pipes when installed near any opening shall be as remote therefrom as practicable so as to prevent liability of flow of oil or vapor through the building opening.

(b) The receiver terminal of each fill pipe shall be located in a tight metal box or casing provided with means for locking. The delivery terminal shall be connected through the top of the tank.

(c) Fill pipe shall be provided with a trap or sump carried within four (4) inches of the lowest point of the tank.

(d) Fill pipe shall be made up with screw threaded flanged fittings and shall be oil tight and secured in place.

### Section 6. Vent Pipes.

(a) An open, galvanized iron vent pipe without a trap and draining to the tank shall be provided for each tank. The lower end of the vent pipe shall not extend below the top of the tank more than one inch.

(b) Where a battery of tanks designed to hold the same class of liquids is installed, vent pipes may be connected into a main header. Connections to the header shall not be less than one foot above the level of the highest reservoir from which the tanks may be supplied. The main vent pipe from the header shall be secured to the aggregate area of vent pipes connected to the tanks.

(c) Vent openings shall be screened by 40 mesh galvanized wire screen, and shall be of sufficient size to adequately vent the tank during the filling operation.

# PUBLIC HEARING

vents shall be not less than two (2) inches in diameter for tanks over 1,100 gallons capacity, and in no case less than one and one-quarter (1¼) inches in diameter.

(d) Vent pipes shall be provided with weatherproof hoods and terminate outside the building above the roof surface, not less than six (6) feet nor more than twelve (12) feet above the fill pipe. Such vent outlet shall not be located within three (3) feet in any direction of a window or other opening, or an exterior stairway, or fire escape, nor shall vent pipes be placed in elevator or dumb-waiter shafts, or in an enclosed court.

(e) If compelled, because of structural conditions, to carry the vent outlet higher than twelve (12) feet above the fill box, and if the fill lines are connected to trucks by tight connections and filled by pressure, one (1) inch line shall be connected to tank and fill parallel the fill line and terminate in the fill box with unthreaded end. A check valve shall be installed in line so as to permit excess oil in the tank to flow into the fill box and shall be so set as to prevent the passage of vapor to the street.

## Section 7. Return Pipes from Burners.

Return lines from burners, where necessary shall be not less than the diameter of the supply line to the burner. Return lines shall be run as direct as possible, shall be connected into the suction line near the pump or into the storage tank. No oil shall be returned to the storage tank at a temperature higher than one hundred and forty (140) degrees Fahrenheit.

## Section 8. Heating Coils in Tanks.

All heating to reduce viscosity of Grade A fuel oils in storage tanks in any building shall be only by means of water coils thermostatically controlled and the tanks shall not be heated above one hundred and forty (140) degrees Fahrenheit.

## Section 9. Valves and Control of Flow for Grade A Fuel Oil.

(a) Control valves at the burners shall be of a substantial type, provided with a stuffing box of liberal size containing a removable cupped gland designed to compress the packing against the valve stem and so arranged as to facilitate removal. Valves shall be designed to close against the supply and to prevent withdrawal of the stems by continued operation of the hand-wheel. The use of packing which may be affected by oil or heat is prohibited.

(b) A shut-off valve shall be provided in discharge line near each pump; in discharge line near each tank as near the tank as practicable, and in discharge lines near each burner.

## Section 10. Oil Level Indicating Device for Grade A Fuel Oil.

A test well or gauging device shall be installed and so arranged as to prevent the escape of oil or vapor within the building at any time. The top of the well when located outside of a building shall be sealed and kept closed when not in use.

## Section 11A. Pumps for Grade A Fuel Oil.

Pumps shall be of a recognized standard mechanical construction approved by the Board of Standards and Appeals.

Pumps shall be installed in duplicate where fire protection equipment is dependent on the use of fuel oil for heating or steam.

Pumps located in the same room where burners are installed shall be provided with a remote control.

Pumps used in connection with outside above ground storage tanks shall be located outside embankments, and at such a point that they will be accessible at all times, even if the oil in the tank or reservoir should be on fire.

Pumps may be located below the top of the oil storage tank or tanks where heavy oil is used having a viscosity of not more than eighteen (18) degrees Baume

and where the top of the tank or tanks is not more than ten (10) feet above the pump or pumps.

## Rule 11B. [Rule 24.] Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11A (a).

## Rule 12. Burners for [Grade A] Fuel Oil.

The burner mechanism shall be of a recognized type approved by the Board of Standards and Appeals. In domestic installations the burner shall be equipped with an overflow attachment or an automatic control to prevent flooding.

## Rule 13. General Devices for Grade A Fuel Oil.

(a) Devices which are subject to breakage and escape of oil shall be prohibited.

(b) Thermometers with large clear reading scales, placed in thermometer walls with screwed top connections, shall be installed at convenient and prominent positions in the oil supply pipe lines between the service tank and the pumps, and also between the pumps and the burner, to indicate the temperature of the oil.

## Rule 14. Instruction Cards.

Cards giving complete instructions for the care and operation of the fuel oil system shall be permanently fixed near the apparatus and maintained in readable condition.

## Rule 15. Operation of Plant Other Than Domestic Installations Using Grade A Fuel Oil.

No fuel oil burning plant shall be operated unless in charge of a person holding a certificate of qualification from the Police Commissioner. A certificate of qualification will be required of each person who is directly in charge of the operation of the plant during each shift.

## Rule 16. Installation.

No fuel oil system shall be operated or oil placed in the system until after a permit has been issued by the Fire Commissioner. Plans for each fuel oil system shall be submitted to the Fire Commissioner, together with a Certificate of the Superintendent of Buildings indicating that the proposed construction of the enclosure and the location of the tanks is in accordance with the requirements of the Building Code and these Rules.

## [Rule 17. Systems Prohibited Where Grade A Fuel Oil Is Used.

Systems fed by gravity or force systems are prohibited.]

## [GRADE B FUEL OIL.]

## [Rule 18. Manner of Storage for Grade B Fuel Oil.

Fuel oil to be used for domestic heating purposes where stored, shall be at all times contained in closed metal tanks.]

## [Rule 19. Location and Capacity of Tanks for the Storage of Grade B Fuel Oil.

### 1. Location.

(a) Storage tanks shall preferably be buried either outside of a building or below the lowest floor level. When located inside of a building and on the lowest floor level, the aggregate capacity of such storage tanks shall not exceed 200 gallons. Such inside storage tank shall be enclosed in 4 inches of terra cotta or 8 inches of approved masonry.

(b) Tanks shall be buried with top of tanks not less than 2 feet below the surface of the ground and below the level of any piping to which the tanks may be connected, except that, in lieu of the 2-foot earth cover, tanks may be buried under 12 inches of earth and a cover of reinforced concrete at least 6 inches in thickness extending at least one foot beyond the horizontal

# PUBLIC HEARING

outline of tank in all directions; concrete slab to be set on a firm, well-tamped earth foundation.

(c) Tanks shall be set on a firm foundation and surrounded with soft earth or sand well tamped in place. Tanks shall be completely encased with six (6) inches of concrete, where soil conditions require.

## 2. Capacity.

The total storage capacity shall not exceed 1,100 gallons.]

### [Rule 20. Material and Construction of Tanks for Grade B Fuel Oil.

(a) Tanks shall be constructed in accordance with the requirements of Rule 5, except that tanks of a capacity of over 60 gallons and not more than 550 gallons may be constructed of steel not less than 3/16 inches in thickness.

(b) Auxiliary supply tanks of 60 gallons or less capacity may be constructed of brass, copper, steel or wrought iron of not less than No. 14 U. S. Gauge.]

### [Rule 21. Tests of Tanks for the Storage of Grade B Fuel Oil.

All storage tanks located inside of buildings, either on or below the lowest floor level, or outside buried tanks, shall withstand a hydrostatic test for at least 30 minutes, of not less than twenty-five (25) pounds per square inch and shall show no leaks.]

### Rule 17. [22.] Auxiliary Tanks for Grade B Fuel Oil.

(a) Auxiliary supply tanks may be of the gravity type if suitable automatic safeguards to prevent abnormal discharge of oil at the burner are provided. The total capacity of such tank or tanks in any building shall not exceed 60 gallons.

(b) Auxiliary supply tanks, or storage tanks, shall not be located within ten (10) feet of any fire or flame, and where practicable shall be placed at an interior angle of the cellar, formed by the walls of the building.

(c) Auxiliary supply tanks shall be substantially and rigidly supported on metal frame or cradle and secured by 2x1/8-inch straps riveted or bolted to frame and securely fastened to wall of building by rigid metal braces.

### [Rule 23. Oil Level Indicating Device for Grade B Fuel Oil.

Gauging devices or test wells, the breakage of which would permit the escape of oil or vapor within the building, shall be prohibited. The top of the well when located outside of a building shall be sealed and kept locked when not in use.]

### [Rule 24. Pumps for Grade B Fuel Oil.

(a) Oil pumps used for supplying oil to the burners shall be rigidly fastened in place and secure against leaks.

(b) Pumps shall be of approved design as described in Rule 11 (a).]

### [Rule 25. Piping for Grade B Fuel Oil.

#### Section 1. Type and Material.

(a) All piping shall be of standard full weight brass, wrought iron or steel. Supply pipe shall be not less than one-fourth (1/4) inch in diameter, iron pipe size.

All piping shall be buried so far as it is practicable.

(b) All connections shall be tight and shall have well-fitted joints.

(c) Hose and couplings, where used in connection with mechanical burners, shall be capable of withstanding a pressure equal to the piping to which it is connected and shall be constructed of fire retarding materials. Hose shall be no longer than necessary.

#### Section 2. Tests.

All piping after installation shall be tested and proven tight at a hydrostatic pressure of one hundred (100) pounds per square inch.

#### Section 3. Fill Pipes.

See Rule 8, Section 5—(a), (b), (c) and (d).

#### Section 4. Vent Pipes.

See Rule 8, Section 6—(a), (b), (c), (d) and (e).

#### Section 5. Overflow Pipes from Burners and Auxiliary Tanks.

Overflow pipes shall be not less than one size larger than supply pipe.]

### Rule 18. [26.] Valves and Control of Flow for Grade B Fuel Oil.

(a) Readily accessible valves shall be provided on each burner and in the discharge line from each storage tank.

[(b) See Rule 9 (a) for construction of valves.]

(b) [(c)] A remote or thermostatic control for shutting off the supply of oil to the burners shall be provided.

(c) [(d)] An automatic by-pass valve of a size equal to that of the discharge line shall be installed between each pump and the first discharge shut-off valve. The automatic by-pass valve shall discharge into the discharge line near the pump or into the storage tank. The automatic by-pass valve shall be constructed of non-combustible materials and so designed as to prevent the complete closing of the valve. Automatic by-pass valves shall be set at not more than fifty (50) per cent of the maximum working pressure..

### [Rule 27. Burners for Grade B Fuel Oil.

Burners shall be of a recognized standard type approved by the Board of Standards and Appeals and shall be equipped with an overflow attachment so arranged as to shut off the flow of oil to prevent flooding.]

### Rule 19. [28.] Pilot Light.

Automatic systems unless electrically ignited shall be designed so that the flame cannot be extinguished by operation of the automatic control valve and a [A] pilot light of adequate intensity shall be provided in each combustion chamber, so arranged as not to be easily extinguished.

### Rule 20. [29.] Furnaces and Ranges.

(a) Stoves, ranges, hot air furnaces or other appliances originally designed for use of fuel other than oil shall not be used in connection with oil burners unless the space in which vapors might collect are adequately ventilated and if used shall be of such construction as to withstand the maximum temperature of which the oil burner in use is capable.

(b) No damper for closing of more than eighty (80) per cent of the effective area of the flue shall be installed in a smoke pipe or flue.

### Rule 21. [30.] Fire Protection in Domes and Stallions.

(a) No combustible material shall be stored within ten (10) feet of a furnace door.

(b) Any woodwork, wooden lath and plaster, or other combustible material within four (4) feet of the sides or back or eight (8) feet from the front of the furnace shall be covered with approved plaster or other approved incombustible material. At the front of the furnace there shall be constructed a ceiling consisting of plaster board covered with 26 U. S. gauge sheet metal or three-fourths (3/4) of an inch of Portland cement on metal lath; said ceiling shall extend four (4) feet beyond the sides and back and eight (8) feet from the front.

(c) Near the furnace, and so located as to be convenient for use in emergency, there shall be installed a hand fire extinguisher of an approved type for use on oil fires.

### [Rule 31. Instruction Cards.]

See Rule 14.

### [Rule 32. Installation.]

See Rule 16.

# PUBLIC HEARING

## Rule 33. Where the Use of Grade B Fuel Oil Is Permitted.

Grade B Fuel Oil, within the meaning of these rules, shall be used for domestic heating in buildings occupied by not more than two (2) families. If used in buildings occupied by more than two families or in commercial buildings, a Certificate of Qualification will be required as provided in Rule 15. And for buildings occupied by more than two families or in commercial plants the room or rooms in which the oil conveying piping and equipment is installed shall be cut off from the rest of the building by fireproof partitions, ceilings and floors constructed of not less than eight (8) inches for brick, not less than six (6) inches for stone or cinder concrete, or hollow blocks of terra-cotta, concrete or gypsum, and not less than four inches for stone or cinder concrete if properly reinforced with steel, and such rooms shall have direct entrance from the street only, and shall be adequately vented direct to the outer air.]

## Rule 22. [34.] Systems Prohibited Where Grade B Fuel Oil Is Used.

The use of auxiliary tanks between pump and burner of the pressure type are prohibited. Systems, fed by

gravity between the storage tank and the pump, or force systems, are prohibited.

## Rule 23. [35.] Use of Grade A or Grade B Fuel Oil.

(a) No person, firm, company or corporation shall within the limits of the City of New York use any device or apparatus for burning Grade B fuel oil within the meaning of these rules unless such device or apparatus shall have been approved by the Board of Standards and Appeals.

(b) These Rules shall not apply to gas companies in the storage or use of fuel oil in the manufacture of illuminating gas for public use.

(c) Oils derived from or including petroleum that have a flash-point below a temperature of 135 degrees Fahrenheit, when tested in a Tagliabue or Pensky-Martens closed cup tester, shall not be used as a fuel to produce heat or light.

The use of oil stoves, oil heaters or oil lamps commonly used for household purposes which employ a wick to absorb such oil in its combustion shall not be prohibited; or shall the use of such oil be prohibited when used in a plumber's torch or similar apparatus.

(d) These Rules shall take effect immediately.

# RULES

## SMOKING IN FACTORIES.

Adopted by the Board of Standards and Appeals,  
August 13, 1918.

### Rule 1. PERMIT.

**Prohibition.** No person shall smoke, or carry a cigar or cigarette in any factory as defined in Section 1, Section 2, of the State Labor Law, nor in any part of a factory, within the City of New York, except in protected portions or special classes of occupancies as specified in Rule 2 of these rules, and then only after the issuance of a permit by the fire commissioner.

It shall be the joint and several duty of the owner and lessee or lessees of the building containing such factories to cause to be posted in each and every entrance hall, stairhall or room throughout the building, as well as in every elevator-car, in English, and also in such other language or languages as the fire commissioner shall require, a notice of such prohibition, and the penalty for its violation.

**Application.** Application for such permit shall be made only by the owner of the building on suitable forms to be furnished by the fire commissioner.

**Time Limit.** Such permit shall be for a definite period not exceeding one year, and shall not be renewed after expiration until a reinspection of the premises for which it is issued has been made for the purpose of determining whether existing conditions warrant a renewal.

**Conditions.** The permit shall state the conditions under which, the hours between which, and the place or places in such factory where smoking may be permitted, and the permit shall be framed and kept posted in a conspicuous place in the factory.

**Revocation.** Violation of any of the conditions stated in the permit, in addition to incurring such penalties as are prescribed by law, shall be full and sufficient cause for the revocation of such permit by the fire commissioner, and he shall not again issue a permit for the premises until at least one year has elapsed.

## RULE 2. PERMISSIBLE CASES.

Smoking may be permitted in:—

(a) Factories engaged in the manufacture of cigars, cigarettes, or smoking tobacco, when necessary for the efficient conduct of the business, provided that:

(1) No smoking other than that for sampling, testing and experimental purposes is carried on.

(2) Such smoking is conducted in a room provided especially for that purpose, separated from the rest of the building by fireproof or fire-resisting partitions, with all openings therein protected by self-closing fire doors, and, further, unless the building is of fireproof construction or equipped with an approved automatic sprinkler system, the floor and ceiling of such room shall be covered with fire-retarding material.

(3) Such chemical fire extinguishers as the fire commissioner may direct are installed.

(4) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

(b) Factories devoted entirely to one of the following occupancies:

Blacksmithing or horseshoeing;

Boiler making;

Brick, terra cotta or artificial stone works;

Forge shops;

Foundries;

Iron, steel, brass or copper works;

Machine shops;

Smelting;

Stone or monumental works;

provided that in any case:

(1) The building is not of wooden construction;

(2) Such chemical fire extinguishers as the fire commissioner may direct are installed; waste materials are deposited in fireproof receptacles.

(3) All waste paper and other inflammable waste materials are deposited in fireproof receptacles.

## WARNING.

Notice is hereby given to all petitioners, appellants and applicants for relief at the hands of the Board of Standards and Appeals, and to all lawyers, architects and engineers representing owners or lessees in proceedings before the board—

*First*, That if they do not appear in person or by representative at the hearing on their case, dismissal for lack of prosecution is likely to result.

*Second*, That due and ample notice of the date set for hearing is provided in the publication in this BULLETIN of the calendars of the board, each case being set down by Calendar Number and premises under the date of the hearing.

*Third*, That no plea of ignorance of the date of the hearing can be entertained in view of this publication and

of the posting of the calendars on the bulletin board of the board and of the further publication of calendars in the daily press.

*Fourth*, That no one is entitled to written notice date for the hearing in his case, and that the failure to receive such notice is no excuse for not appear.

*Fifth*, That the business of the board is to dispose of all cases promptly, for the reason that the pendency of an appeal or petition ties the hands of the administrative official in enforcing his order; therefore, no appeal or petition will be allowed to be hung up by reason of the appellant or petitioner to file necessary data by any other method of delay.

#### BOARD OF STANDARDS AND APPEALS

WILLIAM E. WALSH, Chairman

HENRY L. CONNELL

JAMES P. HOLLAND

JOHN GUILFOYLE

CHIEF JOHN KENLON

WILLIAM J. O'GORMAN, Secretary

EDWARD V. BARTON, Chief Clerk

—Municipal Building, Rooms 1001 to 1015.

PHONE—Worth 0184.

HOURS—9 a. m. to 5 p. m. Saturdays, 9 a. m. to  
noon.

Communications should be addressed to the chairman of  
the board.

### CONTENTS

Issue of the Bulletin contains, in the order given—

cket.

ll of Clerk's Calendar.

e Trial Calendar.

ices in Building Zone Cases.

utes of Regular Meeting, June 8, 1926, at 10  
a. m.

utes of Regular Meeting, June 8, 1926, at 2  
p. m.

rection.

es.

tice of Public Hearing.

gress Report.

### PUBLIC HEARINGS.

Tuesdays, at 10 a. m. and 2 p. m.  
Special meetings as published in this Bulletin.  
Call of Clerk's Calendar, Tuesdays, at 2 p. m.  
All hearings are held in Room 1013, Municipal Building,  
Manhattan.

### HOURS FOR CONSULTATION.

10 A. M. to 1 P. M.

Any person desiring to consult the chairman or the en-  
gineers, pertaining to the work of the board, will be seen  
only between the hours of ten in the morning and one in the  
afternoon—Saturdays excepted.

### CALL OF CLERK'S CALENDAR.

The Clerk's Calendar consists of applications under the  
Building Zone Resolution, and its object is to give inter-  
ested property owners opportunity to file objections, if any,  
and will be called in Room 1013, Tuesday, June 15, 1926,  
at 2 o'clock. At this call each case is set for hearing on  
a definite day.

The next subsequent Call of the Calendar will be on  
Tuesday, June 22, 1926, at 2 o'clock.

The Clerk's Calendar is not to be confused with the  
calendar of cases that have been definitely set for hearing  
on fixed days.

### NOTICE TO APPELLANTS AND PETITIONERS.

No appeal, application or petition will be entertained in  
connection with which court proceedings are pending or in  
progress, nor accepted that are not filed within twenty days  
from the date of the action of the Administrative Official.

Any communication purporting to be an appeal, applica-  
tion or petition shall be regarded as a mere notice of in-  
tention to seek relief until it is filed on the form required  
by the rules of this board.

Upon receipt of any such communication the writer will  
be supplied with the official forms for presenting his ap-  
peal, application or petition, and if he fails to supply the  
data required thereon, within twenty days, his case may be  
dismissed for lack of prosecution.

At the time of filing an application, the appellant or peti-  
tioner shall forward a signed notice of appeal addressed  
to the administrative official (either superintendent of build-  
ings or fire commissioner) and file with this board a dupli-  
cate of said notice.

Petitioners are advised that their plans must indicate the  
points of the compass so as to establish the true location and  
position of the property, the subject of the appeal.

Appeals, applications and petitions will be simplified and  
expedited by conforming to these directions.

WILLIAM E. WALSH, Chairman.

## CALL OF CLERK'S CALENDAR. TUESDAY, JUNE 15, 1926, AT 2 P. M. *Building Zone Cases.*

28-26-BZ.  
APPLICANT—Harry Hurwit, for Mano Realty  
owner.  
PREMISES—1311 Amsterdam avenue, Manhattan.  
APPLICATION, under section 21 of the building  
resolution,  
TO PERMIT the alteration and change of occupan  
a stable for more than five (5) horses to a  
for the storage of more than five (5) mot  
hicles.  
108-26-BZ.  
APPLICANT—Eugene De Rosa, for Emerdyke  
Corp., owner.  
PREMISES—4915-4923 Broadway, Manhattan.  
APPLICATION, under sections 7b and 21 of the b  
zone resolution,  
TO PERMIT the extension from a business distr  
a residence district of a proposed theatre b  
175-26-BZ.  
APPLICANT—Joseph Leone, for Edward H. Li  
owner.  
PREMISES—299-307 5th street, Brooklyn.  
APPLICATION, under sections 7e and 21 of the  
ing zone resolution,  
TO PERMIT in a business district the erection an  
tenance of a garage for the storage of mo  
five (5) motor vehicles.  
234-26-BZ.  
APPLICANT—John J. Gilmartin, for Brian G. Hug  
owner.

# CALENDAR

PREMISES—East side of Cedar avenue, 93 ft. 11 in. south of West 179th street, The Bronx.  
APPLICATION, under section 21 of the building zone resolution,  
PERMIT in a business district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles.

26-BZ.

APPLICANT—James W. Byrnes, for Max Kirsch, lessee.  
PREMISES—109 Blake avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
PERMIT in a business district the installation and maintenance of a gasoline service station.

25-BZ.

APPLICANT—John J. Dunnigan, for Marie Carberry, owner.  
PREMISES—West side Third avenue, 80.74 ft. south of East 182nd street, The Bronx.  
APPLICATION, under sections 7c and 21 of the building zone resolution,  
PERMIT in a business district extending from an unrestricted district the erection and maintenance of a garage for the storage of more than five (5) motor vehicles (previously before the board).

6-BZ.

APPLICANT—James W. Byrnes, for Mary G. Conboy, owner.  
PREMISES—405-413-423 44th street, Brooklyn.  
APPLICATION, under sections 7a and 21 of the building zone resolution,  
PERMIT partly in a residence district and partly in a business district the alteration, extension and change of occupancy of a stable for more than five (5) horses to a garage for the storage of more than five (5) motor vehicles.

2-BZ.

APPLICANT—Harry M. Sushan, for Katinka Petersen, owner.  
PREMISES—746 Fourth avenue, Brooklyn.  
APPLICATION, under section 21 of the building zone resolution,  
PERMIT in a business district the extension in height for an additional story of a one-story motor vehicle repair shop.

3-BZ.

APPLICANT—John J. Dunnigan, for John C. Gaffney, owner.  
PREMISES—3617 Bainbridge avenue, The Bronx.  
APPLICATION, under sections 7e and 21 of the building zone resolution,

## BOARD OF STANDARDS AND APPEALS

### REGULAR MEETING.

TUESDAY MORNING, JUNE 8, 1926.

Present: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon.

The minutes of the regular meeting of the board, held on Tuesday morning, June 1, 1926, and the minutes of the regular meeting of the board, held on Tuesday afternoon, June 1, 1926, were approved as printed in the Bulletin, No. 23, Vol. XI.

### APPEALS FROM ADMINISTRATIVE ORDERS.

1254-25-A.

APPELLANT—Standard Oil Company of New Jersey.  
SUBJECT—Appeal from decision of fire commissioner.  
PREMISES AFFECTED—Certificate of approval for combustible mixture, "Flit."  
APPEARANCES—

For Appellant: Joseph M. Lovelace.

ACTION OF BOARD—Laid over to July 27, 1926, at 10 a. m., on request of appellant's representative.

783-25-A.

APPELLANT—Solsieg Realty Corporation, owner.  
SUBJECT—Application for reopening—withdrawal—appeal from order of fire commissioner.  
PREMISES AFFECTED—654 Broadway, Manhattan.  
APPEARANCES—None.

ACTION OF BOARD—Chairman read request to reopen for purpose of withdrawing appeal; application for reopening granted; appeal withdrawn.

THE VOTE TO REOPEN AND WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Negative ..... 0

Absent: Chief Kenlon ..... 1

139-26-A.

APPELLANT—George E. Strehan, for R-W F Co., Inc., lessee.

SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—348 Fulton street, Brooklyn.  
APPEARANCES—None.

ACTION OF BOARD—Appeal withdrawn.

THE VOTE TO WITHDRAW—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative ..... 0

Absent: Chief Kenlon ..... 1

144-26-A.

APPELLANT—Charles Davis Co., Inc., lessee.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—1-5 Franklin avenue, Brooklyn.

APPEARANCES—

For Appellant: Cromwell Watson.

For Administration: Inspector Lynch department.

ACTION OF BOARD—Appeal granted on conditions—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.....

Negative ..... 0

Absent: Chief Kenlon ..... 1

### THE RESOLUTION:

(144-26-A)

WHEREAS, Charles Davis Co., Inc., for Robert owner, filed, February 19, 1926, an appeal from a decision of the fire commissioner, affecting premises Nos. 1-5 Franklin avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated January 29, 1926, reads (Order No. 1634-LC):

# MINUTES

"You are hereby notified that an inspection of the above premises used for the storage of rosin, etc., shows that the following must be done before the permit requested by you can be issued:

## FORTHWITH

"1. Provide an approved underground system for storage of volatile inflammable oil (alcohol).";

WHEREAS, the building is of frame construction, one story ft.) in height, 25 ft. by 75 ft. in area; OCCUPIED the manufacture of varnish, 4 persons; and

WHEREAS, the appellant contends that prior permits allowed him to keep 20 barrels of alcohol; that he does not more than four barrels of alcohol on the premises

any time; furthermore, that the order to provide an underground tank conflicts with the United States Internal revenue permit, which requires him to keep all alcohol in a vault subject to their inspection; and

WHEREAS, the records of the fire department disclose that its were issued from 1914 to 1919 for the storage of (10) barrels of alcohol, and from 1919 to 1925 for storage of twenty (20) barrels of alcohol; and

WHEREAS, there has been no apparent change in condition; and

WHEREAS, there are ample and sufficient exits as required

resolved, that the order of the fire commissioner be and hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be maintained not more than ten (10) barrels of alcohol on the premises, used for compounding of shellac and varnish mixtures, at any time; and that the present building shall be not increased in height, area or dimension.

215-26-A.

APPELLANT—Vitreous Enameling & Stamping Co., Inc., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—1381-1397 Sedgwick avenue, The Bronx.

APPEARANCES—

For Appellant: Daniel B. Zimmer.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative

Absent

THE RESOLUTION:

(149-26-A)

WHEREAS, Vitreous Enameling & Stamping Company, owner, filed, February 19, 1926, an appeal from an

of the fire commissioner, affecting premises 1381-Sedgwick avenue, Borough of The Bronx; and

WHEREAS, the order of the fire commissioner, dated February 2, 1926, No. 89918-LF, reads:

1. Install a standpipe system with riser 4 inches diameter tested to withstand a pressure of 300 lbs. square inch, extending from cellar to roof, with necessary check valves and 2½ in. regulation Fire department outlets on each story (including basements, cellars and roofs) placed within main stair-enclosure. Each outlet to be provided with sufficient feet of 2½ in. standard hose attached thereto.";

WHEREAS, the building is non-fireproof, one story and 19 ft.) in height, 172 ft. 6 in. by 95 ft. in area; OCCUPIED for the manufacture of enamel metals; base-painted sheet metal, 9 persons; 1st story, enameling 5 persons; and

WHEREAS, the appellant contends that there are many windows at front and rear of this one-story and basement building, rendering easy access; that adequate supply of fire extinguishers, pails, etc., are provided; fire hydrants are near by and the fire hazard is very slight.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that the building shall be not increased in height (one story above grade); that the use, operation and industrial process now employed on the premises shall be not changed; and that all permits required by the fire department otherwise shall be obtained within sixty days.

215-26-A.

APPELLANT—Starrett & Van Vleck, for 150 William Street Corporation, owner.

SUBJECT—Appeal from decision of superintendent of buildings.

PREMISES AFFECTED—150 William street, Manhattan.

APPEARANCES—

For Appellant: O. A. Johnson and William F. Deggan.

ACTION OF BOARD—Appeal granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon

Negative

Absent

THE RESOLUTION:

(215-26-A)

WHEREAS, Starrett & Van Vleck, for 150 William Street Corporation, owner, filed, March 13, 1926, an appeal from a decision of the superintendent of buildings, affecting premises 150 William street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, rendered March 4, 1926, reads:

"This amendment is disapproved with the following objections:

"9. Windows on Ann Street must be fire windows. Section 375.";

and

WHEREAS, the building is fireproof, 19 stories in height, 119 ft. 9 in. by 117 ft. 6 in. in area; OCCUPIED as an office building, about 155 persons on each story; and

WHEREAS, the appellant proposes to install plate glass windows on the Ann street front, set in steel frames and subdivided into small lights (about 368 sq. in.) by muntins which provide for a ¾ in. rabbet instead of 5/8 in. as required by the code; and

WHEREAS, the appellant contends that Ann street is 24 ft. in width; that the buildings causing the exposure are five to seven stories in height, owned by the appellant, who proposes to protect them with automatic sprinkler systems and ultimately replace these buildings with fireproof structures.

Resolved, that the decision of the superintendent of buildings be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that no portion of the building shall be used or maintained for manufacturing occupancy; that the sashes shall be constructed of pressed steel; that no single light of glass above 1st story shall exceed 368 sq. in.

1141-25-A.

APPELLANT—Crocker National Fire Prevention Engineering Co., for American Railway Express Co., owner.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—217-223 East 43rd street and 218-226 East 44th street, Manhattan.

# MINUTES

## APPEARANCES—

For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1141-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for American Railway Express Co., owner, filed, November 6, 1925, an appeal from an order of the fire commissioner, affecting premises Nos. 217-223 East 43rd street and Nos. 218-226 East 44th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated May 25, 1925, reads (Order No. 77464-F):

"1. Provide a separate and distinct system of Automatic Sprinklers throughout building having at least one source of water supply, arranged and equipped as provided in the rules for fire extinguishing appliances adopted by the Board of Standards and Appeals, May 4, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919.";

and

WHEREAS, the building, facing on two streets, is fireproof, 7 and also 11 stories in height, 125 ft. by 200 ft. (irregular) in area; OCCUPIED as a garage and repair shop for owner's delivery trucks; 1st to 10th story, average of 6 persons per story; 11th story, 33 persons; EQUIPPED with a standpipe system with one 9,900 gallon tank and two 5,000 gallon tanks and also two siamese connections on the 44th street front and one on the 43rd street front of the building; and

WHEREAS, appellant contends that no wooden auto body repairs are made on the premises; that there is on each story one 40 gallon chemical extinguisher on wheels; that there is installed a fire alarm signal system; that the premises are used continuously and that fire drills are regularly conducted; and

WHEREAS, the building is equipped throughout on each floor with central office fire headquarters connection, and all the fire protectives as required by the fire department are installed and maintained.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted on condition* that there shall be no gasoline storage of any nature or description above the 5th story; that the building shall be equipped throughout with approved standpipe system; and that the use and occupancy shall be restricted to the business of the owner and operator of the premises.

1073-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Shapiro Candy Manufacturing Co., lessee.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—11-13 Emerson place, Brooklyn.

## APPEARANCES—

For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5

Negative .....

## THE RESOLUTION:

(1073-25-A)

WHEREAS, Croker National Fire Prevention Engineering Co., for Shapiro Candy Manufacturing Company, lessee, filed, October 20, 1925, an appeal from an order of the fire commissioner, affecting premises 11-13 Emerson place, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated July 24, 1925, Order No. 82575-F, reads:

"1. Replace defective shutters with proper iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof on east side of building or other approved protection, as per Section 375, Article 18, Ch. 5, Code of Ordinances.

"3. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a direct line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at south side of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of Code of Ordinances.";

and

WHEREAS, the building is non-fireproof, four stories in height, 50 ft. by 129 ft. 6 in. in area; OCCUPIED on 1st, 2nd and 3rd stories as a candy factory, and on 4th story as a shoe factory, 97 persons above the 1st story; and

WHEREAS, there are three windows on the 3rd story and 7 windows on the 4th story within 50 ft. of the roof of a neighboring one-story corrugated iron shed to the south of the premises and also three windows in the east wall on each story above the 1st story within 30 ft. of the roof of a neighboring three-story dwelling to the south and also openings in the east wall on each story above the 1st story within 50 ft. of the roof of a one-story building to the northeast of the premises in question; and

WHEREAS, appellant contends that the one-story building forming the exposure to the south is used for the storage of iron and steel junk; that the windows within 50 ft. of the exposure to the southeast are now protected by shutters; that the building is equipped with a sprinkler system and proposes to provide iron shutters on those windows in the stair hall which overlook the one-story building and the corrugated iron shed at the south; and

WHEREAS, the board acting under a similar order, denying the northerly wall of said premises; and

WHEREAS, the building is equipped with an approved sprinkler system.

*Resolved*, that the order of the fire commissioner be and it hereby is *modified*, and the appeal as to Item 3 be and it hereby is *granted*, only so far as it affects openings on the course of stair or elevator shafts; and *on condition* that the present use and occupancy shall remain substantially unchanged; that the appeal as to Item 1 be and it hereby is *denied*.

1114-25-A.

APPELLANT—Croker National Fire Prevention Engineering Co., for Gilman Paper Co., Inc.

SUBJECT—Appeal from order of fire commissioner.

PREMISES AFFECTED—396-400 South Second Street, Brooklyn.

## APPEARANCES—

For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1114-25-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Gilman Paper Company, Inc., owner, filed, October 29, 1925, an appeal from an order of the fire commissioner, affecting premises 396-400 South 2nd street, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 14, 1925, No. 83466-F, reads:

"1. Provide a separate and distinct system of automatic sprinklers throughout the building having at least one source of water supply, arranged and equipped as provided in the Rules for fire extinguishing appliances adopted by the Board of Standards and Appeals May 24, 1917, as amended May 2, 1918, and January 21, 1919, effective February 17, 1919."

WHEREAS, the building is non-fireproof, five stories in height, "L" shape, having a frontage of 75 ft., a depth of 36 ft. and a width of 36 ft. 6 in. across the rear; there is also a one-story boiler room, 38 ft. 6 in. by 75 ft. in area at the westerly rear of the premises, subdivided into two sections on the 1st story and into two sections above the 1st story; and

WHEREAS, appellant contends that the building is equipped with a fire alarm signal system, provided with a national fire watchman's time service, visited hourly, and also with fire fighting appliances; and contends, further, that the board is not set up in box form, but is all stacked tightly, and set up by purchaser when the article to be contained therein is inserted.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* as a temporary variation on condition that the paper box occupancy and use on the premises shall be vacated and discontinued on or before October 31, 1926; that other protectives required by the fire commissioner shall be installed and maintained in the meantime.

431-25-A.  
APPELLANT—Croker National Fire Prevention Engineering Co., for Jacob Davidson, owner.  
SUBJECT—Appeal from order of fire commissioner.  
PREMISES AFFECTED—56 Myrtle avenue, Brooklyn.  
APPEARANCES—

For Appellant: Herman E. Horwood.  
For Administration: Inspector Maher of fire department.  
ACTION OF BOARD—Appeal granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—  
Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(1118-25-A)

WHEREAS, Croker National Fire Prevention Engineering Company, for Jacob Davidson, owner, filed, October 29, 1925, an appeal from an order of the fire commissioner, affecting premises No. 56 Myrtle avenue, Borough of Brooklyn; and

WHEREAS, the order of the fire commissioner, dated August 1, 1925, reads (Order No. 83833-F):

"1. Provide iron shutters at all openings in the exterior wall above 1st story which are distant in a di-

rect line less than 30 ft. from any opening in any other building and not in the same plane with said openings and which are not more than 50 ft. above a neighboring roof at rear side of building, or other approved protection, as per Sec. 375, Article 18, Chapter 5 of the Code of Ordinances."

and

WHEREAS, the building is non-fireproof, four stories (42 ft. 8 in.) in height, 22 ft. 6 in. by 77 ft. in area at 1st story and 22 ft. 6 in. by 66 ft. in area above. OCCUPIED: 1st story, store; 2nd story, vacant at present (to be occupied for light manufacturing); 3rd story, manufacture of shoe buckles, 5 persons; 4th story, manufacture of shoes, 8 persons; and

WHEREAS, there are four windows on each story above the 1st story within 50 ft. of the roof of a neighboring one-story extension at the rear and also one window on each story above the 1st story within 30 ft. of openings of a three-story building to the easterly rear; and

WHEREAS, appellant contends that the premises in question is but 2 ft. 8 in. above the 40 ft. limit of buildings requiring shutters and that the windows along the course of the rear fire escape are to be made fireproof and self-closing.

Resolved, that the order of the fire commissioner be and it hereby is *modified*, and the appeal be and it hereby is *granted* only so far as it affects the three small windows, vertically, in the westerly run on the rear of the building.

431-25-A.

APPELLANT—Lotos Oil & Distributing Corp., owner.  
SUBJECT—Application for reopening—modification—appeal from decision of fire commissioner.  
PREMISES AFFECTED—218-220th street and Harlem river, Manhattan.  
APPEARANCES—

For Appellant: Joseph F. McCarthy.  
ACTION OF BOARD—Appeal reopened and resolution corrected to read that earth fill above tank "shall be not less than 3 feet," to conform with report of committee.

CONDITIONS—As specified in resolution.  
THE VOTE TO REOPEN AND CORRECT RESOLUTION—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4  
Negative ..... 0  
Absent: Chief Kenlon ..... 1

## THE RESOLUTION:

(431-25-A)

WHEREAS, O'Connor & Bain, for Lotos Oil & Distributing Corp., owner, filed, April 21, 1925, an appeal with the board of appeals, from an order of the fire commissioner, affecting premises 218th to 220th street and Harlem River, Manhattan; and

WHEREAS, the order of the fire commissioner, dated April 17, 1925, reads:

"5. All storage tanks comprising or forming a part of an oil storage plant shall be buried so that the tops thereof shall be at least two feet below the grade level."

and

WHEREAS, the premises consist of a plot of ground, lying between Ninth avenue and Harlem river, 320 ft. by 110 ft. in area, upon which is located the oil storage and distributing plant of the Lotos Oil Distributing Corp., consisting of an office, a pump house and also twelve (12) 31,500 gallon storage tanks, each 11 ft. in diameter and 44 ft. long, used for the storage of gasoline; the tanks being located in a concrete enclosure of sufficient area and height to accommodate the liquid capacity of said tanks; the tops of tanks are located approximately 6 ft. above ground level; and

# MINUTES

WHEREAS, appellant contends that, due to the nature of the soil and the height of the water table, it would be a hardship to comply with the order of the fire commissioner.

Cal. No. 421-25-A.

June 8th, 1925.

PREMISES, 218th to 220th Street & Harlem River, Manhattan.

## REPORT OF COMMITTEE:

A committee of the Board consisting of Chairman Walsh, Fire Chief Kenlon, Messrs. Holland and Connell visited the above premises on June 8th, 1925.

The appeal is before the Board on an order of the Fire Commissioner requiring the burial of oil storage tanks. The appellant seeks relief from the entire burial of the tanks for the reasons that the ground is on the banks of the Harlem River and if compelled to bury same they would be below tide level. The property is now occupied with temporary wooden shacks and one story frame structures set on discarded scows.

The entire west side of 9th Avenue (north of the 3rd Avenue car barns on 217th Street) is vacant, so there is no improvement that would be in any way impaired or adversely affected by any means of hazard.

The plans before us on this appeal, propose the installation of twelve steel tanks, installed horizontally; the natural grade is approximately six feet above tide water.

The committee recommends that the proposed installation be separated into batteries of not more than three tanks to each battery and that the tanks be set approximately half-way (diameter) below grade and that the enclosure walls shall be built of reinforced concrete, carried to the top of the tanks, and all enclosures and tanks to be filled and covered over with earth; the fill to extend not less than three feet above the top of the tanks, and that a reinforced concrete wall shall be erected outside the tank installation enclosure; these outside enclosure walls to be not less than 10 ft. high, the earth fill to be sloped from the top to the inside of the exterior enclosure walls at bottom; the tanks so installed to be equipped in accordance with the rules of the Fire Department and the ordinances in all other respects; a yard hydrant with anti-freezing valves and siamese connection to be provided at the end of the dock, connected to and supplied from approved pumps hooked up to the city water mains, and that a revolving water line nozzle shall be provided, one to each battery enclosure of three (3) tanks, and that an approved liquid fire-fighting medium shall be provided and maintained operative from an independent pump house, the pump house to be isolated from the tank enclosure and to be constructed fireproof. It is further recommended that the sub-dividing wall between each battery of tanks shall be carried up at least 6 ft. above the top of the earth fill of the tanks, the ends of these walls to be returned on a rack of 45 degrees at opposite ends, and that a return of the drawings shall be made to this Board for approval, in compliance with the foregoing report.

(Signed) WILLIAM E. WALSH,  
JOHN KENLON,  
HENRY L. CONNELL,  
JAMES P. HOLLAND.

and

WHEREAS, this appeal was granted by the board at its meetings June 9, 1925, November 24, 1925, January 26, 1926, and May 25, 1926, on certain conditions, and appellant requested a modification of these conditions; and

WHEREAS, plans were filed and approved by the board July 28, 1925, and appellant now requests a further modification of the resolution and of the plans.

Resolved, that the order of the fire commissioner be and it hereby is modified, and the appeal be and it hereby is granted on condition that the equipment shall be installed in accordance with the recommendations of the report

of the committee of inspection, except that the siamese connection at end of dock and the revolving water line nozzle to the battery enclosure can be omitted and the entire premises be enclosed in a wall of reinforced concrete approved masonry, the exterior of front wall facing street to be finished with face brick; the plans to approved permitting a bypass on the suction and discharge lines of tanks Nos. 1 and 12; and permitting the concrete walls separating the batteries of tanks to be not less than 6 ft. in height above the top of tanks, and the earth fill above the top of the tank shall be not less than 3 ft. in depth at any point. The necessary permit required by law to be obtained and work executed to completion without suspension or unnecessary delay.

## BUILDING ZONE CASES.

285-26-BZ.

APPLICANT—Abraham H. Schwartz, for Homestead Construction Corp., owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit in a residence district extending from a business district the erection and maintenance of a building for store and other purposes.

PREMISES AFFECTED—12 to 24 East Roosevelt avenue, Corona, Borough of Queens.

APPEARANCES—

For Applicant: A. A. Hovell and Frank Bellucci.

For Opposition: None.

ACTION OF BOARD—Laid over to June 15, 1925, 2 p. m., pending inspection by Commissioner Guilfoyle (other members having previously inspected); no further argument.

1304-25-BZ.

APPLICANT—William F. Doyle, for Samuel Berman, owner.

SUBJECT—Application (re: decision of superintendent of buildings), under section 21 of the building zone resolution, to permit the conversion of occupancy from a warehouse and garage for five (5) motor vehicles to a garage for the storage of more than five (5) motor vehicles.

PREMISES AFFECTED—2447-2449 Coney Island avenue, Brooklyn.

APPEARANCES—

For Applicant: William F. Doyle.

For Opposition: M. Kalmanor, Mrs. Jessie Sattler and Mr. Sattler.

ACTION OF BOARD—Application granted on condition.

CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle.

Negative .....

Absent: Chief Kenlon .....

## THE RESOLUTION:

(1304-25-BZ)

WHEREAS, William F. Doyle, for Samuel Berman, filed, December 16, 1925, an application, under the building zone resolution, to permit partly in a business district partly in a residence district the conversion of occupancy from a warehouse and garage for five (5) motor vehicles to a garage for the storage of more than five motor vehicles; premises 2447-2449 Coney Island avenue, Brooklyn; and

WHEREAS, a public hearing was held on this appeal by the board of standards and appeals, at its regular meeting, June 8, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals;

# MINUTES

WHEREAS, the use district maps accompanying the building zone resolution show that Coney Island avenue is in a business district; that Avenue U is in a business district, and that East 12th street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered April 16, 1926, reads:

"Proposition contrary to the Zone Resolution, Art. 2, Sec. 4 a 15.

"The conversion of a warehouse and a garage for five cars into a garage for the storage of more than five motor vehicles in a business district.";

WHEREAS, the existing building is of non-fireproof construction, one story in height, with a frontage of 40 ft. 3/4 in. and a depth of 108 ft. and 110 ft., irregular; to be occupied as a garage for the storage of more than five motor vehicles; and

WHEREAS, the board deemed that applicant was entitled to temporary relief on the ground of practical difficulties and unnecessary hardship, under section 21 of the building zone resolution.

*Resolved*, that the board of standards and appeals does hereby *make a variation* in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is *granted* for a temporary period of two years for the storage and use of automobiles of the coach or pleasure car type, the property of owner, lessee or operator of the premises, *on condition* that the building shall be restricted to one story in height above grade; that the rear and gable walls shall be unpierced throughout their full height and length; that there shall be no sign erected other than the name and title of the business conducted on the premises; that no gasoline storage shall be maintained in excess of one tank not exceeding 550 gallons, located at the front of the building on the inside of the street wall, for the use and accommodation of the operator of the premises only; that all permits required, shall be obtained within ten days and the work completed within ninety days.

134-26-BZ.

APPLICANT—Israel Spielberg, for May Firetag, owner.

SUBJECT—Application (re: decision of fire commissioner), under section 21 of the building zone resolution, to permit in a business district the erection and maintenance of a gasoline service station.

use for temporary period of two years from December 11th, 1923, having expired.”;

and

WHEREAS, the existing building is of frame construction, three stories in height, with a frontage of 23 ft. and a depth of 57 ft.; to be occupied as a tailor shop and dwellings; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decision of the superintendent of buildings be and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

1135-25-BZ.

APPLICANT—William H. Kehoe, for Louis Edelstein, owner.

SUBJECT—Application (re: decision of health commissioner), under section 21 of the building zone resolution, to permit in a residence district the maintenance of a milk depot and also a garage for the storage of one (1) commercial motor vehicle.

PREMISES AFFECTED—541 Snediker avenue, Brooklyn.

APPEARANCES—

For Applicant: Barney Guntmacher.

For Opposition: Eugene Schwartz.

ACTION OF BOARD—Application denied.

THE VOTE TO GRANT—

Affirmative ..... 0

Negative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle..... 4

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(1135-25-BZ)

WHEREAS, William H. Kehoe, for Louis Edelstein, owner, filed, November 5, 1925, an application, under the building zone resolution, to permit in a residence district the maintenance of a milk depot and also a garage for the storage of one commercial vehicle; premises 541 Snediker avenue, Borough of Brooklyn; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 8, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Snediker avenue is in a residence district; that Riverdale avenue is in a business district, and that New Lots avenue is in a business district; and

WHEREAS, the decision of the health commissioner, rendered October 19, 1925, reads:

“Application for permit to sell milk and milk products at 541 Snediker Avenue, Brooklyn, made by you on ..... is being forwarded to the Board of Health with a recommendation that permit be denied. This is being done because of the fact that premises to be used as a depot is within a restricted district as designated in ‘Use District Map.’ The business of conducting a dairy or bottling establishment within a restricted district is prohibited by the Zoning Law.”;

and the decision of the superintendent of buildings, rendered February 25, 1926, reads:

“In reply to your communication of Feb. 19th with reference to premises 541 Snediker Ave., you are advised that a certificate in this matter cannot issue because the \* \* \* premises which are in a residential district cannot be used for the housing of a commercial car.”;

and

WHEREAS, the premises consist of a plot of ground, 25 ft. by 100 ft. in area, on the front portion of which is

located a non-fireproof two-story dwelling and on the rear of the lot is located a one-story garage, 25 ft. by 28 ft. area; in this garage it is proposed to store 10 cans of milk or cream and also a commercial automobile; and

WHEREAS, the board deemed that applicant was not entitled to relief under section 21 of the building zone resolution on the ground of practical difficulties and unnecessary hardship.

Resolved, that the decision of the health commissioner and it hereby is *affirmed*, and that the application be and it hereby is *denied*.

Negative ..... 0

Absent: Chief Kenlon ..... 1

THE RESOLUTION:

(669-23-BZ)

WHEREAS, Leslie & Martin, for Jamaica Water Supply Company, owner, filed, May 31, 1923, an application, under the building zone resolution, to permit in a residence district the erection and maintenance of a water pumping station; premises 118-50 128th street, Richmond Hill, Borough of Queens; and

WHEREAS, this application was granted by the board at its meeting July 17, 1923, and applicant requested a re-opening of the case in order to increase the size of the structure proposed; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, June 8, 1926, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that 128th street, Cedric road and 127th street are all in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered May 5, 1926, reads:

"1. Amendment disapproved as the resolution of the Board of Appeals (669-23-BZ) permits the erection of but one structure 24 ft. by 24 ft. 8 in.—not further considered.";

WHEREAS, the proposed building is of non-fireproof construction, one story in height, with a frontage of 51 ft. and a depth of 24 ft. 8 in.; to be occupied as a water pumping station; and

WHEREAS, the board deemed that applicant was entitled to relief under section 21 on the ground of practical difficulties and unnecessary hardship.

Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that the building shall not exceed a one-story structure in height, located approximately in the centre of block 70, lot 2551, Borough of Queens, for the use and occupancy of a pump-house in conjunction with the local public water service supply; that all permits required shall be obtained within sixty days and the work completed within sixty days.

THE RESOLUTION:

(863-25-BZ)

WHEREAS, Francis L. Archer, for Empire Investors Corporation, owner, filed, August 26, 1925, an application, under the building zone resolution, to permit in a residence district, extending from a business district, the erection and maintenance of a business building; premises 660 Fifth avenue, Manhattan; and

WHEREAS, a public hearing was held on this application by the board of standards and appeals, at its regular meeting, October 13, 1925, after due notice by publication in the Bulletin of the Board of Standards and Appeals; and

WHEREAS, the use district maps accompanying the building zone resolution show that Fifth avenue is in a business district; that West 52nd street is in a residence district and that West 53rd street is in a residence district; and

WHEREAS, the decision of the superintendent of buildings, rendered August 14, 1925, reads:

"1. Business use encroaches upon residence district contrary to the provisions of Section 3 of the Building Zone Resolution.";

and

WHEREAS, the proposed building is to be of fireproof construction, 30 stories in height, with a frontage of 100 ft. and a depth of 160 ft. and 167 ft., irregular; to be occupied as a business building; and

WHEREAS, the board deemed that the granting of this application under safeguarding and restrictive conditions for the protection of other affected property was a reasonable application of the provisions of section 7-c of the building zone resolution; and

WHEREAS, this application was granted by the board at its meeting October 13, 1925, with the following resolution:

"Resolved, that the board of standards and appeals does hereby make a variation in the application of the use district regulations of the building zone resolution, and that the application be and it hereby is granted on condition that a side court of not less than 8 ft. in width shall be provided at the extreme westerly end of the plot for its entire depth; that the business use throughout the building, other than the 1st and basement stories, shall be restricted exclusively to the conduct, operation and use of executive offices, with no manufacturing use or occupancy in any part or portion of the building; that the 1st story, and the cellar incidental to the use of the 1st story, shall be restricted to the conduct and operation of stores of a retail mercantile character or to the conduct and operation of a banking business authorized by the state or federal laws; that there shall be no service exit or entrance for commercial operation within the residence use area of these premises on 52nd street front beyond 125 ft. of the Fifth avenue frontage; that there shall be no show windows, business or commercial display within the residence use area of the premises; that any windows below the roof level of the adjoining premises to the west, in the westerly gable wall, shall be glazed with translucent glass; that there shall be no signs or advertising display on or in any window or on any portion of the rear and westerly gable walls, and no wall signs or advertising of any description; that there shall be no signs or advertising display on the 52nd street front of the building within the residence use

# MINUTES

area; that the requirements of the building zone resolution shall be complied with in all other respects; that all permits necessary for the prosecution of the work shall be obtained within nine months and the work of building carried to completion without unnecessary interruption or delay.”;

and

WHEREAS, the applicant requested a reopening of the case and a rescindment of the resolution.

*Resolved*, that the resolution adopted October 23, 1925, be and it hereby is *rescinded*.

Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(880-25-S)

WHEREAS, Abraham Jacobs, for J. Heit, owner, filed, August 28, 1925, a petition for variation from the requirements of the labor law, as cited in an order of the fire commissioner, affecting premises 254-258 West 35th street, Borough of Manhattan; and

WHEREAS, the order of the fire commissioner, dated July 25, reads (Order No. 81972-LD):

"1. Remove all partitions not built of incombustible material as per Sections 263 and 270 of the Labor Law."

WHEREAS, the building is fireproof, 16 stories in height, and covers an area of 100 ft. in area; OCCUPIED, manufacturing

clothing, about 22 persons on each story; EQUIPPED with a sprinkler system. EXITS: Two interior fireproof stairways, extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner, who occupies the 12th story, claims that his loft is divided into four parts by wood partitions, 7 ft. in height, the top of which are at least 18 in. below the sprinkler heads; he further contends that there partitions involved a large sum of money and would cause a considerable loss to him if compelled to comply strictly with the letter of the law.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 ft. below sprinkler line; that exit door not less than 36 ft. wide shall be provided in said partition, leading direct from workroom and opening out to exit hall; that an exit sign at least 8 in. in height shall be erected and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partitions subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.

739-25-S.

PETITIONER—Edward P. Doyle, for Frank Dobson, owner.

SUBJECT—Variation of labor law as cited in orders of fire commissioner.

PREMISES AFFECTED—319-321 East 53rd street, Manhattan.

## APPEARANCES—

For Petitioner: Edward P. Doyle.  
For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

## THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

## THE RESOLUTION:

(739-25-S)

WHEREAS, Edward P. Doyle, for Frank Dobson, owner, filed, July 15, 1925, a petition for variation from the requirements of the labor law, as cited in orders of the fire commissioner, affecting premises No. 319-21 East 53rd street, Borough of Manhattan; and

WHEREAS, the orders of the fire commissioner, dated June 4, 1925, read:

(Order No. 85745-LD)

"1. Enclose the interior stairway at the west side of building serving as a required means of exit and the landings, platforms, and passageways connecting therewith on all sides with partitions of fire resisting material extending continuously from the cellar to the underside of the roof within the stair enclosure shall be covered with fire resisting material constructed as per Section 271 of the Labor Law and Rule 1 of the

# MINUTES

Board of Standards and Appeals revised and adopted July 29th, 1924, or carry out a proper alternative method of complying with Section 271 of the Labor Law."

(Order No. 79155-LD)

"1. Enclose the interior stairway at the west side of the building serving as a required means of exit on 1st story with partitions of fire resisting material from floor to the underside of the 2nd story, including any exposed stair soffits, landings and passageways; openings shall be provided with approved self-closing fire doors as per Rule 2, Board of Standards and Appeals, adopted July 29, 1924."

(Order No. 79157-LD)

"1. Arrange the doors leading to the stairway on all stories upon which five or more persons are employed, so as to open outwardly without obstructing the stairway, as per Section 271 of the Labor Law."

(Order No. 79158-LF)

"1. Install an adequate interior electric fire alarm system in accordance with the Rules of Board of Standards and Appeals and the enclosed approved layout."

(Order No. 79159-LF)

"An inspection of the premises 319-321 East 53rd Street, Borough of Manhattan, shows that a fire drill should be established and maintained therein according to the requirements of Section 279 of the Labor Law. Etc., etc., etc.";

and

WHEREAS, the building is non-fireproof, five stories in height, 40 ft. 3½ in. by 96 ft. in area. OCCUPIED: 1st story, office, drafting, 10 persons; 2nd story, upholstering, drafting, 11 persons; 3rd story, cabinet work, 7 persons; 4th story, cabinet work, 8 persons; 5th story, furniture repairing, 10 persons. EXITS: An interior wooden stairway, extending from the 1st story to top story, enclosed in wooden partitions with no doors at openings; an open wooden stairs from top story to roof scuttle; a fire escape on the front of the building, having fireproof openings along the course thereof, extending from top story to the 2nd story, and counterbalanced stairs to sidewalk; ROOFS of adjoining buildings 25 ft. lower at east, 35 ft. lower at west; and

WHEREAS, the petitioner proposes to comply with orders No. 79155-LD and No. 79157-LD, requiring the enclosure of stairs at 1st story, and arranging doors leading to stairway, so as to open outwardly; the petitioner contends that the occupancy and area of the building are small; that the entire building is occupied by one concern, and the exits are adequate.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to Orders Nos. 79158 and 79159, on condition that the stipulations as adopted in Cal. No. 733-25-A, affecting same premises, shall be complied with; the petition, as to Orders Nos. 85745, 79155 and 79157, be and it hereby is denied.

1214-25-S.

PETITIONER—Julius Eckmann, for Hermine Milch, owner.

SUBJECT—Variation of labor law as cited in decision and order of fire commissioner and decision of superintendent of buildings.

PREMISES AFFECTED—228-238 East 44th street, Manhattan.

APPEARANCES—

For Petitioner: Julius Eckmann.

For Administration: Inspector Maher of fire department.

ACTION OF BOARD—Petition granted on condition.

## THE RESOLUTION:

(1214-25-S)

WHEREAS, Julius Eckmann, for Hermine Milch, owner, filed, November 23, 1925, a petition for variation from the requirements of the labor law, as cited in a decision and an order of the fire commissioner, affecting premises No. 228-238 East 44th street, Borough of Manhattan; and

WHEREAS, the decision of the fire commissioner, dated November 7, 1925, reads:

"This will answer your request to accept as an alternative for violation 70298-LD to install a horizontal exit on 4th story and the holding in abeyance of said violation until May 1st, 1926.

"We must advise you that the Fire Commissioner is without authority to vary from the requirements of the Labor Law in any particular or hold the same in abeyance.

"The installation of such horizontal exit on 4th story would in no way be a compliance of violation 70298-LD and would not meet with the requirements of the Labor Law.";

and the order of the fire commissioner, dated November 9, 1925, reads (Order No. 70298-LD):

"1. Provide an outside iron balcony fire escape on the rear side of building 236-238 East 44th Street, with balconies 4 ft. in width, connected by stairways not less than 22 in. wide placed at an incline of not more than 45 degrees, extending from ground to roof, constructed as per Section 273 of the Labor Law and the rules of the Board of Standards and Appeals, \* \* \*";

and the decision of the superintendent of buildings, in acting on request for certificate of occupancy for No. 234 East 44th street, reads:

"1. Doors to easterly stairway must be self-closing.";

in acting on request for certificate of occupancy for No. 238 East 44th street, reads:

"1. Provide a second means of egress from the 3rd and 4th floors as per Section 271, Labor Law.

"2. Doors along main interior stairway must be self-closing.";

and

WHEREAS, the building is non-fireproof, five stories in height, irregular in area, having a frontage of 130 ft. and a depth of 100 ft. and a width at rear of 40 ft.; separated into two sections by a fore and aft wall with openings therein (protected with fire doors) on the 2nd, 3rd, 4th and 5th stories, there being an additional horizontal exit on the 5th story; there being a one-story extension at the westerly rear, occupied as salesrooms, storage and factory with a total of 57 persons above the 1st story at present; EQUIPPED with a two source sprinkler system. EXITS: Two interior fireproof stairways (the front east stairway extending from the 1st story to roof and the front west stairway extending from the 1st to 5th story), enclosed with fireproof partitions, with fire doors at openings; and

WHEREAS, petitioner contends that the order was issued owing to manufacturing being done on the 4th and 5th stories of the premises, and contends, further, that the fire department on the 4th story is provided with a horizontal exit, and on the 5th story of the 4th story proposes to provide a 3 ft. wide iron balcony which will connect the two sections of the building.

Resolved, that the board of standards and appeals hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, as to fire department Order No. 70298, Item 1, on condition that an iron party wall balcony be provided in the rear of structure at the intersection of the two wings, rear on the 2nd, 3rd and 4th stories, with fireproof partition doors and steps to sills from each section, and all windows and openings on the course of the balcony shall be fireproof, self-closing; and, as to Item 1

# MINUTES

superintendent of buildings' decision affecting No. 236-238, in the same conditions; and *denied* as to decision of superintendent of buildings in all other respects.

234-25-S.

PETITIONER—Henora Building Corp., owner.  
SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.  
PREMISES AFFECTED—2082 Third avenue, Manhattan.

APPEARANCES—

For Petitioner: Samuel Rosenblum.  
ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

Affirmative: Chairman Walsh, Commissioners Connell, Holland and Guilfoyle and Chief Kenlon ..... 5  
Negative ..... 0  
Absent ..... 0

THE RESOLUTION:

(1234-25-S)

WHEREAS, Samuel Rosenblum, substituted for Henora Building Corp., for Henora Building Corp., owner, filed, December 2, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises No. 2082 Third avenue, Borough of Manhattan; and  
WHEREAS, the decision of the superintendent of buildings, dated March 19, 1926, reads:

"Relative to your application of February 24th, 1926, for a Certificate of Occupancy for the above premises, you are advised before a Certificate of Occupancy can be issued as per your application, it will be necessary to provide two interior stairway or one interior enclosed stairway and one exterior screened stairs, but no fire escape.

"This building has one enclosed interior stairway and a Labor Law fire escape with fireproof windows and casement doors.

"Fire escape cannot be accepted as complying with the Labor Law as the building was erected since the year 1913."

WHEREAS, the building is non-fireproof, three stories in height, 25 ft. by 100 ft. in area. OCCUPIED: 1st story, factory, 40 persons; 2nd story, factory, 14 persons. EXITS: An interior fireproof stairway, extending from the 1st story to roof; enclosed in fireproof partitions with fireproof doors at openings; a 45 degree fire escape on the front of the building, having fireproof opening along the course thereof, extending from the 3rd story to the 2nd story balcony with counter-balanced stair case; ROOFS of adjoining buildings to south 10 ft. higher; and

WHEREAS, petitioner requests, in view of the small area of building and the limited occupancy, that the existing fire escape be accepted as a secondary means of egress.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that a regulation labor law fire escape shall be provided on the 114th street front of the building, third window from the Third avenue elevation, in addition to the primary interior exit as required.

5-S.

PETITIONER—Philip Freshman, for Bragio Ruffino, owner.

SUBJECT—Variation of labor law as cited in decision of health commissioner.

PREMISES AFFECTED—449 Union Street, Brooklyn.

APPEARANCES—

For Petitioner: James W. Byrnes.  
ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

THE RESOLUTION:

(1190-25-S)

WHEREAS, Philip Freshman, for Bragio Ruffino, owner, filed, November 16, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the department of health, affecting premises No. 449 Union street, Borough of Brooklyn; and

WHEREAS, the decision of the department of health, dated August 19, 1925, reads:

"At a meeting of the Board of Health of the Department of Health of the City of New York, held Aug. 19, 1925, your application for a sanitary certificate for a cellar bakery at No. 449 Union Street, in the Borough of Brooklyn, was denied."

and

WHEREAS, the building is non-fireproof, two stories in height, 18 ft. by 28 ft. in area. OCCUPIED: Cellar, bakery; 1st and 2nd stories, one private family; the cellar bakery is 10 ft. 2 in. in height from floor to ceiling, the ceiling of bakery is 1 ft. 4 in. above curb level, the floor of bakery is 4 ft. below yard level, the bakery is ventilated by 3 windows to yard, each 2 ft. 8 in. by 2 ft. 2 in. in size; and

WHEREAS, the petitioner proposes to paint the side walls of bakery and provide a movable transom over the entrance door; the petitioner further contends that the cellar bakery has been in use during the past 10 years, and has filed three affidavits to that effect.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted on condition that the bakery shall not be increased in area and shall be ventilated with not less than three windows, 2 ft. 8 in. by 2 ft. 2 in., at the ceiling in the rear, and at the front by a movable transom sash; and that all permits otherwise required shall be obtained.

1307-25-S.

PETITIONER—Samuel Cohen, for Dorcoe Realty Co., Inc., owner.

SUBJECT—Variation of labor law as cited in decision of superintendent of buildings.

PREMISES AFFECTED—222-224 West 37th street, Manhattan.

APPEARANCES—

For Petitioner: Samuel Pelton.  
ACTION OF BOARD—Petition granted on condition.  
CONDITIONS—As specified in resolution.

THE VOTE—

THE RESOLUTION:

(1307-25-S)

WHEREAS, Samuel Cohen, for Dorcoe Realty Co., Inc., owner, filed, December 17, 1925, a petition for variation from the requirements of the labor law, as cited in a decision of the superintendent of buildings, affecting premises Nos. 222-4 West 37th street, Borough of Manhattan; and

WHEREAS, the decision of the superintendent of buildings, dated December 16, 1925, reads (B. N. 2497-1925):

"Your Building Notice of December 12th, 1925, referring to premises 222-4 West 37th St., has been received. The proposed work is Disapproved.

"Wood partitions not permitted in F. P. building. Sec. 270, L. L.";

and

# MINUTES

WHEREAS, the building is fireproof, 14 stories in height, 37 ft. 6 in. by 98 ft. 9 in. in area at 1st story. OCCUPIED: 1st story, stores; upper stories, tenant factory, 50 persons on each story; EQUIPPED with a sprinkler system and a fire alarm signal system. EXITS: An interior fireproof stairway and a fire tower extending from the 1st story to roof, enclosed in fireproof partitions with fireproof doors at openings; and

WHEREAS, the petitioner proposes to remove all wood partitions except those enclosing offices and showrooms; the petitioner contends that in a prior case the board permitted non-fireproof partitions to remain on the 3rd, 6th, 8th and 9th floors; the petitioner now requests a similar resolution for all floors.

Resolved, that the board of standards and appeals does hereby make a variation from the requirements of the labor law, and that the petition be and it hereby is granted, only so far as it affects the partitions around showrooms, office and entrance hall to office and showrooms, on condition that the upper portion of said partitions shall be glazed with thin glass not less than 18 in. below sprinkler line; that exit door not less than 36 in. wide shall be provided in said partition, leading direct from workroom and opening out to exit hall; that an exit sign at least 8 in. in height shall be erected, and a red light placed over such door, in addition to other means of exit; that on any floor occupied by more than one tenant the subdividing partitions shall be arranged so as to allow independent egress to all required means of exit for each tenant; that the partitions subdividing one tenant from another shall extend from the floor to the ceiling; and where partition prevents the effective discharge of water from sprinkler heads, additional heads shall be provided to cover entire floor area, to maintain sprinkler throughout entire premises; that all interior partitions, excepting showroom, office and entrance hall partitions, shall be constructed of incombustible material, as specified under subdivisions A to H of section 355 of the building code, or any approved fireproof partition; and that the occupancy and use shall remain substantially unchanged.
